**Subject:** \*\*\*\*\* HELP ! Rising FPL Costs and Poor Energy Strategy

Dear Governor DeSantis ,

I am one of your constituents in Flagler county , Florida who has always supported you with my vote .

I wanted to bring to your attention a great concern I have and as more Floridians become aware they too will be concerned .

I am also writing Mr Greco , my State Representative, on this important matter .

FPL rates have been rising greatly in the last few years with more price hikes put in for approval . My greatest concern is the strategy of FPL to have invested vast amounts of money into Renewable Energy such as Solar ( from China incidentally) that is **very inefficient** compared to other forms of power. And who will be responsible to pay for the \$Billions of dollars invested in this very weak producer of electricity ? ... the Customers of FPL through higher rates.

Especially with Trump as President , the cost of **typical energy** of oil and coal is going down . This would mean lower rates for customers. BUT , with FPL's poor and costly strategy I and all Customers will be forced to pay for this error and incompetence.

I ask you as my Governor to **FIGHT** for Lower rates and a turning away from this strategy . Let FPL “ eat “ the cost of this terrible , inefficient investment into renewables . It is not feasible and will continually lead to obscene costs for your constituents and all of FPL's Customers.

On a personal note , I am a retired citizen on a fixed income and I cannot continue to pay for these outlandish high electric bills on top of everything else going up in price - since Covid and under the Biden admin with their horrible policies and overspending and deficits , we have and still are witnessing a tremendous price hike on ALL things - I am financially being choked . I am one voice of millions experiencing the exact same thing .

Governor DeSantis...Please Help With This Matter .

With Appreciation,  
Mark Campese
