CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

I want to express my personal support for Florida Power & Light (FPL) in their continued efforts to strengthen Florida's energy infrastructure.

As someone deeply engaged with our local business community, I see the importance of reliable service and long-term infrastructure planning every day. FPL is a valued member of The Chamber of Commerce of the Palm Beaches and a leader in the economic landscape of Palm Beach County. Their commitment to service reliability, innovation, and grid modernization helps ensure that our region can continue to grow and thrive.

A resilient and future-ready energy grid is essential to meet the evolving needs of our businesses and residents. I appreciate FPL's investments in strengthening the system and preparing for the demands of tomorrow.

Please include this message as part of the public comment for Docket #2025-0011.

Thank you,

Michael Zeff

Subject: Florida Power & Light Increase

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Sirs:

I heard recently that Florida Power & Light is asking for yet another increase. It was not long ago that it frivolously asked for and was presumptuously granted two increases that affected each and every Florida resident full-time property owner.

As my husband and I are NOT investors, nor renters, but permanent residents who get no assistance from the government nor write-offs on our income tax return, and are existing on retirement income, we are 1000% opposed to FPL getting any percentage of increase at this time. They can't even use hurricanes as an excuse now, and should look to the federal government just as CA does even protecting it from bankruptcy!!

We are no different than millions of others in our State, paying ridiculously high water, power and Spectrum rates. Adding insult to injury, each level of government has no conscience about "jumping on the bandwagon" every month with their increased fees without seeking nor receiving approval from any permanent resident owner that they too increase the trial of our monthly bills. It is not a wonder so many hundreds of thousands have left Florida AGAIN! This galls me as you are all answerable to The People, and our pockets are not bottomless pits!

Only 2 days ago, I received an electric bill for \$300 + for 1 month for a home with 2 adults and 1 dog. We turn off one floor of AC each night. We keep our temperature at 75 degrees. Here, we are nearing the end of June, receiving a water bill for \$118. We have no sprinkler system, pay for the car wash, drink bottled water, and refrain from watering our lawn as rainy season is upon us. And still wonder when our water will be recontaminated.

We must be very mindful every month of just how many of these increases will "usurously" occur and just how much the next increase will burden us. We despise these ripoffs. Again, we get no assistance like the State of Florida does from the federal government.

Lastly, Spectrum who has little to no competition in our area provides internet & cable service. Every month, the rate is raised. This corporation has grown to be a conglomerate, fees increasing almost every month, but should be busted.

We residents have the very same problem for the People in the health care field: Just look at AdventHealth. Then look at it's ratings from city to city. Healthcare for the People is the last priority, where nurses alone are holding these hospitals up by their high skills, integrities and tenacity on stilts. Patients and family experience condescension, rudeness, mistakes in medication, ridiculous waiting times for test results, physical and verbal assaults, emotional primadonna doctors who, in spontaneous emotional states, victimize patients, violate HIPPA laws and do not take complaints -- even the most serious ones -- seriously. They care about three things: potential liabilities; having judgments or settlements that don't exceed Fla's malpractice caps, and

insurance premiums. Every week, these priorities affect more and more patients. I can only imagine what % of death rates are due to doctors' errors.

Overall, Florida, even with its natural assets, is becoming a state that is becoming a liability not only "bleeding" it's People, but more specifically, senior citizens. Well, it's not okay! I am indifferent to the total due of each bill and i am opposed to any FPL increase!

Subject: Letter of Support for Florida Power & Light Company (FPL)

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioners,

I am writing to express my strong support for Florida Power & Light Company (FPL) and to share the consistently positive experiences I have had with their team and services over the years.

In my professional and personal interactions with FPL, I have found their employees to be not only highly competent and responsive, but also genuinely committed to serving the public with integrity, care, and professionalism. Their proactive communication, technical expertise, and collaborative spirit have been instrumental in helping projects run smoothly and efficiently—especially in times when reliability and clarity are most needed.

Whether coordinating infrastructure needs, responding to inquiries, or addressing service challenges, FPL has proven itself to be a reliable partner. Their dedication to innovation, safety, and customer satisfaction reflects a company culture rooted in public service and accountability.

In a time when energy providers face increasing scrutiny and rising expectations, it is both refreshing and reassuring to work with an organization that not only meets but often exceeds those expectations. I hope the Commission recognizes the value that FPL brings to our communities, and I am confident they will continue to be a model utility provider for Florida and beyond.

Thank you for your time and attention.

Sincerely,

Shahin Etesam

Subject: VOTE AGAINST FPL \$10B RATE INCREASE

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear PSC, As FPL customers, we are against the recent FPL rate increase proposal.

Based on research by the CLEO Institute, “many of those in favor of the rate increase were former FPL employees, have FPL staff on their organizations’ board of directors, or work for organizations that receive funding from FLP.” These were people with direct financial interests tied to FPL, reflecting at the very least a profound conflict of interest.

A large percentage of FPL customers are seniors on fixed incomes. I hope that our voices are heard. Thank you for listening.

James of North Port, FL

Comments:

Regarding Docket Number 20250011-EI, FPL Rate Hike Dear Commissioners, I am writing to ask you to reject the proposed FPL rate hike as structured. There is no justification for increasing their Return on Equity to 11.9%, a whopping 24% higher than the industry average ROE of 9.6%. FPL and it's parent company NextEra Energy are well positioned for continued financial success and should not be granted an excessive return on their Florida investments, paid directly by me and the rest of the FPL Florida ratepayers. Simply stated FPL should not be granted an ROE more than average and given the national footprint of NextEra Energy, the FPL ROE should be no more than the average ROE earned by NextEra across all the states that they service. As a ratepayer to FPL I ask that you please reject the proposed rate hike as proposed.

Subject: Positive Experience with FPL - Docket #2025-0011

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

To Whom It May Concern,

My name is Bobby Thigpen, and I'm writing to share my positive experiences with Florida Power & Light (FPL) at both of my residences:

- 6057 Red Stag Drive, Port Orange, FL 32128
- 2555 S Atlantic Ave, Daytona Beach Shores, FL 32118

Over the years, I've experienced nothing but reliable, responsive, and community-minded service from FPL. Their efforts go beyond utility service—they've truly shown up for our community. During a particularly challenging time while I was assisting the operations of Jon Hall Chevrolet on Nova Road in Daytona Beach, FPL generously allowed us to use their lot next door for overflow vehicles. It was a small gesture with a big impact, and one I haven't forgotten.

Additionally, FPL continues to impress me with their proactive communication and preparedness ahead of incoming weather. As a Florida resident, that level of readiness gives me peace of mind.

I'm writing in support of FPL's proposed rate increase. Based on their consistent service, community support, and commitment to infrastructure and reliability, I believe the investment is justified and well-placed.

Thank you for the opportunity to share my thoughts.

Sincerely,
Bobby Thigpen
