Subject: Solar power plan

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

I would like to express concern with PSC focus on solar power and the lack of focus on gas power generation. Part time solar power (about 5 hours per day) is 5-6 times more costly than reliable gas power. Pushing such high costs on the rate payers is the wrong policy and is a waste of residents money. Affordable power is the supposed goal of PSC, solar power is not affordable. It's robbing citizens of their money. I urge you to switch focus to reliable and continuous power generation utilizing fuels such as natural gas. Florida rate payers should not see 40-50 % rate increases every 1-2 years.

Regards,
Janos Nagy
