**Subject:** Oder Ledbury Treatment Plant Three Days In A Row

**CAUTION:** This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Since Sunday there has been a very strong odor coming from the Wekiva Hunt Club Wastewater Treatment Plant (WWTP), located at 144 Ledbury Drive in Longwood, FL.

It has present in the air all day 3/8/26, 3/9/26 and 3/10/26.

I was going to write to whoever cares on Sunday but am worn out asking for something to be done. I would guess that is what Sunshine wants.

There was a consent order not too long ago and Sunshine was rewarded with a rate increase to its customers.

Sunshine Utilities continues to pollute the natural drainage land that borders between Sweetwater Oaks and Wekiva subdivisions, the volume of spills has polluted Sweetwater Creek and its subsequent run to the Wekiva River Basin.

This was sent to me in one letter from the DEP, " E. coli samples collected in various sections of Sweetwater Creek are below the surface water quality standard."  
Oh, ok then why don't you have a drink?

**Why are they allowed to continue to pollute by air and land, with virtually no consequences and allowed to raise rates?**

**When will something be done and a responsible vendor or the county take back the operation?**

Sunshine Water continues to be a horrible partner for Seminole County or Wekiva and Sweetwater Oaks communities.
