I wish to comment on the current Rate Hike under consideration for FPL. I believe they are requesting an 11.5% increase which is not only arrogant but also out of line with the current day to day cost of living for most customers of FPL. I talked with one of your reps who told me only certain aspects of a company's budget are considered for hikes. I believe the way this business, the PSC evaluates companies for rate hikes needs to be re-evaluated. I tried to get a copy of their total budget and was not able to do so. So:my suggestions are based on what I have read or seen in the news stories. 1. Reduce the CEO pay by \$15 Million 2. Reduce the Board of Directors pay by a total of \$1 Million. 3. Reduce advertising costs by 75%. Why do they need to spend so much on advertising. 4. Reduce the exorbitant costs of outside consultants, lobbyists and lawyers. 5. With digital billing they must be saving a fortune in clerical costs and can pass that savings along to consumers. 6. Eliminate bonuses for the CEO, Board and others who are not day to day employees. 7. Quit lying about how they are trying to save costs, always exploring ways to find new ways at cheaper costs. 8. Foreign countries have

massive solar and wind farms which Florida could have plus utilize wave energy as the 1300 mile coast has lots of waves to produce power. FPL like all utilities is out of control and are no longer providing just energy, they are all about the PROFIT/MONEY. A 5% increase is fair and gives plenty money to the stockholders. My suggestions if implemented would pay for this rate increase. Larry Pulos Call me if you want more info. 36-348-2287
