I have recently received TECO Electric bills that are insane !

My electric bills average \$360 per month now with an all time high bill of \$470 in August 2025. This is before the most recent TECO increase ! Why in the world does Tampa pay the third highest electric bills in the United States of America ?

Something is broken ! It's not my electric meter. It is a State Government that allows living in Florida to become financially out of reach for everyday, normal, middle class family's! Really, how are family's to plan for ballooning expenses like a child's college tuition, insurance and property taxes when electric bills go up four times in about one year ? I beg of you, Govenor DeSantis needs to find relief for Fliridians living on the edge of moving to Mississippi of all places which despite their many failures find a way for the cost of living to be the lowest in the United States ! I love the State of Florida but, come on, being the greatest State in the Union we can do better than what is happening in Hillsborough County / Tamoa ! Please Govenor DeSantis, Florida can do better than this !
