Dear Madam/Sir,

I am attaching a letter of support for FPL's services, justifying a proposed rate increase.

I appreciate your consideration.

Sincerely,

Johannes Vieweg, MD

**Subject:** Letter of Support for FPL's Proposed Rate Increase

Dear Commissioners,

As a long-time customer of Florida Power & Light (FPL), I am writing to express my support for the proposed rate increase currently under consideration. I understand that any adjustment to utility rates is a matter of public interest and scrutiny; however, as a resident who has directly benefited from FPL's consistent investments in infrastructure, reliability, and storm preparedness, I believe this proposal deserves thoughtful consideration and approval.

Over the past several years, I have seen firsthand the improvements FPL has made to ensure a more reliable and resilient electric grid. Power outages in my area have become increasingly rare and, when they do occur, are restored faster than ever before. FPL's proactive approach—such as hardening power lines, installing smart grid technology, and trimming vegetation near lines—has made a significant difference in both daily service and storm response times.

Additionally, I appreciate FPL's commitment to clean energy and forward-looking solutions, such as solar investments and modernization of power plants to reduce emissions and fuel costs. These are not only environmentally responsible decisions but also contribute to long-term efficiency and affordability.

While no one welcomes higher bills, the proposed increase is a reasonable step to maintain and advance the level of service Floridians have come to expect. Reliable electricity is critical for households, businesses, schools, and health facilities. By supporting this rate adjustment, we are investing in a future where disruptions are fewer, energy is cleaner, and infrastructure is better prepared to withstand Florida's extreme weather.

Thank you for considering my perspective. I trust that the Commission will decide on the best interest of all customers and the continued reliability of our electric service.

Sincerely,

**Johannes Vieweg, MD**
