Subject: Reject Florida Power & Light's Rate Hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

I'm a Floridian and I am requesting that you vote **NO** on FPL's settlement agreement that would raise rates far above the national average.

If the Commission approves FPL's settlement, FPL will have the second highest return on equity in the country. That's a huge burden for Florida families who can barely afford our energy bills as it is.

Please reject FPL's settlement agreement and cap its return on equity to the national average of 9.6%.

I'm counting on you to protect Florida ratepayers.

Thank you for your consideration,

Sincerely,

Ms. Lisa Hyde

Subject: Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being.

Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,

Mr. Gabriel James

Subject: Net Metering at 1766 Supreme Ct Naples FL Complaint 1459235E

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Ms Augspurger

I have great difficulty understanding how the PSC allows FPL to put other constraints on the net metering conditions spelled out in the administrative code. These additional FPL imposed " guidelines" are in direct conflict with the administrative code. To be clear I was **FORCED** into an SGIA agreement by FPL as they kept telling me I could not use my system. This guideline imposed on the size of the system is contrary to the intent of administrative code as it restricts the residential customer to a smaller system so that FPL continues to get money by not allowing net metering. Regarding your second statement about a bi-directional meter is correct except it only works in one direction as any surplus power my system makes is not credited against the power I use on cloudy days. This continues to be FPL mis leading the PSC as FPL is allowing me to use the power I produce! (Bless their heart) I have turned off the exporting function of my system since there is absolutely zero benefit for me to export. This FPL condition is contrary to the administrative code I am not being

allowed to offset my usage. If you would please review the administrative code and you will see there are no conditions on the size of the system.

Jim Reichart

1766 Supreme Ct

Dear Chairman LaRosa,

My energy bills have gone up far too much per month. With prices climbing on all basic needs, it's becoming impossible to manage. Floridians need relief. I urge you to support OPC's proposal for lower energy rates and reject FPL's rate hike.

Sincerely,

Sincerely,

Hilary Haas

Subject: Net Metering at 1766 Supreme Ct Naples FL Complaint 1459235E

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Ms Augspurger

I have great difficulty understanding how the PSC allows FPL to put other constraints on the net metering conditions spelled out in the administrative code. These additional FPL imposed " guidelines" are in direct conflict with the administrative code. To be clear I was **FORCED** into an SGIA agreement by FPL as they kept telling me I could not use my system. This guideline imposed on the size of the system is contrary to the intent of administrative code as it restricts the residential customer to a smaller system so that FPL continues to get money by not allowing net metering. Regarding your second statement about a bi-directional meter is correct except it only works in one direction as any surplus power my system makes is not credited against the power I use on cloudy days. This continues to be FPL mis leading the PSC as FPL is allowing me to use the power I produce! (Bless their heart) I have turned off the exporting function of my system since there is absolutely zero benefit for me to export. This FPL condition is contrary to the administrative code I am not being allowed to offset my usage. If you would please review the administrative code and you will see there are no conditions on the size of the system.

Subject: Reject FPL's Unprecedented \$10 Billion Rate Hike – Protect Florida Families

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Chair Mike La Rosa,

I am writing to strongly urge you to reject Florida Power and Light's (FPL) proposed \$10 billion rate hike—the largest in U.S. history. Approving this increase would be a devastating blow to Florida families, many of whom are already struggling with rising living costs. This past year, this Commission has already failed residents by allowing TECO's rate hikes, and we cannot afford another reckless decision that prioritizes corporate profits over public well-being. Electricity is not a luxury—it is a life-saving necessity in Florida. With extreme heat, hurricanes, and severe weather events, access to affordable power is essential for survival. A rate increase of this magnitude would force seniors, low-income families, and working-class residents to choose between paying their electric bills and affording food, rent, or medical care. No one should have to make such impossible choices just to keep the lights on.

Beyond the financial hardship, this increase also carries serious environmental consequences. Instead of investing in clean, affordable renewable energy, FPL continues to expand its reliance on fossil fuels, worsening extreme weather patterns and increasing pollution. These impacts disproportionately harm low-income communities and communities of color, who already experience higher energy burdens and environmental health risks. If FPL truly needed more funding, it should focus on sustainable energy solutions, not passing costs onto struggling residents.

The Florida Public Service Commission has a responsibility to serve the public, not corporate monopolies. FPL is a monopoly, meaning Floridians have no choice but to pay whatever rates are approved. If this rate hike is allowed, it will set a dangerous precedent, opening the door for further unchecked increases that will push even more families into a financial crisis.

I urge you to reject this historic \$10 billion rate hike and stand with the people of Florida. The residents of this state deserve fair and affordable electricity—not price gouging from utility giants.

Sincerely,
Mr. Gabriel James

I have lived in PBC most of my life and it seems FPL is squeezing us harder at a time when we are struggling to eat, pay our Bill's with so many essential things having record price hikes. FPL does not need to raise rates just so they can make record profits.

Sincerely,
Sue Riendeau
