**Subject:** RE: Please Reject PSC Docket 2025-0011 Solar

Good Morning

We will be placing your comments below in consumer correspondence in Docket No. 20250011, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you,  
Nick Holmes  
Commission Deputy Clerk II  
Office of Commission Clerk  
Florida Public Service Commission  
850-413-6770

*PLEASE NOTE: Florida has a very broad public records law. Most written communications to or from state officials regarding state business are considered to be public records and will be made available to the public and the media upon request. Therefore, your email message may be subject to public disclosure.*

Hello Esteemed Leadership Team!

I moved to Florida to escape crazy policies in Maryland. From what I've read it seems the Green-Solar Scam is coming to Florida.

- It looks to me that solar and battery backup are being installed in Florida today and our Utilities want us to pay more for it. Solar is fine for those who want to have it as a home backup, but large scale installations in Australia, Germany, California (another country right?) have cost much more and delivered less power than modern Gas Fired turbines. Stand-by base load is also reduced when solar replaces reliable coal powered plants.
- The solar panels come from China. They are not secure and are a risk I don't see as worth taking.
- The space required for solar cells and battery backup stations is much more than that required for Gas turbine installations.
- Please stop the scam and direct our utility dollars to reliable Gas and Clean Coal.

Thank you,  
Thomas Flamminio  
Sarasota FL
