The rate increase meeting notice did not mention what the reason was for the increase: is it for capital improvements to the water machinery and water distribution or for the developers personal use? If it is for capital improvements, then please specify in detail what these improvement are, what the cost is for each item, what the schedule is to implement these improvements, who will oversee implementation, and who will be project manager and project engineer. I would like to see improvements to the Grenelefe water utility but without a known plan with specifics it is not reasonable to propose rate increases.
