

TALQUIN ELECTRIC COOPERATIVE  
DOCKET NO. 20250039-EU  
STAFF'S **FOURTH** DATA REQUEST  
REQUEST NO. 1  
BATES PAGE(S): 27-30  
FILED September 29, 2025

1. Rule 25-6.0440(1)(d), Florida Administrative Code, addresses the obligation the joint petitioners are under to provide information about the differences in rates to customers that are subject to transfer under this proposed Agreement.
  - a. For Talquin: Please provide a July 2025 sample bill for the 39 residential class customers who are now regarded as an Extra Territorial Customers with Quincy. Provide the sample bill based on using 1,000 kilowatt-hours per month.
  - b. For Quincy: Please provide a July 2025 sample bill for a residential class customer using 1,000 kilowatt-hours of usage per month. Clarify in your response that this is the correct rate schedule for the 39 residential class customers who are subject to transfer from Talquin, pending the Commission's approval of the Agreement

TALQUIN'S RESPONSE to 1(a): See attached sample Talquin invoices for a single phase residential service (Member Name "Jane Doe").

QUINCY'S RESPONSE to 1(b): See attached sample Quincy invoices for a residential service.

### Reporting an Outage

Please report an interruption in your electric and/or water service using one of the methods below:

**By Phone:** Please call 1-888-802-1832 for a live operator or 1-866-899-4832 for an automated attendant.

**Online and Talquin app:** You may report an outage through the Talquin app or on the website [www.talquinelectric.com](http://www.talquinelectric.com).

**Text Notification:** You can enroll in our text option to report an outage. Through this service, you will be notified if there is an outage that possibly affects your service and status updates. To register, please visit the website [www.talquinelectric.com](http://www.talquinelectric.com) for instructions.

### Paying Your Bill

**Online and Talquin app:** You may pay your bill through the Talquin app or online at [www.talquinelectric.com](http://www.talquinelectric.com) with credit/debit card or electronic check.

**In Person:** You may bring your payment to any of our Member Services Offices listed above. We accept Visa, MasterCard and Discover credit/debit cards, checks and money orders. Locations and hours are listed above; each location also has a drop box for after-hours payments.

**Bank Draft:** Your payment can be automatically drafted monthly from your checking or savings account or your credit card. Please sign up for this service on the Talquin app or at [www.talquinelectric.com](http://www.talquinelectric.com).

**By Phone:** Call any Talquin Office and choose the prompt to pay by phone to pay your bill using our Interactive Voice Response (IVR) system. You may pay by credit/debit card or electronic check.

**By Mail:** Please return the bottom portion of your bill along with your check or money order, payable to Talquin Electric Cooperative, in the envelope provided to; P.O. Box 1679, Quincy, FL 32353.

## **City of Quincy Sample Residential Electric Bill (1000KWH)**

### Residential Electric Rate

Customer Charge (per meter): \$6.00/Month

Energy Charge: .09241 cents/KWH

Add fuel adjustment charge. Fuel adjustment charge is calculated monthly based on the fuel adjustment charge the city receives from our wholesale power provider.

REQUEST NO. 3  
BATES PAGE(S): 37-43  
FILED September 29, 2025

3. Exhibit C to the joint petition includes a sample letter Talquin sent to the Extra Territorial Customers who are subject to transfer in this proceeding. Please answer the following:
- a. If known, were all letters delivered (e.g., did Talquin receive any notifications from the United States Postal Service that any of the letters were undelivered [“returned to sender”])?
  - b. Since sending the letter on September 2nd and up to the date the utility proves a response, how many reply letters, phone calls, emails, and/or other forms of customer correspondence has Talquin received regarding this pending matter? Please summarize the nature of those customer contacts (i.e., if applicable, state the number of those in favor versus opposed and the general consensus of the affected customers’ opinions).
  - c. Was the Cooperative Member who contacted the Cooperative with his preference to maintain his electric utility accounts as described in the Petition at Paragraph 15.e. also one of the customers providing correspondence to the customer notice sent by Talquin as described in the Petitioners’ response to Question 3.b. above?

TALQUIN’S RESPONSE to 3(a):

All 41 letters were mailed via U.S. Certified Mail. As of the date of this submission, the United States Postal Services’ records reflect that 32 letters have been delivered, 2 letters are “in transit” (to Washington state), 7 “attempted deliveries.” Of the 7 attempted deliveries, 6 letters have been returned as undelivered (two of the letters are addressed to one Member with two accounts). Talquin has confirmed these Members’ mailing addresses in its system and is re-mailing all returned letters via regular U.S. Mail.

TALQUIN RESPONSE to 3(b):

Since sending the September 2<sup>nd</sup> letter, Talquin has received communications from three individual Members.

1. The first Member (637 Cox Lane) is the same Member who contacted Talquin prior to the filing of the Petition. This Member has four impacted accounts. This Member contacted Talquin by telephone after receiving the letter and reiterated that he is opposed to the transfer of his accounts to Quincy and is very upset. He stated he would

prefer to maintain his account with Talquin. This Member has also submitted written correspondence to the Commission.

Notably, the Member's brother (555 Cox Lane) is his neighbor (has two additional impacted accounts). Although Talquin has not heard directly from the Member's brother, the Member claims his brother shares his concerns.

2. The second Member (46 Ball Farm Road) contacted Talquin by telephone after receiving the letter. She has one impacted account. After receiving an explanation of the impending transfer, the Member did not appear concerned about the transfer.
3. The third Member (303 Walsh Road) contacted Talquin by telephone after receiving the letter. She has one impacted account. This Member was unhappy with her account being transferred to Quincy and would prefer to maintain her account with Talquin.

QUINCY RESPONSE to 3(b):

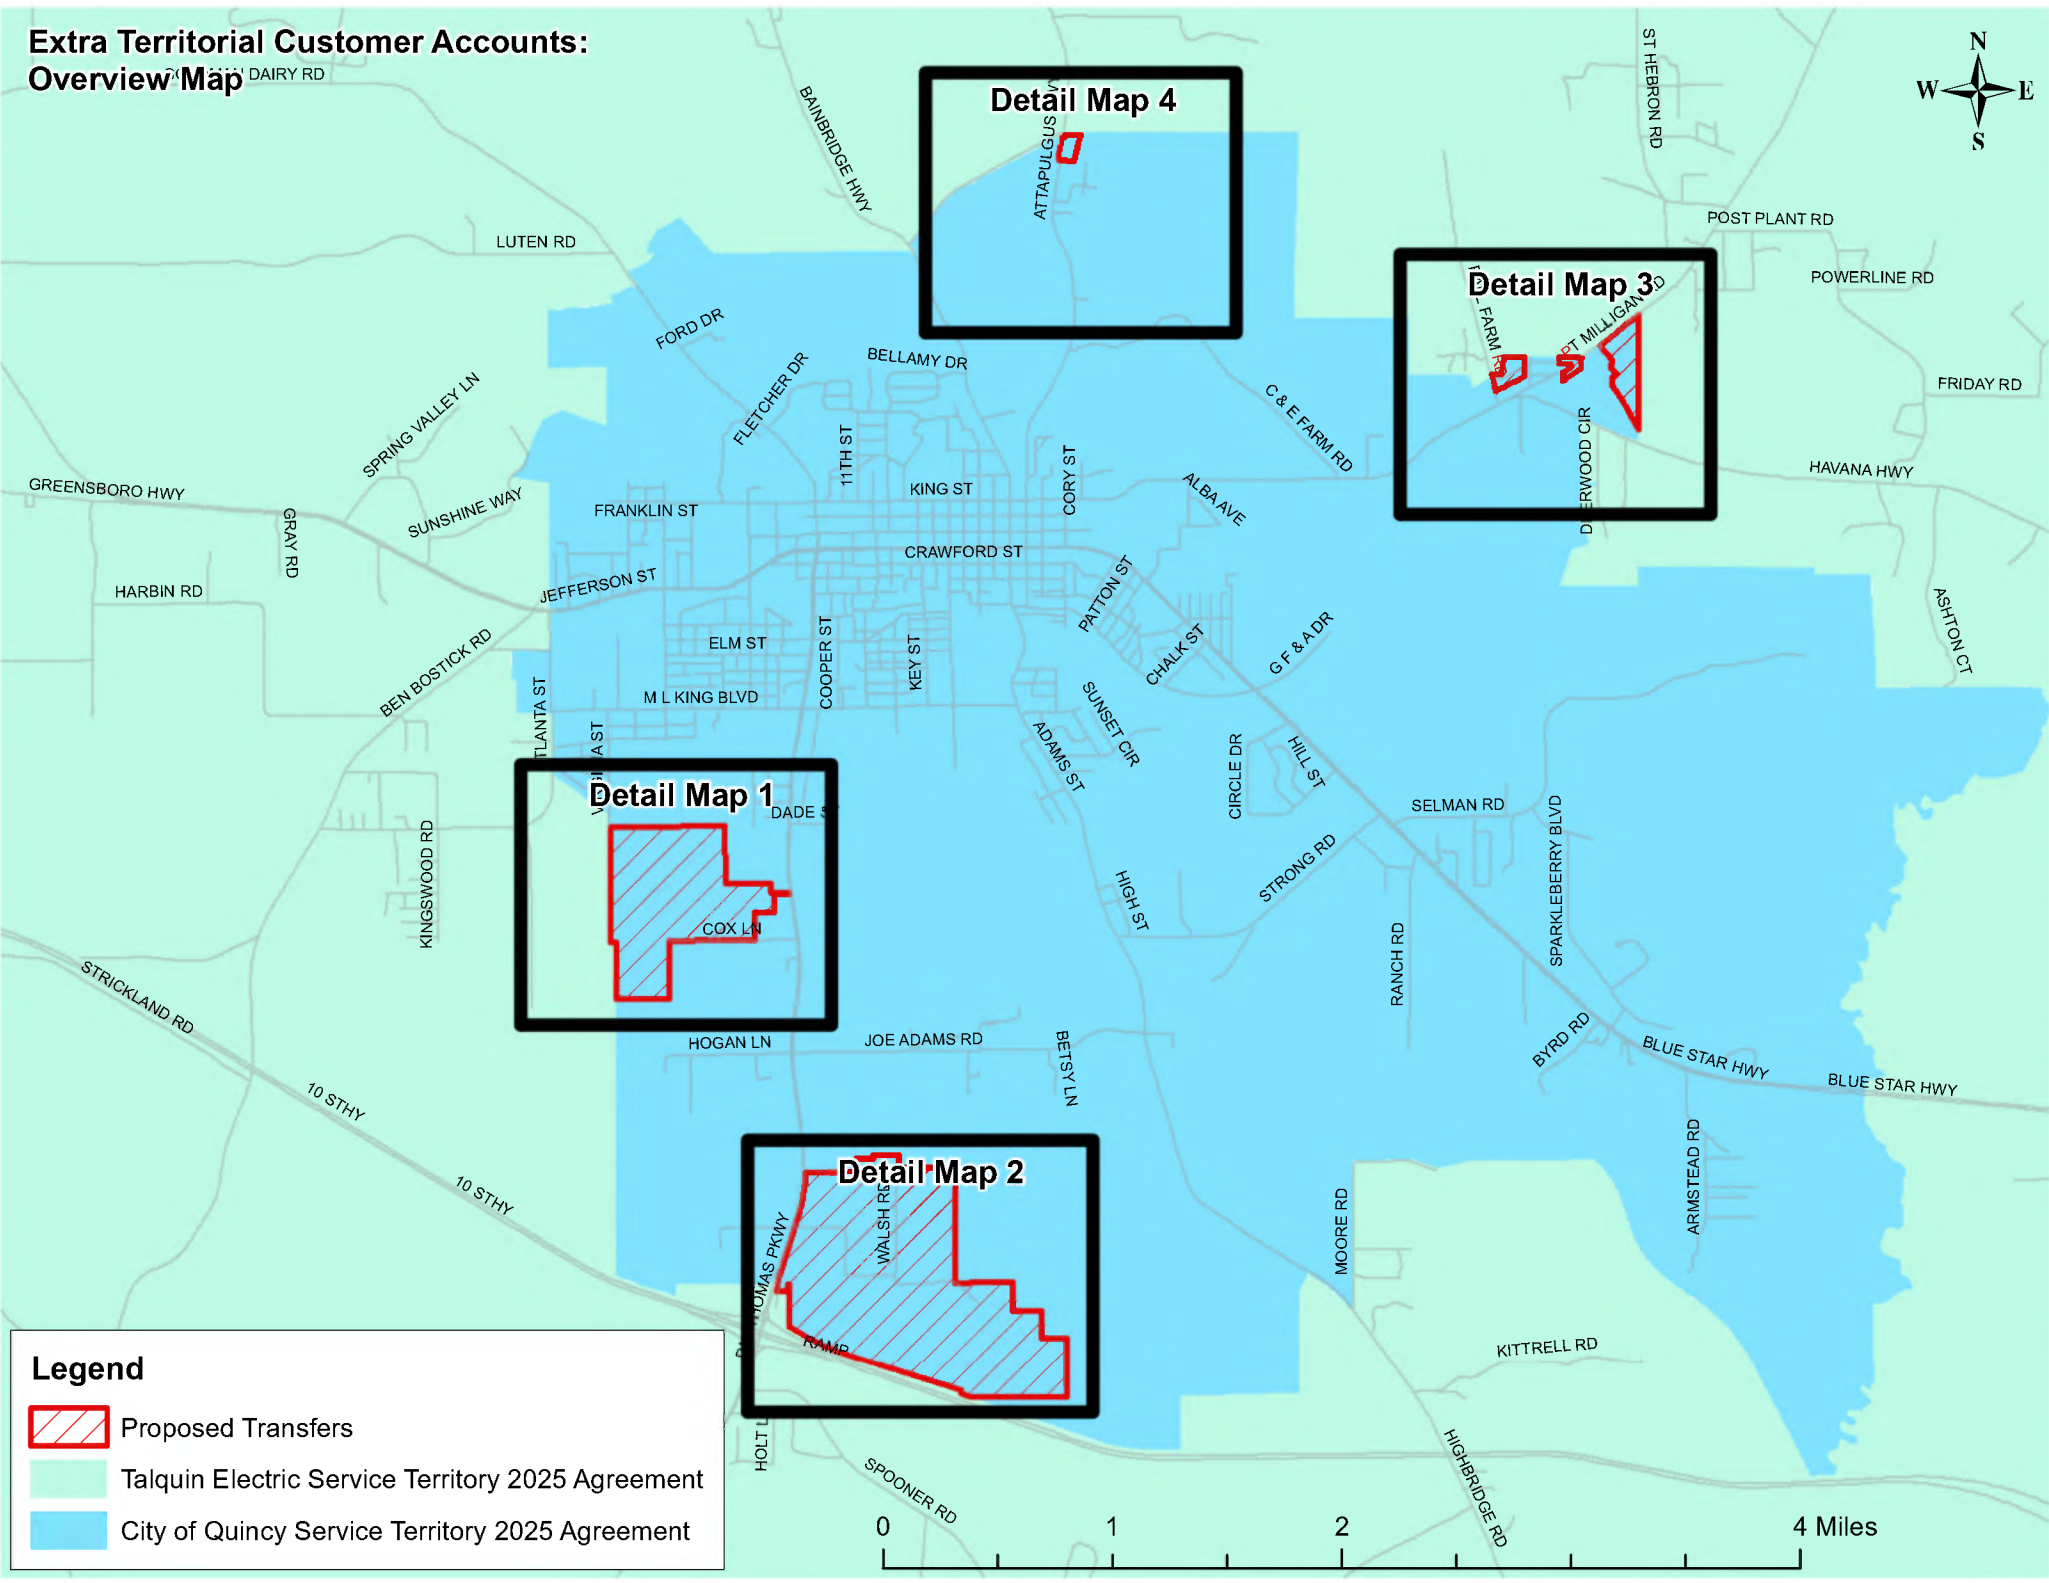

Quincy is unaware of any contact from any of the 41 account holders who received the September 2<sup>nd</sup> letter.

TALQUIN RESPONSE to 3(c):

Yes. The Cooperative Member who contacted the Cooperative with his preference to maintain his electric utility accounts as described in the Petition at Paragraph 15(e) is also one of the customers who has contacted Talquin as described in its response to Question 3(b), above. This Member has also submitted written correspondence to the Commission.

**In addition to the foregoing response, for ease of reference, attached are maps for the four circuits which make up the 41 Extra Territorial Customers' accounts.**

FILED September 29, 2025

4. Page 8 of the proposed Agreement, Paragraph 16.b., states, in part, the Agreement "... will not cause a decrease in the reliability of electrical service for existing or future customers of either Cooperative or Quincy." Please provide any analysis and/or documents supporting this assertion.

TALQUIN'S RESPONSE to 4: The Agreement, as presented, largely maintains the status quo. Talquin has the capacity to serve their existing customers and future anticipated growth in the area surrounding the City of Quincy.

Talquin maintains three substations serving the area surrounding the City of Quincy: its Gretna Substation, its Point Milligan Substation, and its Wetumpka Substation.

- Gretna Substation: There are approximately 3,500 services connected to Talquin's Gretna Substation, which has the capacity to serve 56 MVA. In December 2024 the highest load for the Gretna Substation was only 14,438 kW with the highest load in recent years occurring in December 2022 at 18,321 kW at its peak. Accordingly, the Gretna Substation is designed to handle the current load and future growth.
- Point Milligan Substation: There are approximately 2,100 services connected to Talquin's Point Milligan Substation, which has the capacity to serve 28 MVA. In December 2024 the highest load for the Point Milligan Substation was only 6,391 kW with the highest load in recent years occurring in December 2022 at 10,681 kW at its peak. Accordingly, the Point Milligan Substation is designed to handle the current load and future growth.
- Wetumpka Substation: There are approximately 2,000 services connected to Talquin's Wetumpka Substation, which has the capacity to serve 28 MVA. In December 2024 the highest load for the Wetumpka Substation was only 7,733 kW with the highest load in recent years occurring in December 2022 at 12,690 kW at its peak. Accordingly, the Wetumpka Substation is designed to handle the current load and future growth.

Talquin has the capability of switching the feed for the connections served by the Wetumpka Substation and/or the Point Milligan Substation to the Gretna Substation (and vice versa) which provides greater reliability for these services.

QUINCY'S RESPONSE to 4: The Agreement, as presented, largely maintains the status quo. The City has the capacity to serve their existing customers and future anticipated growth in the City of Quincy and surrounding area.

Quincy maintains two substations to serve its customers in and around the City of Quincy: the North Substation and the South Substation. The North Substation has the capacity to serve 66 MVA. The South Substation has the capacity to serve 15 MVA. The two Substations currently serve a total of 4,887 customers.

The two Quincy substations provide power through a radial feed. A transmission line comes in and ties to the North Substation and then ties to the South Substation. Quincy has one interconnection point with Duke Energy at the North Substation.

FILED September 29, 2025

5. Section 4.7 of the proposed Agreement states, in part, "Nothing herein shall be construed to prevent or in any way prohibit the right of each party to maintain any existing Express Distribution Lines within the Territorial Area of the other party." Please answer the following as it relates to the previous sentence:
- a. As of the date Talquin prepares its response to the query, how many Express Distribution Lines are currently in the Quincy service area as defined by this proposed Agreement?
  - b. As of the date Quincy prepares its response to the query, how many Express Distribution Lines are currently in the Talquin service area, as defined by this proposed Agreement?
  - c. Please provide any document(s) that support and/or explain that the existing Express Distribution Lines referenced in Section 4.7 of the proposed Agreement do not and will not result in uneconomic duplication of facilities. If no such document exists, please explain why uneconomic duplication does not and will not result from the existence of such lines.

JOINT RESPONSE to 5(a): The parties are only aware of one Talquin Express Distribution Line running north and west along Moore Road within Quincy's service territory. This Line is used to serve Talquin accounts in Talquin's service territory.

JOINT RESPONSE to 5(b): The parties are unaware of any Quincy Express Distribution Lines within Talquin's service territory as of the date of this response.

JOINT RESPONSE 5(c): No such document exists responsive to this request. Many of the poles along Moore Road supporting Talquin's Express Distribution Line appear to date back to 1989. Based on the current terrain, Talquin suspects that the decision to build this distribution line on the west and north side of Moore Road (within Quincy's service territory) was to minimize vegetation removal costs. No Quincy facilities currently exist along Moore Road. The parties do not believe Talquin's Express Distribution Line will result in uneconomic duplication of facilities.

6. Sections 2.8 and 2.9 of the proposed Agreement reference the execution of a franchise fee agreement for use of the City's rights of way by Talquin. Does the City agree that the Commission does not have any jurisdiction over the execution of franchise agreements and enforcement of franchise fees?

QUINCY RESPONSE: Yes. The City of Quincy understands that the Commission does not have jurisdiction over the execution of a franchise agreement and/or the enforcement of franchise fees as per Fla. Stat. § 366.13. Sections 2.8 and 2.9 of the Agreement were included for the purpose of acknowledging the City's ordinance imposing the franchise fee for access to its right-of-way as a matter of sovereign right.

7. Sections 2.8 and 2.9 of the proposed Agreement reference the execution of a franchise fee agreement for use of the City's rights of way by Talquin. Does the Cooperative agree that the Commission does not have any jurisdiction over the execution of franchise agreements and enforcement of franchise fees?

TALQUIN RESPONSE: Yes. Talquin understands that the Commission does not have jurisdiction over the execution of a franchise agreement and/or enforcement of franchise fees. Sections 2.8 and 2.9 of the Agreement were included for the sole purpose of acknowledging the City's right to request a franchise fee and the Cooperative's willingness to negotiate a franchise fee in good faith under the prescribed framework.
