Subject: WATER UTILITY
DOCKET NO. 20250088-WU
SUN COMMUNITIES FINANCE LLC d/b/a Water Oak Utility

We respectfully disagree with the rate hikes suggested for Water Oak Country Club Estates in Lady Lake FL. In reading the "Objectives and Procedures" section of the Public Service Commission Auditors Report (October 7, 2025), we noted that this is a "class C utility providing service to 1371 residential customers and 18 GENERAL SERVICE CUSTOMERS." Can anyone tell us exactly "who" it is that constitutes "18 general service customers?" Further, how does this impact the residential customers vs general service customers? It is our understanding that we have our own well here, and the water is billed separately from the sewer charges. The sewer charges have always seemed way out of line in relation to the amount of water used. We have in the past, questioned this, and have received a variety of convoluted answers and calculations, all of which seem to revolve around "someone's " creative math. I was in banking for a solid portion of my career. I like to deal in actual numbers and percentages, none of which have been presented to reconcile these charges. IF the proposed rate hike is as outrageous as it seems on paper, I don't know how Sun Communities can expect to retain their "land renters" since they are seeming to want to clear the place out with ridiculous fees. This is an elderly demographic, many of whom rely on Social Security as their primary source of income. The amount of money needed to insure one of these homes is ridiculous, and electric utilities are increasingly outrageous as well (never mind what it costs in this area for groceries and gas -basic necessities.) Now, I understand that rates do increase for everything everywhere, but when you start charging ridiculous amounts of money for water that doesn't even go down a sewer (such as any used outside to water lawns, plants, pressure washing homes and

driveways,) does anyone really believe that Water Oak won't turn into anything but a nasty dump of a trailer park since people aren't going to be willing to take care of anything except INSIDE their walls? We are asking for a clear and concise accounting of our individual lot water and sewer expenses, and being provided with accurate meters to read BOTH. We are also asking that we not be "penalized" for any corporate "mistakes" in billing the individual lots over the years, and if that translates into some kind of "loss" for Sun Communities, they absorb whatever it costs for their mistakes.

Respectfully,

Diane and Kevin Berger
Lot #445
543 Spruce Dr
Lady Lake FL 32159-3269
