Comments:

Duke's "energy charge" has increased 33% since last year! How can you keep approving huge increases like this? This far exceeds inflation and other types of increases. Although Duke did have a slight decrease in fuel cost, the 33% increase in energy cost made that useless on consumer final bill. Please have the consumer in mind when you approve the utility company rate increases. They have large profit margins and their employees and shareholders are happy. Keep the average residents in mind and how much your approved increases affect us.
