Re: Docket No. 20260052-EQ -- Petition for approval of renewable energy tariff and standard offer contract, by Florida Power & Light Company.

Dear Mr. Baker:

Please provide the information requested below regarding Florida Power & Light Company (Utility) to the Office of Commission Clerk by **Friday, April 10, 2026**.

1. For each component of the avoided unit's capital or O&M cost(s) that is higher than the prior year's standard offer, explain why. As part of this explanation, describe the impacts of any changes in financial assumptions, unit type or capabilities, unit timing, or general industry trends.
2. Identify the necessary minimum capacity factor required to receive full capacity payments under the proposed tariff and how it was determined and/or calculated.
3. Please complete the following table for each year, 2027 through 2046, and in total (nominal and net present value (NPV)), describing estimated payments to a renewable provider based on the proposed tariffs included in the Utility's revised standard offer contract for each of the five scenarios listed below. For the calculations, assume the renewable generator is (i) a 50 MW facility capable of providing firm capacity, (ii) has an in-service date of January 1, 2027, (iii) operates at the minimum capacity factor required to receive full capacity payments under the tariff, and (iv) has a contract duration of 20 years.
 - a. As-Available Energy Rate (Energy Only Payments – No Firm Capacity)
 - b. Normal Capacity Payments
 - c. Levelized Capacity Payments
 - d. Early Capacity Payments
 - e. Early Levelized Capacity Payments

Mr. Joel T. Baker
