FPL is focused on supporting China's solar panel industry for the next ten years. Why? Production of energy is more expensive. It requires acres of land with other better uses. It will retard the states energy production. Already new industries like AI cannot move to Florida due to bad energy planning.

We do not need to please a corrupt and losing Washington DC policy, trying to fulfill Joe Biden's plan for the future, when it seems certain he can't screw in a lightbulb.

Please use all your influence to send FPL packing to redo their faulty plan. That plan only maximizes pass thru rate increase assuring executive bonuses and stock value. If you have the time, supporting evidence is provided here in an excellent presentation by David Walsh;
