Re: Docket No. 20260026-GU - Application for rate increase by Florida City Gas

Dear Mr. Teitzman:

Please find enclosed for filing in the above referenced docket the Direct Testimony and Exhibits of Helmuth W. Schultz, III. This filing is being made via the Florida Public Service Commission's web-based electronic filing portal.

If you have any questions or concerns, please do not hesitate to contact me. Thank you for your assistance in this matter.

Sincerely,

Walt Trierweiler
Public Counsel

DIRECT TESTIMONY

OF

HELMUTH W. SCHULTZ, III

On Behalf of the Office of Public Counsel

before the

Florida Public Service Commission

DOCKET NO. 20260026-GU

I. STATEMENT OF QUALIFICATIONS

Q. PLEASE STATE YOUR NAME, OCCUPATION, AND BUSINESS ADDRESS.

A. My name is Helmuth W. Schultz, III. I am a Certified Public Accountant licensed in the State of Michigan and a senior regulatory consultant at the firm Larkin & Associates, PLLC, ("Larkin") Certified Public Accountants, with offices at 15728 Farmington Road, Livonia, Michigan, 48154.

Q. PLEASE DESCRIBE THE FIRM LARKIN & ASSOCIATES, PLLC.

A. Larkin performs independent regulatory consulting primarily for public service/utility commission staff and consumer interest groups (public counsels, public advocates, consumer counsels, attorneys general, etc.). Larkin has extensive experience in the utility regulatory field as expert witnesses in over 600 regulatory proceedings, including water and sewer, gas, electric and telephone utilities.

Q. HAVE YOU PREPARED AN EXHIBIT WHICH DESCRIBES YOUR EDUCATIONAL BACKGROUND AND PROFESSIONAL EXPERIENCE?

A. Yes. I have attached Exhibit HWS-1, which is a summary of my background, experience and qualifications.

Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION AS AN EXPERT WITNESS?

A. Yes. I have provided testimony before the Florida Public Service Commission ("Commission" or "FPSC") as an expert witness in the area of regulatory accounting and storm cost recovery in numerous cases as listed in Exhibit HWS-1.

Q. BY WHOM WERE YOU RETAINED, AND WHAT IS THE PURPOSE OF YOUR TESTIMONY?

A. Larkin was retained by the Florida Office of Public Counsel ("OPC") to review the request for Florida City Gas Company's ("Company" or "FCG") (together with its parent Chesapeake Utilities Corporation ("CUC")) for a base revenue increase of $46,870,932. The initial total base revenue increase of $63,273,876, based on a projected 2027 test year, is offset by the $16,402,944 revenue requirement associated with the surcharge recovery for the Safety, Access, and Facility Enhancement ("SAFE") program revenues that are already being recovered on customer bills, resulting in a requested incremental base rate revenue requirement of $46,870,932.

Q. ARE YOU INCORPORATING ANY RECOMMENDATIONS OF OTHER OPC WITNESSES?

A. Yes. Chris Walters makes recommendations regarding requested capital structure and return on equity ("ROE"), and Lane Kollen addresses certain affiliate costs at a detail level and makes recommendations to correct identified errors, and I am incorporating their findings and recommendations into my testimony.

II. BACKGROUND

Q. PLEASE SUMMARIZE YOUR UNDERSTANDING OF THE COMPANY'S REQUEST.

A. The petition for Docket No. 20260026-GU is a request described by FCG as a single year proposal consisting of: (a) an increase in base rates and charges sufficient to generate a total base rate revenue increase of $46.9 million based on a projected 2027 test year, which is net of an incremental base rate revenue requirement of $16.4 million associated with the reclassification of the SAFE program revenues from clause to base rates; (b) a 11.25% mid-point ROE and an equity ratio of 50.14% from investor sources for all regulatory purposes; (c) continuation of the Storm Damage Reserve approved in the 2018 Settlement Agreement; (d) expansion of the AMI deployment beyond the AMI Pilot approved in FCG's 2022 rate filing; (e) retention of the unamortized amount of acquisition adjustment approved by Order No. PSC-2007-0913-PAA-GU; (f) continuation and expansion of the existing SAFE program; (g) inclusion of the SAFE plant additions forecasted through December 31, 2026; and (h) a request for Interim Rate Relief in the amount of $16,244,207.

Q. ARE YOU SUBMITTING SCHEDULES ON BEHALF OF THE OPC WITH RECOMMENDATIONS BASED ON BOTH THE INTERIM RATE REQUEST AND THE BASE RATE REQUEST FOR THE TEST YEAR 2027?

A. No. Attached as Exhibit HWS-2 are the recommendations based on the 2027 forecasted test year. Having said this, it is my understanding that the OPC has reserved the right to demonstrate that adjustments disallowed in the subsequent hearing for setting permanent rates should also be disallowed for interim purposes and that the associated revenues should be refunded to customers. I concur with this approach which I briefly address elsewhere in my testimony.

Q. PLEASE SUMMARIZE WHAT THE COMPANY HAS INCLUDED IN ITS REQUEST TO THE FLORIDA PUBLIC SERVICE COMMISSION?

A. The April 20, 2026, petition filed by FCG seeks a net increase of $46,870,932. As explained earlier, the request is intended to be net of the $16,402,944 of revenue associated with SAFE investments as of December 31, 2025, currently being recovered through the SAFE recovery clause.

Q. WAS THERE ANYTHING THAT STOOD OUT IN YOUR INITIAL REVIEW OF THE FILING THAT YOU FOUND ALARMING?

A. Yes. The Company filing reflects a 2027 forecasted operating expense of $46,623,423. That is an increase of $21,125,773 or 82.9% over the $25,497,650 forecast of operating expense for 2023 approved in the June 9, 2023, Order No. PSC-2023-0177-FOF-GU ("2023 FCG Order"). This projected amount, created a mere two years later in early 2025, represents a significant increase over a four-year period. That is especially

concerning since the customer count for 2023 in Docket No. 20220069-GU was 117,487 and the number of customers projected as of December 31, 2027, is 131,126 and an increase of 11.6%. Some notable 2027 cost increases above that allowed in the 2023 FCG Order were affiliate costs, payroll, and benefits. In Exhibit HWS-3, page 1, I have summarized a comparison of O&M expense, employees, and various expenses preacquisition to post acquisition. In Exhibit HWS-3, page 2, I have prepared a comparison of expenses, by account, from the annual reports from 2021 to 2025 and the Company request for 2027.[1] The change is significant, and I will discuss this in more detail later in my testimony.

Q. YOU GIVE AN OVERVIEW OF YOUR TESTIMONY ORGANIZATION LATER IN SECTION III, BUT SINCE YOUR EXHIBITS HWS-6 THROUGH HWS-9 ARE SO VOLUMINOUS, CAN YOU DISCUSS WHY YOU HAVE ATTACHED THEM TO YOUR TESTIMONY?

A. Yes. It is unusual for me to attach such a large volume of information in support of my testimony. However, this is a highly unusual case. I have relied on the information included in my testimony and point below out where and how I have done so. I have included the amount of information for complete context rather than provide snippets. The financial information that was presented to investors for the 2023 to 2025 reporting periods and included in my Exhibit HWS-6 is provided because it paints a story that is at odds with the carefully crafted one that the filing seeks to have the regulators accept. FCG and CUC would have the Commission believe that there are no

[1] These reports are attached in my Exhibit HWS-7 at 101-837.

synergies—only enormous extra costs that FCG customers must bear for no other reason than two large companies got together and made a sale for the benefit of each other.

The investor presentations in Exhibit HWS-6 depict the excited utterances of thrilled CUC buyers who describe the operational synergies they are harvesting, the best practices they are receiving from FCG, the earnings margin that FCG is immediately providing to CUC from day one, the outsized, robust contribution of FCG to CUC earnings per share ("EPS"), and the quality of the FCG workforce.

In the Commission filing, however, the picture is much more dismal. Throughout testimony there is a near-smear campaign of insinuations that the systems were antiquated, the service was lacking, customers were unhappy, safety was at risk, gas was not getting delivered, and FCG was just not up to snuff. CUC seeks to subtly paint itself as a white knight coming to rescue FCG customers. CUC says in testimony that they are not seeking to recover the massive $466 million acquisition adjustment, but investors are told that CUC is working on a plan to do just that while perhaps recovering some of the related costs piecemeal in this case.

I have included the large earnings exhibit of ESRs and Annual Reports in Exhibit HWS-7 and the miscellaneous documents containing accounting information because, in addition to relying on them, they are necessary to illustrate that despite there being representations of a seamless transition under a transaction that the Commission had zero authority to approve, FCG and CUC have subtly sought to change the rules about

how their earnings are measured and have done so in a way that affects interim and permanent rates. I will discuss these impacts in my testimony. One of the documents also illustrates the intent of CUC on the day the transaction closed to recover some or all of the cost of the $466 million acquisition premium from customers.

The case is rife with examples of all sorts of FCG acquisition costs that FCG customers are being asked to bear. Exhibits HWS-6, HWS-8, and HWS-9 present a more believable story that is based in the reality of making statements to investors that come with severe penalties if proven to be untrue. In my testimony I point out the contrasts of the tale of these two viewpoints. These exhibits are voluminous, but the customers deserve more than a carefully curated story that would stick them with the bill while CUC celebrates synergies, EPS growth into the next few years, $500 million of new investment opportunities and leveraging other benefits of FCG.

I should note that I used transcripts of the statements that CUC executives made to investors. They are produced and provided by an entity called "Seeking Alpha" and are unrelated to CUC and are generated from audio recording files that CUC has posted on its website under the tab for "Investors." I believe the transcripts are self-authenticating in the very strictly regulated world policed by the United States Securities and Exchange Commission and shareholder derivative lawsuits (that Directors & Officers Liability ("D&O") insurance protects the executives and board from) but would certainly welcome CUC pointing out where the transcripts conflict with the actual statements made.

Q. DID THE COMPANY PROVIDE ANY ANALYSIS IN THEIR FILING TO SUPPORT THE INCREASED COSTS SINCE FCG'S LAST RATE REQUEST?

A. What they provided was inadequate at best. They purported to provide analysis in two documents in the filing, and in response to discovery. The documents referenced as support for cost increases in the filing are MFR Schedule C-34 and Company witness Everngam's Exhibit ME-3. In discovery the Company was requested to explain the difference between the $2,477,003 of affiliate costs approved in the 2023 FCG Order and the $27,436,036 of forecasted affiliate costs for 2027. The response suggested that the difference may be due to how costs were recorded by the prior owner and CUC and that the requested comparison is an apple-to-orange comparison. That explanation was followed by referencing the 2021 costs to 2025 costs on MFR Schedule C-34. The response continued that while MFR Schedule C-34 does not separate the costs between affiliate and non-affiliate, the schedule shows the inflation impact on 2021 costs.

Q. ARE THE DOCUMENTS OR THE RESPONSE JUSTIFICATION FOR THE INCREASE IN O&M EXPENSE?

A. No. Company MFR Schedule C-34 shows that, per the Company, the escalated 2021 base year filing costs of $31,383.325 are $8,747,118 lower than the adjusted historic base year costs of $40,130,443. That suggests the expense increase through 2025 is excessive. The summary on Company witness Everngam's Exhibit ME-3 applies an escalation factor based on the years 2003-2027 and applies the calculation to what is identified as 2023 costs per Order PSC-2002-128-PAA-GU [sic].[2] If that is a 2023

[2] This order was cited by witness Everngam in his direct testimony at his Exhibit ME-3 and cannot be located at this time.

cost, it would not be appropriate to apply an escalation factor based on a change from 2003 to 2027 to justify the 2027 costs. This ignores the fact that the 2023 costs utilized already reflect inflation that occurred through 2023. The Company methodology compounds the inflation from 2003 through 2023. If the costs are listed as 2023 O&M costs are not from 2023 and from some other period of time it ignores the facts and circumstances that the 2023 FCG Order reflects the level of O&M expense the Commission determined to be necessary for providing safe and reliable service.

A more appropriate comparison of the historic and the forecasted costs is shown in Exhibit HWS-4. My first calculation applies the 1.1008 Inflation & Growth Compound Multiplier for the period 2023 to 2025 to the Commission approved cost of $25,497,650 in the 2023 FCG Order resulting in an escalated 2025 cost of $28,067,567. That result is $12,062,876 below the 2025 Adjusted Historic Base Year O&M of $40,130,443. That further confirms the 2025 costs are excessive just as Company MFR Schedule C-34 did. Next my calculation applies the 1.2005 Inflation & Growth Compound Multiplier for the period 2023 to 2027 to the Commission approved cost of $25,497,650, resulting in an indicative 2027 cost of $30,610,007. That result is $16,013,416 below the 2027 forecasted O&M of $46,623,423. Clearly the 2027 costs are excessive. This calculation is the more appropriate calculation and indexed comparison because it has as its origin or analytical beginning point the most recent cost approved by the Commission in the 2023 FCG Order that represented the regulator's determination of what level of cost is required to provide customers with safe and reliable service at a reasonable rate.

Q. WHY ARE YOU COMPARING THE COST TO WHAT WAS ALLOWED BY THE COMMISSION IN THE 2023 FCG ORDER?

A. The order established going forward what the Commission determined reasonable for FCG to provide safe and reliable service to customers. Since those costs were an approved base, a comparison of that forecast-to-actual should serve as a measurement tool going forward.

Q. WHY DID YOU MAKE THE COMPARISON TO THE APPROVED COST INSTEAD OF ACTUAL COSTS?

A. Initially, I was not afforded that opportunity as part of discovery for 2023 and even for the forecasted costs for 2022 that were part of Docket No. 20220069-GU. When I requested actual cost information for 2022 and 2023 the Company objected to providing it. After five decades of analyzing costs, I viewed this as a serious and concerning impediment to the discovery process in evaluating a requested increase in rates. The Company subsequently provided some supplemental responses primarily provided by the prior owner. Because the Company took the initial position claiming that FCG's financial historic cost detail was not available, I determined that an analysis based on the approved cost and historic costs from the Annual Reports filed with the Commission would provide the Commission with a more comprehensive analysis in weighing the Company's request.

Q. WAS THIS ISSUE IMPACTING A DETAILED REVIEW OF SUPPORT CREATED BY THE COMPANY?

A. Yes. The Company in responding to discovery objected to providing information prior to November 2023 claiming the information was not available and claimed that "...the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information." The claim of lack of availability and the assertion that the value of such information is lacking in the ability to provide evidence of importance in the current proceeding is biased and disingenuous.

Q. WHY IS THE CLAIM OF AVAILABILITY DISINGENUOUS?

A. It is disingenuous because the transaction should have been seamless to the regulator and customer alike – to the regulator because they have no expectation that there will be a degradation in oversight, and to the customers because they have every expectation that the high level of service quality determined by the Commission will continue.

Q. WHAT DOES THE EVIDENCE SHOW IN THIS REGARD?

A. It shows that there should be no lapse in access to information. The suggestion that prior results of operation and the financial information of FCG is not available ignores the fact that FCG as a Company did not just have its historical financial information evaporate and service levels change simply because the owner at the time rates were set in 2023 decided to sell the Company to Chesapeake three months later. The Company's filing even proves that claim is meritless. For example, the Company used a five-year average to determine the projected bad debt expense it is requesting for recovery, and it has acknowledged that the years 2022 and 2023 are still subject to an IRS audit. I am 100% confident that if the IRS asked to review some costs from 2022 and 2023, that FCG would not claim the information is no longer available or has no

probative value. Another example is the Company in Exhibit ME-3 has historical customer information back to 2003 in calculating the compound multiplier.

On December 8, 2023, and December 13, 2023, Chesapeake filed two letters with the Commission that effectively gave notice (without seeking approval of the acquisition) that a change in ownership had occurred but that the level of service and adherence to the regulations of the Commission and the continuation of the tariffs and name of the Company would continue unchanged. Exhibit HWS-9 at 28, 219. This is confirming evidence that the transaction (that did not need Commission approval, and which was agreed to on September 26, 2023, without the Commission's knowledge) would be seamless to the regulator and the customers alike. This level of continuity should be no different when it comes to access to supporting information. The mere notice of a sale should not create an information void or vacuum that impedes the Commission or intervenors. At this point the Commission has not relieved FCG and Chesapeake of full disclosure obligations or its burden of proof to justify its enormous cost increase. The Commission and customers should be in the same position that they were on November 30, 2023, when it comes to setting future rates.

Q. WHY IS THE CLAIM OF PROBATIVE VALUE BIASED AND DISINGENUOUS?

A. In my decades of reviewing rate requests and discovery I cannot recall a Company deciding recent historical information has no value in evaluating its request for an increase in rates – especially one based on a fully projected test year. Companies may not agree with the process of reviewing historical information and using that

information in evaluating a filing, but to claim the information is of no value is totally absurd and making the unilateral conclusion that it is of no value to intervening parties is not something they can decide. This self-serving claim is simple, unvarnished bias. What makes the claim disingenuous is that I am confident that in evaluating the acquisition of FCG, Chesapeake Utilities Company had to review the historical results of operations, assets and liabilities as part of their due diligence. If CUC wants to claim the information was not reviewed and no due diligence was done, that would be different. The review of that information and having it available would be required to serve as support in evaluating whether synergies can be shown in the future as justification for the acquisition of the Company and for requesting the current significant increase in rates. To the contrary, and as evidence that they in fact had access to this type of historical information, CUC executives bragged to investors that they were achieving or able to "harvest" synergies in 2024, even to the point of claiming they were ahead of schedule. Exhibit HWS-6 at 244. They also made glowing statements about the quality of FCG employees (CUC "very much aligned" with the FCG "organization and culture"), the best practices (using the "best of both" nomenclature) they would mine from Florida Power & Light Company ("FPL")-managed FCG and the matching culture of the FCG workforce. Exhibit HWS-6 at 6, 92, 99, 11.

Adding to the concern is that the Company stated in its response to OPC Interrogatory No. 3-107 (Exhibit HWS-5 at 169) that CUC did not acquire all historical data for FCG at the time of the acquisition and continued stating that they could get some information at an additional cost. This response is perplexing since CUC agreed on September 26,

2023, to pay a premium of $466 million (subject to some true-ups), which raises the question as to how the purchase could include such a price if financial detail was not included. The stated unavailability of cost information was compounded by the claim or insinuation throughout the direct testimony that the legacy FCG systems were less than sufficient, requiring significant additional investments and CUC implying that FCG was not being managed sufficiently. These claims were debunked in depositions and by the statements to investors.

Q. WITH REGARD TO YOUR MENTION OF CUC DUE DILIGENCE AND KNOWLEDGE OF HISTORICAL INFORMATION, DID CUC IMPLY THAT FCG WAS NOT BEING MANAGED SUFFICIENTLY?

A. The Company alluded to that in their testimony and stated so in response to discovery. OPC Interrogatory No. 3-124 (Exhibit HWS-5 at 179) asked if testimony regarding past management and leadership is that FCG would provide better management and leadership than what FCG was receiving under FPL the response was yes. In response to OPC Interrogatory No. 3-128 (Exhibit HWS-5 at 181) the Company claimed that because of the difference in size, CUC management and Board of Directors are able to provide increased experience, understanding and oversight of FCG's business than that provided by FPL.

Q. IS THE PREVIOUS MANAGEMENT OF THE COMPANY SOMETHING TO BE CONSIDERED WHEN ACQUIRING A COMPANY?

A. It is a commonsense consideration. If one was to buy a house that is not properly maintained, he would not pay a premium when it was known that there would be added

costs to make it more efficient and comfortable. The same applies when acquiring a company. Similarly, a buyer would not pay a massive premium for a company if it knows there are weaknesses in operations and systems that will require significant additional acquisition target-specific investments to improve operations including financial and management systems unless it is irrationally assumed the added cost of investment will be rubber stamped by regulators and passed onto customers.

Q. DO YOU CONCUR WITH THE ASSESSMENT BY CUC REGARDING PAST MANAGEMENT AND LEADERSHIP?

A. I have not made any such determination and in fact I question how CUC concluded this. First, in past decisions, the Florida Public Service Commission must have concluded that FCG was provided with proper financial management and services as part of past rate proceedings or the orders issued would have mentioned issues to that effect. Also, the public statements by CUC should be scrutinized for statements to investors and regulators about the quality of FCG operations, award-winning service, high quality FCG employees and benefits that FCG provided to the CUC system. Some of these statements are explored in my testimony as they are contrasted with assertions the Company has provided. I have attached publicly available transcripts of investor presentations that CUC expects investors to rely upon in making financial decisions as Exhibit HWS-6. Statements CUC makes to regulators and customers should be consistent with these investor communications.

Additionally, the determination of a purported need for system improvements appears to surprisingly have been largely made post-acquisition,[3] suggesting there was minimal due diligence performed *prior* to the acquisition.

Notably, when asked in OPC Interrogatory No. 3-129 (Exhibit HWS-5 at 183) for a comparison of administrative and general cost under FPL and subsequent actual and forecasted costs for CUC's cost to perform the transferred functions, the response was "FCG objects to this request to the extent that it seeks information regarding the costs for corporate functions when FCG was owned by FPL that is not readily accessible to FCG and would be unduly burdensome and costly to obtain. Moreover, costs for these services under the prior parent are not relevant, nor likely to lead to the discovery of relevant information in this proceeding." The response also stated that FCG employees were transitioned to shared groups aligned with the goal to perform functions efficiently, effectively and with better governance in the aggregate. Reading these objections, one would have thought that a brand-new company was created on December 1, 2023, instead of the seamless transition described in the December 8 and 13, 2023, representations to the Commission. Exhibit HWS-9 at 28, 219.

[3] CUC CEO made this statement on November 7, 2024, "I think the level of potential opportunity has probably increased a little bit from what we were expecting before we got a good look at the unit… They were seeing that, I think promote the sort of synergies that we were hoping to find along with the growth opportunities that are a little bit more robust probably than we had originally anticipated" Exhibit HWS-6 at 244. This statement seems also to undermine the notion that there were operational issues at FCG since CUC was telling investors that they were seeing a better than expected situation once they looked under the hood.

I find it questionable how CUC could justify the significant premium it paid for FCG when it is unable to provide any tangible assessment of benefits that will result in lower costs for customers and that some cost comparisons were not available to identify even potential synergies. In follow-up, the Company was asked to explain how the Company can prove to the Commission and customers that, under CUC ownership, FCG can provide safe and reliable service in a more cost-effective manner than FPL. The response to OPC Interrogatory No. 7-226 (Exhibit HWS-5 at 224) that the costs incurred by the prior parent for safe and reliable service is irrelevant. The response continued by referring to MFR Schedules C-34 through C-38 as the required benchmarking detail. As discussed earlier MFR Schedule C-34 proves the 2025 costs are excessive and the increase is not justified. Also, as discussed earlier, Exhibit HWS-4 refutes the alleged justification.

Q. WHY IS THE PAYMENT OF AN ACQUISITION PREMIUM EVEN RELEVANT IF CUC IS NOT ASKING FOR RECOVERY OF THE PREMIUM?

A, Although the request for specific recovery of that premium is not included in the current request, I believe the recovery of significant costs related to the transaction in the form of transaction costs, lost customer-provided tax benefits and much higher debt costs are embedded in the significant cost increases and significant investments that FCG is claiming are required. Recovery of those cost increases and impacts is being requested from customers in multiple forms as I discuss in my testimony, along with significant investments in at least one system that was a little over two years old when the Commission previously determined it to be sufficient for safe and reliable service while

owned by FPL and assigned it a 20-year life. See, for example, Exhibit HWS-8, pages 3, 6.

Q. WHAT IS THE INCREASE IN SPECIFIC COSTS THAT YOU FIND AN ISSUE AND WHY ARE THE INCREASES CONCERNING?

A. According to the 2023 FCG Order, the approved affiliate costs were $2,477,003, and the current request includes an ask for $27,436,036. The payroll expense approved in Docket No. 20220069-GU was $10,598,909, excluding incentive compensation, and the corresponding 59.6% increase in the payroll ask in this case is $16,914,137. There are also concerns with costs like incentive compensation costs, pension and benefits, injuries and damages and others, all of which I will discuss in more detail later in my testimony. As I mentioned earlier, an analysis comparing different cost are detailed in Exhibit HWS-3. This comparison is twofold. Page 1 provides a comparison of what was allowed under the 2023 FCG Order to subsequent years' actual cost and the forecasted cost in this proceeding. Page 2 is a summary of actual costs, by account, from 2021 to 2025 as reported in the FCG annual reports filed with the Commission with a comparison to the same costs for 2027 by account as presented in the Company's request. While the level of increase is concerning, by itself, the fact that this is occurring on the heels of the acquisition by CUC is in my opinion a serious issue. With an acquisition price as significant as what CUC paid, one would have hoped that the Company performed a thorough due diligence and saw opportunities for cost improvements and cost synergies to pass through to the customers. Instead, the filing demonstrates a significant increase in costs being forecasted and even spent in 2024 and 2025. All of this occurs against a backdrop of the enormous $466 million premium

paid to acquire FCG being carried on the books of FCG and ultimately CUC. The direct cost of this acquisition premium cannot be justified for recovery from FCG customers in this proceeding—if at all. The incidental costs of acquisition cannot be justified if the acquisition premium cannot be. The mere incurrence of these costs has placed enormous pressure on CUC to squeeze a variety of corporate costs out of Florida customers using this rate case as the vehicle. The absence of cost reductions or synergies is a concern, as these costs seem to be going in the wrong direction—up instead of down.

Q. WHY IS THERE AN EXPECTATION FOR COST REDUCTIONS?

A. As indicated, the Company paid a significant premium for FCG assets, and it would be a commonsense expectation that in an attempt to recoup that premium there would be cost savings generated. A measurement tool for evaluating whether synergies have been achieved and will continue to be achieved involves comparing the costs under CUC's management to the costs under FPL's management. However, it appears one avenue for recovery of the premium is increasing costs and passing that increase on to customers instead of synergies. The Company was requested to identify cost reductions in 2024 and 2025 from synergies that were achieved since the acquisition. The response stated that operational costs for 2024 do not represent a good baseline for evaluating savings or synergies because numerous tasks were performed, in whole or in part, by FPL, under the Transition Services Agreement ("TSA"). The response continued that 2025 would be a more realistic starting point to understand CUC's operating costs to run CUC because 2025 was the first year in which CUC operated FCG with minimal services provided under the TSA with FPL. Finally, the response stated that synergies

and operational efficiencies are often long term rather than short term, that FCG does not have a comprehensive summary of cost reductions and that CUC expects further synergies and benefits as operational experience with FCG matures.[4] There are several problems with this response. The primary one is one of credibility.

Q. PLEASE EXPLAIN WHAT YOU MEAN ABOUT THE PROBLEM OF CREDIBILITY.

A. In sharp contrast to what the Company is telling the Commission and customers, the management of CUC has indicated to investors that they were achieving synergies at a higher rate than expected as early as the first quarter of 2024 – or within 180 days of taking over FCG. In the same third quarter of 2024 earnings review call with investors, CUC bragged that they were "also seeing some operational synergies that we are beginning to harvest, frankly." Exhibit HWS-6 at 244. As early as first quarter of 2024, the CUC management was crowing to investors that "several FCG management employees returned to their former NextEra positions and we have been able to absorb the jobs within our existing management team." Exhibit HWS-6 at 6. This theme continued in the second quarter of 2024 when CUC executives publicly said "[w]e remain intently focused on achieving synergies." Exhibit HWS-6 at 92. These statements severely undermine the basis for actually adding extra layers of payroll, O&M, and executive management costs, including incentive compensation. In fact, the investor presentations over the first five quarters of CUC's ownership of FCG is stuffed with representations of efficiencies being achieved or sought. CUC even discusses that

[4] OPC Interrogatory No. 1-13 (Exhibit HWS-5 at 25).

it "was in the process of leveraging the Florida City Gas after hours call center for our whole enterprise which will standardize and enhance the customer experience." Exhibit HWS-6 at 96. The executive team also touted that there were "a lot of commonalities to our approaches and cultures and our teams have been really engaged to learn from each other." Exhibit HWS-6 at 6. In addition to undermining any notion that there was a service deficiency at FCG, the milking of the FCG operations by CUC would indicate implicit efficiencies that seem to be ignored in the development of costs for this rate case. The discovery I have reviewed seems to deny the very existence of these synergies. CUC statements in the first quarter of 2024 that management "remain intently focused on achieving synergies, optimizing operations across the enterprise, and accelerating capital investment," should cause the Commission to take a hard look at how the customers of FCG are being used for shareholder gain. HWS-6 at 92. Perhaps the real question ought to be whether the customers are being ***abused*** from a ratemaking standpoint. At a minimum, these management statements required the full and timely access to analytical tools to compare expenses of historical periods to ferret out cost anomalies that could indicate efficiencies or even the masking of them.

Q. WHAT IS ANOTHER PROBLEM WITH THAT RESPONSE?

A. That response supports the need for historical cost details for the years 2021, 2022 and all of 2023, so a comparison of FCG costs incurred under CUC to costs incurred under FPL could be compared and evaluated. The operations in 2024, according to the response, are not a good baseline—and that may be partially correct since costs may include impermissible transition costs that are shareholder responsibilities and overstate expenses. That possibility makes the comparison to historical costs under FPL

even more important. Clearly, the suggestion that a comparison to 2025 cost does not apply a commonsense approach to measurement since those costs along with 2026 and 2027 are completely under CUC management and the goal is to determine whether the change in management is providing more cost effective service as the result of the acquisition.

Q. WHAT DID YOU DO TO EVALUATE THE VARIOUS COSTS WITHIN THE COMPANY'S REQUEST?

A. To evaluate the current request, I relied on information from Docket No. 20220069-GU discovery, the Company's filing, discovery responses and financial information filed with the Commission. Since I provided testimony in Docket No. 20220069-GU on behalf of the OPC, I retrieved documentation to at least get actual information for 2021 (and earlier) and forecasted information for 2022 and 2023 along with discovery responses.

Q. DID THE COMPANY SUBSEQUENTLY PROVIDE THE INFORMATION FOR 2021, 2022, AND 2023 AS REQUESTED?

A. Some information was provided for 2022 and eleven months of 2023 in some supplemental responses with the reference: "(as provided by prior owner)." The delay in receiving the information had impacted the review process. As for 2021, I relied on information supplied in Docket No. 20220069-GU as suggested by the Company in their evasive initial responses to our requests.

III. ORGANIZATION OF TESTIMONY

Q. HOW WILL YOUR TESTIMONY BE ORGANIZED?

A. In Section IV, I present the overall financial summary for the base rate change, showing the revenue requirement increase (decrease) for the test year ended December 31, 2023, as recommended by OPC. In Section V, I discuss the issue with the Reserve Surplus Amortization Mechanism ("RSAM"). In Section VI, I discuss my proposed adjustments to rate base. In Section VII, I discuss my adjustments to operating income. Exhibit HWS-2 presents the schedules and calculations in support of the test year ended December 31, 2027, revenue requirement. Exhibit HWS-3 and Exhibit HWS-4 provide analysis of historic costs and evidence showing the cost requested do not meet a benchmark requirement showing costs are reasonable and justified, respectively. Exhibit HWS-5 is a compilation of discovery responses that I rely on and reference in my testimony. Exhibit HWS-6 is a compilation of CUC earnings call transcripts and associated earnings presentations to investors from 2023, 2024, and 2025. Exhibit HWS-7 contains the Earnings Surveillance Reports ("ESRs") that FCG filed with the Commission from 2023 through the present and includes the forecasted ESRs for the same period. It also includes the Annual Reports that FCG filed with the Commission for the years 2021 – 2025. Exhibit HWS-8 contains Order No. 2020-0489-PAA-GU and an associated response to a Staff Data Request relating to then brand new and later prematurely abandoned Starnik customer information system. Exhibit HWS-9 contains miscellaneous documents related to the 2023 CUC acquisition of FCG and the CUC Team Incentive Plan ("TIP").

IV. OVERALL FINANCIAL SUMMARY

Q. WHAT IS THE DECEMBER 31, 2027, BASE RATE REVENUE REQUIREMENT DEFICIENCY OR EXCESS FOR FCG?

A. As shown in Exhibit HWS-2, Schedule C, the OPC's appropriate adjustments in this case result in a revenue decrease for FCG for the December 31, 2027, test year of no more than $5,956,640. This is a difference of $52,827,572 from the proposed base rate revenue increase of $46,870,932, net of the $16,402,944 transfer of SAFE revenue requirements as requested by FCG in its filing.

Q. WHAT IS INCLUDED IN EXHIBIT HWS-2 THAT YOU PREPARED IN SUPPORT OF YOUR TESTIMONY AS IT PERTAINS TO THE DECEMBER 31, 2027 TEST YEAR.

A. Exhibit HWS-2 consists of Schedules A, A-1, B, B-1 through B-5, C, C-1 through C-15, and D.

Q. WHAT IS SHOWN ON SCHEDULE A?

A. Schedule A presents the revenue sufficiency for the December 31, 2027 test year, giving effect to all of the adjustments I am recommending in this testimony, along with and including the impacts of the recommendations made by OPC witnesses Chris Walters and Lane Kollen.

Q. WHAT IS SHOWN ON SCHEDULE B?

A. Schedule B presents OPC's adjusted rate base and identifies the adjustments impacting rate base that I am recommending in this case. Schedules B-1 through B-5 provide supporting calculations for these adjustments.

Q. WHAT IS SHOWN ON SCHEDULE C?

A. OPC's adjusted net operating income is shown on Schedule C. The adjustments to net operating income are listed on Schedule C, Page 2 of 2. Schedules C-1 through C-15 provide supporting calculations for these adjustments.

Q. WHAT IS SHOWN ON SCHEDULE D?

A. Schedule D presents the capital structure and overall rate of return as recommended by OPC witness Chris Walters.

Q. WOULD YOU PLEASE DISCUSS EACH OF YOUR SPONSORED ADJUSTMENTS TO FCG'S FILING?

A. Yes, I will address each adjustment I am sponsoring below.

V. RESERVE SURPLUS AMORTIZATION MECHANISM

Q. WHY ARE YOU ADRESSING THE RESERVE SURPLUS AMORITZATION MECHANISM?

A. The RSAM was designed to allow the Company to adjust its reported, achieved return to, under normal operations and/or extenuating circumstances, achieve its target return

within the earnings range approved by the Commission. The RSAM was never intended to be utilized to adjust earnings for costs incurred by the Company that are beyond normal operating costs and for below-the-line costs. For example, in response to OPC Interrogatory No. 1-44 (Exhibit HWS-5 at 104), the Company identified $3,836,389 of non-recurring costs related to the integration of FCG to CUC and $1,761,342 of costs related to the discontinuance of FCG's legacy system for a total of $5,597,731. Any adjustment to the RSAM associated with these costs driving earnings to a level requiring the utilization of the RSAM would be inappropriate.

Q. ARE THERE OTHER CONCERNS WITH THE UTILIZATION OF THE RSAM DURING 2023 AND 2024?

A. Yes. The $25,000,000 of RSAM Reserve Amount utilized consisted of essentially three adjustments. In reviewing the annual reports that I have included in Exhibit HWS-7 it was noted that depreciation expense was reduced in 2023 and 2024 by $5.1 million and $15.5 million, respectively. This was determined by comparing the accrual to accumulated depreciation for the respective years and the depreciation expense for the year. To the extent any of the above costs or other TSA costs were charged to O&M and in turn reducing the return in either year the utilization is considered inappropriate. The third charge to the RSAM was labeled as an adjustment of $4,414,128[5] in 2023 and it was noted that a credit was made to the goodwill in 2023 for a similar amount. To the extent any costs associated with the acquisition and/or the transition were

[5] This is the portion of the $25,000,000 Reserve Amount the Commission authorized FCG to amortize, that was amortized or "used" by FCG under FPL ownership. Transcript of July 7, 2026, deposition of Joanah Baugh at 88-89.

charged above the line contributing to FCG's perceived need to utilize the RSAM (and increase rate base for the years 2023 through the 2027 test year and beyond) to achieve a higher return those costs should be reflected below the line and returned to customers.

Q. CAN YOU PLEASE TELL US MORE?

A. Yes, I would be happy to do so. One of the overall themes of this case is that CUC agreed to acquire FCG in what appeared to be a very accelerated negotiation.[6] Based on the discovery conducted so far, CUC by all appearances performed very little due diligence—especially about the level of service quality of a company that had three months earlier received the same service quality stamp of approval that CUC's FPUC gas company had received in March 2023—and in a period of a mere 103 days, agreed to pay a jaw dropping $923 million for a company whose rate base or net book value was established at $487.3 million by the Commission in that same order. Public evidence indicates that as early as November 9, 2023, CUC notified investors that it had identified FCG acquisition transaction costs estimated at $18.75 million that were expected to be incurred in conjunction with the purchase. Exhibit HWS-9 at 7, 12.

In February of 2024, CUC reported it had booked $10.6 million of transaction costs that were incurred in 2023, with $7.7 million being incurred in the third quarter of 2023 and $6.45 million of that $7.7 million being attributed to the "Regulated Energy Segment" of the CUC business and recorded in the third quarter of 2023. Exhibit HWS-

[6] FCG witness and Senior Vice President Michael Galtman testified that based on memory he recalled that the discussions with FPL began in the "spring, early summer' of 2023. Deposition of Michael Galtman taken on June 29, 2026, at 134.

9 at 7, 12. FCG reported in discovery that in 2024 it had incurred $3,836,389 of acquisition costs. When asked, the Company indicated that *none* of these transaction or acquisition costs had been excluded from being recorded and thus has been reported to the Commission on the regulated books of FCG above-the-line.[7] I confirmed this by reviewing the 2023 and 2024 Annual Report to the Commission. Exhibit HWS-7 at 642, 711. I did not observe any significant amounts reported below the line. In the 2024 Annual Report to the Commission, FCG also expressly stated that acquisition costs had reduced the achieved ROE in 2024. Exhibit HWS-7 at 727, 791.

Q. WHAT DOES THIS HAVE TO DO WITH THE RSAM?

A. I am glad you asked. The RSAM is a mechanism under which the Commission allowed FPL through FCG, as the applicant/subsidiary in the last rate case, to create a manufactured depreciation surplus of $25 million from which FCG could amortize available credit balances in the depreciation reserve to the income statement (by crediting depreciation expense) in order to enhance achieved ROE up to the top of the authorized range of 10.5%. The amortization to income meant that a corresponding debit—or increase in rate base—would have to be made to the depreciation surplus otherwise known as the Reserve Amount. Given the magnitude of the transaction costs that were reported to have been recorded on FCG's books for Florida regulatory purposes, and the fact that FCG recorded $21 million of the available $25 million Reserve Amount they "bought" (without notice to or approval from the Commission) in the first 13 months of ownership, it is presumptive that at least the $10.2 million of

[7] Transcript of July 7, 2026, deposition of Joanah Baugh at 85.

transaction/acquisition costs were effectively transferred to rate base by operation of the RSAM.

Q. SO WHAT? WHY SHOULD THOSE 2023 AND 2024 TRANSACTIONS MATTER IN 2026 WHEN THERE IS A 2027 TEST YEAR?

A. There are several reasons why it should matter. First, customers should not have to pay the transaction costs for the "privilege" of having their perfectly good monopoly natural gas supplier to be sold in a transaction that is completely outside the purview of the Commission and to which they have no say or point of entry to challenge. Second, since there is no point of entry and CUC—through FCG—is not here seeking approval of the transaction or the $445 million[8] acquisition premium or "goodwill," the Commission should not take any steps to give the Company "backdoor" or indirect approval of the deal that might prejudice a future proceeding where FCG seeks to add the massive amount of Goodwill to its rate base and ask customers to pay for it. This is a very real concern because CUC told investors in 2024 that it fully intended to seek approval to pass through some or all of the acquisition premium to customers. Exhibit HWS-6 at 16. The evidence in the public record indicates that CUC bought FCG for the benefit of its corporate growth strategies on behalf of shareholders[9] and stands to realize

[8] Response to OPC Production of Documents Request No. 8-249b, stated that the transfer of assets and related goodwill to FCG affiliate Peninsula Pipeline Company reduced the original $466 million goodwill by $20.410 million. The resulting $445 million is the portion that remains on the books of FCG (Exhibit HWS-5 at 300).

[9] Exhibit HWS-6 at 6: ("significant opportunities to drive growth"), 11: ("we are really excited about the expected capital investment opportunities created"), 17: ("One of the things that we are really excited about by this transaction are the opportunities that we see in terms of new investments so out of the gate, that's our focus."), 62: ("the FCG acquisition …will drive significant earnings growth").

significant tax benefits at the corporate level as reflected in an exhibit to witness Galtman's deposition.[10]

A good example of this is the statement from the CEO on February 21, 2024:

> Of course, our most significant growth effort in 2023 was the successful completion of the Florida City Gas acquisition. It was a strategic move for us, more than doubling our footprint in a very attractive market where we have already operated for 40 years. We expect the transaction to drive significant incremental earnings growth well into the future…

Exhibit HWS-6 at 99.

Third, the RSAM was clearly not established by the Commission or intended for use by a *purchasing utility* for dumping onto customers the costs of lining its shareholders' pockets and bolstering earnings per share, margin, total shareholder return, growth and investment opportunities and other corporate benefits. Any increase to rate base caused by the use of the RSAM to transfer recovery of the shareholders transaction costs to become the responsibility of past, current, or future customers, should be expressly disallowed. In fact, it is my opinion that any costs that are associated with the transaction like those incremental or "but for" costs that are addressed in the testimony of OPC witness Lane Kollen should also not be allowed to increase rate base through the use of the RSAM.

Q. WHY DO YOU ASSERT THAT THE COMPANY MIGHT SEEK RECOVERY OF THE MASSIVE GOODWILL IN THE FUTURE USING THE RECOVERY

[10] Late-filed Exhibit 3 to the deposition of Michael Galtman taken on June 29, 2026.

OF TRANSACTION COSTS BY MEANS OF THE RSAM AS APPROVAL OF THE ACQUISTION?

A. On February 21, 2024, CUC informed investors that it was intent on seeking recovery of the goodwill from customers. The CEO stated, "And so really for us, our focus on right now is trying to evaluate when will be the appropriate time that we may seek to go in and actually tried to get a portion of the goodwill as an acquisition premium full recovery there. And so that's really the focus right now and integrating the operations." Later, in that same meeting, the CUC's general counsel was more explicit:

> I mean, I would remind folks that it took us a little while to gather the savings data that's really necessary in Florida to meet the FIVE factor tests or demonstrating that we can recover parts and pieces of the premium without adversely impacting rate payers. So that's usually a year-long process, and then we would likely look to recover something, we'll begin a filing process potentially next year. ***There may be some other sort of small-scale things we can do along the way.*** But our primary focus, frankly, is growing through all of that, and we think we've got a pretty good plan in place to do it.

(Emphasis added.) Exhibit HWS-6 at 16.

The reference to "some sort of small-scale things we can do along the way" is strongly suggestive that slipping these transaction (and other "but for") costs onto customer bills could be part of a "pretty good plan" that CUC has had in place. Furthermore, the day before taking ownership of FCG, on November 30, 2023, Chesapeake produced a memorandum entitled "Accounting for the Acquisition of Florida City Gas." The memo identified that the acquisition was "[e]xpected to support and extend CUC's

long-term EPS guidance and provides approximately $500 million in investment opportunity over five years." Against this background, CUC stated that "as appropriate, the Company will consider opportunities for recovery of the goodwill as it integrates FCG into its existing operations and considers the criteria for such recovery as defined by the Florida PSC." Exhibit HWS-9 at 16, 17. Clearly this deal was a shareholder goldmine and holds the potential for infliction of further pain on customers on the horizon.

By all appearances there is a plan to seek recovery in the future. It is obvious that the reason goodwill recovery is *not* included in this request is because the increase in rates associated with the increase in O&M expense and investments in plant at the parent level as well as at FCG is already significant, along with the costs that witness Kollen has identified. I am concerned that the approval in this case of the use of the RSAM to recover transaction costs and integration costs would be part of a foot in the door to claim that the Commission effectively approved the acquisition so recovery of the massive premium paid could be requested in the future. Disregard of the errors identified by witness Kollen related to the increase in the WACC would also be a part of that backdoor approval, if they are not corrected. The Commission should not allow this to happen.

Q. WHY DO YOU SAY THAT THE RSAM CANNOT BE USED TO TRANSFER RECOVERY OF THE SHAREHOLDERS TRANSACTION COSTS TO THE RESPONSIBILITY OF CUSTOMERS?

A. Aside from the fact that these acquisition costs provide no benefit to FCG's customers, the RSAM was never intended to be used for this purpose. I point to passages in the 2023 FCG order that established the RSAM. As I read the plain words in the order, the Commission was intent on letting FCG use the RSAM to manage the daily fluctuations in revenues and expenses and interest rates and inflation in order to stay out for four years and to avoid as much as $2 million in rate case expense. When the Commission awarded the RSAM to FCG it was aware that the witness supporting it was from the parent FPL. It was also aware that the two FPL witnesses in the case denied that FCG was for sale. In my opinion the Commission clearly did not intend for the RSAM to be used by a **purchaser** of FCG to use it to transfer the costs of any sale (which was denied to be underway) to customers. The enormous transaction costs exceeding $10 million, cannot reasonably be classified as part of "daily fluctuations." The Company has acknowledged in discovery that the CUC purchase was the largest ever acquisition by the Company and was not a common occurrence. Specifically, the language at pages 16-17 in the order, which I have **bolded** for clarity, reads as follows:

> We also recognize that there was competing testimony about whether the RSAM should be approved in this case and whether it will benefit customers. We are persuaded by the testimony that **the RSAM would allow FCG to manage its day-to-day fluctuations as well as take on the risk of both actual current as well as potential future increases in interest rates and inflation.** FCG proposes having a Reserve Surplus amount of **$25 million available for managing these daily fluctuations in revenues and expenses**, but FCG did not propose any treatment for the remaining reserve surplus of $27.1 million.
>
> ***

> While there was testimony offered that the RSAM would shift risk to customers, FCG offered evidence that its rate plan with the RSAM would result in fair, just, and reasonable rates. By approving the proposed RSAM, we believe FCG is in the best position to maintain its ROE within the approved range and thus reduce the likelihood of additional rate increases in the near future. As we expressed at our Agenda Conference on April 25, 2023, we are mindful of today's economy and the effects of inflation on customers and their utility bills. FCG offered testimony that adopting **the proposal allows FCG to manage typical day-to-day fluctuations associated with running a utility business**, while also having to absorb potentially higher costs resulting from inflation and rising interest rates.
>
> ***
>
> **We find** the RSAM **will** result in a reduction of revenue requirement, save customers money on their utility bills, and **give FCG the ability to manage its day-to-day business fluctuations, and allow FCG to take on the risk of increases in interest rates and inflation.** FCG did not propose any treatment for the remaining reserve surplus of $27.1 million.

The plain and obvious reading of the order makes it clear that the Commission, in making its decision over the objection of the OPC, did not contemplate that the RSAM would be used in an abusive way, by an entity that was not even a participant in the 2022 rate case, to transfer these shareholder costs to customers.

I am also aware that the OPC even asked the CUC witnesses in the FPUC docket that occurred around the same time if they were involved in any merger activity and it was denied. Clearly the Commission had no reason to believe that the RSAM would be misused in this way. After the completion of merger was announced, the OPC submitted a letter asking the Commission to consider revisiting on its own motion the FCG and FPUC rate cases in light of the fact that the merger occurred within the test year of each company. Exhibit HWS-9 at 221, 225. No action was taken and that silence may have emboldened CUC to attempt to put a "good plan in place" to do some "other sort of smaller-scale things" to impose transaction costs on FCG customers while the costs were being treated essentially as sunk and ignored for financial reporting purposes in investor filings. See, for example, Exhibit HWS-6 at 3,8,34,35,36,59,63,67.

Q. WHAT SHOULD THE COMMISSION DO TO ADDRESS THIS SITUATION?

A. The Commission should recognize how CUC has utilized the RSAM to recover costs that are not normal operating daily fluctuations in revenues and expenses and interest rates and inflation. Customers must be protected from having to pay for the cost of the acquisition and the integration cost. Importantly, the Commission should not give implicit or tacit advance approval to a future request for an acquisition adjustment, The shifting of those dollars through the RSAM is not consistent with the intent of the RSAM and therefore the wrong must be corrected by returning those dollars to the benefit of the customers.

Q. HAS THE COMMISSION PREVIOUSLY ADDRESSED ACQUISTION AND CONVERSION COSTS?

A. Yes. On pages 19 and 20 of Order No. PSC-1992-0807-FOF-WS, the Commission found the following with (bold and underline emphasis added):

> It appears that the premise for TVU's seeking recovery of the amortized acquisition and conversion costs is Mr. Ustica's statement that every legitimate business expense should be recovered from the ratepayers. We disagree with this premise. Although an expense may be legitimate, the expense may provide no benefit to the ratepayers and should, therefore, not be borne by them**.** For instance, the ratepayers should not be forced to pay for expenses associated with utility assets not used for the provision of utility services.
>
> We believe that the costs of acquiring the systems and the costs to convert TVU's corporate status should be borne by the stockholders, not the ratepayers. The evidence in the record supports the conclusion that these costs benefit the shareholders, but the record is silent as to any benefit these costs have to the ratepayers. In all likelihood, the organization structure change would only serve to increase the costs to the ratepayers.
>
> In consideration of the foregoing, we have **reduced** water and wastewater systems' expenses by $1,369 each to remove amortized acquisition and conversion expenses, as such expenses are not appropriate for recovery above-the-line.

Q. HOW CAN THE COMMISSION ADDRESS THIS ISSUE SINCE THE RSAM NO LONGER EXISTS?

A. The Company can be ordered to establish a regulatory liability called an RSAM Correction Liability that can be amortized over a period of two to five years, offsetting revenue requirements on a fixed, straight-line basis. This would not function as an RSAM the Company can utilize to manipulate earnings to above the bottom of the approved return range as companies have done, but would be an actual return of the funds wrongly charged to operations above the line that were then added to rate base by the RSAM. The RSAM Correction Liability can be established by charging the integration costs and acquisition costs below the line as they should have been. This would also reverse the improper increase to rate base that occurred through reduced accumulated depreciation balance.

Q. DOES THE RSAM STILL EXIST?

A. No. The Company has made public statements that the RSAM has been "completed" and "completely utilized" and thus no longer exists. Exhibit HWS-6 at 320, 362. More importantly, the depreciation study that the Commission approved in Docket No. 20250035-GU established depreciation parameters under the assumption that the artificially created Reserve Amount (depreciation surplus) was corrected and only identified a current surplus of about $6.8 million, as CUC has reported to investors. Exhibit HWS-6 at 602.

Q. WOULD ESTABLISHMENT OF THE RSAM CORRECTION LIABILITY BE RETROACTIVE RATEMAKING?

A. No. Rates were established prior to this accounting for the acquisition and this would be no different than the Company recording an addition to plant between rate cases that is ultimately deemed imprudent and excluded by the Commission from recovery. This is unusual but it is not retroactive ratemaking and is something the Commission has authority to do. Nothing in the RSAM authorization indicated that the Company could charge below-the-line costs above the line. It was not designed to be a "gotcha" for customers.

Q. WHAT AMOUNT OF PREVIOUS COST EXPENSED ARE YOU RECOMMENDING BE INCLUDED IN THIS RSAM CORRECTION LIABILITY?

A. According to the CUC Fourth Quarter & Full-Year 2024 Earnings Call Presentation at page 33 the Company has indicated FCG transaction and transition expenses were $10.6 million in 2023 and $2.9 million in 2024 for a total of $13.5 million. Exhibit HWS-6 at 356. As stated earlier there are no below the line costs reported in the Annual Reports of this magnitude so it is unlikely that the costs were not charged to customer expenses. Company witness Baugh stated that the $3,836,389 of integration costs recorded in 2024 and identified in OPC Interrogatory 1-44 (Exhibit HWS-5 at 104), were "acquisition" costs and that the term "integration" and "acquisition" costs were interchangeable. For 2023, CUC identified $6.456 million of transition costs that were charged to the "Regulated Energy Segment." Exhibit HWS-9 at 70.

Q. HAVE YOU CONSIDERED WHETHER THE ERRORS IDENTIFIED BY WITNESS KOLLEN THAT OVERSTATE THE 2027 TEST YEAR WACC COULD APPLY TO COSTS THAT FCG REFLECTED IN THE ESRS IN 2023 AND 2024 AND, IF SO, SHOULD THERE BE AN ADJUSTMENT TO YOUR REGULATORY LIABILITY FOR THAT EFFECT?

A. Yes. Theoretically any such improper costs that were reflected as a reduction in achieved rate of return in the first 13 months of CUC ownership may have been transferred to rate base through the RSAM. The loss of deferred taxes increases the return customers are asked to pay, in addition to the increase in the new debt rate as compared to the rate under FPL. A high level estimated impact on the change in WACC was calculated by including the ESR-reported September 2023 deferred income tax balance in the capital structure as of December 2023 and December 2024. The source ESR documents for this analysis are contained in Exhibit HWS-7 at 26, 55. The change in WACC is then applied to the adjusted capital structure to estimate the revenue requirement impact for those years.

The second high level calculation reflects the impact of substituting the pre-acquisition FPL long term debt rate of 3.36% and reflecting the impact of that in the capital structure when compared to the WACC as reported in the December 2023 and 2024 FCG ESRs by CUC. Exhibit HWS-7 at 26, 55. Again the difference between calculated return is applied to the adjusted FCG ESRs reported capital structure. In Exhibit HWS-2, Schedule B-5, Page 2, I have estimated that an additional $10,996,455 should be added to the RSAM Correction Liability. However, I have only added $5,483,228 (50%) to the proposed RSAM Correction Liability and flowed it through my schedules

as described in this section. While I should have adjusted the full amount, I have recommended the 50% for an equal sharing between customers and shareholders to reflect consideration of impartiality despite the Company's one-sided approach in this filing.

Q. ARE YOU MAKING AN ADJUSTMENT TO THE COMPANY'S REQUEST?

A. Yes. My Schedule Exhibit HWS-2, Schedule B-5 shows the effect of the straight line amortization of this RSAM Correction Liability over 4 years reflecting an annual amortization credit to expense of $4,745,807. The rate base impact is a credit of $16,610,324.

VI. RATE BASE

A. AGL Plant Acquisition Adjustment

Q. DOES THE COMPANY'S REQUEST INCLUDE COSTS ASSOCIATED WITH A PLANT ACQUISITION ADJUSTMENT?

A. The Company has not directly included the acquisition adjustment (and associated amortization) of the $466 million premium paid to acquire FCG being carried on the books of FCG and ultimately CUC. FCG is seeking to recover some of the acquisition and transaction-related incremental costs and cost impacts in other portions of this case. Elsewhere in my testimony, along with OPC witness Kollen, we address the need to hold customers harmless from being saddled with these costs.

The Company has included in rate base $21,656,835 in utility plant and a credit of $16,362,943 in accumulated amortization for a net rate base amount of $5,293,892. This $21,656,835 was included in FCG's filing in Docket No. 20060657-GU and approved in Order No. PSC-2007-0913-PAA-GU issued in 2007.[11] According to MFR Schedule G-2, Page 24 of 31, the annual amortization expense included in the Company's request is $721,895.

Q. WHAT IS FCG'S JUSTIFICATION FOR INCLUDING THE ACQUISITION ADJUSTMENT IN RATE BASE?

A. The purported justification for allowing the excess of price paid in an acquisition over the book cost of property (essentially goodwill) in rate base and rates in Florida exists is if a company is able to "continually" demonstrate during its ownership that customers will derive certain benefits attributable to the acquisition. To accomplish this, the Company must meet five factors to be included in rate base. The factors are:

1. Increased quality of service;
2. Lower operating costs;
3. Increased ability to attract capital for improvements;
4. Lower overall cost of capital; and
5. More professional and experienced managerial, financial, technical and operational resources.

The allowance of the acquisition adjustment that FCG proposes to continue including in rates in this case was based on the meeting of those factors when Florida City Gas was acquired by AGL Resources. Inc ("AGLR"). The achievement of those factors is no longer relevant or applicable since the Company was effectively acquired by

[11] FCG response to OPC Interrogatory No. 3-129 (Exhibit HWS-5 at 183).

Southern Company as part of the merger in 2016 and was subsequently acquired by NextEra and FPL in 2018 and now is part of CUC through an acquisition in 2023.

Q. YOU STATED THAT THE ACQUISITION ADJUSTMENT WAS APPROVED IN DOCKET NO. 20060657-GU. WAS THE CONTINUED RECOVERY APPROVED IN DOCKET NO. 20170179-GU?

A. No. That case was settled between intervenors and the representatives of its owners at the time – the Southern Company. The Commission Staff asked back then if it was the intention of the parties to address the acquisition adjustment and whether the parties agreed to stipulate their approval. The Company responded by stating that settlement was a "black box" settlement, the agreement did not specifically disallow or adjust it and no intervenor party submitted testimony or exhibits recommending any adjustment.[12]

Q. DESPITE THE "BLACK BOX" SETTLEMENT, DID THE ACQUISITION ADJUSTMENT CONTINUE TO BE RECOGNIZED IN RATE BASE?

A. Yes. In the 2023 FCG Order, the Commission concluded that "[w]e are persuaded by the testimony of FCG's witnesses and find that the amortization of the *acquisition adjustment shall continue until the next general rate case*, at which time FCG will have to support its further continuance under the five factors this Commission has historically reviewed when considering acquisition adjustments for natural gas

[12] Company response to OPC Interrogatory No. 5-159 in Docket No. 20220069-GU (Exhibit HWS-5 at 306).

utilities."[13] That conclusion specifically allows for a "continuous" review and evaluation as to whether the requirements for including the cost in rates are being met. As noted above, the *net* amount of $5,293,892 is included in the test year rate base as is the $721,894 amortization expense. FCG seeks to recover these costs from customers.

Q. DID YOU ARGUE IN DOCKET NO. 20220069-GU THAT THE CHANGE IN OWNERSHIP FROM SOUTHERN COMPANY TO NEXTERA ENERGY/FPL AFFECTED THE BASIS FOR CONTINUED RECOGNITION OF THE ACQUISITION ADJUSTMENT?

A. Yes. And while the Commission determined that amortization should continue, they did not opine on the five factor requirement in that case and stated that it would be evaluated in the next rate case. A change in ownership like this one, in my opinion, extinguishes the acquisition adjustment that was recorded on the prior owner's books.

Q. WAS THE DECISION APPEALED TO THE SUPREME COURT OF FLORIDA AND UPHELD?

A. It was. In my testimony in Docket No. 20220069-GU I referred to the Florida Public Service Commission's recognition in Order No. PSC-2000-1165-PAA-WS and Order No. PSC-2005-1242-PAA-WS that acquisition adjustments do not survive subsequent purchases of a utility's assets. The Supreme Court indicated that the argument did not

[13] It is my understanding that the OPC challenged that inclusion in the Florida Supreme Court as being contrary to precedent and policy. On June 4, 2026, the Court denied the OPC's appeal and said essentially that including the acquisition adjustment in the 2023 Order was within the Commission's discretion and was supported by the evidence. As I understand the opinion, the Court did not say that the Commission was required to make the adjustment.

apply because water and wastewater utilities are different from gas utilities and the orders are not clear as whether they were intended to apply universally to all utilities. The Court rejected the claim by the OPC that continued recognition was not supported by competent, substantial evidence because the FCG witness claimed it was and further that part of that FCG witness's claim was the decisions referenced by the OPC were not gas utility decisions. Also, as part of the Court's rejection of the OPC appeal, there was a specific reference to the Commission stating the amortization shall continue until the next general rate case. While I am concerned that the rationale provided perhaps did not reflect a full understanding of the issue, it does serve as a basis for future consideration of whether the cost should continue to be included in base rates. One aspect of this concern is found in the Court's decision observation that the Commission does not have an acquisition adjustment policy applicable to gas utilities. Even so, the Commission clings to the five factor rationale as policy.

Q. HOW DOES THE DECISION SERVE AS A BASIS FOR CONSIDERATION IN THE COMPANY'S CURRENT REQUEST?

A. The Commission and the Supreme Court both referenced that the amortization shall continue until the next general rate case. Neither decision stated the amortization shall remain in perpetuity.

Q. **DOES THIS COMMISSION "POLICY" AFFECT THE APPLICATION OF THE FIVE FACTOR POLICY YOU DISCUSS ABOVE?**

A. It is my opinion that an analysis should be moot since the acquisition adjustment in question was applicable to a 2007 rate case and has been allowed to continue through

multiple subsequent acquisitions without proper justification. The intangible asset that Southern Company purchased is no longer recognizable for ratemaking purposes given the acquisitions that have subsequently occurred and cannot be justified to continue to be reflected on FCG's books or in customer rates. That said, the Company cannot justify the continued recovery because they cannot meet all five requirements.

Q. WHAT REQUIREMENTS ARE NOT ACHIEVABLE BY FCG IN THIS CASE?

A. Increased quality of service would be difficult to provide substantiation for since the Company has repeatedly said that information from prior to December 2023 is not available. If they do not have quality of service information from any predecessor including Southern Company and NextEra, a comparison cannot be made. Since the filing itself does not include any such support that factor cannot be achieved. Additionally, statements made to investors and the Commission contradict any notion that ownership under CUC has improved service. To the contrary, FCG and the CUC legacy Florida gas company both received the same highest level of service quality finding by the Commission in orders issued less than 90 days apart. CUC told investors that FCG's service was award winning. HWS-6 at 168. Seven days after buying the utility, CUC told the Commission on December 8, 2023, that "Florida City Gas will continue to provide safe and reliable natural gas service to customers located throughout its service territory ***consistent with that provided before the change in ownership***." (Emphasis added.) Exhibit HWS-9 at 219. Instead of it indicating an increased level of service, at best, the statement indicates that at the time the decision was made to buy FCG, CUC was committing to maintaining the existing service levels.

The test of "lower operating costs" is clearly not proven since cost under CUC have increased dramatically as discussed throughout OPC testimony. As to "more professional and experienced managerial, financial, technical and operational resources" given the increase in costs and the lack of detail supporting this improvement including the lack of any acknowledgement by FPL that the resources provided by FPL were less than sufficient, this test cannot be met. Said another way, I am confident that FPL would not acknowledge that the resources provided by FPL were less than sufficient—especially since the Commission's 2023 FCG Order found that FPL was providing safe and reliable service. In depositions taken in this case, FCG witnesses appeared to retreat from any implication that FCG was deficiently run or was lacking in professional and experienced managerial, financial, technical and operational resources under FPL ownership and management. Statements made to investors and regulators by CUC during 2023, 2024, and 2025, also undermined any notion of inferiority under FPL ownership and management. Furthermore, in March of 2025, CUC received its first ever indicative bond rating of BBB+. While this milestone gets a pat on the back, it hardly indicated that CUC possesses superior financial resources to the Southern Company or NextEra or even similar resources, for that matter. More to the point, throughout 2024, CUC told investors that the largest and strongest contribution to margins and EPS was being consistently provided by the FCG operation and that FCG would "drive earnings growth." Exhibit HWS-6, at 62, 68, 109, 116, 138, 165, 184, 209, 213, 214, 233, 236, 284, 290, 292, 311, 314, 315, 329, 330, 357, 362, 364, 365.

As also noted above, CUC told investors, as it prepared to siphon off some operational superiority at FCG for the benefit of CUC legacy operations system wide, that it "was in the process of leveraging the Florida City Gas after hours call center for our whole enterprise which will standardize and enhance the customer experience." Exhibit HWS-6 at 96. Other comments to investors in 2024 indicated that both companies (FCG and legacy CUC) were exchanging best practices for the benefit of the whole system. Exhibit HWS-6 at 18, 92, 111, 244, 254, 741. This would hardly indicate buyer superiority. Also worth noting is the quote by the CUC CEO that "[a]ny organization is only as good as its people, and we were thrilled to officially welcome Florida City Gas employees to the Chesapeake utilities family late last year… Culturally there's a strong fit." Exhibit HWS-6 at 6. These remarks are hardly an indicator of a deficiency in the operations of pre-acquisition FCG.

I will also note that Company witness George Navo made reference to a document relied on for continuance of recognition of the acquisition adjustment. That 731-page document provides accounting guidance on various topics including the treatment of an acquisition adjustment. The guidance emphasizes impairment testing and does make reference to the ability for regulators' to subsequently disallow an acquisition adjustment or, if the regulated utility ceases to apply ASC 980, the regulatory asset should be written off.

Q. THE COMPANY CLAIMS THAT WITNESS EVERNGAM'S EXHIBIT ME-3 PROVIDES THE JUSTIFICATION FOR LOWERING OPERATING COSTS. IS THAT SUFFICIENT PROOF OF LOWERING COSTS?

A. It is not sufficient proof. As discussed earlier, that calculation escalates costs using an Inflation & Growth Compound Multiplier from 2003 through 2027 and applied that to costs that are not representative of costs applicable in 2023 when the acquisition occurred. As shown in Exhibit HWS-4, the Commission-approved cost for 2023—when escalated—are significantly less than the forecasted FCG costs for 2027 under CUC which means the 2027 costs are *not* lower as would be required by the Commission five factor test.

Q. HAS THE COMMISSION EVER SUBSEQUENTLY DENIED A PREVIOUSLY APPROVED ACQUISITION ADJUSTMENT FOR CUC?

A. Yes. On pages 3 and 4 of Order No. 23166, the Commission found the following with bold and underline emphasis added:

> In Order No. 18716 (Docket No. 870118-GU) we approved an Acquisition Adjustment in the amount of $200,000 for Central Florida Gas Company. **This acquisition adjustment was approved based on projected savings due to Central Florida Gas Company's acquisition by Chesapeake Utilities Corporation in 1985.** However, we approved the $200,000 acquisition adjustment with the caveat that the projected savings would be analyzed in future rate cases to determine if the projected savings actually occurred or had eroded.
>
> **The record in this case reveals that the savings** which were predicted to occur as a result of the acquisition **have not materialized**. To the contrary, the company (Central Florida Gas) has experienced a total increase in its revenue requirements since addition, the company has failed to demonstrate that increased expenses related to the acquisition

> will not continue to occur or that the savings it has projected will ever materialize. **Therefore, the acquisition adjustment of $200,000 should be removed from the Company's rate base**, and the Company's request for an acquisition adjustment of $509,422 is denied. Also, the related Accumulated Depreciation and Amortization 6) Expense should be reduced by $172,592 and $33,960 respectively.

This may be why FCG has not identified synergies from the transaction and has moved forward because failure to achieve those savings could result in an FCG request for future recovery being denied.

Q. WHAT ARE YOU RECOMMENDING WITH RESPECT TO THE COST ASSOCIATED WITH AGLR'S ACQUISTION OF THE COMPANY?

A. Based on the discussion above regarding multiple acquisitions, that accounting guidance does not preclude regulators from subsequently disallowing an acquisition adjustment or excuse the Company's inability to comply with Commission five factor policy, I recommend that the net amount included in rate base of $5,293,892 be excluded from rate base and that amortization expense be reduced $721,894. The adjustment is shown in Exhibit HWS-2, Schedule B-1.

B. AMI Meters

Q. WHAT IS INCLUDED IN THE COMPANY'S REQUEST FOR THE NEW AMI METERS?

A. The Company's request includes additions to plant of $6,295,084 in 2026 and $23,691,970 in 2027. The request includes an increase of $64,259 and $284,740 to O&M expense in 2026 and 2027, respectively. Additionally, depreciation would be

included as part of this request. Finally, FCG's request would include additional costs for the AMI Pilot despite the Company's claim none exists.

Q. WHAT DID YOU MEAN WHEN YOU STATED DESPITE THE CLAIM NO COSTS EXISTS FOR THE AMI PILOT?

A. The Company was requested in OPC Interrogatory No. 5-178 (Exhibit HWS-5 at 197) to provide the number of meters installed, the cost by account of the meters installed under the pilot and the associated annual expense for the years 2022-2026. The response stated the pilot did not proceed as originally envisioned due to the absence of a communication network the operational framework did not exist to track costs, installations by year or O&M expense by account. The response concluded "Accordingly, the Company does not have annual cost per account data, meter installation data by year, or discrete annual O&M expense attributable to the AMI pilot for the years 2022 through 2026, and no AMI-related O&M impacts are reflected in the test year or historical O&M expenses." The fact that the Company cannot identify what costs were in historical years or in 2026 means they have no way of determining whether costs that existed are not continuing. In addition, the fact that the pilot program installations are presumed to be connected to the communications systems so they can operate in the manner they are supposed to there would be cost associated with that implementation. Furthermore, when the Commission approved the AMI Pilot in 2023, to address the OPC concerns "that FCG has not attempted to quantify benefits, the Utility has proposed the collection of data to quantify benefits through tasks such as remote meter reading, disconnection, and leak/outage detection, all of which should reduce related expenses," the Commission stated:

> Because FCG intends to gather information to determine the feasibility of AMI technology on its system and the appropriateness of system-wide deployment of this technology in the future, we find its potential to result in cost savings for the customers to be credible. For these reasons, we hereby approve the AMI Pilot. An adjustment of ($3,104) shall be made to the originally projected O&M expense provided for the AMI Pilot to reflect the corrected O&M expense identified in FCG witness Howard's revised testimony. In addition, we order FCG to provide a final report with a summary of the findings described above to the Commission within 90 days of completion of the AMI Pilot.

Since the project was never completed, no such report was produced and FCG continued to collect the revenue requirement associated with the $3.4 million capital cost and $13,792 in O&M.

Q. WHAT IS YOUR UNDERSTANDING OF WHY THE AMI PROJECT IS BEING INCLUDED IN THE CURRENT REQUEST?

A. According to FCG in Docket No. 20220069-GU, the purpose of the AMI Pilot was intended to test and gain information and data on the deployment, use, benefits, and cost savings associated with AMI with two-way communications. The AMI Pilot proposal under FCG at the time was for installation of 5,000 meters in a single year and a subsequent three-year evaluation period in which the performance of the meters and their correlative benefits will be assessed.[14] Now the Company is requesting expansion to an additional 75,000 customers in the years 2026 and 2027 adding $29,987,054 to rate base for meters alone in the years 2026 and 2027 plus $284,740 of O&M expense in the forecast for 2027. The claimed purpose is to produce future efficiencies, improved billing accuracy, enhanced system operations and safety. This is a significant cost request for customers given the failure of the pilot program being implemented as

[14] Direct testimony of Kurt Howard at 37-38 in Docket No. 20220069-GU.

was proposed and approved and absent any cost benefit being identified or even quantified for the continuation of the implementation.

Q. HOW MANY CUSTOMERS WERE ASSOCIATED WITH THE PILOT PROJECT AND THE PROPOSED EXPANSION THAT WILL BE INCLUDED IN THE REQUEST AND AT WHAT COST?

A. The FCG AMI Pilot was to replace 5,000 meters in Brevard County and the expansion is to add 75,000 meters in Port St. Lucie and Rockledge. The AMI Pilot cost purportedly consisted of $3,350,000 of total capital expenditures for the cost of installation and estimated annual O&M expense of $20,000 for the four-year administration of the pilot. As stated earlier the incurrence of the cost of the expansion will be spread throughout the years 2026 and 2027, which will add $29,987,054 to rate base for meters alone in the years 2026 and 2027, plus $284,740 of O&M expense in the forecasted 2027, plus any associated costs for additional hardware and software that will be required for efficient operation of the meters.

Q. ARE THERE CONCERNS WITH THE COMPANY'S REQUEST?

A. Definitely, there are concerns. First, the forecasted pilot program cost was borne by customers without any identified benefit when it was allowed in Docket No. 20220069-GU. That cost was passed on to customers without the pilot being deployed as envisioned due to the absence of a communication network and was therefore not fully functional. To make matters worse the Company cannot even identify or quantify the costs incurred and passed on to customers. In that docket the Company claimed the proposed system was new to the gas industry and there is not much known about it

which raises the question whether it was prudent at the time. This was further insinuated in the response to OPC Interrogatory No. 3-113 (Exhibit HWS-5 at 175) where the Company stated AMI was not previously implemented because, until recently, natural gas AMI meter technology and deployment economics did not support prudent implementation. Second, the suggestion that benefits are long term and that benefits have not been reflected in the filing. The concern with this suggestion is that even though there is a claim of benefits, the Company has not performed a cost-benefit analysis, and the Company cannot provide an estimate of those long-term benefits that are claimed to be possible.[15] Third, to compound this concern is when asked about the potential benefits like a reduction in the need for meter readers the Company claimed those personnel would be reassigned elsewhere. Fourth, the request is described as adding 75,000 meters and according to the response to Staff Interrogatory No. 2-32 (Exhibit HWS-5 at 68) the Phase 1 and 2 installations would occur from 2026 through 2029. Based on that time frame the 75,000 meters would not be completely installed during the time period that begins September 2026 through December 2027. In fact, the response to OPC Production of Documents Request No. 1-3 (Exhibit HWS-5 at 229) states that 100% of the meter cost is included but only 50% will be installed. Fifth, given the failure of the initial pilot and the potential likelihood that FCG will be further integrated with the legacy Florida natural gas LDC operations, it would make more sense for CUC to roll out AMI meters to all Florida customers statewide or even CUC customers nationwide, if at all. FCG was already the guinea pig in a failed pilot, they should not be yet again rushed into being laboratory specimens in a half-baked and

[15] Responses to OPC Interrogatory Nos. 3-111 and 3-112 (Exhibit HWS-5 at 173, 174).

poorly conceived but grander scale experiment just because FCG is in for a rate case. Finally, the estimated cost is escalated by a 22% contingency for equipment and labor increasing the Company's request by $5,407,502. The request for inclusion in rates without any quantified or identified benefit is considered a major issue when implementation of the system is not known; that there is no cost benefit prepared to justify the acquisition and the cost is not measurable. Customers should not be required to pay for a project that was not justified by the previously approved pilot absent a quantified current or future value to those whose rates will increase in 2027. This is especially true when the cost is not known and measurable.

Q. ARE YOU RECOMMENDING AN ADJUSTMENT FOR THE AMOUNTS REQUESTED?

A. Yes. The capital costs for the AMI expansion reflected in 2026 and 2027 should be reduced an estimated $18,141,069, accumulated depreciation should be reduced $883,632, depreciation expense should be reduced $790,346 and O&M expense should be reduced $284,740.

Q. WOULD YOU EXPLAIN HOW YOU ESTIMATED THE CAPITAL COST REDUCTION OF $18,141,069?

A. Yes. My adjustment to plant, accumulated depreciation and depreciation expense are reflected in Exhibit HWS-2, Schedule B-2. The response to OPC Interrogatory No. 1-32 (Exhibit HWS-5 at 65), identified two cost components associated with the AMI project forecasted to go into service during the last 4 months of 2026 and on a monthly basis in 2027. The sum total is $29,987,054. Since the filing reflects 2026 additions of

$6,295,084 as of December the full amount is in the forecasted rate base in 2027 and since the Company assumed equal monthly costs throughout 2027 it would average $11,845,985 for the forecasted $23,691,970 of additions that were reflected during 2027. The total for 2026 and 2027 reflected in the average 2027 rate base is $18,141,069. The accumulated depreciation for 2026 assumed four months of depreciation based on depreciation rates from MFR Schedule G-2, Page 23. That estimate is $93,286. The accumulated depreciation estimated to be reflected in the filing for 2027 is based on a full year of depreciation on 2026 additions and on average of the plant additions for 2027 multiplied by the Company's depreciation rates for Accounts 3812 and 3821. The estimated average accumulated depreciation included in rate base for 2026 and 2027 additions is $790,346. The adjustment to accumulated depreciation is $883,632 which is the 2026 amount of $93,286 plus the 2027 amount of $790,346.

C. Capital Additions

Q. DID YOU REVIEW FCG'S CAPITAL ADDITIONS REQUEST?

A. Yes. A review of requested additions to plant is normally performed as part of my assessment of a company's requested increase in rates. The review typically will make a comparison of the historical additions and retirements, preferably over the last five years to the forecasted additions in the intermediate year and the test year. In the current filing, that comparison is even more important because of the change in ownership, even though there should be zero impact on the ability to monitor and regulate the Company. As shown in Exhibit HWS-2, Schedule B-3, I have summarized seven years

of additions and retirements that reflect five years under FPL management and two years under CUC management. After decades of analyzing plant costs, it is my opinion that it is necessary to do an expanded analysis that will provide a better comparison of what was previously required and approved by the Commission to the additions since the acquisition and forecasted in 2026 and 2027. This analysis will assist in determining whether the cost for additions to plant since the acquisition and forecasted for 2026 and 2027 are reasonable and required for safe and reliable service based on what was previously determined to be required for the provision of safe and reliable service under prior management. With the significant premium paid by CUC it would be assumed the plant under the previous owner would not require a significant level of new investment. Common sense says that you do not pay for a high price brand new luxury car when you're getting a 10-year-old broken-down car with a few hundred thousand miles on it.

Q. WHAT DID YOU DETERMINE FROM YOUR REVIEW OF THE COMPANY'S REQUEST FOR CAPITAL ADDITIONS?

A. The Company has included in their request a very optimistic and aggressive amount of plant additions. As shown in Exhibit HWS-2, Schedule B-3, Page 1 of 3, actual plant additions ranging from a low of $22,037,141 to a high of $51,456,659 in the years 2019 to 2025. The 2023 plant addition balance excludes the LNG facility so there is more of an apples to apples comparison to the other years. Additionally, the additions reflected exclude SAFE and relocations that are being recovered in mechanisms. The historical additions have fluctuations but the increased cost for additions in 2025 and the forecasts for 2026 and 2027 are concerning.

Q. HOW DID YOU GET THE COST YOU INCLUDED IN YOUR ANALYSIS SINCE YOUR EARLIER DISCUSSION IDENTIFED AN ISSUE WITH OBTAINING COST INFORMATION FOR 2022 AND 2023?

A. The supplemental response to OPC Interrogatory No. 1-58 (Exhibit HWS-5 at 143) referred to the annual reports for 2022 and 2023. The reports include a summary of beginning plant balances, additions, retirements, various adjustments and the ending plant balance. While the details are different than what was provided in the previous rate case and the current rate case it is presumed to be reliable since it is what is reported to the Commission with the auditors' opinion attached.

Q. WHAT IS DRIVING THE INCREASES IN ADDITIONS IN 2025 AND THE FORECASTS?

A. The 2025 additions amount as shown in Exhibit HWS-2, Schedule B-3 is $51,456,659. The reason it is higher than the historical is it includes $16,848,825 for phase 2 of the CIS system. The 2026 increased cost includes $15,602,094 identified as the Port St Lucie Pressure Improvement or the increase could be driven by the $6,295,084 AMI phase 1 plus the $4,577,431 for the Indian River M&R Station. The 2027 increase in plant additions is driven by the $23,691,970 forecasted for AMI phases 1 and 2.

Q. DO YOU KNOW WHY EXHIBIT HWS-2, SCHEDULE B-3, PAGE 1 OF 3 INDICATES A SIGNIFICANT VARIANCE OCCURRING IN 2021 WHEN COMPARED TO 2020?

A. In Docket No. 20220069-GU, FCG explained in the response to OPC Interrogatory No. 4-151 (Exhibit HWS-5 at 305) that 2020 was higher than 2021 due to $12.2 million of

spending for a major improvement for a new large industrial customer and a $10 million systems investment. This suggests that significant cost fluctuation can occur from year to year and that an averaging of historic information provides a good benchmark for determining the reasonableness of forecasted plant additions.

Q. DID YOU MAKE ANY COMPARISON OF THE FORECASTED AND ACTUAL 2026 PLANT ADDITIONS TO DATE?

A. I did. The Company was requested in OPC Interrogatory No. 5-197 (Exhibit HWS-5 at 213) to provide by account, by month the actual plant additions net of retirements for 2026 and update the response as information becomes available. The response provided actual information for January through April of 2026. In Exhibit HWS-2, Schedule B-3, Page 2 of 3, I have made a comparison of the MFR Schedule G-1, amounts, excluding additions for SAFE and relocations, to the comparable actual amounts provided in the response to OPC Interrogatory No. 5-197 (Exhibit HWS-5 at 213) for January to April of 2026. The year-to-date difference suggests the Company projections to date are overstated by 24.12%. If the trend continues the forecasted net additions of $42,831,884 could be overstated by $10,331,292 ($42,831,884 x .2412). That is significant in of itself but it is even more concerning when you take into consideration the significant increase in projected O&M expenses being requested by the Company.

Q. ARE THERE OTHER CONCERNS WITH THE FORECASTED ADDITION FOR 2026 AND 2027?

A. Yes. OPC Production of Documents No. 1-9 (Exhibit HWS-5 at 276) requested FCG to "Please provide all documents in your possession, custody or control supporting (i.e.

estimates, quotes, bids, etc.) the projected plant additions and retirements by major category for each of the years the respective projections for the 2026 intermediate year and the 2027 rate years." The response provided 10 Excel files that included spread sheets with various levels of detail depicting a breakdown of some actual costs and some forecasted costs and some quotes. The information for the AMI costs was where I was able to determine that the cost included a 22% contingency. The first six files, I was able to locate on the summary of plant additions provided in response to OPC Interrogatory No. 1-10 (Exhibit HWS-5 at 12), the total of which can be traced to the total additions on MFR Schedule G-1. The seventh file was a large summary of costs primarily for 2024 and 2025 and $961,653 for 2026 for a project identified as "Medley RNG." I could not locate a project by that name on the OPC Interrogatory No. 1-10 (Exhibit HWS-5 at 12) summary. The eighth file was a simple summary listing various allocated common plant additions with no detail beyond the different project costs. The ninth file was the Excel version of the MFR for plant additions, plant retirements and cost of removal. The final file was a one-line summary of SAFE actual costs year to date followed by the monthly forecasted amounts through December 2026. Nothing was provided for 2027. My assessment of the information provided is that the response lacked substance and support for more than $180 million of costs as listed on OPC Interrogatory No. 1-10 (Exhibit HWS-5 at 12). Numbers on an Excel file do not constitute supporting documentation. Documentation would be quotes, estimate and/or invoices that show that the numbers on the spreadsheet are based on something tangible and are not a best guess.

Q. DID YOU ATTEMPT TO GET ADDITIONAL PROJECT SUPPORTING DOCUMENTS?

A. I did. OPC Production of Documents No. 3-37 (Exhibit HWS-5 at 280) requested FCG to "Refer to the direct testimony of Brian Gilliam on page 5, lines 1-12. Provide each of the project estimates submitted by project managers." The response provided various documents including some of the same documents provided in the response to OPC Production of Documents Request No. 1-3 (Exhibit HWS-5 at 229). In addition, the response to OPC Production of Documents No. 3-38 (Exhibit HWS-5 at 280) requested documents submitted by vendors. Again, there was an issue with identifying and mapping the documents to specific project costs listed in the response to OPC Interrogatory No. 1-10 (Exhibit HWS-5 at 12) and in determining how the documents supported costs. I did discover an interesting bit of information in a document referred to as "OPC 37 2026_02_B." The information indicated the project was SAP related and that for "BILL PROCESSING PRESENTMENT AND PAY" it would provide a benefit of $600,000 in 2026 and $1.2 million in 2027. The "INTERACTIVE VIRTUAL ASSISTANT" would incur capital cost in 2026 and provide a cost benefit of $1.5 million in 2027 and 2028. Additional project description reflected further cost benefits. This is very concerning since the Company has repeatedly claimed the benefits from the projects are long-term and costs savings have not been reflected in the filing except a mere $123,128 amount, despite the statements to investors to the contrary as shown in Exhibit HWS-6 at 6, 9, 10, 17, 18, 32, 45, 46, 63, 92, 102, 163, 244, 255, 268.[16]

[16] Response to OPC Interrogatory No. 7-224 (Exhibit HWS-5 at 294).

Q. YOU STATED THE ADDITION ANALYSIS EXCLUDES SAFE AND RELOCATION ADDITIONS. ARE YOU CONCERNED WITH THE LEVEL OF ADDITIONS FORECASTED FOR SAFE AND RELOCATIONS?

A. SAFE project costs are included in the Company filing and while the costs as of December 31, 2026, are proposed to be included in base rates it is my understanding those costs are subject to review by Commission Staff prior to being approved. The SAFE analysis supplied as support was not support and as someone who has audited costs for years I would question the validity of the cost. In my opinion the cost should be subject to an actual audit prior to being included in base rates.

Q. WHAT ARE YOU RECOMMENDING WITH RESPECT TO THE PROJECTED PLANT ADDITIONS FOR 2026 AND 2027?

A. If the AMI adjustment recommended earlier is not made, then the plant additions amounts projected for 2026 and 2027 should be reduced to take into account the 24.12% overstated projected plant additions amount. As shown in Exhibit HWS-2, Schedule B-3, Page 2, the actual additions amount, excluding SAFE and relocations, for the first 4 months of 2026, is 75.88% of what was projected for the first 4 months of 2026. On Page 1 of Schedule B-4, I calculated my adjustment by reducing the 2026 and 2027 additions by $10,330,219 and $4,357,210, respectively, by reducing the requested amounts by the 24.12% underspending to date. Using an estimated composite depreciation rate of 2.55%, I am recommending a reduction in depreciation expense of $373,818. The same $373,818 reduction to accumulated depreciation for 2027 plus a reduction of $131,721 for the 2026 depreciation yields an accumulated depreciation impact of a total of $505,537. Since the first depreciation accrual would be made in

2026, the $394,640 reduction to accumulated depreciation for 2026 reflects a year and half of depreciation.

D. Cash Working Capital

Q. WHAT DID YOU DETERMINE FROM YOUR REVIEW OF THE COMPANY'S REQUEST FOR CASH WORKING CAPITAL?

A. The Company has an inflated request of $29,388,571 when compared to the $15,709,607 allowed in Docket No. 20220069GU.

Q. HAVE YOU IDENTIFIED ANY SPECIFIC COMPONENTS THAT ARE IMPACTING THE COMPANY'S REQUEST?

A. Yes. An unusual line item in the requested working capital is the current liability Taxes Accrued-Income showing a debit balance of $20,189,850. Liabilities should be a credit not a debit making this unique. It is also notable that the Accounts Receivable in the request is $20,159,733 which is a 30% increase over the $15,503,936 requested by FCG in 2023 when under FPL management.

Q. IN THE 2023 FCG ORDER WHAT DID THE COMMISSION STATE WITH REGARD TO YOUR CONCERNS WITH THE CASH WORKING CAPITAL REQUEST AND YOUR COMPARISON TO HISTORIC AMOUNTS?

A. The Commission stated, "Historical data does not account for the changes made in the projected test year nor does it account for FCG's change in ownership since its last rate case." In that 2022 case FCG requested $17,357,425 and that was reduced to

$15,709,607 by removing unamortized rate case expense and the impact of half of D&O insurance. The Commission stated that it considered an indexing of the historical amounts in making that determination. In my assessing the working capital in Exhibit HWS-2, Schedule B-4, I applied the Commission indexing for the change in the Inflation & Growth Compound Multiplier from 2023 to 2027 as shown in Exhibit HWS-4 to the approved cash working capital in 2023.

Q. WITH THE COMMISSION'S NOTED CONCERN WITH COMPARING HISTORICAL INFORMATION AND THE CHANGE IN OWNERSHIP, ARE YOU ASSESSING THE REASONABLENESS OF CASH WORKING CAPITAL DIFFERENTLY?

A. Yes and no. The Commission did indicate in the order that historical information is relevant in evaluating costs. While I am not relying on the historical trend under CUC management, I am relying on what the Commission assessed in Docket No. 20220069-GU and their determination in that case. From a historical basis I am comparing the current request to what was requested in that case since this provides a comparison of what was requested and what was deemed reasonable under FPL management compared to the request under CUC management. I believe it to be very relevant since CUC has made unsubstantiated and self-contradicted claims regarding FPL management deficiencies. A more efficient operation would in most cases operate in a more cost-efficient manner and the significant increase being requested in my opinion is contradictory to that position. That is why I noted the change in Accounts Receivable since the increase suggests there may be an issue with collections especially since the

2023 receivables would still be reflecting a collection issue associated with the COVID-19 pandemic.

My primary focus in FCG's projected working capital is with the $20,189,850 debit in Taxes Accrued-Income liability account. The Company in OPC Interrogatory No. 5-195 (Exhibit HWS-5 at 210) was requested to explain this novelty, identify who owes this amount and show how the amount was calculated. The response stated that for Florida purposes this amount represents a net operating loss restricted to Florida and the unsettled federal intercompany receivable due from the parent company. This is clearly identified by the Company as a benefit to which FCG and its customers are entitled. The response stated that "Accordingly, the federal portion of this amount is owed to FCG by the parent company, not taxing authorities." That means that FCG is asking customers to pay a return on money owed to them by CUC. CUC as the shareholder is in essence asking customers to pay a return on money CUC owes to FCG. This is not an appropriate request by the Company and the debit should be reduced by the amount CUC owes FCG, but since no calculation was provided that amount is not clear.

Q. DID YOU ATTEMPT TO DETERMINE THE AMOUNT APPLICABLE TO FLORIDA AND THE AMOUNT OWED BY CUC?

A. Yes. Since the filing showed a debit of $19,274,329, I could find some details in the Annual Report filed with the Commission. Some of the amounts on MFR Schedule B-1 could be traced to the Annual Report but the tax obligation was not. The Annual Report shows a credit for the deferred tax liability. Since the capital structure includes

deferred taxes, I attempted to perform a reconciliation of the deferred tax amounts in the filing to that in the Annual Report. The Annual Report shows a deferred tax asset in Account 190 of $15,145,409 and deferred tax liability in Accounts 281-283 of $42,382,452 for a net liability of $27,237,043. MFR Schedule D-1 reflects a hard coded number for deferred taxes of $21,442,098. This amount can be traced to the MFR Schedule B-1 liability amounts for Deferred Income Taxes-Property of $14,604,345 plus Deferred Income Taxes-Other of $11,407,151 minus the deferred asset Accumulated Deferred Income Tax of $4,569,399. As I stated earlier, however, the deferred tax amounts on MFR Schedule B-1 could not be traced to and/or reconciled with the Annual Report. Since the Annual Report net deferred taxes were a credit of $27,237,043 and the capital structure reflects a credit of $21,442,098 this would suggest any remaining 2025 deferred tax amount should be a credit of approximately $5.8 million and not a debit of $19,447,859 as shown on MFR Schedule G-1, Page 3.

Q. ISN'T IT TRUE THAT THE NUMBERS YOU ARE COMPARING ARE THE 2025 YEAR-END AMOUNTS IN THE ANNUAL REPORT TO THE 13-MONTH AVERAGE IN THE FILING?

A. That is correct. I made the comparison that way because the filing and the rate request uses the average. Since I traced most of the December 2025 amounts in the MFR Schedule B-1 to the Annual Report, except for the deferred taxes and other cost within reason, I believe that comparison provides a strong indication that the significant debit in the liability account is questionable.

A similar analysis using year-end amounts does not change the outcome. If, for the month ending December 2025 on MFR Schedule B-1, I were to take the liability amounts for Deferred Income Taxes-Property of $19,988,528 plus Deferred Income Taxes-Other of $16,596,719 minus the deferred asset Accumulated Deferred Income Tax of $11,604,085, a net of $24,981,162 would be the result. The December 2025 Taxes Accrued-Income on MFR Schedule B-1 is a debit of $22,021,345 resulting in a net credit for the deferred taxes in the filing of $2,959,817. As stated earlier, the Annual Report shows a net credit of $27,237,043 as of December 2025 so the difference is significant.

Q. DO YOU HAVE ANY OTHER CONCERNS ABOUT THE COMPANY'S PRESENTATION OF WORKING CAPITAL?

A. Yes. In the 2023 FCG Order, the Commission approved working capital that included the impact of removing "Clause Net Underrecoveries" in the amount of ($1,053,994). In the ESRs that FPL filed on behalf of FCG after the 2023 FCG Order was issued, the Company reflected this removal under "FPSC Adjustments" in the amount of ($5,282,509) for June 2023 and ($4,532,921) for September 2023. In the December 2023 ESR that CUC filed for FCG the underrecovery amount removed was ($3,586,708). For the forecast 2024 ESR, the Company projected that the amount to be removed for the year would be ($2,810,510). The amount removed as reflected in the December 31, 2024 and 2025 FCG ESRs is $0. These amounts are found in Exhibit HWS-7.

Q. IS THERE MORE INFORMATION AVAILABLE THAT YOU CONTEND WOULD INFORM THE COMMISSION OF HOW THIS INFORMATION SHOULD BE VIEWED FOR RATEMAKING?

A. Yes. I have reviewed the earnings surveillance reports and certain orders and filings of FCG and FPUC gas related to the PGA clause, to determine whether there is consistent treatment of this working capital impact within the CUC Florida natural gas LDCs. My Schedule B-4, Page 2, in Exhibit HWS-2 shows the history of this adjustment as reflected in earnings reporting since the 2023 FCG Order was issued and some information from the PGA dockets.

Q. DOES THIS INFORMATION CAUSE A CONCERN?

A. Yes. This is a Commission-ordered adjustment from the last rate case that has vanished from the Company's earnings reporting and is not reflected in the interim or permanent rate test years. The chart is based on a review of the Company's ESRs which I have included in Exhibit HWS-7 at 1-100. The chart also includes a review of the PGA filings made by CUC for the Florida LDCs. The information indicates that the legacy Florida LDCs have not historically reflected net clause underrecoveries. They have in fact historically reflected overrecoveries as reflected in the PGA filings. I reviewed the 2023-2026 FPUC gas surveillance reports and the first quarter 2026 ESR shows a small adjustment of ($158,170) and $0for all other ESRs for the same period from 2023 to present. It appears that under CUC, FCG is presenting its clause recoveries on a combined Florida basis which has the effect of masking the impact of this adjustment. I am aware that in Order No. PSC-2024-0480-FOF-GU, issued November 21, 2024, the Commission allowed CUC to consolidate the FPUC and FCG operations for the

Purchased Gas Adjustment ("PGA") clause purposes only. However the base rates of FCG have not been consolidated. CUC is not even proposing to take that step in this case. The impact of clause net underrecoveries are baked into the working capital of FCG and unless removed will cause FCG's rates to be overstated.

Q. WHAT ADJUSTMENT SHOULD BE MADE TO ACCOUNT FOR THIS?

A. It is my opinion that FCG should be required to break out the underrecoveries attributable to FCG and that amount should be used to reduced working capital. In the meantime, given that the most recent filing by CUC for the combined true-up for 2025 reflects a net underrecovery of ($4,056,838) and, further given that FCG has historically been the driver of the net underrecovery balance, I will reflect this number in the adjustment, absent an accurate break out of the FCG-specific number. An alternative would be to either use the December 2023 actual amount ($3,586,708) or to use the Company's 2024forecasted amount of ($2,810,510) since FCG had a basis for believing that it would experience clause net underrecoveries of this amount in 2024. To the extent that this working capital adjustment has been inappropriately excluded from reported, achieved NOI for 2024 and 2025, the RSAM adjustment that I recommend should be accordingly adjusted and interim rates should also be revisited for additional refunds.

Q ARE THERE ANY OTHER COSTS THAT SHOULD BE ADJUSTED?

A. There is. The Commission has required an adjustment for D&O included in cash working capital and the Company complied with making that 50% adjustment in the

filing for each of the years 2025, 2026 and 2027. I am recommending total disallowance of D&O insurance so an added reduction of $34,438 is required.

Q. ARE YOU RECOMMENDING AN ADJUSTMENT TO WORKING CAPITAL?

A. Yes, I am. As shown in Exhibit HWS-2, Schedule B-4, I have recommended a reduction of $10,094,925 to FCG's projected $20,189,850 debit in current liabilities for Taxes Accrued-Income. The adjustment removes a very conservative 50% of the debit balance in the liability account Taxes Accrued-Income in estimating what CUC owes FCG for federal income taxes. This should be considered very conservative since 84.7% of the net deferred tax balances is comprised of federal taxes based on the December 2025 balances. The next adjustment is for $4,056,838 to Customer Accounts Receivable for the estimated clause net underrecoveries adjustment that has historically been required by the Commission to remove the debit effect of that receivable that is otherwise embedded in base rates working capital. The final adjustment is the 50% of D&O still remaining in the 2027 prepaid amount. The adjustments are considered reasonable when compared to the Commission referenced indexing since the projected working capital amount of $15,709,607 that was approved in the 2023 FCG Order GU, escalated by the Inflation & Growth Compound Multiplier for 2023-2027 results in an indicative cash working capital requirement of $18,859,431.

VII. NET OPERATING INCOME

A. Revenue

Q. HAVE YOU REFLECTED AN ADJUSTMENT TO REVENUE?

A. Yes. There are concerns with the revenue reflected in the filing. While I have concerns with the base revenue projections, I have not adjusted that. However, I am recommending an adjustment to Other Revenue of $3,389,195 as shown in Exhibit HWS-2, Schedule C-1.

Q. WHAT ARE THE CONCERNS WITH THE BASE REVENUE THAT YOU DID NOT ADJUST FOR?

A. The response to OPC Interrogatory No. 1-17 (Exhibit HWS-5 at 284) provided a summary of revenues, customers and billing determinates under CUC management. The 2026 forecasted increase in customers from 2025 was 1.8%. The actual increase as of March 2026 was already 1.2%. Three months in, 25 % of the year, and the customer count was already 67% of the annual forecast increase. Even if the change in customers for the remaining nine months only double the first three months the forecast by the Company will be understated.

The other notable fact is that the forecasted Therms for 2026 are 180,638,006 and as of March 2026 the actual Therms was 49,502,612 and if that were annualized the 2026 Therms would be 198,010,448. Whether seasonality and weather would affect this extrapolation, I cannot say. I am identifying this scenario as a basis for further inquiry.

Q. WITH THE SIGNIFICANT POSSIBLE UNDERSTATEMENT WHY DID YOU NOT MAKE AN ADJUSTMENT?

A. I have been doing this for decades and over that time when you point to these concerns, the Company will respond to the issue I identified and will argue that seasonal impacts

vary. The Company will further argue that the understatement reflects the snowbirds coming to Florida and this behavior will not continue. In my experience, this argument is often accepted. So I feel compelled to point out this as an issue and just maybe the Commission Staff will take it under consideration.

Q. HOW DID YOU DETERMINE THE ADJUSTMENT TO OTHER REVENUES?

A. I evaluated the historical revenue from 2021 to 2025 based on the information available to me. As Exhibit HWS-2, Schedule C-1 shows, in 2021 through 2023 the Annual Reports reflected revenue from Initial Connections, Reconnects for Cause, Collection in Lieu and Returned Check in Account 495 and those revenues disappeared in 2024 and 2025. Also reflected in Account 495 was Other Revenue in each year. This is a significant amount and it is not clear what this revenue is from. In reviewing detail in the filing, I noted that the Company made an adjustment to Account 495 for Conservation Revenues so I assume that a portion of the "Other" is Conservation Revenues. I did not conclude it was all Conservation Revenues because the adjustment in 2025 for Conservation Revenues was $5,434,645 while the Annual Report listed the Other Revenue as $6,473,837, a difference of $1,039,192. Coincidently that is in the range of the amount of Other Revenue from the 2021-2023 years that disappeared post-acquisition. So, I have assumed that the Company forgot those revenues were included in Other Revenue in 2024 and 2025 and simply failed to reflect them in the forecast for 2025 and 2026. I did not have sufficient information for 2024 to make the calculation I performed for 2025. So, using a four year average, I am recommending an increase of $1,004,899. As for the revenue in Account 488 I calculated a five-year average of the 2021-2025 actual amounts as reported in the respective Annual Reports, which

yields $3,107,144. The Company reflected a forecast of $2,287,122 for these elements of Other Revenue that is lower than any of the actual amounts from 2021-2025.

With respect to Off-System Sales ("OSS") that appeared to be overlooked by FCG, in his deposition Company witness George Navo confirmed nothing was reflected for OSS in 2027 despite a historical trend of sales. In its response to OPC Interrogatory No. 1-17 (Exhibit HWS-5 at 284), the Company identified OSS revenues of $1,081,039 and $2,047,508 in 2024 and 2025, respectively. It is not reasonable to assume zero OSS revenues in the future. The Commission has addressed this issue of underforecasting OSS revenues before. In 2008, Peoples Gas System ("PGS") sought to use a greatly understated forecast of OSS revenues, even when there was evidence that much higher revenues had historically been achieved. The OPC challenged the PGS underforecast on this basis and the Commission stated that "OPC believes that recent history has shown that the $2 million sales level is achievable, measurable, and known." In siding with the customers, the Commission stated "[w]e agree with OPC witness Schultz's adjustments to increase OSS by $1,500,000."[17] The same should happen here. Accordingly, I am recommending an adjustment of $1,564,274 based on the two-year average. This is considered conservative since the March 2026 year to date OSS sales amount is $1,063,154 and if annualized that would be $4,252,616. The total recommended increase to Other Revenue is $3,389,195.

[17] Order No. PSC-2009-0411-FOF-GU, at 21, issued June 9, 2009, *In re: Petition for rate increase by Peoples Gas System,* in Docket No 20080138-GU.

B. Payroll

Q. WHAT HAVE YOU DETERMINED FROM YOUR REVIEW OF THE PAYROLL COST INCLUDED IN THE COMPANY'S BASE RATE REQUEST?

A. The Company's payroll cost request for 2027 includes $16,914,137 charged to expense, $1,328,638 charged to "other," and $5,771,520 charged to capital projects. The amounts do not include any of the $4,822,610 of incentive compensation costs. The request assumes a year-end employee complement of 251 full time equivalents ("FTEs") and 2 part-time. The history of payroll expensed and capitalized along with the changes in the employee complement is detailed in Exhibit HWS-2, Schedule C-2.

Q. ARE THERE ANY CONCERNS WITH THE COMPANY'S REQUEST?

A. There are. The Company's expense request of $16,914,137 is $6,315,228 above the $10,598,909 expense request by FCG for 2023. That is a 59.6% increase above FCG's expensed payroll request in a mere four years. The capital request of $5,771,520 is $3,721,233 above FCG's capitalized payroll request of $2,050,287 for 2023. That is a 181.5% increase in just four years. Contributing to this increase is the Company's actual headcount additions, to-date plus the projected additions throughout the remainder of 2026 and into 2027. Based on the response to OPC Interrogatory No. 1-51 (Exhibit HWS-5 at 124) the Company's first month of operations, December 2023 had an employee complement of 169. The actual employee complement as of May 2026 has grown to 226. FCG is further assuming a complement of 237 by December 2026 and a complement of 253 by December of 2027. The addition of 84 FTEs as of December 2027, above the December 2023 complement of 169, is very troubling. Also

of concern is the increased capitalized labor amount associated with the added FTEs and the percentage of capitalization. The Company allocation of payroll to expense in 2024 and 2025 was 69.00% and 58.65%, respectively. The 2027 test year jumped to 70.43% despite the Company stating that a good comparison for 2027 is 2025.

Q. ARE YOU RECOMMENDING AN ADJUSTMENT BASED ON THE INCREASED EXPENSE ALLOCATION?

A. Yes. The expense ratio adjustment is a reduction of $1,586,748. As shown in Exhibit HWS-2, Schedule C-2, Page 1, I calculated the adjustment by applying a 63.83% factor to the total requested payroll of $24,014,295 (excluding incentive compensation), based on a two-year average from 2024 and 2025, (that also excluded incentive compensation). The resulting payroll expense is $15,327,389 which is $1,586,748 less than the requested O&M expense, also based on the exclusion of incentive compensation of $16,914,137.

Q. WHAT MAKES THE COMPANY'S REQUEST TO ADD POSITIONS SO CONCERNING?

A. The Company's previous request assumed a complement of 187 positions for 2023, and the Commission concluded "Upon review of the testimony presented by FCG, we find FCG has adequately addressed concerns related to staffing levels…" I interpret that to mean the Commission concluded that the forecasted payroll for an average of 187 FTEs was sufficient and reasonable for FCG to provide safe and reliable service. Based on the supplemental response to OPC Interrogatory No. 1-49 (Exhibit HWS-5 at 115) the 2023 average was 188 FTEs. The average for 2024 was 187 FTEs based on

the response to OPC Interrogatory No. 1-51 (Exhibit HWS-5 at 124). The fact that the complement is basically the same, indicated that common sense would suggest the total payroll would be similar, factoring in a reasonable escalation. The actual 2023 total payroll of $15,798,289 for 11 months under FPL plus the $3,227,140 for 1 month under CUC totals $19,025,429. According to the response to OPC Interrogatory No. 1-47 (Exhibit HWS-5 at 109) the total payroll for 2024 was $24,823,697, an increase of 30.48% in a single year. Even without an increase in the complement the total payroll increase is clearly beyond significant, compounding the concern with the purported need to add more FTEs. I will note that the averages for 2023 and 2024 were based on 169 and 200 FTEs respectively in December of those years. However, the Annual Reports for 2023 and 2024 identified December total employees of 178 and 174, respectively. This was concerning that the reported numbers are materially different from what was identified in responses.

Q. WHY DID YOU STATE THE SIGINIFICANT DIFFERENCE WAS CONCERNING?

A. The Company on July 13, 2026 provided what they identified as corrections to a number of responses that primarily were related to employee information.

Q. DID THE NEW INFORMATION IMPACT YOUR ANALYSIS AND RECOMMENDATION?

A. No. The last reported actual of 226 FTEs and the forecasted request for 248 FTEs did not change. But I did find it interesting that despite the claims of efficiency the Company response stated the following:

> The Company does not have a report that shows the FTEs by business unit or the allocation factors to derive them. Therefore, in order to answer this response, we calculated these factors in excel and reviewed on a high level what the allocated FTEs were. However, in responding to PSC auditor request, we reviewed the manual calculation of FTEs at department level and found allocation factor errors used to provide our original response.

If this correction were to explain a change of 1 or 2 FTEs, I wouldn't be concerned, but when the monthly differences in actual FTEs over a two-year period varied from 8 to 20 it makes one wonder how you don't know how many people are working for you. Adding to that concern, as noted earlier, is that the Annual Reports for 2024 and 2025 identified the year-end numbers as 174 and 177, respectively. These numbers reported are even more significantly different than the original response to the revised 2024 and 2025 year-end numbers of 220 and 216, respectively. That is a difference of 46 and 39 in 2024 and 2025 respectively. The Annual Reports are supposed to be accurate, and the differences should be concerning to the Commission, as they are to me, especially with the Company's emphasis on its efficiency. Since the changes do not directly impact my recommendation, I am not relying on these new speculative numbers.

Q. HAS THE COMPANY PROVIDED DETAIL FOR THE ADDITION OF FTES IN AN ATTEMPT TO JUSTIFY THE FORECASTED INCREASE?

A. Depending on the response, the Company increased the year-end employee complement by 2 or 3 FTEs in 2025 from the 200 FTEs as of December 2024. Or, based on the corrected response, the December year-end FTE number declined by 4 FTEs from 2024 to 2025. The explanation for the purported additions varied depending on the witness and the response to discovery. Witnesses Haffecke, Barrington, Bhatwadekar and Navo discussed 48 added positions, but the response to OPC

Interrogatory No. 1-46 (Exhibit HWS-5 at 106) identified 55 positions. While some explanations were provided in testimony, that does not mean the positions are in fact required and/or will be filled. The fact is that 187 positions were determined by the Commission to be sufficient for 2023 to provide safe and reliable service and now FCG is assuming that in a post-acquisition environment where it has told investors that it was harvesting synergies, and it now says an average of 248 is required for 2027 with a December 2027 FTE count of 253. This should be cause for doubt. A projected 32.6% increase in employees from 2024 to 2027 could suggest that there is a desire for Commission approval of payroll that could provide a windfall for shareholders to the extent the positions are not filled. This is especially concerning when one factors in the acquisition premium that is suggestive that FCG operated very efficiently prior to the acquisition. FCG's extreme glee and virtual drooling when talking to investors during 2024 supports that FCG was a moneymaking machine that provided healthy margins and large contributions to earnings per share demonstrates how well run FCG truly was. Exhibit HWS-6 at 62, 68, 109, 116, 138, 165, 184, 209, 213, 214, 233, 236, 284, 290, 292, 311, 314, 315, 329, 330, 357, 362, 364, 365. Common sense would guide a prudent buyer to not overpay for a company if it was known that a company was not efficient and required a 32% increase in employees. It would be expected with a premium of that magnitude that significant cost savings would be available to justify the premium paid and expenses would be contained and not increased significantly. CUC's claims to investors of "beginning to harvest" operational synergies during 2024 and that it would "continue to be laser-focused on managing our payroll," supports my point and severely undermines the Company's 2027 FTE claims in testimony. Exhibit HWS-6 at 10, 244.

Q. THE RESPONSE TO OPC INTERROGATORY NO. 46 (EXHIBIT HWS-5 AT 106) INDICATES A HIRING OF TWO POSITIONS IN 2025 AND THAT IS THE INCREASE YOU STATED OCCURRED FROM DECEMBER 2024 TO 2025, SO DOESN'T THAT PROVIDE SOME SUPPORT TO THE COMPANY POSITION THAT ADDITIONS WILL OCCUR?

A. No. The response to OPC Interrogatory No. 1-52 (Exhibit HWS-5 at 134) identified 126 positions being filled in 2025 so apparently there is significant turnover. This turnover can consequently impact what will happen to forecasts in 2026 and 2027. The added positions from December 2025 to December 2026 is 35 FTEs and the 2027 forecast is another 16 FTEs are projections for added FTEs that are inconsistent with the historical hiring that the Commission found reasonable for safe and reliable service. The projected change in the employee complement is not known and measurable and runs contrary to the theory that more advanced technology results in cost savings due to reductions to the employee complement. In support of this concept, CUC management certainly envisioned synergy harvesting in year one along with its laser focus on payroll.

Q. IS IT POSSIBLE THAT THE DIFFERENCES COULD BE ATTRIBUTED TO SOME OF THE ADDITIONS NOT BEING FULL TIME POSITIONS?

A. Definitely. But the fact remains that the Company is proposing an increase of 51 FTEs from the 202 FTEs (as of December 2025) to 253 as of December 2027. Any suggestion that the 48 additions identified in testimony is sufficient to support the increase of 51 positions reflected in the filing totally ignores the high likelihood that some of the positions will not be full-time and further that there are numerous positions being

vacated during the year. To consider the testimony sufficient for support of the addition of 51 positions, the Commission would have to ignore the fact that not all the positions discussed are full-time and turn a blind eye to the absence of any justification and/or explanation supporting the back filling of positions vacated during the year. The fact remains that some of the positions identified by witnesses Haffecke, Barrington, Bhatwadekar and Navo are not full time as stated in their respective testimonies and as reflected in the attached response to OPC Interrogatory No. 1-46 (Exhibit HWS-5 at 106) in the column labeled 46.c in the attachment.

Q. EARLIER YOU IDENTIFIED THE PAYROLL DOLLARS AS A CONCERN. COULD YOU EXPLAIN IN MORE DETAIL YOUR CONCERN?

A. Yes. As shown in Exhibit HWS–2, Schedule C-2, Page 2, Line 16, the actual total payroll for FCG for 2022 was $14,787,074 and that increased to $19,025,449 in 2023. Ironically the driving force for that increase was that one month of payroll in December 2023 totaling $3,227,160 under CUC management was 17% of the $19,025,449. As shown in Exhibit HWS–2, Schedule C-2, Page 1, Line 21, the actual total payroll for FCG has since skyrocketed to $29,601,497 in 2025, representing an increase of 100% from 2022. Even though the forecasted payroll of $28,836,905 for 2027 is lower than the 2025 amount, that request is still 95% greater than the payroll in 2022, which was the last full year under FPL management.

Q. HOW IS IT THAT PAYROLL IS INCREASING SO SIGNIFICANTLY?

A. There are at least two reasons. The first, as discussed, is increasing the employee complement from an average of 173[18] in 2022 to an average of 248 in 2027[19], an increase of 43.4%. The second obvious contributor is that the amount allocated from CUC is higher than that by FPL. Another contributor is that 2022 incentive compensation was $1,320,210, the 2025 actual incentive compensation was $5,152,145, and the 2027 forecast is for $4,822,610.

Q. WHAT DO YOU RECOMMEND FOR PAYROLL EXPENSE IN THE 2027 TEST YEAR?

A. Using the most known and measurable employee count of 226 FTEs, the adjusted payroll expense, excluding incentive compensation, of $15,327,389, should be reduced by $1,359,688 to $13,968,071. My very conservative adjustment is reflected in Exhibit HWS-2, Schedule C-2. The adjustment simply multiplies the known vacancies as of May 2026, times the adjusted average payroll expense per employee, excluding incentive compensation. The total combined adjustment for payroll is $2,946,436.

Q. WHY DID YOU REFER TO THE RECOMMENDED ADJUSTMENT AS BEING VERY CONSERVATIVE?

A. As discussed, the increase in FTEs is significant, and while I question whether the additions are really required, whether time allocation is appropriate, and whether the fact the Company assumes that even if positions are eliminated with the implementation of newer technology, the Company still claims that those positions will

[18] Supplemental response to OPC Interrogatory No. 1-49 (Exhibit HWS-5 at 115).
[19] Response to OPC Interrogatory No. 1-51 (Exhibit HWS-5 at 124).

be redeployed elsewhere without saying where. After decades of testifying in multiple jurisdictions, I have consistently observed that projecting an increase in the complement has been a tool used by utilities to cynically increase the revenue requirement. Absent real justification, some regulators will limit the additions requested to what is considered reasonable or to the most recent actual headcount. Florida has generally accepted the Company request even though history in many cases has shown the forecasts were overstated. The recommended FTE level of 226 is an increase of 20.9% above the 2023 Order allowance of 187 for 2023 that was considered reasonable by the Commission as sufficient. That generous allowance is in my opinion not justified when one considers the synergies that CUC told shareholders would occur and in light of the $466 million premium paid that can only be viewed as a payment for already efficiently run Company that does not require a significant increase in employees.

C. Incentive Compensation

Q. HAVE YOU ANALYZED FCG'S REQUEST FOR INCENTIVE COMPENSATION FOR THE TEST YEAR 2027?

A. Yes, I have. The Company, in response to OPC Interrogatory No. 1-34 (Exhibit HWS-5 at 73), indicated that the projected 2027 test year incentive compensation includes $614,766 inclusive of a signing bonus of $633 classified as Short-Term capitalized costs, $261,921 of Long-Term capitalized cost ($256,718 of which would be stock compensation), $2,377,440 inclusive of a signing bonus of $25,226 classified as Short-Term O&M expensed costs and $1,402,594 of Long-Term O&M expense ($1,384,476

of which would be stock compensation) and $165,889 of Short-Term and Long-Term incentive compensation to be charged to "other." The total projected incentive cost for 2027 is $4,822,621. The response to OPC Interrogatory No. 1-36 (Exhibit HWS-5 at 81) stated that while some incentive compensation was excluded from the 2025 historical and the 2026 intermediate year, "…no corresponding adjustment was made to the 2027 test year."

In evaluating the current request, I found it important to compare the request to the costs in Docket No. 20220069-GU. The response to OPC Interrogatory No. 1-61 (Exhibit HWS-5 at 149), indicated that while under the control of FPL, FCG's 2023 test year incentive compensation included $287,655 of Short-Term capitalized costs, $1,321,611 of Short-Term expensed costs and $163,461 of Long-Term expense, for a total cost of $1,772,727. In response to OPC Interrogatory No. 1-36 (Exhibit HWS-5 at 81), the Company stated that "FCG removed incentive compensation costs from the 2026 intermediate year"—but no corresponding adjustment was made to the 2027 test year.

The 2.7-fold increase is very concerning, especially when the Company cannot provide any quantified costs savings that have been recognized from improvements to the operations and synergies from the acquisition. Basically, any argument that incentive compensation creates an incentive to improve operations does not exist and cannot be supported.

More concerning to me is the likelihood that customers are being asked to pay high incentive compensation for the CUC shareholder-driven earnings per share, margin growth, and total shareholder return benefits that CUC spent so much time glorifying and crowing about to investors while not delivering any of that value to customers in the test year beyond the Grinch-like $123,128 that I noted above. Of course, it goes without saying that none of this analysis of a seriously excessive incentive compensation proposal begins to take into account the enormous and abusive shareholder-centric transactions that will add costs to customer bills if allowed. It is likely that these incentive payments are being proposed precisely because CUC is thrilled that the acquisition of FCG was so profitable that it wants FCG customers to share in their happiness by paying its executives for having participated in the aftermath of the transaction.

OPC testimony demonstrates that the shareholders representatives are blatantly reaching into the cookie jar and helping themselves to customer-provided funds to pay for an enormous transaction that overwhelmingly benefited them at customers' expense. As an example of this, $38.814 million of deferred income taxes paid by customers in advance before December 1, 2023, to settle FCG taxes owed to the government were given away by CUC so that CUC shareholders could cut their own taxes. Exhibit HWS-9 at 7, 12. CUC issued high cost debt to pay for FCG customers to be able to continue to receive the same level of quality service from CUC as provided under FPL, and now CUC wants the customers to reimburse shareholders for that extra debt cost for the privilege of their gas company being sold to CUC. The depreciation surplus that the Commission determined FCG customers overpaid was used to pay off

millions of dollars of transaction costs that made the deal happen for shareholders. OPC witness Kollen and I have proposed mechanisms to address and correct these abuses. I mention this here because the crush of abusive transactions heaped on customers would make any savings to which the Company might admit pale in comparison. The microscopic $123,128 amount that the Company admit to saving customers is a travesty in my opinion, given the overall set of facts. These facts further support my adjustments to address projected incentive compensation amounts.

Q. YOUR DISCUSSION REFERENCES SHORT-TREM AND LONG-TERM INCENTIVE COMPENSATION. HOW MANY PLANS EXIST FOR THE COMPANY?

A. In response to OPC Production of Documents Request No. 1-3 (Exhibit HWS-5 at 229) the Company provided copies of four different plans. They are the Spot Award plan, the TIP, the Cash Bonus Incentive Plan and the Stock and Incentive Compensation Plan.

Q. IS THERE A CONCERN WITH THE COMPANY'S INCLUSION OF ALL THE INCENTIVE COMPENSATION PLAN COSTS IN THE TEST YEAR?

A. Definitely. The Commission in the past has excluded a portion of the projected incentive compensation expense. In fact, in Docket No. 20210015-EI, FPL, the Company's affiliate, excluded portions of executive and non-executive incentive compensation that FPL stated were excluded by the 2010 FPL rate case order, Order

No. PSC-2010-0153-FOF-EI.[20] That decision first excluded executive and non-executive incentive compensation associated with an above-target ratio and adjusted it to the target ratio. Then the decision excluded 100% of what was defined as target executive compensation and 50% of what was identified as target non-executive compensation. In the Progress Energy Florida ("PEF") rate case, Docket No. 20090079-EI, the Commission, disallowed all of the Company's requested incentive compensation stating that we believe that "PEF should pay the entire cost of incentive compensation, as its customers do not receive a significant benefit from it." It is especially noteworthy that the decision concluded that a "significant benefit" was not received as opposed to a finding of even *some* benefit.

The inclusion of incentive compensation in base rates is commonly an issue in the various jurisdictions in which I have testified. In many cases the cost has either been shared or even disallowed in total if the reasonableness or if the achievement required was insufficient and/or were focused on shareholders. The amount of FCG's incentive compensation costs is based on financial achievements and the plans relied on in this filing are only a tool for distribution of this bonus.

Q. WHY SHOULD THE COMMISSION BE CONCERNED WHETHER OTHER JURISDICTIONS DISALLOW SOME AND/OR INCENTIVE COMPENSATION?

[20] See, Order No. PSC-2010-0153-EI, issued March 17, 2010, at 150, in Docket No. 080677-EI, *In re: Petition for increase in rates by Florida Power & Light Company.*

A. The Commission should be concerned because focusing on the Company compensation only is akin to planting your head in the sand and ignoring that every jurisdiction deals with whether incentive compensation should be included in base rates. The Company stated in response to OPC Interrogatory No.1-29 (Exhibit HWS-5 at 56) that "Incentive compensation is necessary to attract and retain highly trained and skilled personnel in the energy industry." The attract and retain argument has been presented in every case I can recall as the purported justification offered by the utility. That is followed by the argument that it is needed based on compensation surveys that are claimed to support the level of compensation paid by a company in its rate request. The employees that a company seeks to attract will come from companies in other jurisdictions and the compensation surveys are for companies from other jurisdictions so how regulators in those jurisdictions evaluate and treat incentive compensation is relevant if a true apples to apples comparison is to be made. Adding to the importance of recognition to other jurisdictions is the repeated reference by companies like FCG to the compensation surveys that include those jurisdictions as support for the payroll, benefits and incentive compensation. While focusing on positions and costs, the studies do not factor in how comparable company compensation is treated in establishing rates in other jurisdictions. Simple reliance on the study results without considering rate treatment of the compensation is an apple to oranges comparison. For example, the response to OPC Production of Documents Request No. 1-4 (Exhibit HWS-5 at 275) states that the Company does not have any study in its possession and control that specifically compares the Company incentive compensation approved for recovery through rates in other jurisdictions. That means the reliance on the study is ignoring what happens in other jurisdictions.

Interestingly, while the Company relies on comparing compensation that is paid in other jurisdictions, they claimed in response to OPC Interrogatory No. 5-184 (Exhibit HWS-5 at 202) that aside from the disallowance of FCG incentive compensation in the 2023 FCG Order it is unaware of any other states where regulators have not allowed incentive compensation in base rates including the Florida Public Utilities natural gas and electric operating companies. That is truly a head-in-the-sand statement since, as discussed earlier, other Florida utilities as well as utilities in other jurisdictions have had incentive compensation excluded from base rates.

Q. CAN YOU SOME EXAMPLES OF WHERE INCENTIVE COMPENSATION HAS BEEN EXCLUDED FROM BASE RATES IN OTHER JURISDICTIONS?

A. Yes. I am directly and intimately familiar with New York, Vermont, and Connecticut as being some of the states that have disallowed incentive compensation.

Q. WOULD YOU IDENTIFY ANY ISSUES YOU HAVE WITH THE CUC INCENTIVE COMPENSATION PLANS OR THE ASSUMPTION THAT THE RELATED COSTS ARE APPROPRIATE?

A. The first issue is that according to the response to OPC Interrogatory No.1-28 (Exhibit HWS-5 at 50) assumes all eligible employees will receive incentive compensation. When compared to the response to OPC Interrogatory No.1-49 (Exhibit HWS-5 at 115), that response indicates that there are more eligible employees in 2026 and 2027 than the number of FTEs in the respective years. Ironically, the response to OPC Interrogatory No.1-49 (Exhibit HWS-5 at 115) states that the FTEs in the response to OPC Interrogatory No.1-49 (Exhibit HWS-5 at 115) is different from OPC

Interrogatory No.1-28 (Exhibit HWS-5 at 50) because OPC Interrogatory No.1-49 (Exhibit HWS-5 at 115) includes FTEs that are not eligible for incentive compensation. That statement explains why those receiving incentive compensation in 2024 and 2025 is lower than the numbers in OPC Interrogatory No.1-49 (Exhibit HWS-5 at 115), but it does not explain how 2026 and 2027 recipients exceed forecasted FTEs. The fact that everybody gets an incentive payment suggests that there is not really an incentive to perform *above* the day-to-day operational requirements. The second issue is the significant increase in incentive compensation from $1,320,210 in 2022 to $5,152,145 in 2025 with a projected cost of $4,822,610 in 2027. That equates to a 365.3% increase from 2022 to 2027 for which there is no justification offered. Third, the total projected for 2027 is not known at this time because the performance and results of operations are not known yet and the goals are not even set for 2027. Fourth, the Company reliance on the plans as support is misleading and does not reflect the actual funding of the incentive plan. The plans primarily provide a mapping of how to distribute the amount set up for distribution. The key section in the plan is the "Exceptions, Modifications, TIP Suspension or Termination" at the very end. That section of the plan states funding of the *bonus* program is predicated on the *overall financial performance* of the Company and that the plan is funded by achieving the Company's *annual financial targets* which are approved by the Board of Directors. The next paragraph of that section states that management reserves the right to reduce, suspend or eliminate the TIP for any reason. The financial targets are not identified, the financial results trigger the funding and determine the funding level of the incentive pool, the performance in 2027 is not known and there remains the possibility that the plan could be eliminated.

Clearly, the incentive compensation is based on financial results and not on all the disingenuous claims regarding safety and customer care.

For the Cash Bonus Incentive Plan, some of the performance criteria factors are earnings per share, earnings, change in stock price, ROE, and other financial measurements. Clearly, there is an overwhelming focus on shareholders. The customers effectively have to pay twice for the Stock and Incentive Compensation plan. First, to the extent that it is an expense paid for by customers and second, once the stock is issued, the customer has to pay a return on it.

The key concern is that the real emphasis on the incentive dollars being paid is that financial goals are the trigger. The response to OPC Interrogatory No. 5-185 (Exhibit HWS-5 at 203) states that plan funding is based on financial targets as approved by the Board of Directors. The response also states that components driving the incentive pool calculation are the achievement of threshold, target or maximum goals. The request asked for the calculation of the pool for 2023-2025 and forecasted years 2026 and 2027 but the Company did not provide the calculations to show how the various components are being used to develop the forecasted pool dollars. The Company was requested in the deposition of Michael Galtman to provide the pool calculation and the initial response again failed to provide the calculation.

Q. DO THE PLANS PROVIDE ANY INDICATION THAT SOME ADDED PERFORMANCE IS REQUIRED BY EMPLOYEES TO RECEIVE INCENTIVE COMPENSATION?

A. No. The performance identified in the TIP Plan are for tasks and achievements that would be expected of employees as part of their contractual relationship with the Company when hired. A company does not hire someone under the assumption that they will not perform their job in a safe manner. A company does not hire someone under the assumption they will not perform as a team player. The performance of service in the community may be something that a company assumes as a rewarding event if that participation was not communicated during the hiring process and the fact that only a 75% participation rate is required suggests that some employees would not qualify for a reward. Common sense suggests employees should avoid phishing incidents and should focus on cybersecurity. A company should expect employees to participate in training to advance their knowledge and skills as part of their employment obligation to the company. If FCG is of the opinion that these basic performances under an employment arrangement have to be goals for which all employees will ultimately be provided additional compensation then the management if the Company should be evaluated with a management performance audit. The reality is the goals referenced by the Company are for distributing the pool determined by financial metrics.

Q. HAS THE COMPANY JUSTIFIED THE INCLUSION OF ALL INCENTIVE COMPENSATION IN THE CURRENT FILING?

A. The Company made an attempt, but they did not justify it. The Company was asked whether there were any studies or analysis that show whether there is any benefit to ratepayers. The response to OPC Interrogatory No. 1-29 (Exhibit HWS-5 at 56) stated that "Upon acquisition of FCG by CUC, payroll for non-union employees were reviewed in order to align FCG employee pay with that of other similarly situated CUC

employees and at market-based rate." The response also states that "Incentive compensation is necessary to attract and retain highly trained and skilled personnel in the energy industry." In response to OPC Interrogatory No. 1-36 (Exhibit HWS-5 at 81) the Company further argues that compensation is at risk and if the Commission were to disallow the associated costs the Company would need to consider increasing base salaries to remain competitive with other companies also trying to attract and retain qualified employees. This is the same argument companies have repeated over and over as long as the inclusion of bonuses and incentive compensation in base rates has been requested. Despite disallowance of some or even all incentive compensation by various regulators over the decades I have participated in hearings I have never seen a company follow through with this kind of "crying wolf." In fact, in OPC Production of Documents Request No. 5-56 (Exhibit HWS-5 at 282), the Company was asked to provide any Board of Directors minutes where the possibility of changing the compensation in the event incentive compensation was disallowed was discussed and the response stated that there are no minutes discussing this.

Q. DO THOSE ARGUMENTS JUSTIFY THE INCLUSION OF INCENTIVE COMPENSATION IN RATES?

A. No. Just arguing that wages are competitive totally ignores the fact that regulators in Florida and other jurisdictions have excluded some or all incentive compensation for various reasons including customers sharing with shareholders as the benefit of bonuses for exceptional performance inures to both, that the payments are not really based on demanding goals that promote an incentive for increased performance or goals that reflect added incentive or even in recognition of the impact on customers due to current

economic conditions. Earlier I identified examples in Florida where this was the case. The Company was asked in OPC Production of Documents Request No. 1-4 (Exhibit HWS-5 at 275) to provide any studies the Company has in its possession that reflect a comparison of the Company's incentive compensation plan to those which have been allowed to be included in rates in other jurisdictions. The response stated, "While Chesapeake does have compensation analysis provided by its compensation experts, the Company has no study in its possession and control that specifically compares either or both of Chesapeake's four incentive compensation packages addressed in this case to incentive compensation approved for recovery through rates by Chesapeake, or any other company, in other jurisdictions." This absence of supporting documentation is especially relevant and critical since utilities always argue that compensation is reasonable based on comparisons to other utility companies. However, as the responses show, when rates are actually being established by other utilities and for FCG, the Company is unable to demonstrate that the inclusion of incentive compensation is comparable to what is allowed or not allowed in other jurisdictions.

The argument that, if not allowed, the cost may have to be incorporated in base salaries as I have discussed has been made over and over without any implementation despite jurisdictions' disallowance of costs. The emphasis on the plan goals on safety for employees and customers ignores the fact that that priority is what employees are required to do as part of their contractual obligation to the Company and ignores the fact those goals are for cost distribution, not for establishing the funding being asked of customers. This lack of proof and justification falls short of meeting FCG's burden of proof.

Q. ONE REASON YOU IDENTIFIED FOR OTHER COMMISSIONS EXCLUDING INCENTIVE COMPENSATION WAS THAT GOALS DID NOT PROMOTE AN INCENTIVE TO IMPROVE OPERATIONS. DO YOU HAVE AN OPINION ON THE GOALS FOR INCENTIVE COMPENSATION UNDER CUC?

A. The goals and achievements for the years 2023-2025 as depicted in the response to OPC Interrogatory No. 1-30 (Exhibit HWS-5 at 58) are those that an employee is expected to perform as part of the employee's employment or do not require an incentive for improving operations. Training is expected of employees and while it may improve operations, that is an expectation of employees that is not a above and beyond effort by the employee, I have no idea how participating in a survey is an enhancement of the normal duties of an employee. If said employee fails to identify concerns or improvements that come to their attention that could lead to discipline or termination. Participating in Community Support is not sufficient justification if there is no benefit other than enhancing the Company's image and image building is generally not an allowed expense in rates. The response to OPC Interrogatory No. 1-31 (Exhibit HWS-5 at 62) adds to concerns when it stated, "The Company does not specifically adjust the goals for prior year's achievements in setting new goals; however, we do review prior year performance to determine appropriate goals for the new year." Another goal is safety related yet the Company's injury and damage expense increased from an actual of $1,504,203 in 2024 to a forecasted $3,343,132 in 2027. To put the expense in context the 2021 expense in Docket No. 20220069-GU was $554,227.[21] The goals by all

[21] FCG MFR Schedule E, P. 4, in Docket No. 20220069-GU.

appearances are not designed for anything more than a means of distributing a bonus payment.

Q. ARE THERE ANY OTHER CONCERNS YOU HAVE IDENTIFIED WITH THE INCENTIVE COMPENSATION PAYMENTS?

A. Yes. Responding to OPC Interrogatory No. 1-32 (Exhibit HWS-5 at 65) the Company stated the TIP program which applies to "most" employees does not include a financial goal. However, the Chesapeake C-suite level executives' compensation, including incentive compensation, is subject to review and approval by the Board of Directors. Among the goals considered are a third-party consultant's analysis, certain corporate, operational, safety and financial targets. The key, though, is that the response stated, "Ultimately, any compensation adjustments are made at the **discretion** of the Board of Directors." (Emphasis added.) While the Company labels this as an incentive plan, the goals are for distribution only, and the discretionary determination makes it abundantly clear that the incentive compensation is a discretionary bonus and is not designed to improve operations that will benefit customers.

The suggestion though that the TIP Plan does not include financial goals is not true. As discussed in detail earlier, the TIP Plan funding according to the plan provided in the response to OPC Production of Documents Request No. 1-3 (Exhibit HWS-5 at 229), specifically states funding of the bonus program is predicated on financial performance. Financial goals provide benefits to shareholders. Contrary to what is an expected response from the Company that financial performance also benefit customers the reality is that customers are paying for safe and reliable service through rates that

provide recovery of and on plant and they also pay for expenses. Shareholders on the other hand are allowed a return that gives them some assurances not afforded non-monopoly companies in the form of the financial targets that determine the funding of the incentive compensation plans. CUC unabashedly brags to investors about delivering long-term top quartile earnings growth, which in turn facilitates top quartile dividend growth," and having "earnings growth driven by capital investment… leading to best in class shareholder return and that its model for financial success has "higher than regulated return on equity." Exhibit HWS-6 at 166, 169, 192, 237, 267, 311, 344, 423, 489, 565, 700.

Q. ARE YOU RECOMMENDING AN ADJUSTMENT FOR INCENTIVE COMPENSATION BASED ON THE INFORMATION CURRENTLY AVAILABLE?

A. Yes. My recommendation is that all of the $3,780,035 of incentive compensation requested should be excluded from base rates since there is no evidence that the plan design is providing a benefit to customers beyond what is already expected of employees as part of the employees' day-to-day obligation to the Company and customers. Anything less would be punitive and effectively force customers to continue paying for the ongoing impacts of a transaction that only serves the interests of shareholders. Requiring customers to pay for the excessive incentive compensation that is focused on enhancing earnings for shareholders is especially egregious at this time since customers are having to deal with a tough economy. As an alternative, conservatively, and consistent with Order No. PSC-2010-0153-FOF-EI, I am recommending that $1,402,594 of the long-term plan costs be excluded and that

$1,188,720 of short-term plan costs be excluded allowing for an equal sharing of the unproven perceived benefit to customers. The adjustment is reflected in Exhibit HWS-2, Schedule C-3. I want to emphasize, however, that under the egregious and abusive circumstances of this case this is not a reasonable option because FCG shareholders have positioned themselves to be enriched at the FCG customers' expense by proposing handsome rewards to the executives who made the acquisition happen. This case is overwhelmingly about shareholders with no discernable benefit to customers. Statements made contemporaneous with the transaction and immediately after making that clear. Exhibit HWS-6. The filing only reinforces that reality.

D. Employee Benefit Expense

Q. DID YOU REVIEW THE COMPANY'S EMPLOYEES BENEFITS AND THE ASSOCIATED REQUESTED COST?

A. Yes. This is another cost that has significantly increased after the acquisition by CUC. In As shown in Exhibit HWS-2, Schedule C-4, the 2022 the total employee benefits under FPL management were $1,055,050 of which O&M expense was $791,395. In 2025 the total employee benefit cost under CUC management increased to $4,707,472 and O&M expense increased to $3,123,984. The Company's request for 2027 O&M expense is $3,689,041 based on a total cost of $5,574,286. The increase is clearly related to the proposed 32.6% increase in FTEs from the 187 authorized by the Commission in the 2023 FCG Order and an increase in allocated cost. I would also note that the O&M expense amount is a moving target. Company MFR Schedule G-2, Page 17 indicates the Account 926 expense excluding payroll is $3,888,657; the response to

OPC Interrogatory No. 1-22 (Exhibit HWS-5 at 32) identified the expense as $3,689,041 and the response to OPC Interrogatory No. 5-179 (Exhibit HWS-5 at 199) identified the budgeted expense to be $3,606,823. My analysis will focus on the amount included in the filing.

Q. IS THERE A CONCERN WITH THE BENEFITS THAT ARE BEING PROVIDED?

A. Yes. The Company has three 401(k) plans, one of which is a stock plan and another that was labeled as a SERP plan. The Company in response to discovery stated that there was no SERP plan[22] and yet the filing identified one and the response to OPC Interrogatory No. 6-206 (Exhibit HWS-5 at 218) stated the 401(k) SERP was a Non-Qualified Deferred Compensation Plan for a *select group* of management or highly compensated employees. Then in response to OPC Interrogatory No. 9-263 (Exhibit HWS-5 at 227) the Company stated that the detail originally provided is for costs related to the Non-Qualified Deferred Compensation Plan, which are unrelated to SERP. The labeling as SERP was purportedly due to an erroneous ledger description and there is no SERP. The Company apparently cannot make up their mind on this but based on the description of the Non-Qualified Deferred Compensation Plan the benefit is similar to a SERP as it provides a benefit over and above the normal plans and is limited to a special group of employees. I view this as an excessive benefit.

[22] Response to OPC Interrogatory Nos. 1-65-68 (Exhibit HWS-5 at 155, 160, 162, 167).

Q. ARE YOU RECOMMENDING AN ADJUSTMENT TO EMPLOYEE BENEFITS?

A. Yes. As shown in Exhibit HWS-2, Schedule C-4, I am recommending a reduction of $384,399 to employee benefit expense. The adjustment consists of an exclusion of the special benefit cost for special employees of $43,025 and a $341,374 flowthrough based on my recommended adjustment to the employee complement. The adjustment is calculated using the average benefit expense per employee after excluding the special retirement plan cost, multiplied by the employee complement adjustment.

E. Storm Reserve

Q. IS THE COMPANY REQUESTING TO CONTINUE THE ANNUAL ACCRUAL OF $57,500 TO ACHIEVE A STORM RESERVE CAP OF $800,000?

A. Yes. As of December 31, 2025, the reserve for storms is $377,617. Since the acquisition of the Company by CUC, customers have contributed $119,922 to the reserve through December of 2025 with no storm events being charged against the reserve. (OPC Interrogatory Nos. 3-110 and 1-38, Exhibit HWS-5 at 172 and 89). The response to OPC Interrogatory No. 3-110 (Exhibit HWS-5 at 172) was filed in May 2026 so presumedly there were no storms charged to that date and the reserve balance would be $396,785 as of April 30, 2026.

Q. DO YOU HAVE AN ISSUE WITH THIS REQUEST?

A. Yes. The argument by the Company is that the accrual was approved by the Commission based on a study previously submitted. This argument ignores the fact that

the Commission previously approved depreciation rates approved while operated by FPL and the fact that FCG has filed for and received approval for a change in depreciation rates. This argument ignores the fact that operations are different under CUC management. This argument ignores that the study does not support an accrual specific to FCG territory.

Q. HAVE YOU REVIEWED THE STUDY THAT IS PURPORTED TO BE IN ACCORDANCE WITH RULE 25-7.0143(1)(1), FLORIDA ADMINISTRATIVE CODE, THAT THE COMPANY HAS RELIED ON FOR RECOVERY OF THE SELF INSURANCE RESERVE IN ITS REQUEST?

A. I have, twice. The study indicates there is an expected annual cost of $190,000 and there is a 1% chance that damages of $2,500,000 could occur and only a 13.9% chance that the April 2026 balance would be exceeded by a storm and after May that probability would be only 11.9%. The annual estimated cost is based on simulated hurricanes over a broad geographic area beyond FCGs service territory. While the study observes that some years will have no costs and some years will have small costs, it concludes that a few years will have a large cost. Since FCG was acquired by FPL, the largest cost was $48,626 in 2020 and only $9,799 was charged subsequent to that storm. As shown in Exhibit HWS-2, Schedule C-5 reflects the total cost charged against the reserve in the last 7 years is $58,426. That equates to an annualized expense of $8,347 based on a monthly average of $696 over the last 84 months. Absent any historical evidence that there will be more storms impacting the Company specifically and higher costs incurred, the storm reserve is currently sufficient for the next 47 plus years.

Q. HOW DID YOU DETERMINE THAT THE RESERVE IS SUFFICIENT FOR THE NEXT FORTY-SEVEN PLUS YEARS?

A. In 84 months since the reserve balance was $33,542 as of December 31, 2018, the Company has had three minor storms charged to the reserve totaling $58,426. That $58,426 averages to $696 a month for an annualized cost of $8,347. The April 2026 reserve balance of $396,785, assuming an average annualized cost of $8,347 would require 47.5 years before it would be fully utilized. This is based on actual data; it is not a guesstimate as assumed in the study being relied on. I do agree that some years will have no costs, some years may have some low costs and in rare instances a major charge may occur. This is evidenced by the historical data to date and at this time the single major annual cost is $48,626. During the last seven years from 2017-2024, there were 6 major storms in Florida:

Hurricane Michael – October 10, 2018 (Category 5)
Hurricane Irma – September 10, 2017 (Category 4)
Hurricane Ian – September 28, 2022 (Category 4)
Hurricane Idalia – August 28, 2023 (Category 4)
Hurricane Helene – September 27, 2024 (Category 4)
Hurricane Milton – October 9, 2024 (Category 3)

There were no hurricanes or major tropical storms making landfall in Florida during 2025. Despite the storms that did occur the storm reserve has survived with no major cost being charged. In fact, Chesapeake's CEO told investors in November 2024 that "I'd like to start with a short update on Hurricane season. Overall, our systems fared well through Hurricanes Debby, Helene and Milton, for which we are grateful." Exhibit HWS-6 at 233, 254. There was no mention of economic loss as evidenced by the minimal charges against the reserve.

Q. ARE YOU AWARE OF THE COMMISSION EVER STOPPING A PREVIOUS ANNUAL ACCRUAL FOR STORM DAMAGE?

A. Yes. In a Progress Energy case, I recommended the accrual be terminated since the reserve was sufficient to cover the historical trend of storms impacting the Company specifically and that the study relied on and focused on storms that covered an area beyond the customers of Progress. Order No. PSC-2010-0131-FOF-EI excluded from rates the continuation of the annual accrual.

Q. WHAT ADJUSTMENT ARE YOU RECOMMENDING?

A. In Exhibit HWS-2, Schedule C-5, I recommend that the annual accrual of $57,500 be discontinued beginning January 1, 2027, unless some storm occurs that would result in a rare charge against the reserve, the reserve balance will be $435,117 as of December 31, 2026.

F. Injuries and Damages/Insurance

Q. WHY ARE YOU COMBINING INJURIES AND DAMAGE WITH INSURANCE IN YOUR ANALYSIS?

A. As I have discussed earlier, the overall request by FCG is significant, especially when compared to the cost demonstrated by the previous owner's experience. To determine why the increase is higher, a comparison is required of the various costs. The analysis of costs for insurance and injuries and damage is best performed by combining the cost because the companies accounted for them differently.

Q. PLEASE ELABORATE ON THE DIFFERENCES?

A. FCG 2023 projected costs for Accounts 924 and 925 under FPL were $503,407 and $515,304, respectively. The response to OPC Interrogatory No. 1-65 (Exhibit HWS-5 at 155) in Docket No. 20220069-GU detailed the $1,018,712 of costs by insurance type with no indication of specific costs related to injuries and damages. For 2027 the FCG-requested costs for Accounts 924 and 925 under CUC are $478,731 and $3,343,132, respectively. The first notable difference is that according to MFR Schedule G-2, page 19d the non-payroll expense in Account 925 Injuries and Damage is $3,051,108. There was no payroll dollars amount included in Account 925 under FPL management while under CUC management the account includes $292,024 of payroll. Next the 2023 projected property insurance under FPL was estimated at $40,127 so some of the liability insurance costs were assigned to Account 924 Property Insurance. Under CUC the property insurance in Account 924 was $478,731. According to the response to OPC Interrogatory No. 5-189 (Exhibit HWS-5 at 208), the specific property insurance was $435,019 and $43,712 of vehicle insurance was included in that amount. This response noted that only a portion of vehicle insurance expense was included in the insurance since that cost is allocated across various O&M accounts. This is different from how FCG cost was projected in 2023 under FPL since all the costs were included in either Accounts 924 or 925. Another difference was that the 2023 projected cost was strictly insurance where the 2027 projection included $458,609 identified as “Other Adjustments to 924 & 925 in G2-19g-h not part of Insurance Direct Projection.” Apparently that cost is not readily identifiable.

Q. IS THERE A CONCERN WITH THE AMOUNT OF THE INJURIES AND DAMAGES/INSURANCE EXPENSE INCLUDED IN THE COMPANY'S REQUEST?

A. Yes. As discussed, the total expense including payroll is $3,343,132 in Account 925 and $478,731 in Account 924 as shown on MFR Schedule G-2, Page 17 for a total of $3,821,863. The historic base year costs in Docket No. 20220069-GU as shown on MFR Schedule G-2, Page 17 were $441,754 for Account 924 and $554,227 for Account 925 for a total of $995,981. Forecasted 2027 cost of $3,821,863 are 383.7% more than the 2021 actual of $995,981. This increase over six years should be concerning to the Commission. Based on supporting details, this increase is attributed to the allocation of costs from CUC and is further evidence that in its filing, the acquisition by CUC does not reflect the synergies that would be expected and which CUC bragged to investors about, especially given the acquisition premium paid by CUC.

Q. DID YOU MAKE A COMPARISON OF THE 2027 FORECAST FOR FCG UNDER CUC MANAGEMENT TO THE ACTUALS FOR 2022 AND 2023 UNDER FPL MANAGEMENT?

A. This comparison was intended as part of discovery but initially was not possible because the Company objected to providing the information. Subsequently responses were provided with the caption "Supplemental Response (as provided by prior owner)." The result of the initial and subsequently provided information is summarized in Exhibit HWS-2, Schedule C-6. The 2022 expense under FPL was $35,461 for Account 924 and $1,041,091 for Account 925 for a total of $1,076,552. The 2023 expense under FPL for Account 924 was $20,024 and $2,036,899 for Account 925—presumably for

11 months ending November 2023. To that I added CUC-managed amounts of $130,905 for Account 924 and $122,070 for Account 925 for the month of December 2023 under CUC, for a total expense of $150,929 for Account 924 and $2,158,969 for Account 925 for a combined total of $2,309,898 for 2023.

Q. CAN YOU DESCRIBE WHAT APPEARS TO BE A SIGNIFICNT INCREASE FROM 2022 TO 2023?

A. Yes. The supplemental responses to OPC Interrogatory's No. 1-37 (Exhibit HWS-5 at 84) and 1-39 (Exhibit HWS-5 at 94) provided cost information for Accounts 924 and 925 under FPL management. The 2022 dollars for the respective accounts was basically labeled as insurance cost in response to OPC Interrogatory No. 1-37 (Exhibit HWS-5 at 84) and the amounts provided were only $4,611 less than the combined cost of $1,081,163 as reported to the Commission for the year ended December 31, 2023.

For 2023 the comparable insurance cost under FPL management for the 11 months for Account 924 was $20,024 and the other insurance cost was $948,516 for Account 925. However, in the response to OPC Interrogatory No. 1-39 (Exhibit HWS-5 at 94), FPL identified Injuries and Damages for Account 925 to be $2,036,899. For my cost comparison I conservatively utilized the higher amount of $2,036,899 for Account 925. Since the supplemental response indicated the costs were for 11 months ending November 30, 2023, I added the CUC reported costs of $130,905 for Account 924 and $122,070 of costs for Account 925 and the final combined cost for 2023 $2,309,898 ($150,029 for Account 924 plus $2,153,969 for Account 925). The combined reported cost to the Commission for the year ended December 31,2023, was $2,238,525

($77,524 for Account 924 plus $2,161,001 for Account 925). The analysis in Exhibit HWS-2, Schedule C-6 is $81,373 higher than the reported combined amount and the only assumption for the difference is the report to the Commission includes 12 months and I should not have added the costs identified as CUC costs, but I elected to utilize the higher amount to avoid any concerns of understating the 2023 amount.

Q. BASED ON THE INFORMATION PROVIDED ON INSURANCE IS THERE ANY REASON THAT THE ACCOUNT 925 COSTS EXCEEDED THE INSURANCE CHARGED TO THAT ACCOUNT?

A. The cost in Account 925 can include the cost of insurance and adjustments to the reserve accrual associated with injuries and damages claims of employees or others, losses of such character not covered by insurance, and expenses incurred in settlement of injuries and damages claims.

Q. DO YOU HAVE ANY INDICATION WHAT COULD BE CONTRIBUTING TO THIS INCREASE?

A. The Company's supplemental response to OPC Interrogatory No. 1-38 (Exhibit HWS-5 at 89) identifies various debits and credits to the reserve with the credit for 2023 being $1,048,940 which may explain the majority of the difference between the $948,516 of identified insurance cost and the 2023 injuries and damages expense of $2,036,899 in the supplemental response information provided by the prior owner.

Q. ARE YOU RECOMMENDING AN ADJUSTMENT TO THIS EXPENSE?

A. Yes. As shown in Exhibit HWS-2, Schedule C-6, I am recommending a reduction of $2,154,354 in the Company's projected amount leaving an allowed (required) expense of $1,223,650 that is based on the actual expense from 2021 escalated by inflation from 2021 to 2027 using the Company inflation factor identified in response to OPC Production of Documents Request No. 30 (Exhibit HWS-5 at 277).

Q. PLEASE EXPLAIN THE RATIONALE FOR YOUR RECOMMENDATION AND THE ADJUSTMENT TO YOUR RECOMMENDATION FOR DIRECTORS & OFFICERS LIABILITY INSURANCE.

A. As I have stated, I used the 2021 expense of $980,723 as a base and applied the CPI inflation amounts for the period 2021-2027 based on the 24.77% inflation factor provided by the Company in response to OPC Production of Documents Request No. 30 (Exhibit HWS-5 at 277). This is the inflation factor that Company witness Everngam references in his testimony when he attempts to justify the rate increase request. The 2021 costs were used as a base because that was the actual historic test year in the 2022 rate case. The 2021 actuals are assumed reasonable since it should exclude any cost incurred in anticipation of the sale of FCG. The inflation factor is generous since it reflects the COVID-19-related inflation that occurred in 2022 and 2023 which in reality was an anomaly since many cost increases during that period declined in subsequent years. The Company amounts are clearly excessive when compared to a historical period that the Commission found to have been representative of safe and reliable operations as part of the overall assessment of the filing in Docket No. 20220069-GU. The D&O Insurance was excluded because I am addressing that cost separately and recommending a separate adjustment to D&O Insurance below.

Q. DIDN'T THE COMPANY PROVIDE DOCUMENTS AS SUPPORT FOR THE INSURANCE COSTS?

A. Yes and no. The documents provided were invoices dated 2025 for CUC, where costs were allocated, as discussed by OPC witness Lane Kollen, the allocation of costs is a separate issue and a major concern to the OPC. As for the so-called estimates, they were projections based on discussions with its insurance broker.[23] Clearly this could be considered as hearsay from my non-lawyer perspective. The OPC recommended expense of $1,223,650 is reasonable based on historic costs escalated by inflation.

G. Directors & Officers Liability Insurance

Q. WHAT IS THE COMPANY REQUESTING FOR RECOVERY OF DIRECTORS & OFFICERS LIABILITY INSURANCE IN 2027?

A. The response to OPC Interrogatory No. 1-18 (Exhibit HWS-5 at 27) identifies D&O expense of $151,835 for 2027. The history of this cost is summarized in Exhibit HWS-2, Schedule C-7. Company witness Joanah Bough at page 23 of her direct testimony states that the Company is requesting the full amount in 2027.

Q. WAS THERE A PREVIOUS DISALLOWANCE OF THIS EXPENSE BY THE COMMISSION?

A. Yes. The 2023 FCG Order reaffirmed a disallowance of 50% of D&O insurance expense. In the filing the Company reflected an adjustment complying with the order for 2025 (MFR Schedule C-2, Page 1) and 2026 (MFR Schedule G-2, Page 2) but

[23] Company response to OPC Production of Documents Request No. 3-34 (Exhibit HWS-5 at 279).

rejected the decision in its request for 2027. In an attempt to undo the Commission's past decision, the Company has put forward the same argument previously made that the cost is necessary to attract and retain qualified employees and directors.

Q. ARE THERE CONCERNS WITH THIS REQUEST BY THE COMPANY?

A. Yes. The Company request is not only concerning because its asking customers to pay for insurance that only benefits shareholders and the cost of $151,835 is ten times higher than the 2022 expense of $13,141. This increase is clearly related to the acquisition by CUC where allocated costs have increased significantly.

Q. WHAT IS THE PURPOSE OF D&O INSURANCE?

A. D&O insurance is designed to protect directors and officers from decisions they make that may be determined to be bad decisions or decisions of a questionable nature resulting in a claim against the decision makers and/or the Company. In my decades of experience the only claims made necessitating this coverage are made by shareholders, and I have yet to see a company provide evidence where anyone other than the shareholders has made a claim against directors and officers.

Q. WHAT ADJUSTMENT ARE YOU RECOMMENDING TO D&O INSURANCE EXPENSE?

A. I am recommending that the entire cost of $151,835 be excluded from rates since this cost provides no benefit to customers, especially in an environment when CUC is engaging in activities that indicate a transformation of the Company to potentially

increase acquisitions through IT systems that are scalability friendly. Exhibit HWS-6 at 310.

Q. WHY ARE YOU RECOMMENDING AN ADJUSTMENT DIFFERENT FROM 50% DISALLOWANCE IN THE 2023 FCG ORDER?

A. Since the Company is attempting to recover all the cost, I am recommending to the Commission that there be a complete disallowance because the cost associated with D&O insurance benefits shareholders. As explained earlier, the benefit of D&O insurance is the protection shareholders receive from directors' and officers' imprudent decision making. The benefit of this insurance clearly inures primarily to shareholders; some of whom generally are the parties initiating any suit against the directors and officers. If the Commission does not agree with the concept that shareholders are the prime beneficiary, then at the very least an equal sharing should be continued and a reduction of $75,918 would be required.

H. Rate Case Expense

Q. WHAT HAS THE COMPANY INCLUDED IN EXPENSE FOR THIS RATE CASE?

A. According to MFR Schedule C-13 the cost for the rate case is $4,215,262. That's an increase of 138.8% over the 2022 rate case costs listed on MFR Schedule C-13. Company witness Jessica Husted states in direct testimony at page 5 that the costs are proposed to be amortized over five years for Regulatory Commission expense of $843,052 for this proceeding.

Q. IS THAT INCREASE IN COSTS A CONCERN?

A. Yes. As I stated the test year costs of $4,215,262 are 138.8% higher than Docket No. 20220069-GU costs of $1,763,380. In Exhibit HWS-2, Schedule C-9, I applied the Company calculated 2026 inflation factor of 1.3418 from MFR Schedule C-37 and the result is $2,366,103. It is obvious the amount requested for rate case cost is excessive when compared to the escalated benchmark cost. The breakdown of the cost is of major concern especially when one rationalizes the appropriateness of the cost being included in this request. For example, the $373,117 for a depreciation study is not only more than twice the $157,862 of cost of Docket No. 20220069-GU where the cost was more than twice the cost in Docket No. 20170179-GU. The proposed depreciation cost here is for something not even subject to review in this case. The claimed costs for this study relate to Docket No. 20250035-GU that was filed in February 2025, where the hearing concluded before the test year letter was filed in this case. The Company never identified the depreciation study in that case as being part of a future rate case. The purpose of the depreciation study as I understand was not for a mere change in the depreciation rates but to regenerate an RSAM for the Company to massage rates for the benefit of shareholders. Additionally, this cost was incurred in 2024 and there is no basis for Commission authorization for the cost to be deferred for recovery in 2027-2031.

Another cost I find questionable is the $40,000 for a witness on the continued recovery of the acquisition costs carried over from the Southern Company acquisition of FCG. Company witness Matt Everngam provides testimony and an exhibit with a purported calculation that is supposed to identify the perceived savings in an attempt to meet one

of the five requirements to support the continued recovery of the acquisition adjustment. The outside consultant witness does not. Company witness Matt Everngam provides a history of the adjustment, and attempts to justify it by asserting that it is in the public interest, claims it has increased quality of service, purportedly has yielded supposed cost savings, and he asserts that it somehow gives better access to lower cost of capital and more professional and experienced management. Additionally, Company witness George Navo provided direct testimony claiming to give support for continued recovery of the acquisition adjustment under GAAP. Since at least two Company witnesses discussed the adjustment in their direct testimony, the need for an outside consultant is considered redundant especially since the witness relies on rulings he personally participated in the decision making his testimony biased. If FCG, under CUC management, is so qualified there is no need to pile on costs with a third witness. Maybe the Company has no confidence in their Company witnesses' ability to present justification they all seem to think is sound. This overreach on costs highlights the fact that FCG has offered 17 witnesses to support its claim here while in the last case, only six witnesses were needed to support FCG's filing.

The $475,750 for Temporary Staff Covering cost is considered inappropriate. This cost the Company claims is necessary because the employees who are working on the rate case have to have temporary staff perform tasks while Company employees work on the rate case. Apparently multi-tasking is not something the highly qualified new owner's employees can do. Additionally, by including the employee pay in rate case expense and the same employee's compensation in payroll expense in the 2027 test year customers will be compensating FCG twice for the same employees. Once as part

of amortization and again in payroll expense. Tacking the temporary pay on top of the double recovery is egregious. Excluding the temporary staff cost is conservative with the magnitude of employee pay included. Forecasted travel costs are six times the costs in the previous rate case. This increase is excessive and should be reduced by 50% to $60,050. Even though the travel costs increased by six times that increase pales when compared to the eight-fold increase in Other Notices/Supplies from $40,073 to $342,290. I recommend this cost be reduced by 50% to $171,145.

The next concern is the $100,000 of cost identified as "Other Tariff" that is in addition to the $258,750 of cost for "Tariff Changes & Management." This $100,000 added by all appearances is a contingency. The next inappropriate cost is the $100,000 for Other Prior Owner Assistance." This cost is inappropriate because the assistance for information is unreasonable since CUC acquired FCG and in doing so should have the necessary information required as part of CUC's due diligence in purchasing FCG especially with the premium it paid for FCG. In addition, any cost required by CUC is in reality part of the acquisition and should be considered acquisitions costs. The cost of access to the books and records—which only becomes difficult because CUC bought FCG and did not ensure complete access to any information needed to support its burden of proof—should not be heaped on customers. Finally, the amortization of the prior rate case cost of $147,601 is inappropriate since it was the Company's choice to come in for a rate increase and to compound rate case costs by pumping up what is supposed to be current rate case costs. One additional concern is the accuracy of the Company estimate since the cost to date as of March 31, 2026, were $1,133,889 or 26.8% of the estimated cost so the estimate appears high absent more up to date information and justification.

Q. ARE THERE ANY OTHER FACTORS THE COMMISSION SHOULD TAKE INTO CONSIDERATION WHEN CONSIDERING THE EXCESSIVE INCREASE IN REQUESTED RATECASE EXPENSE AMOUNTS?

A. As alluded to earlier and throughout my testimony, costs have significantly increased under CUC management. The Company and the Commission focus on benchmarks when justifying costs in rates. That same focus should also be applied to cost increases over that benchmark and result in blind acceptance of the Company's purported justification for the increase that things are different. The only difference I have seen in this case is the notion that spending has no limit as exemplified by the premium paid by CUC in the acquisition of FCG.

Q. WHAT ARE YOU RECOMMENDING?

A. I am recommending the cost of the case be reduced by $1,467,663 by excluding the costs discussed above. The adjustment recommendation consists of the depreciation study costs of $373,117, the outside consultant cost for the acquisition adjustment of $40,000, the $475,750 of Temporary Staff cost, $60,050 of travel cost, $171,145 of Other Notices/Supplies, the Tariff Other cost of $100,000, the Other Prior Owner cost of $100,000 and the amortization of the prior rate case cost of $147,601.

Q. HOW DOES YOUR RECOMMENDATION IMPACT THE COMPANY'S REQUEST?

A. As shown in Exhibit HWS-2, Schedule C-9, a reduction of $293,533 is recommended to the $843,052 of rate case expense included in the cost of service.

I. Outside Services

Q. WHAT CONCERNS HAVE YOU IDENTIFIED WITH THE COST FOR OUTSIDE SERVICES REQUESTED?

A. The amount of legal costs, the audit costs and various other costs are a concern. Another issue is that while the projected amount of the 2026 and 2027 expense is assumedly set, there seems to be a discrepancy in what the 2025 costs were.

Q. WHAT DO YOU MEAN THERE SEEMS TO BE A DISCREPANCY WITH THE 2025 COSTS?

A. The 2025 outside services expense as shown on MFR Schedule G-2, P.17 and on MFR Schedule C-5, is $1,827,731. MFR Schedule G-2, Page 19b adjusts the $1,827,731 by $129,285 to $1,957,016. Using the Excel workpapers for MFR Schedule C-31, the expense in Account 923 is at least $1,895,860 since one amount listed is for various accounts. The 2025 annual report filed with the Commission at page 29, lists the Account 923 expense on line 103, as $2,366,234. Complicating the issue is reference to MFR Schedule C-31. The affiliate costs listed for Account 923 total $846,459 and the responses to OPC Interrogatory No. 5-176 (Exhibit HWS-5 at 194) and OPC Interrogatory No. 6-214 (Exhibit HWS-5 at 222) list the Account 923 allocated costs to be $1,343,809. This is a concern because if the Company cannot figure out what the Account 923 actual costs are, then how can the Commission rely on the forecasted cost.

Q. WHAT ARE YOUR SPECIFIC CONCERNS WITH THE LEGAL COSTS INLCLUDED THE COMPANY'S REQUEST?

A. The legal costs for 2026 and 2027 are based on an escalation of the 2025 costs at a rate of 2.5% per year. This assumes that 2025 is normal and the Company can identify what the actual 2025 costs were. The response to OPC Interrogatory No. 5-191 (Exhibit HWS-5 at 292) states that the increase in Baker & Hostetler LLP cost in 2025 when compared to 2024 was primarily driven by cost associated with a personal injury case. That suggests that despite the Company emphasis on safety in this case they are assuming that injuries not previously impacting legal costs in 2023 and 2024 are going to continue going forward. I do not agree with this assumption and am recommending the costs for Baker & Hostetler LLP be based on an escalation of the 2024 cost. The explanation for the increase in costs for Gunster Yoakley & Stewart PA is that the prior owner had an extensive in-house legal department, while CUC maintains a smaller legal department and relies on outside services as necessary. That explanation has merit since there is an economic benefit from a larger owner's cost sharing and outsourcing required by a smaller owner will result in higher rates than in-house legal counsel.

Q. WHAT IS THE ISSUE WITH AUDIT FEES?

A. The issue is that FCG was acquired by CUC, and it would be expected that customers would derive some benefit from the change in ownership. The Company, in its presentation in the rate case, is suggesting more efficient operations but at what cost. The response to OPC Interrogatory No. 1-24 (Exhibit HWS-5 at 39) in Docket No. 20220069-GU listed actual audit fees of $114,000 in 2021. The audit fees listed in the response to OPC Interrogatory No. 1-7 (Exhibit HWS-5 at 7) for 2025, and projected for 2026 and 2027 are $403,683, $413,648 and $423,930, respectively. The increase is significant and absent legitimate justification that customers are benefiting from the

increase as part of the Company's requirement to provide safe and reliable service at a reasonable cost, the increase is not justified.

Q. ARE THERE OTHER OUTSIDE SERVICE COSTS THAT ARE AN ISSUE?

A. Yes. The 2025 other costs in Account 923 as shown in Exhibit HWS-2, Schedule C-10, total $988,750 and the 2027 costs excluding the ERP adjustments is $1,300,396 ($1,546,976 - 246,580), an increase of 31.5% in 2 years. Given the use of an annual 2.5% escalation factor used by FCG to escalate legal and auditing fees from 2025 going forward, the 31.5% is clearly excessive, especially since 2025 included a TSA cost. As discussed in detail by OPC witness Lane Kollen, ERP costs are a concern, the $1,819,408 of costs associated with implementation of ERP are an issue.

Q. WHAT ADJUSTMENTS ARE RECOMMENDED TO OUTSIDE SERVICES?

A. The OPC is recommending a reduction to O&M expenses of $552,019 as shown in Exhibit HWS-2, Schedule C-10. The first adjustment is a reduction to legal fees of $78,463. This was calculated by taking the 2024 fees of $124,814 for Baker & Hostetler LLP and escalating that by applying the Company's 2.5% annual escalation factor over a three-year period. I then identified the difference between the requested $212,874 and my recommended (escalated) indicative expense of $134,411 to develop my recommended adjustment to legal fees of $78,463.

The audit fees reduction of $211,965 was determined by reducing the 2027 expense of $423,930 by 50%. This is to reflect a more reasonable cost to customers when you take

into consideration that the fees under FPL management were $114,00 and $95,000 in 2021 and 2022, respectively.

Q. WHY WOULD IT BE APPROPRIATE TO REDUCE THE FEES REQUSTED THAT ARE BASED ON RECENT HISTORICAL COSTS?

A. The Company is supposed to provide safe and reliable services at a reasonable cost. This rate request is driven by the acquisition by CUC and its proposed spending. Prior to the acquisition this Commission in Docket No. 20220069-GU found FPL should be considered as a benchmark when evaluating whether the cost included in the current request to provide a comparable level of service is reasonable. What cannot be ignored in determining whether the level of service is reasonable is the fact that, based on this filing, CUC is requesting significant cost increases and cannot even identify any cost savings to offset those higher costs.

Q. PLEASE CONTINUE WITH YOUR EXPLANATION ON HOW THE OPC'S RECOMMENDED REDUCTION TO OUTSIDE SERVICES WAS DETERMINED.

A. The next adjustment is a reduction of $261,791 to the other costs included in outside services. This was determined by escalating the 2025 other outside service cost of $988,750 after excluding legal fees and audit fees by 2.5% for 2026 and another 2.5% for 2027. The recommended expense of $1,033,738 is $261,591 less than the net other 2027 costs of $1,300,396 ($1,546,976-246,580).

Q. THE NEXT ADJUSTMENT APPEARS TO INCREASE OUTSIDE SERVICES. WHY IS THE COST BEING INCREASED?

A. The adjustment is not really an increase in outside services. It reflects the impact of OPC witness Lane Kollen's adjustment related to the DISTRIGAS Allocation as this is the estimated portion provided to me of the DISTRIGAS Allocation adjustment applicable to outside services. This is required to avoid a duplication of our respective recommendations. The result is my reduction to total O&M Expense for outside services of $507,596.

Q. DO YOU HAVE ANY OTHER CONCERNS ABOUT OUTSIDE SERVICES?

A. Possibly, since at the time I am preparing my testimony there are outstanding discovery requests that relate to these accounts. Depending on the nature of the responses, I reserve the right to adjust my recommendation.

J. Uncollectible Expense

Q. DID YOU REVIEW THE COMPANY'S REQUEST FOR UNCOLLECTIBLE% EXPENSE?

A. Yes. The Company's request for $600,441 ignores the reality that the historical three-year average net write-offs are $321,013. The 2025 bad debt expense was $550,570 exceeding the actual net write-offs of $147,542 by $403,028.

Q. HOW DID THE COMPANY DETERMINE ITS REQUESTED EXPENSE?

A. The Company stated its test year 2025, 2026 and 2027 rate year uncollectible expense reflects the *five-year historical average* of uncollectible expense. As I noted earlier, it is ironic that despite the Company claiming that the historic information prior to the month of December 2023 was not available, this five-year historical average included information from 2021, 2022 and the full year 2023. The problem is the calculation is based on the expensed amount and not on the actual net write-offs during that period.

Q. WHAT IS THE ISSUE WITH REFLECTING THE AMOUNT OF EXPENSE RECORDED EACH YEAR?

A. The expense reflects an accrual on the estimated expense that as shown in Exhibit HWS-2, Schedule C-11 is not even reasonably close to what the actual historical write-offs are and the resulting declining write-off rates. This expense is dependent on the accrual to the reserve that is supposedly based on actual write-offs in relationship to the outstanding accounts receivable. Clearly as Exhibit HWS-2, Schedule C-11, depicts, the expense under CUC management exceeds the actual net write-offs by an excessive amount. I would envision the Company claiming that the bad debt expense is subject to their auditors' review and approval therefore it is reasonable. The difference here is that customers are being asked to pay an expense that is significantly higher than the normal, actual bad debt write-off. In setting rates, the actual historical write-offs should be the benchmark and not a guess at what could be because the Company says so. This is a cost the Company efforts in collection can control and by all appearances the Company has done a decent job by significantly reducing the actual net write-offs.

Q. IS THERE ANYTHING ELSE THAT SHOULD BE CONSIDERED WHEN EVALUATING THE BAD DEBT AMOUNT IN RATES?

A. I believe that consideration needs to be given to the significant increase in Customer Records and Collections expense since the acquisition. As shown in Exhibit HWS-3, Page 2, Line 36, the expense was $2,923,698 in 2022 and the 2027 test year is $6,517,319, or more than double the last pre-acquisition level. It would be expected that some benefit is being achieved with such a significant increase in managing collections.

Q. WHAT ARE YOU RECOMMENDING FOR AN UNCOLLECTIBLE EXPENSE FOR THE TEST YEAR 2027?

A. As reflected in Exhibit HWS-2, Schedule C-11, applying the three-year average net write off rate of .23% to the Company forecasted revenue of $182,641,677 uncollectible expense would be $420,281 resulting in a reduction of $180,160. I believe this is more than a conservative adjustment since the tone in this filing is FCG is performing better under CUC than under FPL and if strict application of performance under CUC were applied the significant lower write off rate of .13% would be applied.

K. Affiliate Expense

Q. DO YOU HAVE CONCERNS WITH AFFILATE COSTS?

A. Yes. OPC witness Lane Kollen is addressing specific issues with affiliate costs and I am providing a high-level assessment of my concerns. Exhibit HWS-3 shows the

affiliate expense approved in the 2023 FCG Order was $2,477,003 and the 2027 forecasted cost is $25,256,622.

Q. DO YOU HAVE AN ISSUE WITH THE COSTS INCLUDED AS AFFILIATE CHARGES?

A. Yes. The affiliate cost increase is clearly excessive and raises concern as to how the cost could increase when CUC paid a $466 million premium to acquire FCG. If a buyer is willing to pay a premium of this magnitude, common sense and due diligence results should suggest that operations are performing at a high level and that there is an expectation that despite that, performance improvements can be made to reduce costs so that the premium cost could be paid for by synergies.

Q. DID YOU INQUIRE AS TO WHY THE AFFILIATE COST INCREASED SO SIGNIFICANTLY?

A. Yes, The Company explanation was CUC accumulates costs and allocates them to the business units. The explanation further suggests that the prior owner treated costs as direct costs. Interestingly the Company response to OPC Interrogatory No. 6-202 (Exhibit HWS-5 at 215) suggested that it would be more realistic to compare the historic year 2021 actual total expense to the 2025 actual costs by using the benchmark analysis. Exhibit HWS-3, Page 2, does what the Company suggested. The 2025 actual cost are 42.28% higher than 2021 O&M expense which exceeds the Company calculated Inflation & Growth Compound Multiplier for 2025 of 28.58%. The 2027 forecasted O&M expense is 64.81% higher than the 2021 actual when Exhibit ME-3 indicates the benchmark increase from 2021 to 2027 is 40.23%. The response then

offers an excuse for the cost increases over the benchmark essentially that CUC charges costs differently and the implementation of new systems. Ironically, the supposed justification is that improvements are required despite the fact that CUC paid a significant premium to acquire FCG.

Q. WHAT DO YOU MEAN THAT THE COMPANY PROVIDED EXCUSES?

A. Excuses is how I view the response since it appears to be a diversion tactic to shift the focus of my discovery question which was seeking an explanation for the almost $25 million difference between the $2,477,003 of affiliate expense allowed by the Commission in the 2023 FCG Order and the 2027 forecast of $27,436,036. The request also asked the Company to include an explanation as to what historical FCG costs were eliminated and replaced with affiliate charges. FCG tried to explain it away by referring to a difference in how FCG under FPL and FCG under CUC charge their costs. The response did not explain what historical costs were replaced by affiliate charges.

FCG further attempted to deflect by claiming that the 2023 projected expense may not represent actual 2023. If FCG had figured this had substance one would think the Company would provide a reference to some analysis or some comparison they made. FCG suggested some comparison of the allowed to actual so based on responses to discovery I made that comparison. The supplemental response to OPC Interrogatory No. 1-2 (Exhibit HWS-5 at 1) provided the information. The affiliate charges to O&M accounts for the 11 months under FPL management totaled $2,162,094 and the one month under CUC management was $1,971,628 for a total of $4,133,722. I found it interesting how only one month under CUC management is almost equal to 11 months

under FPL management. Based on the observed trend if there were 12 months of actual under FPL management, the actual would have been on target with the $2,477,003 allowed by the Commission.

FCGs' response next tried to deflect the focus of the question by suggesting the OPC should compare 2021 to 2025 costs as they have done, making reference to MFR Schedule C-34. That schedule shows the 2025 adjusted O&M expense to be $40,130,443 and the 2021 adjusted and escalated O&M expense to be $31,383,325. This means that the costs under CUC management are $8,747,118 over the benchmarked O&M expense. That schedule does not provide a comparison of the affiliate costs as requested in OPC Interrogatory No. 6-202 (Exhibit HWS-5 at 215).

The response continues by again suggesting that the OPC undertake a comparison of 2021 costs to 2025 costs and further suggesting that Company Exhibit JH-2 provides detailed justification for the difference in cost between the two owners (FPL and CUC). According to the testimony of Company witness Jessica Husted, her Exhibit JH-2 provides an overview of the explanations for the Benchmark variances. Again, the reference is to differences in O&M expense in total and does not compare the differences in affiliate costs from the 2023 amounts allowed by the Commission and the forecasted 2027 amounts of the same nature. At this juncture I would note that the crux of the discovery request was to identify what affiliate charges were driving the 82.8% increase in O&M expense from the $25,497,650 allowed by the Commission for safe and reliable services to the $46,623,423 forecasted for 2027. As for the Company Exhibit JH-2, the explanation for differences from 2021 to 2025 fails to

provide the explanation sought in the discovery request. The detail in Exhibit JH-2 does explain some changes in cost but does not provide justification for the changes. For example, a difference in O&M of $480,289 was simply attributed to an increase in FTEs - with no actual justification. Of course, the increase in FTEs is an issue since synergies would otherwise be expected when an acquisition occurs. Another explanation relates to increases of $765,020 and $218,395 that were due to CUC increasing union pay and non-union pay, respectively. I find it curious that what was competitive pay, based on the market under FPL, is not now competitive enough under CUC. Another difference to be addressed was $1,335,449 and the explanation was that the difference was due to the previous owner charging costs to different accounts with a reference to fleet expenses. These are just words that provide no justification. The explanations are insufficient since they simply make reference to a functional group where Operations and Maintenance is listed 6 times. The reasons provided do not explain to what accounts these costs were charged by FCG under FPL and to what accounts they were charged by FCG under CUC. There is no linking the group explanations or specifically how costs were shifted from one group or account to another. Again, there is no explanation provided for the change from the approved 2023 affiliate cost of $2,477,003 to the 2027 forecasted cost of $27,436,036. As a part of this proceeding FCG expects customers to pay these unjustified costs. Their justification for it is woefully inadequate.

Q. HAS THE COMPANY PROVIDED ANY EXPLANATIONS FOR CHANGES IN AFFILIATE COSTS FROM ONE YEAR TO ANOTHER YEAR?

A. Yes. The response to OPC Interrogatory No. 6-214 (Exhibit HWS-5 at 222) provided a comparison of the 2025 affiliate cost to the 2027 affiliate cost in an attempt at explaining the 25.8% change. The first explanation was the difference was due to the methodology used to budget payroll. This explanation is confusing since the budget for 2025 and the forecast for 2027 are both under CUC management, so should it be assumed that the Company budgeted and charged costs differently under their accounting system? The next change discussed is a 23.3% increase in Customer Records and Collections expense. The explanation is that the difference is due to payroll post-ERP implementation, the costs of the customer self-service portal and annualization of cost. The explanation as to why the increase is there but there is no indication why the increases are necessary. The next explanation was for a 13.4% increase in Administrative & General Salaries where the difference was due to the re-deployment of employees after ERP implementation and new positions. The explanation for a 106.6% increase in outside services is due to the annualization for 2025 SAP billing and an increase for Blackline Lone Worker costs and licensing. The explanations by account are an improvement but they only explain what the driver of the difference between the $21,810,092 of 2025 affiliate charges to O&M compared to the $27,436,036 affiliate charges to O&M for 2027 may be. The explanations are not justification for the increases as the real issue is what is the reason for an almost $25 million difference between the $2,477,003 of affiliate expense allowed by the Commission in the 2023 FCG Order and the 2027 forecast of $27,436,036 and how the large increase benefits customers. The fact remains that O&M expense increased 82.8% from the $25,497,650 allowed by the Commission for safe and reliable services to the $46,623,423 forecasted for 2027. That increase is driven by the increase in

affiliate charges along with employee additions, excessive incentive compensation and other costs with insufficient justification for the increases.

Q. WHAT ADJUSTMENT ARE YOU RECOMMENDING TO AFFILATE CHARGES?

A. The adjustment to allocations are discussed in detail by OPC witness Lane Kollen. Because the Company has charged the costs to specific business units resulting in allocations being made to specific accounts, my recommendations are reflected in my previous specific discussions. Instead of an adjustment to affiliate costs in general, I have made various adjustments to specific expense as discussed in detail throughout my testimony.

L. Payroll Tax Expense

Q. DOES YOUR RECOMMENDED ADJUSTMENT TO PAYROLL IMPACT PAYROLL TAX EXPENSE?

A. Yes. In Exhibit HWS-2, Schedule C-12, I have calculated a reduction of $404,155 to payroll tax expense. Once again, the change in ownership is evident since the requested expense in 20220069-GU was $789,177 and the current request is $1,243,394, a 57.6% increase. The adjustment is a simple flowthrough of my recommended payroll adjustment and incentive compensation adjustment. I determined the effective payroll tax expense rate of 6.01% by dividing the test year payroll tax expense of $1,243,394 by $20,694,172, which is the total of payroll and incentive compensation costs

expensed in the test year. I then applied the effective rate to the total recommended adjustment of $6,726,471 associated with payroll and incentive compensation.

M. Property Tax Expense

Q. **DID YOU REVIEW THE COMPANY'S REQUEST FOR PROPERTY TAXES?**

A. Yes. The Company property tax requested for 2027 is $8,429,202 net of the tax associated with SAFE and Relocation plant in rate base.[24]

As shown in Exhibit HWS-2, Schedule C-13, property tax expense in 2021 was $2,763,965 decreasing to $2,750,898 in 2022. The 2023 property tax expense increased to $3,939,812 around the time the new LNG facility was put in service. Suddenly in 2024, under CUC management post-acquisition, the property tax increased $3,294,894 (83.6%) to $7,234,706. This increase was based on a tax basis of $422,967,676 when plant in service was $732,990,888. The tax basis in 2024 was 57.7% of the plant in service. In 2025 the Company listed the tax basis as $426,848,862 which is 54.46% of the year-end plant in service of $783,736,837. The Company filing indicates the tax basis in 2027 of $886,174,667 is equal to the $886,174,667 average plant in service. The $8,858,620 forecasted property tax expense is based on a 1% effective tax rate. In all my years of analyzing property taxes I do not recall a tax rate of 1% based on the gross average plant in service. Typically, the tax basis is a fraction of the average plant in service generally in the 50% to 60% range. As an example, the tax basis for 2025 is 58.33% as shown in Exhibit HWS-2, Schedule C-13. The increase in tax basis could not be explained by the Company's expert when asked about it in deposition. In my

[24] Company response to OPC Interrogatory No. 1-61 (Exhibit HWS-5 at 149).

experience an 83.6% increase in property taxes from 2023 to 2024 is unheard of. There is definitely an issue with the taxes that apparently were paid in 2024 and 2025. Typically, utilities will interact with tax authorities to minimize taxes but in this case the purported more efficient FCG under CUC management appears to be working to increase taxes. One possibility is the allocation from CUC may include a significant charge ignoring the real property taxes specifically for FCG property or the increase could be reflecting the $466 million acquisition premium.

Q. PLEASE EXPLAIN THE DIFFERENCE IN THE AVERAGE PLANT BALANCE AND THE TAX BASIS YOU REFER TO?

A. The average effective property tax rate would be in the range of .9% to .98% and would be applied to the tax basis of the property and not the average cost of plant in service. As I stated earlier, referral to Exhibit HWS-2, Schedule C-13, lines 22 and 23, shows that the tax basis is a fraction of the plant in service. The tax basis is the assessed property value to which the effective tax rate is applied to calculate the tax obligation. On lines 9 to 13, I am showing what would normally be a calculation of property when a tax basis is established and the effective tax rate is applied. That result is lower than the OPC estimated tax using an effective tax rate based on taxes to total plant.

Q. ARE YOU RECOMMENDING AN ADJUSTMENT TO PROPERTY TAX EXPENSE?

A. Absolutely. The financial oversight of FCG by CUC by all appearances suggests that cost control is not sufficiently a priority and something upon which it is not "laser-focused." I recommend that two adjustments to property tax expense are required. The

first adjustment of $2,819,027 is to reduce the expense on the Company-forecasted average plant in service multiplied by the effective tax rate of .63% for 2023. The effective tax rate was calculated based on the 2023 property taxes of $3,939.812 as a percentage of the 2023 average plant in service of $622,326,695. The second adjustment of $189,852 is calculated by multiplying the OPC recommended adjustments to plant in service of $29,988.702 by the same effective rate .63%.

Q. ARE YOU CONCERNED THAT THE INCREASE IN PROPERTY TAXES IS AT ALL DRIVEN BY THE SALE AND $466 MILLION ACQUISITION PREMIUM?

A. It is a concern, but I have no direct evidence that this is influencing the post-acquisition increase in property tax. The proposed adjustment using the 2023 effective tax rate factor will also eliminate any concern in this regard.

Q. WHY ARE YOU USING AN EFFECTIVE TAX RATE FROM 2023 AND WHY DID YOU APPLY A RATE CALCULATED BASED ON AVERAGE PLANT?

A. The 2023 property taxes are the last year that taxes had any semblance of being reasonable when considering the plant in service balance that is subject to property taxes. In my analysis I calculated the effective tax rate based on the average plant in service instead of the year-end plant in service because I am applying the calculated rate to the Company's average plant requested in the filing. If I calculated the effective rate based on the year-end balance for 2023 the effective tax rate would be lower. I am sure the Company would say my adjustment is not based on an apples to apples

comparison since the calculated rate would be based on year-end plant and then applied to average plant.

N. Depreciation Expense

Q. ARE THERE OTHER ADJUSTMENTS TO DEPRECIATION EXPENSE BEYOND THE PLANT ADJUSTMENTS DISCUSSED EARLIER?

A. Not at this time. The adjustments I have reflected are associated with the OPC's recommended reductions to plant and are based on the Company applicable rates or the cumulative effective rate.

O. Income Taxes

Q. WHAT ADJUSTMENT ARE YOU RECOMMENDING TO INCOME TAX EXPENSE?

A. In Exhibit HWS-2, Schedule C-14, I have increased income tax expense $6,730,424 associated with the $26,555,233 increase in operating income. Additionally, OPC witness Lane Kollen is recommending a reduction of $1,773,908 to reflect the impact of Rule 25-14.004, F.A.C., Effect of Parent Debt on Federal Corporate Income Tax. I have incorporated the effect of his adjustment in my schedules.

Q. PLEASE EXPLAIN WHY THE ADJUSTMENT IS APPROPRIATE.

A. The recommended changes to revenue and expenses increased operating income before taxes. The recommendations increased income and with that increase, income taxes will increase. This portion of the adjustment is a standard adjustment in a rate filing.

Additionally, Rule 25-14.004, F.A.C. requires the Company to reflect the income tax expense deduction associated with the parent's debt that is presumed to be invested in the equity of the subsidiary where the parent-subsidiary relationship exists, and the parties join in the filing of a consolidated return. I will note that this adjustment is supported by OPC witness Lane Kollen, and the Company failed to reflect the calculation on MFR Schedule C-26.

P. Interest Synchronization

Q. PLEASE EXPLAIN THE INTEREST SYNCHRONIZATION ADJUSTMENT.

A. Because rate base changes occur, the amount of estimated interest for tax purposes changes. That change along with changes in the interest rate for financing rate base impacts income taxes. As shown in Exhibit HWS-2, Schedule C-15, my recommended reduction rate base results were offset by OPC witness Christopher Walters changes to the capital structure increasing the interest deduction. The result is an increase to income tax expense of $1,820,463.

Q. Other Concerns

Q. ARE THERE ANY CONCERNS ABOUT WHETHER PROJECTED AND FORECAST RATEBASE AND NET OPERATING INCOME ARE REPRESENTATIVE OF THE OPERATIONS OF THE COMPANY DURING THE TIME WHEN PROPOSED RATES ARE EXPECTED TO BE IN EFFECT?

A. Yes. There are a number of concerns that exist along this line after considering the filing, discovery, and other information I have reviewed.

Q. **PLEASE ELABORATE.**

A. In reviewing the filing and the annual reports filed by the Company, it became apparent that the Company has exhibited very little benefit from integration into the CUC/FCG centralized services organization. The Company has repeatedly stated in response to discovery that any synergies from the acquisition and/or proposed investment in plant have not been reflected. There has been no indication a documented cost benefit analysis exists from the integration with CUC, with the proposed investment in additions to plant and/or the proposed increase in employees.

Q. HAVE YOU REFLECTED ANY ADJUSTMENTS IN YOUR SCHEDULES FOR THE INTERIM TEST YEAR OF YEAR-END 2025?

A. No.

Q. ARE ADJUSTMENTS APPROPRIATE?

A. Yes, but it is my understanding that the OPC intends to pursue this issue in the hearing and has raised an issue to address it. To the extent that the Commission agrees that costs that witness Kollen and I identify are improper for recovery from the customers in the test year and those same types of costs are present in the 2025 interim test year, they should be likewise disallowed and refunded to customers with interest. At this point in time any transaction related costs that are found in the capital structure related to the FCG Direct long term debt and the harmful impact of the Section 338(H)(10) election, for example, plus the carryforward effect of the RSAM increasing rate base for costs that are not allowed in ratemaking, should also be identified and removed and refunded with interest.

Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

A. Yes, it does. However, I would like to state that just because I did not offer a comment or adjustment on any aspect of the Company's case not mentioned above, it cannot be assumed that I am in agreement with such portions of the filing. Additionally, to the extent that discovery information is provided too close in time to incorporate into my testimony and schedules I reserve the right to amend my testimony.

QUALIFICATIONS OF HELMUTH W. SCHULTZ, III

Mr. Schultz received a Bachelor of Science in Accounting from Ferris State College in 1975. He maintains extensive continuing professional education in accounting, auditing, and taxation. Mr. Schultz is a member of the Michigan Association of Certified Public Accountants

Mr. Schultz was employed with the firm of Larkin, Chapski & Co., C.P.A.s, as a Junior Accountant, in 1975. He was promoted to Senior Accountant in 1976. As such, he assisted in the supervision and performance of audits and accounting duties of various types of businesses. He has assisted in the implementation and revision of accounting systems for various businesses, including manufacturing, service and sales companies, credit unions and railroads.

In 1978, Mr. Schultz became the audit manager for Larkin, Chapski & Co. His duties included supervision of all audit work done by the firm. Mr. Schultz also represents clients before various state and IRS auditors. He has advised clients on the sale of their businesses and has analyzed the profitability of product lines and made recommendations based upon his analysis. Mr. Schultz has supervised the audit procedures performed in connection with a wide variety of inventories, including railroads, a publications distributor and warehouser for Ford and GM, and various retail establishments.

Mr. Schultz has performed work in the field of utility regulation on behalf of public service commission staffs, state attorney generals and consumer groups concerning regulatory matters before regulatory agencies in Alaska, Arizona, California, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kentucky, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Jersey, New York, Nevada, North Dakota, Ohio, Pennsylvania, Rhode Island, Texas, Utah, Vermont and Virginia. He has presented expert testimony in regulatory hearings on behalf of utility commission staffs and intervenors on numerous occasions.

Interrogatory No. 2

2. **Affiliate Charges.** Please provide a listing of all parent and affiliate company charges to the Company by account and amounts that are included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and for each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

The table below summarizes the O&M expense charges to the Company from the parent. To capture all parent charges, payroll taxes have been added.

The 2025 test year amounts are presented as recorded in the Company's books. Forecasted totals will reflect applicable adjustments as set forth in MFR Schedule G2-19 (F) – 2025 Adjustments for trending purposes and/or MFR Schedule G2-19 (G–H) – Over and Under Adjustments, to the extent such adjustments pertain to parent charges.

The Florida City Gas acquisition closed on November 30, 2023; therefore, financial results for 2023 include one month of actuals.

Respondent: George Navo

Interrogatory No. 2

2. **Affiliate Charges.** Please provide a listing of all parent and affiliate company charges to the Company by account and amounts that are included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and for each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

The table below summarizes the O&M expense charges to the Company from the parent. To

Interrogatory No. 2, cont.

Supplemental Response (as provided by prior owner):

FCG files an annual report with the Florida Public Service Commission that details all transactions between FCG and its affiliates. For affiliate transactions charged to and from FCG less than $25,000 by account, please refer to the annual reports for years 2022 and 2023 using the following link:

https://www.psc.state.fl.us/company-annual-reports?Code=GU602&Name=Florida%20City%20Gas&industry=Natural%20Gas

Note, the annual report does not require FCG to identify the account for affiliate transactions greater than $25,000. Therefore, refer to Attachment No. 1 to this response for affiliate transactions charged to and from FCG which are greater than $25,000 for the 2022 and the period January through November 2023. All transactions between Florida Power & Light ("FPL") and its affiliates are governed by FPL's Cost Allocation Manual ("CAM"), which documents the cost allocation policies and practices and provides guidelines to employees regarding the application of those policies for affiliate transactions. Please refer to Attachment No. 2 to this response for FPL's 2022 CAM.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 7

7. **Audit Fees.** Provide the amount of audit fees included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Account No.	Description	Historical Year 2023	Historical Year 2024	Historical Year 2025	Intermediate Year 2026	Test Year 2027
923	AUDIT FEES	$ 322,875	$ 88,408	$ 403,683	$ 413,648	$ 423,930

2023 audit fees reflect costs associated with CUC including FCG in their annual audit of CUC's financial statements and internal control framework.

Actual audit fees for 2024 totaled $411,283; these costs were offset by the reversal of accruals recorded in 2023.

Respondent: George Navo

Interrogatory No. 7

7. **Audit Fees.** Provide the amount of audit fees included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 7, cont.

Account No.	Description	Historical Year 2023	Historical Year 2024	Historical Year 2025	Intermediate Year 2026	Test Year 2027
923	AUDIT FEES	$ 322,875	$ 88,408	$ 403,683	$ 413,648	$ 423,930

2023 audit fees reflect costs associated with CUC including FCG in their annual audit of CUC's financial statements and internal control framework.

Actual audit fees for 2024 totaled $411,283; these costs were offset by the reversal of accruals recorded in 2023.

Respondent: George Navo

Supplemental Response (as provided by prior owner):

Audit fees for 2022 were $95,000 and $0 for the period January through November 2023.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: April 29, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 1, 7-9, 14-16, 25-27, 31-33, 36, 41, 43, 45-46, 52, 54-55, 60-61, 64-65, 73-74 and 76 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: April 29, 2026

Interrogatory No. 10

10. **Capital Expenditures.** Please answer the following related to capital expenditures.

a. Please provide the total amount of capital expenditures authorized by the Commission for each of the following years: 2021, 2022, 2023, 2024 and 2025.

b. Provide in a similar format, the amount of actual capital expenditures for each of the following years: 2021, 2022, 2023, 2024 and 2025.

c. Provide in a similar format, the amount of projected capital expenditures for the intermediate period 2026 and the 2027 rate year and to the extent available the actual year to date.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and

Interrogatory No. 10, cont.

the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

a. The capital expenditures authorized by the Commission in the last rate included $119,322,561 of plant additions in the 2023 projected test year in that case. For 2024 and 2025, the amounts previously authorized by the Commission are SAFE and Relocation clauses that have been removed from base rates in this proceeding.
b. See attached exhibit "OPC ROG 10 Cap Expenditures" for actual and projected capital expenditures that consist of capital additions and CWIP balances. For Common Plant additions allocated to FCG for the same time periods, see exhibit attached to OPC interrogatory number 58.
c. See response to letter b above.

Respondent: George Navo

Interrogatory No. 10

10. **Capital Expenditures.** Please answer the following related to capital expenditures.

a. Please provide the total amount of capital expenditures authorized by the Commission for each of the following years: 2021, 2022, 2023, 2024 and 2025.

b. Provide in a similar format, the amount of actual capital expenditures for each of the following years: 2021, 2022, 2023, 2024 and 2025.

c. Provide in a similar format, the amount of projected capital expenditures for the intermediate period 2026 and the 2027 rate year and to the extent available the actual year to date.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL

Interrogatory No. 10, cont.

outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

a. The capital expenditures authorized by the Commission in the last rate included $119,322,561 of plant additions in the 2023 projected test year in that case. For 2024 and 2025, the amounts previously authorized by the Commission are SAFE and Relocation clauses that have been removed from base rates in this proceeding.
b. See attached exhibit "OPC ROG 10 Cap Expenditures" for actual and projected capital expenditures that consist of capital additions and CWIP balances. For Common Plant additions allocated to FCG for the same time periods, see exhibit attached to OPC interrogatory number 58.
c. See response to letter b above.

Respondent: George Navo

Supplemental Response (as provided by prior owner):

Refer to the table below for the actual amount of capital expenditures pertaining to 2022 and the period January 2023 through November 2023. Note, the amounts below do not reflect any clause

recovery capital investments.

Capital Spend by Category (Base Only)	Actual 2022	(Jan-Nov) Actual 2023
New Business	7,878,870	12,132,808
Operations, Safety, & Support	10,952,181	13,202,141
LNG	37,427,924	3,741,678
Fleet	1,531,804	590,669
Systems & Integration	4,314,812	4,223,923
Other (Minor Projects)	1,056,299	416,726
Total	**63,161,889**	**34,307,946**

The amount of capital expenditures for FCG projects which were specifically authorized by the Commission for 2022 and 2023 are available in the following Commission orders:

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 13

13. **Costs.** Provide a detailed summary of cost reductions in 2024 and 2025 that have resulted from synergies that have occurred since the acquisition by Chesapeake Utilities Corporation.

Company Response:

2024 represented a transition year in which Chesapeake Utilities Corporation ("CUC") assumed ownership and operational control of Florida City Gas ("FCG"). During this time, numerous tasks were performed, in part or in whole by Florida Power & Light Company ("FP&L"), under the terms of a Transition Services Agreement ("TSA"). These tasks included functions in a variety of areas such as Finance, Accounting, Information Technology, and Customer Information Systems. Also, during this time, synergies were being evaluated and understood for future operational benefits, but the primary focus was transitioning operational control to CUC, Therefore, the operational costs of 2024 do not represent a good baseline for which to begin to evaluate savings or synergies.

2025 was the first year in which CUC operated FCG with minimal services provided under the TSA with FP&L. As such, it becomes a more realistic starting point to understand CUC's operating costs to run FCG. However, synergies and operational efficiencies are often realized as longer term cost increase avoidance rather than short term savings. While FCG does not have a comprehensive "detailed summary of cost reductions", CUC expects further synergies and benefits as its operational experience with FCG matures and as new systems such as the ERP are implemented.

Respondent: Matthew Everngam

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, No. 13 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

Matthew Everngam

Matthew Everngam, Declarant

Dated: May 8, 2026

Interrogatory No. 18

18. **D&O.** Identify the total company amount for D&O (Directors & Officers liability insurance) included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024. To the extent some costs are direct costs of the Company and some is allocated provide the amounts separately.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.
FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information

is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

The total company amount for D&O (Directors & Officers liability insurance) included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and each of the years 2023, and 2024 are as follows:

	Historical Year 2023	Historical Year 2024	Historical Year 2025	Projected Year 2026	Projected Test Year 2027
% allocated to FCG	-	-	-	-	-
Direct	5,365	68,615	137,347	131,153	151,835
Total D&O Expense	5,365	68,615	137,347	131,153	151,835

Note: 2023 is one month of actuals (December) due to the acquisition.

Respondent: Noah Russell

Interrogatory No. 18

18. **D&O.** Identify the total company amount for D&O (Directors & Officers liability insurance) included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024. To the extent some costs are direct costs of the Company and some is allocated provide the amounts separately.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive

information:

The total company amount for D&O (Directors & Officers liability insurance) included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and each of the years 2023, and 2024 are as follows:

	Historical Year 2023	Historical Year 2024	Historical Year 2025	Projected Year 2026	Projected Test Year 2027
% allocated to FCG	-	-	-	-	-
Direct	5,365	68,615	137,347	131,153	151,835
Total D&O Expense	5,365	68,615	137,347	131,153	151,835

Note: 2023 is one month of actuals (December) due to the acquisition.

Respondent: Noah Russell

Supplemental Response (as provided by prior owner):

FCG incurred the following amounts related to D&O liability insurance: $13,141 for 2022 and $17,658 for the period January through November 2023.

Note that D&O policies were issued by the insurance companies to Nextera Energy (NEE), as parent Company, and then allocated to affiliates, including FCG.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: April 29, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 18, 37-40 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

Noah T. Russell

Noah Russell, Declarant

Dated: April 29, 2026

22. **Employee Benefits.** Provide a detailed listing of each of the respective employee benefits and the associated respective cost separated between O&M, capital and other included in the 2025 historical period, the 2026 intermediate year and the 2027 rate year. Provide a similar listing for each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 22, cont.

Employee benefits related to health, non-health related, and other HR charges including employee relocation costs are included in the table. All employee benefits related to employee recognition are included in Interrogatories response number 23. 2026 and 2027 include all benefits related adjustments from MFR G2 schedule 19F 2025 Adjustments and schedule G2-19G-H Over and Under Adjustments.

The Florida City Gas acquisition closed on November 30, 2023; therefore, financial results for 2023 include one month of actuals.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 24

24. **Employee Recognition/Awards Expense**. Provide a detailed description of what the requirements are for receiving any of the respective rewards and include an explanation of any changes to those requirements by year 2021-2026.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 24, cont.

The Company utilizes the Gratitude Program as its primary means of employee recognition. A comprehensive summary of the Gratitude Program is provided below. In addition, employee recognition based on tenure is administered through the Company's employee service awards program. The Company's Cares Program is another form of employee recognition to help strengthen appreciation and aligns with our mission, vision, and values.

Employee recognition is considered an integral component of the Company's organizational culture. Together, these programs help create a culture of safety, appreciation, connection, and shared success across Chesapeake.

A) Summary of Gratitude Program:

Chesapeake Recognition Programs – Purpose and Overview

Eligibility

Full-time and part-time employees, including interns, can participate in the Gratitude platform. All employees up to and including Directors are eligible for both social and point-based recognition. Officers and Senior Leadership Team members can participate and give point-based recognition but cannot receive it—they may only receive social recognition. Additionally, only Officers and SLT members can award "boost" recognition. Interns may receive social recognition but are not eligible for point-based awards. Temporary employees, contractors, and consultants are not eligible for the platform.

Social Recognition (Non-Monetary)

All Chesapeake employees are eligible to participate in our Social Recognition program.

Interrogatory No. 24, cont.

This non-monetary, non-points-based recognition allows employees to send an eCard with a personalized message to recognize a colleague. These messages are shared on a companywide platform where employees can view, comment on, and celebrate each other's achievements.

The platform also automatically recognizes employee birthdays and service anniversaries, helping us celebrate important personal and career milestones.

Points-Based Recognition (Monetary)

Employees at or below the Director level are also eligible to receive points-based recognition. This program includes an eCard (Social Recognition) along with points that employees can redeem for a variety of gifts. Point awarded can range from 500 to 50,000. Points budgets provided to employee vary based the employee's level. Each item available for redemption has a designated point value, allowing employees to select rewards that are meaningful to them.

B) Service Anniversary Initiative Summary

- The offering is open to all employees in good standing.
- Employees are recognized at their 1-year service anniversary with the next recognition at 5 years, and then at every 5-year milestone thereafter.
- HR tracks employee service dates and notifies employees via email when they reach an eligible milestone. Supervisors receive notification as well to support timely recognition.
- On average 25-35 employees each month reach an eligible milestone per this service initiative.

Interrogatory No. 24, cont.

- The Company maintains a long-standing partnership with Geiger, our external vendor supporting the initiative.
- Each month, HR purchases anniversary certificates from Geiger based on the number of eligible employees. This averages $7,500+ (company-wide) per month.
- Geiger provides a unique redemption code for each certificate which is included in the employee's anniversary email.
- Employees use this code to select their gift from a printed merchandise catalog and a digital link of the expanded catalog including gift options aligned to their milestone tier.
- Gift tiers increase in value as the employee's tenure increases. Employees may choose a gift from the catalog in celebration of their years of service.
- Geiger manages the catalog administration, order processing, and fulfillment.

C) Cares Program

- Each business area appoints one or more Cares Ambassadors, who serve as liaisons responsible for planning and coordinating Cares Events for their respective business area.
- HR meets with Cares Ambassadors monthly to share resources, discuss event planning, and exchange best practices.
- Cares Events are specific to each business area and are held at a cadence determined by the business area leader (monthly, quarterly, or even twice a year), allowing
-

flexibility to meet the schedule and needs of their team. Events may be held virtually and/or in-person and are open to all employees and invited guests.

- Business area leaders include Cares Event funding in their annual budgets, typically $10-$25 per employee per event. Cares Events may recognize employee birthdays, service anniversaries, promotions, educational achievements, retirement, and other employee milestones and achievements.
- Activities planned during the different Cares Events may include prizes awarded to team members. These awards may be Gratitude points, company branded merchandise, or other items valued up to $35 per recipient.

There were no changes to the program's guidelines or criteria, and the administrative approach have remained consistent between 2023 and now.

Respondent: Tina Barrington

Interrogatory No. 24

24. **Employee Recognition/Awards Expense**. Provide a detailed description of what the requirements are for receiving any of the respective rewards and include an explanation of any changes to those requirements by year 2021-2026.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

The Company utilizes the Gratitude Program as its primary means of employee recognition. A

comprehensive summary of the Gratitude Program is provided below. In addition, employee recognition based on tenure is administered through the Company's employee service awards program. The Company's Cares Program is another form of employee recognition to help strengthen appreciation and aligns with our mission, vision, and values.

Employee recognition is considered an integral component of the Company's organizational culture. Together, these programs help create a culture of safety, appreciation, connection, and shared success across Chesapeake.

A) Summary of Gratitude Program:

Chesapeake Recognition Programs – Purpose and Overview

Eligibility

Full-time and part-time employees, including interns, can participate in the Gratitude platform. All employees up to and including Directors are eligible for both social and point-based recognition. Officers and Senior Leadership Team members can participate and give point-based recognition but cannot receive it—they may only receive social recognition. Additionally, only Officers and SLT members can award "boost" recognition. Interns may receive social recognition but are not eligible for point-based awards. Temporary employees, contractors, and consultants are not eligible for the platform.

Social Recognition (Non-Monetary)

All Chesapeake employees are eligible to participate in our Social Recognition program.

This non-monetary, non-points-based recognition allows employees to send an eCard with a personalized message to recognize a colleague. These messages are shared on a companywide platform where employees can view, comment on, and celebrate each other's achievements.

The platform also automatically recognizes employee birthdays and service anniversaries, helping us celebrate important personal and career milestones.

Points-Based Recognition (Monetary)

Employees at or below the Director level are also eligible to receive points-based recognition. This program includes an eCard (Social Recognition) along with points that employees can redeem for a variety of gifts. Point awarded can range from 500 to 50,000. Points budgets provided to employee vary based the employee's level. Each item available for redemption has a designated point value, allowing employees to select rewards that are meaningful to them.

B) Service Anniversary Initiative Summary

- The offering is open to all employees in good standing.
- Employees are recognized at their 1-year service anniversary with the next recognition at 5 years, and then at every 5-year milestone thereafter.
- HR tracks employee service dates and notifies employees via email when they reach an eligible milestone. Supervisors receive notification as well to support timely recognition.
-

- On average 25-35 employees each month reach an eligible milestone per this service initiative.
- The Company maintains a long-standing partnership with Geiger, our external vendor supporting the initiative.
- Each month, HR purchases anniversary certificates from Geiger based on the number of eligible employees. This averages $7,500+ (company-wide) per month.
- Geiger provides a unique redemption code for each certificate which is included in the employee's anniversary email.
- Employees use this code to select their gift from a printed merchandise catalog and a digital link of the expanded catalog including gift options aligned to their milestone tier.
- Gift tiers increase in value as the employee's tenure increases. Employees may choose a gift from the catalog in celebration of their years of service.
- Geiger manages the catalog administration, order processing, and fulfillment.

C) Cares Program

- Each business area appoints one or more Cares Ambassadors, who serve as liaisons responsible for planning and coordinating Cares Events for their respective business area.
- HR meets with Cares Ambassadors monthly to share resources, discuss event planning, and exchange best practices.

- Cares Events are specific to each business area and are held at a cadence determined by the business area leader (monthly, quarterly, or even twice a year), allowing flexibility to meet the schedule and needs of their team. Events may be held virtually and/or in-person and are open to all employees and invited guests.
- Business area leaders include Cares Event funding in their annual budgets, typically $10-$25 per employee per event. Cares Events may recognize employee birthdays, service anniversaries, promotions, educational achievements, retirement, and other employee milestones and achievements.
- Activities planned during the different Cares Events may include prizes awarded to team members. These awards may be Gratitude points, company branded merchandise, or other items valued up to $35 per recipient.

There were no changes to the program's guidelines or criteria, and the administrative approach have remained consistent between 2023 and now.

Respondent: Tina Barrington

Supplemental Response (as provided by prior owner):

FCG does not separately identify or track the information at the level of detail requested. Therefore, the requested information is unavailable for the periods of 2022 and January through November 2023.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 24 and 53 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

Tina Barrington

Tina Barrington, Declarant

Dated: May 8, 2026

Interrogatory No. 28

28. **Incentive Compensation**. For each respective plan, provide the number of employees eligible under the plan for incentive compensation payment and number of eligible employees that did not receive incentive compensation payment for each of the respective years 2021, 2022, 2023, 2024 and 2025 and provide (broken out by) (a) the projected eligible employees and (b) the projected eligible employees who are not assumed to receive payment in the 2025 historical period, the 2026 intermediate period and the 2027 rate year.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information.

Interrogatory No. 28, cont.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

The number of eligible employees is based on December 31 of each calendar year. The number of eligible employees reflects the total number of direct and allocated employees that includes O&M expense, capital, and other.

The 2026 and 2027 projected years assume all full-time employees are eligible for and will receive incentive compensation.

The Florida City Gas acquisition closed on November 30, 2023; therefore, financial results for 2023 include one month of actuals

		Historical Year 2023	Historical Year 2024	Historical Year 2025	Intermediate Year 2026	Rate Year 2027

Interrogatory No. 29

29. **Incentive Compensation.** Does the Company have any studies or analysis that show that its incentive compensation plan provides any benefit to ratepayers? If not, explain in detail what the benefit is to ratepayers.

Company Response:

Upon acquisition of FCG by CUC, payroll for non-union employees were reviewed in order to align FCG employee pay with that of other similarly situated CUC employees and at market based rates. Each year, we review more than 60 key roles and benchmark them against current market compensation data. We then compare these key roles to similar positions across all business units. Based on that analysis, we adjust salary ranges as needed and update base pay for any employees whose pay falls below the minimum of the applicable range.

Incentive compensation is necessary to attract and retain highly-trained and skilled personnel in the energy industry. It is part of their compensation and expected in the market. This top talent allows us to operate our businesses in a safe and reliable way every day with a focus on customer service. The total compensation packages and salary ranges are reviewed periodically both internally and externally. This ensures that we are competitive in the labor market.

Interrogatory No. 30

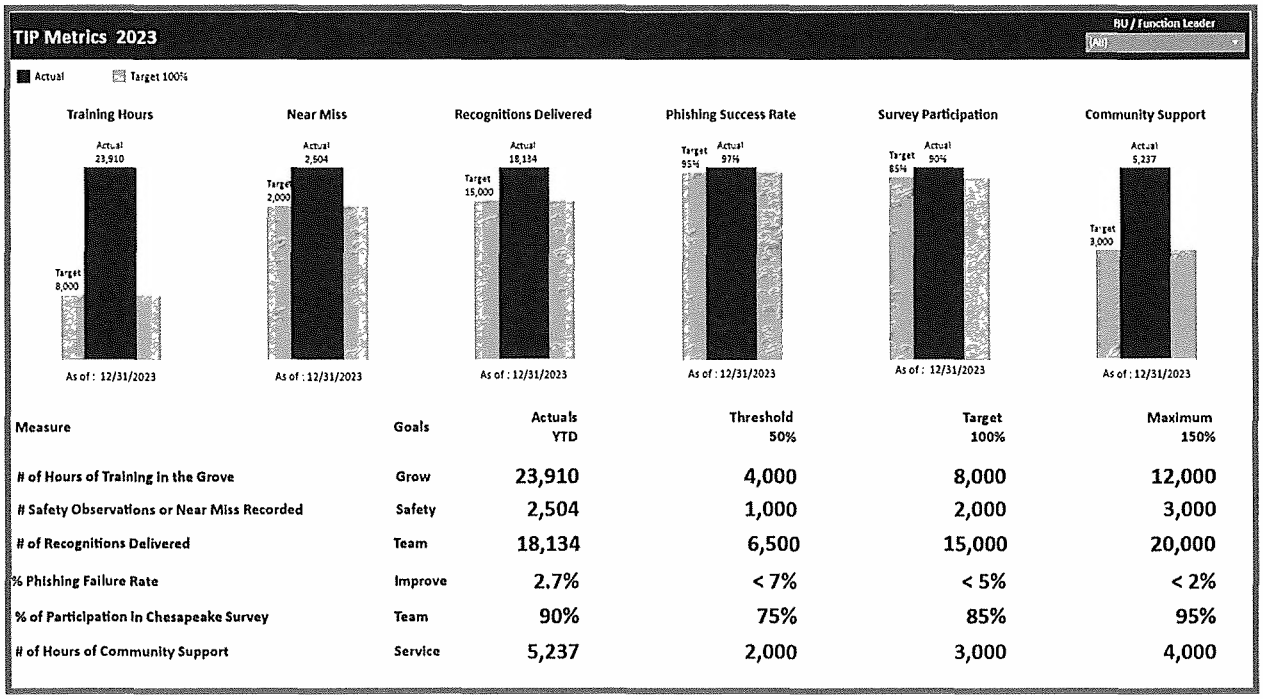
30. **Incentive Compensation.** Provide for each of the years 2021, 2022, 2023, 2024 and 2025, the various goals upon which incentive payments were to be determined and the actual achievement attained (i.e., the response should show actual metrics and not a simple reference that the goal was at target, not at target, at maximum, etc.)

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

TIP is our established incentive pay program based on overall team performance of achieving operational goals. These goals reflect our desire to prioritize safety, operational excellence and continuous improvement across all CUC businesses. We have found that linking our incentive plans to safety has resulted in an enhanced focus on safety and a decrease in incidents. Safety is a priority for CUC, and our goal is to ensure the safety of our customers, our employees, and the communities we serve. The TIP program fosters a culture of safety and accountability where safety is a shared, collective priority. All of these goals measure employee performance for items that directly benefit the safety and service to our customers.

The various goals upon which incentive payments were to be determined and the actual achievement attained are as follows:



Measure	Goals	Actuals YTD	Threshold 50%	Target 100%	Maximum 150%

32. **Incentive Compensation.** Is there a financial goal, that if not met, would result in no incentive compensation payments being made? If so, identify the goal.

Company Response:

Under the TIP program, which applies to most employees, the goals which must be met in order to be eligible for incentive compensation are not financial. See also, response to Interrogatory #30 above. For Chesapeake C-suite level executives, both their salary and incentive compensation are subject to review and approval by the Board of Directors. In addition to considering a third-party consultant's analysis, the Board also considers whether certain corporate, operational, safety, and financial targets have been met. Ultimately, any compensation adjustments are made at the discretion of the Board of Directors.

Dated: April 29, 2026

Interrogatory No. 34

34. **Incentive Compensation.** Please provide the amounts of Incentive Compensation broken out by plan (includes short term and long term) included the 2025 historical period, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024. If there are amounts charged to capital and other provide those separate from the amount charged to O&M.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive

Interrogatory No. 34, cont.

information:

The Florida City Gas acquisition closed on November 30, 2023; therefore, financial results for 2023 include one month of actuals.

The amounts of Incentive Compensation broken out by plan (including short term and long term) included the 2025 historical period, the 2026 intermediate year, the 2027 rate year and for the month of December 2023 and year 2024 are as follows:

[See following page]

Respondent: George Navo

Interrogatory No. 34

34. **Incentive Compensation.** Please provide the amounts of Incentive Compensation broken out by plan (includes short term and long term) included the 2025 historical period, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024. If there are amounts charged to capital and other provide those separate from the amount charged to O&M.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 36

36. **Incentive Compensation.** Identify all amounts of incentive compensation that the Company has removed from the 2025 historical period, the 2026 intermediate year and the 2027 rate year and the reason for which it is not seeking recovery.

Company Response:

The Company removed $337,109 of executive incentive compensation from the 2025 historical base year (see MFR C-2 page 1 of 2) in accordance with Order No. PSC-2023-0177-FOF-GU. The Company also removed $345,431 from 2026 intermediate year (see MFR G2 page 2 of 31). As discussed in the direct testimony of George Navo on pages 23 through 25, no corresponding adjustment was made to the 2027 test year.

Our compensation philosophy recognizes that our employees perform the most critical role in ensuring that our business units provide safe, reliable, and efficient service to our customers. The plan has been designed to reward employees by providing pay and benefits that are competitive in comparison to the utility industry, as well as the general non-utility employers. Even in being competitive, the Company takes a conservative approach relative to its peers and other companies with whom we compete for talent. The compensation package, as a whole, including incentive compensation, represents a cost that is prudent and reasonable to attract, retain and motivate employees who are qualified to effectively and efficiently perform the functions necessary to ensure all our companies are providing the best service possible for our customers. As part of the governance processes regarding compensation, CUC utilizes independent, third-party compensation specialists, such as Willis, Towers & Watson and F.W. Cook, to review compensation across various levels of CUC and its subsidiaries. These

specialists evaluate our compensatory components and overall design relative to benchmarking data when assessing the appropriateness of our total compensation relative to the market and industry trends. That evaluation reflects that while CUC is within the appropriate utility benchmarks, we are also more conservative in our approach than many of our peer organizations. As a result, the incentive compensation levels established by the Company should be considered a prudent and necessary component of our employees' total compensation and therefore, associated costs should be recovered.

We also want the best from our employees in terms of providing excellent service to our natural gas customers and being able to continuously adapt to changing regulatory requirements and market conditions. The Company therefore seeks to achieve an appropriate balance of "at risk" pay that is only recognized if the Company goals of safety, prudent cost management, and the provision of safe and reliable natural gas service, are met. If we did not offer incentive compensation - or if the Commission disallows associated costs - we would need to consider increasing base salaries to remain competitive with other companies also trying to attract and retain qualified employees. This would serve to increase overall costs to the customers regardless of the performance of the Company.

Respondent: George Navo

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: April 29, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 1, 7-9, 14-16, 25-27, 31-33, 36, 41, 43, 45-46, 52, 54-55, 60-61, 64-65, 73-74 and 76 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: April 29, 2026

Interrogatory No. 37

37. **Injuries and Damages.** Identify the amount of injuries and damages expense included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and for each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive

information:

The following are the injuries and damages expense included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and each of the years 2023, and 2024 are as follows:

	Historical Year 2023	Historical Year 2024	Historical Year 2025	Projected Year 2026	Projected Test Year 2027
Injuries and Damages (FERC 925)	122,070	1,504,203	2,861,609	2,917,622	3,343,132
Total Injuries and Damages	122,070	1,504,203	2,861,609	2,917,622	3,343,132

Note: The Florida City Gas acquisition closed on November 30, 2023; therefore, financial results for 2023 include one month of actuals.

Dated: April 29, 2026

Interrogatory No. 39

39. **Insurance Expense.** Please provide the amount of insurance expense, by insurance type (i.e., property insurance, liability insurance, workers compensation, etc.) included in the 2025 historical period, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

The insurance expense for the 2025 historical period, the 2026 intermediate period, the 2027 rate year and for the month of December 2023 and year 2024 represents the portion of CUC's insurance premiums allocated to FCG. Because insurance cost increases are expected to exceed inflation, the Company directly projected insurance premiums for test years 2026 and 2027. These projections incorporate anticipated premium increases based on recent renewal experience, current insurance market conditions, and the Corporation's expectation that insurance premiums will continue to increase at rates materially higher than inflation, as described above.

Please see exhibit "OPC ROG 39 FCG Insurance Premiums Summary" for a summary of the FCG insurance premiums included in the 2025 historical period, the 2026 intermediate period and the 2027 rate year and for the month of December 2023 and year 2024. The actual annual CUC premium invoices for the latest renewal are provided in 7 exhibits in OPC POD 6 beginning with the title "OPC POD 6 CUC Premiums"

Respondent: Noah Russell

Interrogatory No. 39

39. **Insurance Expense.** Please provide the amount of insurance expense, by insurance type (i.e., property insurance, liability insurance, workers compensation, etc.) included in the 2025 historical period, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive

information:

The insurance expense for the 2025 historical period, the 2026 intermediate period, the 2027 rate year and for the month of December 2023 and year 2024 represents the portion of CUC's insurance premiums allocated to FCG. Because insurance cost increases are expected to exceed inflation, the Company directly projected insurance premiums for test years 2026 and 2027. These projections incorporate anticipated premium increases based on recent renewal experience, current insurance market conditions, and the Corporation's expectation that insurance premiums will continue to increase at rates materially higher than inflation, as described above.

Please see exhibit "OPC ROG 39 FCG Insurance Premiums Summary" for a summary of the FCG insurance premiums included in the 2025 historical period, the 2026 intermediate period and the 2027 rate year and for the month of December 2023 and year 2024. The actual annual CUC premium invoices for the latest renewal are provided in 7 exhibits in OPC POD 6 beginning with the title "OPC POD 6 CUC Premiums"

Respondent: Noah Russell

Supplemental Response (as provided by prior owner):

Refer to the table below for insurance expenses by type for 2022 and the period January through November 2023. Note, the amounts below do not include self-insurance associated

Interrogatory No. 43

43. **Lobbying/Government Relations Costs.** Identify all employees that engage in lobbying/governmental relations activities on the local, state or national level. For each employee provide in schedule form:

a. Their fully loaded annual salaries included in the test period and the rate year,
b. Percent of time spent on lobbying activities in the base period and test period,
c. The organizations or trade associations involved,
d. All company-paid or reimbursed expenses or allowances in the test period and the rate year and the accounts charged.

Company Response:

a & b.

43	43.a Fully Loaded Salary Annual Allocated Amount		43.b	
Title	Test Period 2025	Rate Year 2027	Percent of Time Spent on Lobbying Activities	
Dir, External Affairs	$ 1,668	$ 2,203	5%	Lobbying (State)
Govt'l Affairs Mgr	$ 520	$ 1,178	5%	Lobbying (Local)
Regional Engagement Mgr	$ -	$ 849	5%	Lobbying (Local)

c. The organizations or trade associations involvement include: American Gas Association, Florida Natural Gas Association, and Southern Gas Association.

d. Rate year reimbursable allowances related to lobbying total $2,009.

Respondent: George Navo

Interrogatory No. 43

43. **Materials & Supplies.** Provide the actual monthly materials and supplies balances for each of the years 2021, 2022, 2023, 2024 and 2025 and projected for the 2026 interim period and the 2027 rate year.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 44

44. **Non-recurring costs.** Please answer the following related to the recurring nature of your costs.

a. For each expense account in 2024, in the 2025 historical period, the 2026 intermediate period and the 2027 rate year, list each non-recurring charge or credit exceeding $25,000.
b. For each item listed in a. provide an explanation of the cost.

Company Response:

The Company excluded all non-recurring costs from 2025 (see MFR G-2 page 19f) before applying the trending factors for 2026 and 2027. Therefore, 2026 and 2027 do not include any non-recurring costs.

	2024	2025	2026	2027
Non-recurring costs related to the integration of FCG to CUC	3,836,389	1,102,379	-	-
Costs related to discontinuance of FCG's legacy billing system	1,761,342	983,849	-	-

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: April 29, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 1, 7-9, 14-16, 25-27, 31-33, 36, 41, 43, 45-46, 52, 54-55, 60-61, 64-65, 73-74 and 76 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: April 29, 2026

Interrogatory No. 47

47. **Payroll.** Please provide for the 2025 historical period, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024, the amount of base pay, overtime, incentive compensation and the amount of other pay broken down in the most detailed format available including the amount charged to capital, amount charged to expense and amounts charged to other (specify). If any of the other is ultimately expensed, provide the amount ultimately expensed in each year.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

The Florida City Gas acquisition closed on November 30, 2023; therefore, financial results for

Respondent: George Navo

Interrogatory No. 47

47. **Payroll.** Please provide for the 2025 historical period, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024, the amount of base pay, overtime, incentive compensation and the amount of other pay broken down in the most detailed format available including the amount charged to capital, amount charged to expense and amounts charged to other (specify). If any of the other is ultimately expensed, provide the amount ultimately expensed in each year.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 49

49. **Payroll (Full Time Equivalents ("FTE")).** Please provide the number of FTE's included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and the actual number of FTEs for each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 49, cont.

The full-time equivalent employees (FTEs) represent the average headcount of each calendar year. The total number of direct and allocated FTEs are inclusive of those associated with operations and maintenance (O&M) expense, capital, and other.

	Historical Year 2023	Historical Year 2024	Historical Year 2025	Intermediate Year 2026	Rate Year 2027
Full-time employees	169	187	208	224	246

Please note that the amounts presented above are the average headcount for each calendar year. The monthly and year end FTEs are included in ROG #51. In addition, these FTEs are different from those presented in ROG #28 as there were some FTEs included in the table above that were not eligible for incentive compensation and therefore were not included in the response to ROG #28.

Respondent: George Navo

Interrogatory No. 49

49. **Payroll (Full Time Equivalents ("FTE"))**. Please provide the number of FTE's included in the 2025 historical period, the 2026 intermediate period, the 2027 rate year and the actual number of FTEs for each of the years 2021, 2022, 2023, and 2024.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 49, cont.

In addition, these FTEs are different from those presented in ROG #28 as there were some FTEs included in the table above that were not eligible for incentive compensation and therefore were not included in the response to ROG #28.

Updated Company Response:

The Company does not have a report that shows the FTEs by business unit or the allocation factors to derive them. Therefore, in order to answer this response, we calculated these factors in excel and reviewed on a high level what the allocated FTEs were. However, in responding to PSC auditor request, we reviewed the manual calculation of FTEs at department level and found allocation factor errors used to provide our original response. See revised FTEs below:

Interrogatory No. 51

51. **Payroll.** Provide, for each employee group, by month, for each year 2021, 2022, 2023, 2024 and 2025, 2026 year to date, the 2026 intermediate period and the 2027 rate year, the number of full-time employees budgeted, the number of part-time employees budgeted and the actual number of full-time employees and part-time employees (not FTEs).

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 51, cont.

The number of full-time and part-time employees represents the total number of direct and allocated FTEs, inclusive of those associated with operations and maintenance (O&M) expense, capital, and other.

Interrogatory No. 51

51. **Payroll.** Provide, for each employee group, by month, for each year 2021, 2022, 2023, 2024 and 2025, 2026 year to date, the 2026 intermediate period and the 2027 rate year, the number of full-time employees budgeted, the number of part-time employees budgeted and the actual number of full-time employees and part-time employees (not FTEs).

Company Response (Original): FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Updated Company Response:

The Company does not have a report that shows the FTEs by business unit or the allocation factors to derive them. Therefore, in order to answer this response, we calculated these factors in excel and reviewed on a high level what the allocated FTEs were. However, in responding to PSC auditor request, we reviewed the manual calculation of FTEs at department level and found allocation factor errors used to provide our original response. See attached exhibit "OPC ROG 51 Full and

Part Time FTEs - Revised".

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 52

52. **Payroll.** Please provide a list of all open positions in the 2025 test year, the 2026 intermediate year and the 2027 rate year including:

    a. Length of time that the position has been open.
    b. Planned hiring dates for each position.
    c. Hiring dates for any of these positions that have been filled.
    d. Fully loaded annual salary for unfilled positions.
    e. Job Title.

Company Response:

Please refer to the attached file "OPC ROG 52 Open Positions".

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: April 29, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 1, 7-9, 14-16, 25-27, 31-33, 36, 41, 43, 45-46, 52, 54-55, 60-61, 64-65, 73-74 and 76 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: April 29, 2026

Interrogatory No. 55

55. **Pension Expense.** Please answer the following related to your pension costs.

a. Explain how the pension expense in the 2026 intermediate period and 2027 rate year was determined. Provide the calculations supporting the respective amounts.
b. Provide an explanation for any increase over the base period to pension expense in the 2027 rate year and the 2026 interim period.
c. Explain whether any changes to assumptions were used in determining the pension expense and why the changes were made.

Company Response:

a.) The Company does not have a pension plan; nor does the Company receive any allocated pension expense. Therefore, there are no calculations to provide.

b.) The Company does not have pension costs in the base year. Therefore, there are no pension costs in 2027 rate year and the 2026 interim year.

c.) The Company does not have pension costs and there is no plan to offer pension.

	2025	**2026**	**2027**
Pension Expense	$0	$0	$0

Respondent: George Navo

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: April 29, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 1, 7-9, 14-16, 25-27, 31-33, 36, 41, 43, 45-46, 52, 54-55, 60-61, 64-65, 73-74 and 76 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: April 29, 2026

Interrogatory No. 58

58. **Plant.** Please provide the actual plant additions and retirements by major category for each of the years 2021, 2022, 2023, 2024, 2025, the respective projections for the 2026 interim year and the 2027 rate years.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 58, cont.

See attached exhibit *OPC ROG 58 Plant Additions & Retirements* that includes additions categorized by their funding project. Additions for the FCG business unit have been separated from the Common Plant additions allocated to FCG.

Retirements are categorized by FERC utility account, as original assets are retired utilizing generic work orders not associated to capital funding projects.

Respondents: George Navo and Brian Gilliam

.

Interrogatory No. 58

58. **Plant.** Please provide the actual plant additions and retirements by major category for each of the years 2021, 2022, 2023, 2024, 2025, the respective projections for the 2026 interim year and the 2027 rate years.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

See attached exhibit *OPC ROG 58 Plant Additions & Retirements* that includes

additions categorized by their funding project. Additions for the FCG business unit have been separated from the Common Plant additions allocated to FCG.

Retirements are categorized by FERC utility account, as original assets are retired utilizing generic work orders not associated to capital funding projects.

Respondents: George Navo and Brian Gilliam

Supplemental Response (as provided by prior owner):

Interrogatory No. 61

61. Property Taxes. Please answer the following related to your property tax costs.

a. Please provide the amount of property tax expense for the 2025 test year, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024.

b. Please provide calculations for the increase from the 2025 base period to the 2026 intermediate year and to the 2027 rate year.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information

is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Please refer to the attached file "OPC ROG 61 Property Taxes"

Respondents: George Navo and Joanah Baugh

Interrogatory No. 61

61. Property Taxes. Please answer the following related to your property tax costs.

a. Please provide the amount of property tax expense for the 2025 test year, the 2026 intermediate year, the 2027 rate year and each of the years 2021, 2022, 2023, and 2024.

b. Please provide calculations for the increase from the 2025 base period to the 2026 intermediate year and to the 2027 rate year.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Interrogatory No. 61, cont.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Please refer to the attached file "OPC ROG 61 Property Taxes"

Respondents: George Navo and Joanah Baugh

Supplemental Response (as provided by prior owner):

Refer to table below for property taxes for 2022 and the period January through November 2023:

Year	Amount
2022	$2,750,898.48
Jan-Nov 2023	$3,883,328.60

Interrogatory No. 110

110. **Storm Reserve**. Refer to the April 20, 2026 Application for Rate increase on page 9. Provide by month, by year, the history of charges and credits to the storm reserve from inception to the most current date available and identify each storm event charged against the reserve.

Company Response:

At the time of the acquisition of FCG by CUC on November 30, 2023, there was a balance in the storm reserve of $257,825. Since that time, FCG has continued the annual accrual of $57,500. Please see attachment to interrogatory 'OPC ROG 38' that was previously provided for the breakout by month. There have been no storm events charged against the reserve since the acquisition by CUC.

Respondent: Noah Russell

Interrogatory No. 111

111. **AMI**. Refer to the April 20, 2026 Application for Rate increase on page 12. Provide a detailed discussion as to whether the potential AMI-related cost savings were achieved and if so, identify the respective savings and the amount of the respective savings. If the savings were not achieved, explain why not.

Company Response:

As of the projected test year in this proceeding, Florida City Gas has not realized AMI-related operating cost savings. As discussed on page 12 of the April 20, 2026 Application, the AMI program remains in the planning and early implementation phases and has not yet been fully deployed or achieved full operational functionality.

The Company expects that any savings attributable to AMI will emerge gradually in alignment with continued system implementation and eventual operational maturity. The primary economic benefit is anticipated to be a moderation in the escalation of operating costs beyond 2027, rather than discrete, near-term reductions within the test year. For example, meter reading activities across the organization are expected to decline over time; however, affected employees are anticipated to be redeployed to support other operational and customer service functions, limiting immediate reductions in overall O&M expense.

Because the timing of these efficiencies is expected to occur largely beyond the test year, no AMI-related savings have been quantified or reflected in the current filing.

Respondent: William Haffecke and Brian Gilliam

Interrogatory No. 112

112. **AMI**. Refer to the April 20, 2026 Application for Rate increase on page 12. In section D, number 31 there is a reference to future savings with the extension of the implementation of AMI. For each of the five improvements provide the estimated savings, identify where in the filing the savings have been reflected in O&M costs and whether a cost benefit analysis was prepared to quantify those savings. If savings are not reflected, explain in detail why they are not reflected.

Company Response:

Section D, No. 31 of the April 20, 2026 Application identifies potential future operational benefits associated with expanded AMI implementation. These improvements represent anticipated efficiencies, not savings that have been realized or reflected in current O&M expenses.

For all five identified improvements—(1) reduced manual meter reading, (2) reduced field visits and service calls, (3) improved billing accuracy, (4) enhanced system operations and safety monitoring, and (5) remote shutoff and automated safety response—no estimated savings have been quantified, and no savings are reflected in O&M costs for 2026 or 2027. While preliminary, high-level evaluations were performed as part of AMI planning, no finalized cost-benefit analysis quantifying O&M savings has been completed. Savings were not reflected because AMI has not yet been fully deployed system-wide, and many field, billing, and safety activities remain necessary regardless of AMI status. Efficiencies are expected to be gradual and dependent on full deployment, system integration, and operational maturity. Consistent with Commission practice, the Company did not reduce test-year expenses based on anticipated, unverified savings.

In summary, while AMI is expected to produce future efficiencies, those savings have not yet been realized, quantified, or included in O&M costs in the current proceeding.

Respondent: William Haffecke and Brian Gilliam

Interrogatory No. 113

113. **AMI**. Refer to the April 20, 2026 Application for Rate increase on page 12. In section D, number 32, explain in detail why Chesapeake has not previously implemented AMI.

Company Response:

Chesapeake Utilities Corporation has not previously implemented AMI at Florida City Gas because, until recently, natural gas AMI meter technology and deployment economics did not support prudent implementation. Earlier gas AMI offerings provided limited functionality and higher unit costs.

Recent advancements in natural gas AMI meter technology, including meters with an integrated valve capable of remote shutoff to enhance safety, and that automatically close under excess flow and elevated temperature conditions (such as house fires), have materially increased the operational and safety benefits of AMI. In addition, a planned enterprise-wide AMI deployment enables economies of scale, including lower per-unit costs, shared system architecture, and standardized integration, which were not available when AMI was previously evaluated on a standalone FCG basis.

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S THIRD SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 107, 116 and 119-124 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

Matthew Everngam

Matthew Everngam, Declarant

Dated: May 29, 2026

Interrogatory No. 128

128. **Management and BOD.** Refer to the direct testimony of George Navo on page 16, lines 3-4. Is it the witness' testimony that CUC's management team and BOD are able to provide increased oversight of FCG's business and management of operations in a manner that is better than what the former parent company was providing? If so, provide any analysis done to come to this conclusion.

Company Response:

Yes. Under prior ownership, FCG was a relatively small subsidiary within a large, diversified energy enterprise dominated by electric utility operations. Following its acquisition by CUC, FCG is now part of a smaller, more focused natural gas delivery company. As a result, FCG is a more integral component of its parent's overall business, within a corporate structure that is more closely aligned with regulated gas utility operations allowing for increased experience, understanding and oversight of FCG's business.

Respondent: George Navo

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S THIRD SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 107 and 125-133 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 29, 2026

Interrogatory No. 129

129. **Administrative and General.** Refer to the direct testimony of George Navo on page 17, lines 9-11. Provide a summary of the functions previously performed by Florida Power & Light ("FP&L") that were combined and transferred to CUC's corporate office along with a cost comparison of what the previous costs under FP&L were and what the subsequent actual and/or forecasted costs for CUC's corporate office are to perform the transferred functions.

Company Response:

FCG objects to this request to the extent that it seeks information regarding the costs for corporate functions when FCG was owned by FPL that is not readily accessible to FCG and would be unduly burdensome and costly to obtain. Moreover, costs for these services under the prior parent are not relevant, nor likely to lead to the discovery of relevant information in this proceeding. Notwithstanding and without waiving this objection, FCG provides the following information in response:

The following are examples of the activities that FPL performed for FCG. We have indicated which functions continued for a period of time through the Transition Service Agreement.

Corporate Function	Included in TSA
Board	
Corporate Governance	
Accounting/FP&A	Yes
HR	Yes
Insurance	
Internal Audit	
Investor Relations	
IT	Yes
Legal	Yes
Management	
Purchasing	Yes
Regulatory	Yes
Safety	
Security	Yes
Strategic Planning	
Support	
Treasury	Yes

Interrogatory No. 129, cont.

In addition to these functions, Chesapeake has moved Customer Services, Field Services and Operational Services from Florida City Gas into our Shared Services Group. The employees who transitioned from Florida City Gas were moved into those shared groups. This aligns with our goal to perform these functions efficiently, effectively and with better governance in aggregate.

We did not have information regarding costs by function from the prior owner and therefore cannot provide a cost comparison.

George Navo, Declarant

Dated: May 29, 2026

Interrogatory No. 151

151. **Training Facility.** Refer to the direct testimony of William Haffecke on page 7, lines 7-17. Identify when the facility was constructed, the cost of the facility, how the cost was allocated to FCG and FPUC and whether any of the total cost is allocated elsewhere.

Company Response:

Construction on the Florida training facility, known as "Safety Town", began prior to the Company's acquisition of Florida City Gas ("FCG") and is utilized to support training, safety, and operational readiness. The facility was completed in October 2024 and serves as a shared training resource for employees of both Florida Public Utilities Company ("FPUC") and FCG. The entire asset of approximately $2.1 million is on FPUC natural gas books including depreciation expense.

However, there is shared plant (trailers) of approximately $41,000 in which depreciation expense for the trailers is distributed across several business units, with $65 allocated to FCG each month.

Interrogatory No. 178

178. **AMI.** Refer to the direct testimony of William Haffecke at page 27, lines 12-15. Provide by year, from 2022 through 2026, the associated cost of the AMI pilot by account, the number of meters installed, and the annual O&M expense associated with the pilot by account.

Company Response:

The Company did not maintain AMI pilot costs, meter installation counts, or associated O&M expenses on a per-account or annualized basis for the period 2024 through 2026 (FCG under current ownership understands this to also be the case as it pertains to the prior period 2022-2023) as the pilot referenced in Mr. Haffecke's testimony consisted of approximately 5,000 meters that were purchased prior to the Company's acquisition of Florida City Gas and subsequently installed and field-tested; however, the pilot did not proceed as originally envisioned due to the absence of a communications network required to support full AMI functionality, and therefore did not operate as a fully functional AMI system or establish an operational framework to track costs, installations by year, or O&M expenses on a per-account basis. Accordingly, the Company does not have annual cost per account data, meter installation data by year, or discrete annual O&M expense attributable to the AMI pilot for the years 2022 through 2026, and no AMI-related O&M impacts are reflected in the test year or historical O&M expenses.

George Navo, Declarant

Dated: June 9, 2026

Interrogatory No. 184

184. **Incentive Compensation.** Refer to the response to OPC's First Set of Interrogatories, Interrogatory No. 36. In discussing the need for recovery of incentive costs, the response states "If we did not offer incentive compensation – or if the Commission disallows associated costs – we would need to consider increasing base salaries to remain competitive with other companies also trying to attract and retain qualified employees." Explain whether the Company is aware of any state where regulators have not allowed incentive compensation in base rates and if so, identify those states.

Company Response:

Aside from executive incentive compensation that has not been allowed for Florida City Gas with Order No. PSC-2023-0177-FOF-GU, the Company is not aware of any other states where regulators have not allowed incentive compensation in base rates including Florida Public Utilities natural gas and electric.

Respondent: George Navo

Interrogatory No. 185

185. **Incentive Compensation.** Refer to the response to OPC's First Request for Production of Documents, No. 3. Please answer the following questions on the annual Team Incentive Plan:

a. Does the statement "eligible employees have the opportunity to earn an annual cash/bonus incentive" mean that there is the possibility that a cash bonus/incentive is not guaranteed and there is a possibility that a payment will not be made? If not, explain the statement.

b. Explain why the 2025 plan included the statements "The incentive is not based on financial goals, but rather shared goals…" and "Of course, the Company funding must be there for the TIP to be paid out…" when the statements were not included in the 2023 and 2024 plans.

c. Explain why the annual plans provided do not provide any description of how the incentive pool will be determined (i.e. the components considered and how the pool is calculated).

d. Provide the components driving the calculation of the incentive pool and the calculation of the actual pool for each year 2023 – 2025 and the forecasted pool for 2026 and 2027.

Company Response:

a. Yes. The CUC bonus program is structured around measurable goals related to organizational imperatives (e.g Safety, Team, Improve and Service) that are designed to align performance expectations with realistic business outcomes. Incentive compensation is not guaranteed and is dependent upon actual performance relative to the goals established as part of the plan. Based on the company's historical performance and future management expectations, we expect to continue paying incentive compensation annually.

b. The TIP policy is reviewed periodically to ensure its goals remain current and relevant, and to provide ongoing clarity regarding the structure and implementation of the plan. As a result, the plan document may be revised from time to time to reflect those updates. As noted in the answer to a. above, annual incentive compensation is not a guaranteed form

of compensation. Actual performance against the TIP goals, as well as affordability under the plan, as well funding ability relative to the budget, are considered when determining incentive compensation payouts. This point of clarification was added to the plan description over time as part of a normal policy update.

c. The TIP plan documents provided in the response to OPC POD 3 do provide the measurable components and the accompanying performance targets, employee eligibility criteria for the incentive and calculation methodology for determining the incentive. The plans in OPC POD 3 also includes language noting that the plans funding is based on the Company's financial targets as approved by the CUC Board of Directors.

d. Each goal's actual result is compared to the threshold, target, and maximum payout levels, and a payout percentage is calculated using linear interpolation (50% payout at threshold, 100% at target, 150% at maximum, with scaling above or below those points). The individual payout percentages are then averaged across all goals to determine the final payout percentage. See the response to OPC POD 3 for the details related to the 2023 – 2025 performance calculations associated with the TIP plan. For forecasting the 2026 and 2027 incentive compensation amounts the Company utilized the target percentage (100%).

Interrogatory No. 189

189. **Insurance.** Refer to the response to OPC's First Request for Production of Documents, No. 6. For each document provided, identify the account and allocated amount of each listed premium as reflected in the filing for the respective years 2025, 2026 and 2027 so the documents can be reconciled to the amounts as reflected on MFR Schedule G-2, page 19d of 31.

Company Response:

Please see attached file beginning with the title "OPC ROG 189" for the requested breakdown. The exhibit includes a summary of the CUC insurance premium invoices received for the 2024-2025 and 2025-206 renewals (invoices for 2025-2026 provided as part of response to OPC's First Request for Production of Documents, No. 6) as well as the amounts included in MFR Schedule G-2, page 19d for FCG.

The amounts shown for full year 2025 are based on the underlying premium invoices for the 2024–2025 and 2025–2026 policy periods, with projected increases applied to develop the forecast periods. As detailed in the exhibit, the allocated premiums are recorded in the appropriate insurance expense accounts and are included in the test year revenue requirement as reflected on MFR Schedule G-2.

Excluding primary casualty (auto, general liability and workers' compensation), which is billed quarterly, all of CUC's policies are billed annually at renewal. CUC recognizes the expense over the policy term which is September 1st to August 31st for all polices except property which has a December 1st to November 30th policy term.

The insurance premiums reflected for 2026 and 2027 represent forecasted costs based on recent renewal experience, with an assumed compound annual growth rate of approximately 4% over the forecast period, as shown in Exhibit "OPC ROG 189 Insurance Premiums FCG."

Noah T. Russell

Noah Russell, Declarant

Dated: June 9, 2026

Interrogatory No. 195

195. **Taxes Accrued Income.** Refer to MFR Schedule G-1, page 3. Explain in detail how the Company is reflecting a debit balance for this current liability line since MFR Schedule C-
24 indicates the taxes are deferred, how the amount was calculated, and include an explanation as to who owes this amount to FCG since MFR Schedule C-27 indicates the tax returns are filed on a consolidated basis suggesting any overpayment would be due from the parent company.

Company Response:
The debit balance reflected in the current income tax liability line on MFR Schedule G-1 primarily arises from FCG's differing federal and state tax treatments.

For Florida purposes, FCG historically files on a separate company basis. The debit balance represents a net operating loss (NOL) position, creating a receivable-type balance rather than a payable. These Florida NOLs are subject to SRLY (separate return limitation year) limitations, restricting their use to FCG's own future taxable income. Accordingly, while presented within current income tax accounts, the balance reflects future tax benefits and is treated as deferred on MFR Schedule C-24.

For federal purposes, FCG is included in its parent's consolidated tax return (per MFR Schedule C-27). Under this structure, FCG settles its tax position through an intercompany tax-sharing arrangement rather than directly with the IRS. To the extent FCG generates losses that benefit the consolidated group, it records a receivable from the parent company.

In summary, the debit balance reflects:

- Florida NOLs (subject to SRLY limitations) from separate filing, and
- Unsettled federal intercompany receivables due from the parent company, based on consistent historical practice within the consolidated group.

Interrogatory No. 195, cont.

As of the reporting date, these amounts remain unsettled. The benefit of FCG's losses is realized at the parent level, and thus the parent is the counterparty to the receivable. Settlement is expected to occur through intercompany funding or other corporate cash management processes. Accordingly, the federal portion of this amount is owed to FCG by the parent company, not taxing authorities.

Dated: June 9, 2026

Interrogatory No. 202

202. **Affiliate Expense.** Refer to the response to OPC Interrogatory No. 2 and Order No. PSC-2023-0177-FOF-GU at pages 51-52. Provide an explanation for the difference between the affiliate expense approved for the projected test year of $2,477,003 and the 2027 forecast of $27,436,036. Include in the explanation what historical FCG specific costs were eliminated and replaced with affiliate charges.

Company Response:

The above question is asking for a comparison of 2023 projected affiliate costs of the prior owner to projected 2027 affiliate costs of the current owner. There were several costs that the prior owners considered direct that CUC accumulates at a corporate level and allocates to the business units. Under CUC, all shared services and corporate costs, such as customer care, IT, accounting, finance and human resources departments, are considered affiliate costs. In addition to differences between direct and affiliate methodology, the 2023 projected costs referenced in the order may not represent the actual 2023 costs resulting in an apple to orange comparison. Therefore, it is more realistic to compare total actual expenses for the last rate case historic year, 2021, as opposed to separating out affiliate transactions based on a 2023 projection. The Company has already compared total costs of the prior owner for the historic 2021 year to the actual total 2025 costs of the current owner as part of its benchmarking analysis on MFR C-34. Although this MFR does not separate the costs between affiliate and non-affiliate, the schedule shows the difference between 2021 and 2025 after 2021 actual costs were inflated for growth and inflation. Witness Husted provided a very detailed justification for differences in her Exhibit JH-2. A large portion of the difference after inflation and growth related to the difference in the two owners' policy on

Interrogatory No. 202, cont.

insurance deductibles along with increases in insurance premiums and information technology maintenance agreements. In addition to the benchmarking analysis which compared total 2021 cost to total 2025 costs, the Company has detailed the increase in affiliate costs from 2025 actuals to 2027 projection in its response to OPC Interrogatory 214. Please refer to that response for justification of the increase related to those years.

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: June 11, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S SIXTH SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 201-206, 209, 211, 213-214 and 219-221 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: June 11, 2026

Interrogatory No. 206

206. **Employee Benefits.** Refer to the response to OPC's First Set of Interrogatories, Interrogatory No. 22. Explain what employees are eligible for the 401K Stock Match and the 401K SERP Match, explain what is included in the Other Benefits and explain what HR charges are.

Company Response:

Employees participating in the Retirement Savings Plan (401k plan) are eligible to receive Matching Contributions based on the amount of the Pre-Tax Contributions or the Roth Contributions they elected to contribute to their 401k account. Employees who do not elect to make any Pre-Tax Contributions or Roth contributions for a particular plan year are not eligible to receive any Matching Contributions for that year.

In regard to eligibility for the 401k plan Supplemental/Discretionary match paid in company stock, employees must be eligible to participate in Chesapeake's 401k Plan. Additionally, employees must be actively employed on the last day of the plan year being paid out, unless the reason that the Participant is not so employed is due to retirement after having attained Early Retirement Age or Normal Retirement Age, death or disability.

For an employee to become eligible to participate in the Non-Qualified Deferred Compensation Plan (401k SERP), the employee must be (A) among a select group of management or highly compensated employees within the meaning of Sections 201 (2), 301(a)(3), and 40l(a)(l) of ERISA and (B) designated as an Eligible Employee by the Company (or another participating Employer) to receive any applicable Employer contributions and to make Compensation Deferral Contributions, Performance Share Deferral Contributions or Restricted Share Deferral contributions under the Plan.

Interrogatory No. 206, cont.

6690-Other Benefits include service awards, FMLA program costs, Aspiring scholarships, retirement gifts and car allowances.

Other HR charges include relocation, retirement awards, and various company surveys or engagement efforts.

George Navo, Declarant

Dated: June 11, 2026

Interrogatory No. 214

214. **Affiliate Charges.** Refer to the response to OPC's First Set of Interrogatories, Interrogatory No. 6, which provides a comparison of expense amounts charged, or projected to be charged, by CUC to FCG for each of the years 2023 through 2027. Projected 2027 affiliate expense charges are $27,436,036, while 2025 actual affiliate expense charges were only $21,810, 092. This amounts to an increase of $5,625,944, or 25.8%, from 2025 to 2027. Provide the percentage increases in costs from 2025 to 2027 by FERC account and explain any increases or decreases in expenses higher than 10%.

Company Response:

The response to interrogatory 6 does not contain a comparison of expense amounts charged by the affiliate. We believe you are referring to the response to Interrogatory 2, and, will answer this question according to that response. Please refer to the attached file "OPC ROG 214 Summary of Differences over 10% affiliate costs".

George Navo, Declarant

Dated: June 11, 2026

Interrogatory No. 226

226. **Administrative and General.** Refer to the response to OPC's Third Set of Interrogatories, Interrogatory No. 129. Explain in detail how the Company can prove to the Commission and customers that, under ownership by CUC, FCG can provide safe and reliable service in a more cost-effective manner than FPL could, if it is true as you claim that the services provided under the prior parent (FPL) are not relevant and a cost comparison is not available.

Company Response: FCG objects to this request to the extent that it is beyond the scope of this proceeding and not likely to lead to the discovery of relevant, admissible information. For purposes of the Company's request in this proceeding, FCG is not required to demonstrate that it can provide safe and reliable service to its customers in a more cost-effective manner than FPL. Furthermore, to be clear, the response to Interrogatory No. 129 did not say that the services provided under the prior parent are not relevant, but that the costs incurred by the prior parent for such services is irrelevant. This is because rates are set based upon the actual and legitimate costs of the utility seeking a rate change and the money honestly and prudently invested by that utility in utility assets that are used and useful in service to the public.

Notwithstanding and without waiving this objection, FCG notes that it has provided the cost benchmarking details as required in MFR Schedules C-34 through C-38. These MFR Schedules cover costs for the period between the historical base year in FCG's previous rate case of 2021 through the historical base year in FCG's current rate case, 2025. Additionally, these cost benchmarking details are described further in Exhibit JH-2. Based on these details, FCG believes that the projected operating costs reflect what is needed to provide safe and reliable service.

Interrogatory No. 263

263. **SERP.** Refer to the response to OPC's First Set of Interrogatories, Interrogatory Nos. 65-68 and No. 22. Explain why the responses to OPC's Interrogatories 65-68 state there is no SERP, yet the response to OPC Interrogatory No. 22 lists SERP expenses.

Company Response:

The Company's response to OPC's First Set of Interrogatories, Interrogatory No. 22, provided detail regarding the costs related to the Non-Qualified Deferred Compensation Plan, which are unrelated to SERP. Unfortunately, an erroneous ledger description was pulled over with the response. Consistent with the Company's prior responses to Interrogatories 65-68, there is no SERP included.

REQUESTS FOR PRODUCTION

1. **Costs.** Refer to the February 18, 2026 Test Year Notification letter. Provide each analysis or study supporting the increases in O&M and capital costs, including the impact of inflation.

   Company Response:

   Please refer to attached files 'OPC POD 1a O&M Benchmark Analysis' and 'OPC POD 1b CPI Inflation & Growth Factors'.

2. **Corporate Aircraft.** Provide copies of the flight logs supporting the 2024 and 2025 expenses.

   Company Response:

   Not applicable. The Company does not have corporate aircraft.

3. **Incentive Compensation.** Please provide complete copies of all incentive compensation plans, bonus programs or other incentive award programs in effect at the Company for each of the years 2021, 2022, 2023, 2024, 2025, 2026 and 2027 and the plan supporting the incentive compensation in the rate year.

   Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period

prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well.

FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Please refer to the attached files beginning "OPC POD 3".

EX-10.1 3 d500078dex101.htm EX-10.1

Exhibit 10.1

CHESAPEAKE UTILITIES CORPORATION
2023 STOCK AND INCENTIVE COMPENSATION PLAN

1. Purpose of the Plan.

The purpose of this Plan is to enhance stockholder value by linking the compensation of officers, directors and employees of the Company to increases in the price of Chesapeake Utilities Corporation common stock and the achievement of other performance objectives, and to encourage ownership in the Company by key personnel whose long-term employment is considered essential to the Company's continued progress and success. The Plan is also intended to assist the Company in the recruitment of new employees and to motivate, retain and encourage such employees and directors to act in the stockholders' interest and share in the Company's success.

2. Definitions.

As used herein, the following definitions shall apply:

(a) **"Administrator"** means the Board, any Committee or such delegates as shall be administering the Plan in accordance with Section 4 of the Plan.

(b) **"Affiliate"** means any Subsidiary or other entity that is directly or indirectly controlled by the Company or any entity in which the Company has a significant ownership interest as determined by the Administrator. The Administrator shall, in its sole discretion, determine which entities are classified as Affiliates and designated as eligible to participate in this Plan.

(c) **"Applicable Law"** means the requirements relating to the administration of stock option plans under U.S. federal and state laws, any stock exchange or quotation system on which the Company has listed or submitted for quotation the Common Shares to the extent provided under the terms of the Company's agreement with such exchange or quotation system and, with respect to Awards subject to the laws of any foreign jurisdiction where Awards are, or will be, granted under the Plan, the laws of such jurisdiction.

(d) **"Award"** means a Stock Award, Option, Stock Appreciation Right, Stock Unit, or Other Stock-Based Award granted in accordance with the terms of the Plan, or any other property (including cash) granted pursuant to the provisions of the Plan.

(e) **"Awardee"** means an Employee or Director who has been granted an Award under the Plan.

(f) **"Award Agreement"** means a Stock Award Agreement, Option Agreement, Stock Appreciation Right Agreement, Restricted Stock Unit Agreement or Other Stock-Based Award Agreement, which may be in written or electronic format, in such form and with such terms as may be specified by the Administrator, evidencing the terms and conditions of an individual Award. Each Award Agreement is subject to the terms and conditions of the Plan. The Award Agreement shall be delivered to the Participant receiving such Award upon, or as promptly as is reasonably practicable following, the grant of such Award. The effectiveness of an Award shall not be subject to the related Award Agreement being signed by the Company and/or the Participant receiving the Award unless specifically so provided in the Award Agreement.

(g) **"Board"** means the Board of Directors of the Company.

(h) **"Change of Control"** shall mean, except as otherwise provided in an Award Agreement, one of the following shall have taken place after the Effective Date of this Plan:

(i) any one person, or group of owners of another corporation who acting together through a merger, consolidation, purchase, acquisition of stock or the like (a "Group"), acquires ownership of Shares of the Company that, together with the Shares held by such person or Group, constitutes more than fifty percent (50%) of the total fair market value or total voting power of the Shares of the Company (or other voting securities of the Company then outstanding). However, if such person or Group is considered to own more than fifty percent (50%) of the total fair market value or total voting power of the Shares (or other voting securities of the Company then outstanding) before this transfer of the Company's Shares (or other voting securities of the Company then outstanding), the acquisition of additional Shares (or other voting securities of the Company then outstanding) by the same person or Group shall not be considered to cause a Change of Control of the Company; or

(ii) any one person or Group acquires (or has acquired during the twelve (12) month period ending on the date of the most recent acquisition by such person or persons) ownership of Shares (or other voting securities of the Company then outstanding) of the Company possessing thirty-five percent (35%) or more of the total voting power of the Shares (or other voting securities then outstanding) of the Company where such person or Group is not merely acquiring additional control of the Company; or

(iii) a majority of members of the Company's Board is replaced during any twelve (12) month period by directors whose appointment or election is not endorsed by a majority of the members of the Company's Board prior to the date of the appointment or election (the "Incumbent Board"), but excluding, for purposes of determining whether a majority of the Incumbent Board has endorsed any candidate for election to the Board, any individual whose initial assumption of office occurs as a result of an actual or threatened election contest with respect to the election or removal of directors or other actual or threatened solicitation of proxies or consents by or on behalf of a person or Group other than the Company's Board; or

(iv) any one person or Group acquires (or has acquired during the twelve (12) month period ending on the date of the most recent acquisition by such person or Group) assets from the Company that have a total gross fair market value equal to or more than forty percent (40%) of the total fair market value of all assets of the Company immediately prior to such acquisition or acquisitions. For this purpose, gross fair market value means the value of the assets of the Company, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets. A transfer of assets by the Company will not result in a Change of Control if the assets are transferred to:

(1) a stockholder of the Company (immediately before the asset transfer) in exchange for or with respect to its stock;

(2) an entity, fifty percent (50%) or more of the total value or voting power of which is owned, directly or indirectly, by the Company immediately after the transfer of assets;

(3) a person or Group that owns, directly or indirectly, fifty percent (50%) or more of the total value or voting power of all the outstanding stock of the Company; or

(4) an entity, at least fifty percent (50%) of the total value or voting power of which is owned directly or indirectly, by a person described in subparagraph (h)(i), above; or

(v) the stockholders of the Company approve a plan of complete liquidation or dissolution of the Company.

However, no Change of Control shall be deemed to have occurred with respect to a Participant by reason of (1) any event involving a transaction in which the Participant or a group of persons or entities with which the Participant acts in concert, acquires, directly or indirectly, more than thirty percent (30%) of the Shares or the business or assets of the Company; or (2) any event involving or arising out of a proceeding under Title 11 of the United States Code (or the provisions of any future United States bankruptcy law), an assignment for the benefit of creditors or an insolvency proceeding under state or local law.

Notwithstanding the foregoing, if any payment or distribution event applicable to an Award is subject to the requirements of Section 409A(a)(2)(A) of the Code, the determination of the occurrence of a Change of Control shall be governed by applicable provisions of Section 409A(a)(2)(A) of the Code and regulations and rulings issued thereunder for purposes of determining whether such payment or distribution may then occur.

(i) **"Code"** means the United States Internal Revenue Code of 1986, as amended, and any successor thereto, the Treasury Regulations thereunder and other relevant interpretive guidance issued by the Internal Revenue Service or the Treasury Department. Reference to any specific section of the Code shall be deemed to include such regulations and guidance, as well as any successor provision of the Code.

(j) **"Committee"** means a committee of Directors appointed by the Board in accordance with Section 4 of the Plan or, in the absence of any such special appointment, the Compensation Committee of the Board.

(k) **"Common Shares"** means the common stock, par value $0.4867 per share, of the Company, or any security of the Company issued in substitution, exchange or lieu thereof.

(l) **"Company"** means Chesapeake Utilities Corporation, a Delaware corporation, or, except as utilized in the definition of Change of Control, its successor.

(m) "**Conversion Award**" has the meaning set forth in Section 4(b)(xii) of the Plan.

(n) **"Director"** means a member of the Board. Any Director who does not serve as an employee of the Company is referred to herein as a "**Non-employee Director**."

(o) **"Disability"** means (i) "Disability" as defined in any employment, consulting or similar agreement to which the Participant is a party, or (ii) if there is no such agreement or it does not define "Disability," (A) permanent and total disability as determined under the Company's long-term disability plan applicable to the Participant, or (B) if there is no such plan applicable to the Participant or the Committee determines otherwise in an applicable Award Agreement, "Disability" as determined by the Committee. Notwithstanding the above, with respect to an Incentive Stock Option, Disability shall mean permanent and total disability as defined in Section 22(e)(3) of the Code and, with respect to any Award that constitutes "nonqualified deferred compensation" within the meaning of Section 409A of the Code, the foregoing definition shall apply for purposes of vesting of such Award, provided that such Award shall not be settled until the earliest of: (i) the Participant's "disability" within the meaning of Section 409A of the Code, (ii) the Participant's "separation from service" within the meaning of Section 409A of the Code, and (iii) the date such Award would otherwise be settled pursuant to the terms of the Award Agreement.

(p) **"Disaffiliation"** means a Subsidiary's or Affiliate's ceasing to be a Subsidiary or Affiliate for any reason (including, without limitation, as a result of a public offering, or a spin-off or sale by the Company, of the stock of the Subsidiary or Affiliate) or a sale of a division of the Company and its Affiliates.

(q) **"Employee"** means a regular, active employee of the Company or any Affiliate, including an Officer or Director who is also a regular, active employee of the Company or any Affiliate. The Administrator shall determine whether the Chair of the Board qualifies as an "Employee." For any and all purposes under the Plan, the term "Employee" shall not include a person hired as a leased employee, consultant or a person otherwise designated by the Administrator, the Company or an Affiliate at the time of hire as not eligible to participate in or receive benefits under the Plan or not on the payroll, even if such ineligible person is subsequently determined to be a common law employee of the Company or an Affiliate or otherwise an employee by any governmental or judicial authority. Unless otherwise determined by the Administrator in its sole discretion, for purposes of the Plan, an Employee shall be considered to have terminated employment and to have ceased to be an Employee if such person's employer ceases to be an Affiliate, even if such person continues to be employed by such employer.

(r) **"Exchange Act"** means the United States Securities Exchange Act of 1934, as amended, and any successor thereto.

(s) **"Fair Market Value"** means the closing price for the Common Shares reported on a consolidated basis on the primary national securities exchange on which such Common Shares are traded on the date of measurement, or if the Common Shares were not traded on such measurement date, then on the next preceding date on which Common Shares were traded, all as reported by such source as the Committee may select. If the Common Shares are not listed on a national securities exchange, Fair Market Value shall be determined by the Committee in its good faith discretion, taking into account, to the extent appropriate, the requirements of Section 409A of the Code.

(t) **"Grant Date"** means, with respect to each Award, the date upon which the Award is granted to an Awardee pursuant to this Plan, which may be a designated future date as of which such Award will be effective, as determined by the Committee.

(u) **"Incentive Stock Option"** means an Option that is identified in the Option Agreement as intended to qualify as an incentive stock option within the meaning of Section 422 of the Code and the regulations promulgated thereunder, and that actually does so qualify.

(v) **"Nonqualified Stock Option"** means an Option that is not an Incentive Stock Option.

(w) **"Officer"** means a person who is an officer of the Company within the meaning of Section 16 of the Exchange Act and the rules and regulations promulgated thereunder.

(x) **"Option"** means a right granted under Section 8 of the Plan to purchase a number of Shares at such exercise price, at such times, and on such other terms and conditions as are specified in the agreement or other documents evidencing the Award (the "Option Agreement"). Both Incentive Stock Options and Nonqualified Stock Options may be granted under the Plan.

(y) **"Other Stock-Based Award"** means an Award granted pursuant to Section 12 of the Plan on such terms and conditions as are specified in the agreement or other documents evidencing the Award (the "Other Stock-Based Award Agreement").

(z) **"Participant"** means the Awardee or any person (including any estate) to whom an Award has been assigned or transferred as permitted hereunder.

(aa) **"Plan"** means this 2023 Stock and Incentive Compensation Plan, as set forth herein and as hereafter amended from time to time.

(bb) **"Prior Plan"** means 2013 Stock and Incentive Compensation Plan.

(cc) **"Retirement"** means, unless the Administrator determines otherwise, voluntary Termination of Service by a Participant from the Company and its Affiliates after (i) attaining age 65 or (ii) attaining age 60 and having completed at least 10 years of service for the Company and its Affiliates, excluding service with an Affiliate of the Company prior to the time that such Affiliate became an Affiliate of the Company.

(dd) **"Securities Act"** means the United States Securities Act of 1933, as amended.

(ee) **"Share"** means a Common Share, as adjusted in accordance with Section 15 of the Plan.

(ff) **"Stock Appreciation Right"** means a right granted under Section 10 of the Plan on such terms and conditions as are specified in the agreement or other documents evidencing the Award (the "Stock Appreciation Right Agreement").

(gg) **"Stock Award"** means an award or issuance of Shares made under Section 11 of the Plan, the grant, issuance, retention, vesting and/or transferability of which is subject during specified periods of time to such conditions (including, without limitation, continued employment or performance conditions) and terms as are expressed in the agreement or other documents evidencing the Award (the "Stock Award Agreement").

(hh) **"Stock Unit"** means a bookkeeping entry representing an amount equivalent to the Fair Market Value of one Share, payable in cash, property or Shares. Stock Units represent an unfunded and unsecured obligation of the Company, except as otherwise provided for by the Administrator.

(ii) **"Stock Unit Award"** means an award or issuance of Stock Units made under Section 12 of the Plan, the grant, issuance, retention, vesting and/or transferability of which is subject during specified periods of time to such conditions (including, without limitation, continued employment or performance conditions) and terms as are expressed in the agreement or other documents evidencing the Award (the "Stock Unit Award Agreement").

(jj) **"Subsidiary"** means any corporation (other than the Company) in an unbroken chain of corporations beginning with the Company, provided each company in the unbroken chain (other than the Company) owns, at the time of determination, stock possessing 50% or more of the total combined voting power of all classes of stock, in one of the other corporations in such chain.

(kk) **"Termination for Cause"** means, unless otherwise provided in an Award Agreement, Termination of Service on account of any act of fraud or intentional misrepresentation or embezzlement, misappropriation or conversion of assets of the Company or any Affiliate, any act that disparages or diminishes the reputation of the Company or any of its Subsidiaries or Affiliates, or the intentional and repeated violation of the written policies or procedures of the Company, provided that, for an Employee who is party to an individual severance or employment agreement defining Cause, "Cause" shall have the meaning set forth in such agreement except as may be otherwise provided in such agreement. For purposes of this Plan, a Participant's Termination of Service shall be deemed to be a Termination for Cause if, after the Participant's service has terminated, facts and circumstances are discovered that would have justified, in the opinion of the Committee, a Termination for Cause.

(ll) **"Termination of Service"** means, for purposes of this Plan, unless otherwise determined by the Administrator, ceasing to be an Employee (as determined in accordance with Section 3401(c) of the Code and the regulations promulgated thereunder) of the Company and any of its Subsidiaries or Affiliates. Unless otherwise determined by the Committee, if a Participant's employment with, or membership on a board of directors of, the Company and its Affiliates terminates but such Participant continues to provide services to the Company and its Affiliates in a Non-employee Director capacity or as an Employee, as applicable, such change in status shall not be deemed a Termination of Service. A Participant employed by, or performing services for, a Subsidiary or an Affiliate or a division of the Company and its Affiliates shall be deemed to incur a Termination of Service if, as a result of a Disaffiliation, such Subsidiary, Affiliate, or division ceases to be a Subsidiary, Affiliate or division, as the case may be, and the Participant does not immediately thereafter become an Employee of (or service provider for), or member of the board of directors of, the Company or another Subsidiary or Affiliate. Temporary absences from employment because of illness, vacation or leave of absence and transfers among the Company and its Subsidiaries and Affiliates shall not be considered Terminations of Service. In addition, Termination of Service shall mean a "separation from service" as defined in regulations issued under Code Section 409A whenever necessary to ensure compliance therewith for any payment or settlement of a benefit conferred under this Plan that is subject to such Code section, and, for such purposes, shall be determined based upon a reduction in the bona fide level of services performed to a level equal to twenty percent (20%) or less of the average level of services performed by the Employee during the immediately preceding thirty-six (36) month period.

3. Stock Subject to the Plan.

(a) *Aggregate Limit.* Subject to the provisions of Section 15(a) of the Plan, the maximum aggregate number of Shares which may be subject to or delivered under Awards granted under the Plan is 568,000 Shares, which is inclusive of 274,071 Shares that were previously submitted to and approved by the stockholders of the Company and were available for grant under the Prior Plan as of May 2, 2023. No awards may be granted under the Prior Plan after May 2, 2023. Shares subject to or delivered under Conversion Awards shall not reduce the aggregate number of Shares which may be subject to or delivered under Awards granted under this Plan. The Shares issued under the Plan may be either Shares reacquired by the Company, including Shares purchased in the open market, or authorized but unissued Shares.

(b) *Code Section 422 Limits.* Subject to the provisions of Section 15(a) of the Plan, the aggregate number of Shares that may be subject to all Incentive Stock Options granted under the Plan shall not exceed one-hundred percent (100%) of the total aggregate number of Shares that may be subject to or delivered under Awards under the Plan, as the same may be amended from time to time.

(c) *Limit on Awards to Non-employee Directors*. The maximum number of Shares subject to Awards granted during a single calendar year to any Non-employee Director, taken together with any cash fees paid during the calendar year to the Non-employee Director in respect of the Non-employee Director's service as a member of the Board during such year (including service as a member or chair of any committees of the Board), shall not exceed $500,000 in total value (calculating the value of any such Awards based on the Grant Date fair value of such Awards for financial reporting purposes). The independent members of the Board may make exceptions to this limit for a non-executive chair of the Board, provided that the Non-employee Director receiving such additional compensation may not participate in the decision to award such compensation.

(d) *Share Counting Rules*.

(i) For purposes of this Section 3 of the Plan, Shares subject to Awards that have been canceled, expired, settled in cash, or not issued or forfeited for any reason (in whole or in part) shall not reduce the aggregate number of Shares which may be subject to or delivered under Awards granted under this Plan and shall be available for future Awards granted under this Plan. In addition, if any Shares that are subject to awards under the Prior Plan are canceled, expired,

settled in cash, or not issued or forfeited for any reason (in whole or in part) after December 31, 2022, then such Shares subject to an award under the Prior Plan shall, to the extent of such cancellation, expiration, settlement in cash, non-issuance or forfeiture, again be available for grant under this Plan on a one-for-one basis. Notwithstanding the foregoing, Shares added back under the provisions of this subsection (d) shall not be counted when determining the limit on Shares that may be granted as Incentive Stock Options under subsection (b), above.

(ii) Shares subject to Awards that have been retained by the Company in payment or satisfaction of the purchase price of an Award or the tax withholding obligation of an Awardee, and Shares that have been delivered (either actually or constructively by attestation) to the Company in payment or satisfaction of the purchase price of an Award or the tax withholding obligation of an Awardee, such Shares so tendered or withheld shall be available for grant under the Plan on a one-for-one basis. Similarly, if any Shares subject to an award under the Prior Plan are, after December 31, 2022, either retained by the Company in payment or satisfaction of the purchase price of an award or the tax withholding obligation of an awardee, or if Shares are delivered (either actually or constructively by attestation) to the Company in payment or satisfaction of the purchase price of an award or the tax withholding obligation of an awardee under the Prior Plan, then such Shares subject to an award under the Prior Plan shall, to the extent of such tendering or withholding, again be available for grant under this Plan on a one-for-one basis.

(iii) Conversion Awards shall not reduce the Shares authorized for grant under the Plan or the limitations on Awards to a Participant under subsection (b), above, nor shall Shares subject to a Conversion Award again be available for an Award under the Plan as provided in this subsection (d).

4. Administration of the Plan.

(a) *Procedure*.

(i) *Multiple Administrative Bodies.* The Plan shall be administered by the Board, a Committee designated by the Board to so administer this Plan and/or their respective delegates.

(ii) *Rule 16b-3*. To the extent desirable to qualify transactions hereunder as exempt under Rule 16b-3 promulgated under the Exchange Act ("Rule 16b-3"), Awards to Officers and Directors shall be made by the entire Board or a Committee of two or more "non-employee directors" within the meaning of Rule 16b-3.

(iii) *Other Administration.* To the extent required by the rules of the principal U.S. national securities exchange on which the Shares are traded, the members of the Committee shall also qualify as "independent directors" as set forth in such rules. Except to the extent prohibited by Applicable Law, the Board or a Committee may delegate to a Committee of one or more Directors or to authorized officers of the Company the power to approve Awards to persons eligible to receive Awards under the Plan who are not subject to Section 16 of the Exchange Act.

(iv) *Awards to Directors*. The Board shall have the power and authority to grant Awards to Non-employee Directors, including the authority to determine the number and type of awards to be granted; determine the terms and conditions, not inconsistent with the terms of this Plan, of any award; and to take any other actions the Board considers appropriate in connection with the administration of the Plan.

(v) *Delegation of Authority for the Day-to-Day Administration of the Plan.* Except to the extent prohibited by Applicable Law, the Administrator may delegate to one or more individuals the day-to-day administration of the Plan and any of the functions assigned to it in this Plan. Such delegation may be revoked at any time.

(b) *Powers of the Administrator.* Subject to the provisions of the Plan and, in the case of a Committee or delegates acting as the Administrator, subject to the specific duties delegated to such Committee or delegates, the Administrator shall have the authority, in its discretion:

(i) to select the Non-employee Directors and Employees of the Company or its Affiliates to whom Awards are to be granted hereunder;

(ii) to determine the number of Common Shares to be covered by each Award granted hereunder;

(iii) to determine the type of Award to be granted to the selected Employees and Non-employee Directors;

(iv) to approve forms of Award Agreements;

(v) to determine the terms and conditions, not inconsistent with the terms of the Plan, of any Award granted hereunder. Such terms and conditions include, but are not limited to, the exercise and/or purchase price, the time or times when an Award may be exercised (which may or may not be based on performance criteria), the vesting schedule, any vesting and/or exercisability provisions, terms regarding acceleration of Awards or waiver of forfeiture restrictions, the acceptable forms of consideration for payment for an Award, the term, and any restriction or limitation regarding any Award or the Shares relating thereto, based in each case on such factors as the Administrator, in its sole discretion, shall determine and may be established at the time an Award is granted or thereafter;

(vi) to correct administrative errors;

(vii) to construe and interpret the terms of the Plan (including sub-plans and Plan addenda), Awards granted pursuant to the Plan, administrative forms, policies and procedures and any other extrinsic documents relating to the Plan;

(viii) to adopt forms, rules, policies and procedures relating to the operation and administration of the Plan to accommodate the specific requirements of local laws and procedures. Without limiting the generality of the foregoing, the Administrator is specifically authorized (A) to adopt rules and procedures regarding the conversion of local currency, the shift of tax liability from employer to employee (where legally permitted) and withholding procedures and handling of stock certificates which vary with local requirements, and (B) to adopt sub-plans and Plan addenda as the Administrator deems desirable, to accommodate foreign laws, regulations and practice;

(ix) to prescribe, amend and rescind rules and regulations relating to the Plan, including rules and regulations relating to sub-plans and Plan addenda;

(x) to modify or amend each Award, including, but not limited to, the acceleration of vesting and/or exercisability, provided, however, that any such modification or amendment (A) is subject to the minimum vesting provisions under the Plan, if any, and the plan amendment provisions set forth in Section 16 of the Plan, and (B) may not impair any outstanding Award unless agreed to in writing by the Participant, except that such agreement shall not be required if the Administrator determines in its sole discretion that such modification or amendment either (Y) is required or advisable in order for the Company, the Plan or the Award to satisfy any Applicable Law or to meet the requirements of any accounting standard, or (Z) is not reasonably likely to significantly diminish the benefits provided under such Award, or that adequate compensation has been provided for any such diminishment, except following a Change of Control;

(xi) to allow or require Participants to satisfy withholding tax amounts by electing to have the Company withhold from the Shares to be issued upon exercise of a Nonqualified Stock Option or vesting of a Stock Award that number of Shares having a Fair Market Value equal to the amount required to be withheld. The Fair Market Value of the Shares to be withheld shall be determined in such manner and on such date that the Administrator shall determine or, in the absence of provision otherwise, on the date that the amount of tax to be withheld is to be determined. All elections by a Participant to have Shares withheld for this purpose shall be made in such form and under such conditions as the Administrator may provide;

(xii) to authorize conversion or substitution under the Plan of any or all stock options, stock appreciation rights or other stock awards held by awardees of an entity acquired by the Company (the "Conversion Awards"). Any conversion or substitution shall be effective as of the close of the merger or acquisition. The Conversion Awards may be Nonqualified Stock Options or Incentive Stock Options, as determined by the Administrator, with respect to options granted by the acquired entity;

(xiii) to authorize any person to execute on behalf of the Company any instrument required to effect the grant of an Award previously granted by the Administrator;

(xiv) to impose such restrictions, conditions or limitations as it determines appropriate as to the timing and manner of any resale by a Participant or of other subsequent transfers by the Participant of any Shares issued as a result of or under an Award or upon the exercise of an Award, including, without limitation, (A) restrictions under an insider trading policy, (B) restrictions as to the use of a specified brokerage firm for such resale or other transfers, and (C) institution of "blackout" periods on exercises of Awards;

(xv) to provide, either at the time an Award is granted or by subsequent action, that an Award shall contain as a term thereof, a right, either in tandem with the other rights under the Award or as an alternative thereto, of the Participant to receive, without payment to the Company, a number of Shares, cash or a combination thereof, the amount of which is determined by reference to the value of the Award; and

(xvi) to make all other determinations deemed necessary or advisable for administering the Plan and any Award granted hereunder.

(c) *Effect of Administrator's Decision.* All questions arising under the Plan or under any Award shall be decided by the Administrator in its total and absolute discretion. All decisions, determinations and interpretations by the Administrator regarding the Plan, any rules and regulations under the Plan and the terms and conditions of any Award granted hereunder, shall be final and binding on all Participants. The Administrator shall consider such factors as it deems relevant, in its sole and absolute discretion, to making such decisions, determinations and interpretations, including, without limitation, the recommendations or advice of any officer or other employee of the Company and such attorneys, consultants and accountants as it may select.

(d) *Indemnity.* To the extent allowable under Applicable Law, each member of the Committee or of the Board and any person to whom the Board or Committee has delegated any of its authority under the Plan shall be indemnified and held harmless by the Company from any loss, cost, liability, or expense that may be imposed upon or reasonably incurred by such person in connection with or resulting from any claim, action, suit, or proceeding to which such person may be a party or in which such person may be involved by reason of any action or failure to act pursuant to the Plan, and against and from any and all amounts paid by such person in satisfaction of judgment in such action, suit, or proceeding against such person; provided such person gives the Company an opportunity, at its own expense, to handle and defend the same before such person undertakes to handle and defend it on such persons own behalf. The foregoing right of indemnification shall not be exclusive of any other rights of indemnification to which such persons may be entitled pursuant to the Company's Articles of Incorporation or By-laws, as a matter of law, or otherwise, or any power that the Company may have to indemnify them or hold them harmless.

5. Eligibility.

Awards may be granted only to Directors and Employees of the Company or any of its Affiliates; provided, however, that Incentive Stock Options may be granted only to Employees of the Company and its Subsidiaries (within the meaning of Section 424(f) of the Code).

6. Term of Plan.

The Plan shall become effective upon its approval by stockholders of the Company. It shall continue in effect for a term of ten (10) years from the date the Plan is approved by the stockholders of the Company (the "Effective Date") unless terminated earlier under Section 16 of the Plan.

7. Term of Award.

Subject to the provisions of the Plan, the term of each Award shall be determined by the Administrator and stated in the Award Agreement and may extend beyond the termination of the Plan. In the case of an Option or a Stock Appreciation Right, the term shall be ten (10) years from the Grant Date or such shorter term as may be provided in the Award Agreement. Notwithstanding the foregoing, in the event that on the last business day of the term of a Nonqualified Stock Option or Stock Appreciation Right Award (A) the exercise of the Nonqualified Stock Option or Stock Appreciation Right is prohibited by applicable law or (B) Shares may not be purchased or sold by certain Employees or Directors of the Company due to the "black-out period" of a Company policy or a "lock-up" agreement undertaken in connection with an issuance of securities by the Company, the Committee may provide that the term of the Nonqualified

Stock Option or Stock Appreciation Right Award shall be extended, but not beyond a period of thirty (30) days following the end of the legal prohibition, black-out period or lock-up agreement and provided further that no extension will be made if the grant price of such Nonqualified Stock Option or Stock Appreciation Right at the date the initial term would otherwise expire is above the Fair Market Value.

8. Options.

The Administrator may grant an Option or provide for the grant of an Option, either from time to time in the discretion of the Administrator or automatically upon the occurrence of specified events, including, without limitation, the achievement of performance goals.

(a) *Option Agreement.* Each Option Agreement shall contain provisions regarding (i) the number of Shares that may be issued upon exercise of the Option, (ii) the type of Option, (iii) the exercise price of the Option and the means of payment of such exercise price, (iv) the term of the Option, (v) such terms and conditions regarding the vesting and/or exercisability of an Option as may be determined from time to time by the Administrator, (vi) restrictions on the transfer of the Option and forfeiture provisions, and (vii) such further terms and conditions, in each case not inconsistent with this Plan, as may be determined from time to time by the Administrator.

(b) *Exercise Price*. The per Share exercise price for the Shares to be issued upon exercise of an Option shall be determined by the Administrator, except that the per Share exercise price shall be no less than 100% of the Fair Market Value per Share on the Grant Date, except with respect to Conversion Awards.

(c) *No Option Repricings.* Subject to Section 15(a) of the Plan, or in connection with a Change of Control, the exercise price of an Option may not be reduced without stockholder approval, nor may outstanding Options be cancelled in exchange for cash, other Awards or Options with an exercise price that is less than the exercise price of the original Option without stockholder approval.

(d) *No Reload Grants.* Options shall not be granted under the Plan in consideration for and shall not be conditioned upon the delivery of Shares to the Company in payment of the exercise price and/or tax withholding obligation under any other employee stock option.

(e) *Vesting Period and Exercise Dates.* Options granted under this Plan shall vest and/or be exercisable at such time and in such installments during the period prior to the expiration of the Option's term as determined by the Administrator and as specified in the Option Agreement. The Administrator shall have the right to make the timing of the ability to exercise any Option granted under this Plan subject to continued active employment (or retention in the case of a Director), the passage of time and/or such performance requirements as deemed appropriate by the Administrator. At any time after the grant of an Option, the Administrator may reduce or eliminate any restrictions surrounding any Participant's right to exercise all or part of the Option.

(f) *Form of Consideration.* The Administrator shall determine the acceptable form of consideration for exercising an Option, including the method of payment, either through the terms of the Option Agreement or at the time of exercise of an Option. Acceptable forms of consideration may include:

(i) cash;

(ii) check or wire transfer (denominated in U.S. Dollars);

(iii) subject to any conditions or limitations established by the Administrator, other Shares which have a Fair Market Value on the date of surrender equal to or greater than the aggregate exercise price of the Shares as to which said Option shall be exercised (it being agreed that the excess of the Fair Market Value over the aggregate exercise price, if any, shall be refunded to the Awardee in cash if the surrendered Shares were held for a period of more than six (6) months on the date of surrender);

(iv) subject to any conditions or limitations established by the Administrator, the Company withholding Shares otherwise issuable upon exercise of an Option;

(v) consideration received by the Company under a broker-assisted sale and remittance program acceptable to the Administrator and in compliance with Applicable Law;

(vi) such other consideration and method of payment for the issuance of Shares deemed appropriate by the Administrator to the extent permitted by Applicable Law; or

(vii) any combination of the foregoing methods of payment, provided, however, that the Participant must pay in cash an amount not less than the aggregate par value (if any) of the Shares being acquired to the extent required by applicable law.

(g) *Procedure for Exercise; Rights as a Stockholder.*

(i) Any Option granted hereunder shall be exercisable according to the terms of the Plan and at such times and under such conditions as determined by the Administrator and set forth in the applicable Option Agreement.

(ii) An Option shall be deemed exercised when (A) the Company receives (1) written or electronic notice of exercise (in accordance with the Option Agreement or procedures established by the Administrator) from the person entitled to exercise the Option and (2) full payment for the Shares with respect to which the related Option is exercised, and (B) with respect to Nonqualified Stock Options, provisions acceptable to the Administrator have been made for payment of all applicable withholding taxes.

(iii) Unless provided otherwise by the Administrator or pursuant to this Plan, until the Shares are issued (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company), no right to vote or receive dividends or any other rights as a stockholder shall exist with respect to the Shares subject to an Option, notwithstanding the exercise of the Option.

(iv) The Company shall issue (or cause to be issued) such Shares as soon as administratively practicable after the Option is exercised. An Option may not be exercised for a fraction of a Share.

(h) *Termination of Service or Board Membership.* The Administrator shall determine as of the Grant Date (subject to modification subsequent to the Grant Date) the effect a termination from membership on the Board by a Non-employee Director for any reason or a Termination of Service due to (i) Disability, (ii) Retirement, (iii) death, or (iv) otherwise (including Termination for Cause) shall have on any Option. Unless otherwise provided in the Award Agreement, (w) upon termination from membership on the Board by a Non-employee Director, any Option held by such Director that (1) has not vested and is not exercisable as of the effective date of such termination from membership on the Board shall be subject to immediate cancellation and forfeiture, or (2) is vested and exercisable as of the effective date of such termination shall remain exercisable for one year thereafter, or the remaining term of the Option, if less; (x) upon Termination of Service due to Disability or Death, any Option held by an Employee that is vested and exercisable as of the effective date of such Termination of Service shall remain exercisable for three years after such Termination of Service due to Disability or one year after such Termination of Service due to Death, or, in either case, the remaining term of the Option, if less; (y) any Option held by an Awardee at Retirement that is vested and exercisable as of the effective date of such Retirement will remain outstanding for three years or the remaining term of the Option, if less; and (z) any other Termination of Service shall result in immediate cancellation and forfeiture of all outstanding Options that have not vested as of the effective date of such Termination of Service, and any vested and exercisable Options held at the time of such Termination of Service shall remain exercisable for ninety (90) days thereafter, or the remaining term of the Option, if less. Notwithstanding the foregoing, all outstanding and unexercised Options shall be immediately cancelled in the event of a Termination for Cause.

9. Incentive Stock Option Limitations/Terms.

(a) *Eligibility.* Only Employees (who qualify as employees under Section 3401(c) of the Code and the regulations promulgated thereunder) of the Company or any of its Subsidiaries may be granted Incentive Stock Options. No Incentive Stock Option shall be granted to any such Employee who as of the Grant Date owns stock possessing more than 10% of the total combined voting power of the Company.

(b) *$100,000 Limitation.* Notwithstanding the designation "Incentive Stock Option" in an Option Agreement, if and to the extent that the aggregate Fair Market Value of the Shares with respect to which Incentive Stock Options are exercisable for the first time by the Awardee during any calendar year (under all plans of the Company and any of its Subsidiaries) exceeds U.S. $100,000, such Options shall be treated as Nonqualified Stock Options. For purposes of this Section 9(b) of the Plan, Incentive Stock Options shall be taken into account in the order in which they were granted. The Fair Market Value of the Shares shall be determined as of the Grant Date.

(c) *Transferability.* The Option Agreement must provide that an Incentive Stock Option is not transferable by the Awardee otherwise than by will or the laws of descent and distribution, and, during the lifetime of such Awardee, must not be exercisable by any other person. If the terms of an Incentive Stock Option are amended to permit transferability, the Option will be treated for tax purposes as a Nonqualified Stock Option.

(d) *Exercise Price.* The per Share exercise price of an Incentive Stock Option shall in no event be inconsistent with the requirements for qualification of the Incentive Stock Option under Section 422 of the Code.

(e) *Disqualifying Disposition*. Any Participant who shall make a "disposition" (as defined in Section 424 of the Code) of all or any portion of Common Shares acquired upon exercise of an Incentive Stock Option within two years from the Grant Date of such Incentive Stock Option or within one year after the issuance of Common Shares acquired upon exercise of such Incentive Stock Option (a "Disqualifying Disposition") shall be required to immediately advise the Company in writing as to the occurrence of the sale and the price realized upon the sale of such Common Shares.

(f) *Other Terms.* Option Agreements evidencing Incentive Stock Options shall contain such other terms and conditions as may be necessary to qualify, to the extent determined desirable by the Administrator, with the applicable provisions of Section 422 of the Code. If any such terms and conditions, as of the Grant Date or any later date, do not so comply, the Option will be treated thereafter for tax purposes as a Nonqualified Stock Option.

10. Stock Appreciation Rights.

A "Stock Appreciation Right" is a right that entitles the Awardee to receive, in cash or Shares (as determined by the Administrator), value equal to or otherwise based on the excess of (i) the Fair Market Value of a specified number of Shares at the time of exercise over (ii) the aggregate exercise price of the right, as established by the Administrator on the Grant Date. Stock Appreciation Rights may be granted to Awardees either alone ("freestanding") or in addition to or in tandem with other Awards granted under the Plan and may, but need not, relate to a specific Option granted under Section 8 of the Plan. All Stock Appreciation Rights under the Plan shall be granted subject to the same terms and conditions applicable to Options as set forth in Section 8 of the Plan. However, any Stock Appreciation Right granted in tandem with an Option may be granted at the same time such Option is granted or at any time thereafter before exercise or expiration of such Option, and shall be based on the Fair Market Value of one Share on the Grant Date or, if applicable, on the Grant Date of the Option with respect to a Stock Appreciation Right granted in exchange for or in tandem with, but subsequent to, the Option (subject to the requirements of Section 409A of the Code). Subject to the provisions of Section 8 of the Plan, the Administrator may impose such other conditions or restrictions on any Stock Appreciation Right as it shall deem appropriate.

11. Stock Awards.

(a) *Stock Award Agreement.* Each Stock Award Agreement shall contain provisions regarding (i) the number of Shares subject to such Stock Award or a formula for determining such number, (ii) the purchase price of the Shares, if any, and the means of payment for the Shares, (iii) the performance criteria, if any, and level of achievement versus such criteria that shall determine the number of Shares granted, issued, retainable and/or vested, (iv) such terms and conditions on the grant, issuance, vesting and/or forfeiture of the Shares as may be determined from time to time by the Administrator, (v) restrictions on the transferability of the Stock Award, and (vi) such further terms and conditions, in each case not inconsistent with this Plan, as may be determined from time to time by the Administrator. The Committee may, in its sole discretion, waive the vesting restrictions and any other conditions set forth in any Award Agreement under such terms and conditions as the Committee shall deem appropriate.

(b) *Restrictions and Performance Criteria.* The grant, issuance, retention and/or vesting of Stock Awards issued to Employees may be subject to such performance criteria and level of achievement versus such criteria as the Administrator shall determine, which criteria may be based on financial performance, personal performance evaluations and/or completion of service by the Awardee. Stock Awards for which vesting is not based on the attainment of performance criteria are referred to as "Restricted Stock Awards."

(c) *Termination of Service or Board Membership.* The Administrator shall determine as of the Grant Date (subject to modification subsequent to the Grant Date) the effect a termination from membership on the Board by a Non-employee Director for any reason or a Termination of Service due to (i) Disability, (ii) Retirement, (iii) death, or (iv) otherwise (including Termination for Cause) shall have on any Stock Award. Unless otherwise provided in the Award Agreement, (y) a Termination of Service due to Disability, death or Retirement or termination from membership on the Board by a Non-employee Director due to Disability or death shall result in vesting of a prorated portion of any Stock Award, based upon the full months of the applicable performance period, vesting period or other period of restriction elapsed as of the end of the month in which the Termination of Service due to Disability, death or Retirement or termination from membership on the Board by a Non-employee Director due to Disability or death occurs over the total number of months in such period; and (z) any other Termination of Service or termination from membership on the Board by a Non-employee Director shall result in immediate cancellation and forfeiture of all outstanding, unvested Stock Awards.

(d) *Rights as a Stockholder.* Unless otherwise provided for by the Administrator, the Participant shall have the rights equivalent to those of a stockholder and shall be a stockholder only after Shares are issued (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company) to the Participant. Any certificate issued in respect of a Restricted Stock Award shall be registered in the name of the applicable Participant and shall, if required by the Company, bear an appropriate legend referring to the terms, conditions, and restrictions applicable to such Award, substantially in the following form:

> "The transferability of this certificate and the shares of stock represented hereby are subject to the terms and conditions (including forfeiture) of the Chesapeake Utilities Corporation 2023 Stock and Incentive Compensation Plan and an Award Agreement. Copies of such Plan and Agreement are on file at the offices of Chesapeake Utilities Corporation, 500 Energy Lane, Dover, Delaware 19901."

The Committee may require that the certificates evidencing such Shares be held in custody by the Company until the restrictions thereon shall have lapsed and that, as a condition of any Award of Restricted Stock, the applicable Participant shall have delivered a stock power, endorsed in blank, relating to the Common Shares covered by such Award. The Participant shall not be permitted to sell, assign, transfer, pledge or otherwise encumber a Stock Award.

12. Stock Unit Awards and Other Stock-Based Awards.

(a) *Stock Unit Awards.* Each Stock Unit Award Agreement shall contain provisions regarding (i) the number of Shares subject to such Stock Unit Award or a formula for determining such number, (ii) the performance criteria, if any, and level of achievement versus such criteria that shall determine the number of Shares granted, issued, and/or vested, (iii) such terms and conditions on the grant, issuance, vesting and/or forfeiture of the Shares as may be determined from time to time by the Administrator, (iv) restrictions on the transferability of the Stock Unit Award, and (v) such further terms and conditions, in each case not inconsistent with this Plan, as may be determined from time to time by the Administrator. Awards with vesting conditions that are based upon performance criteria and level of achievement versus such criteria are referred to as "Performance Stock Unit Awards" and Awards with vesting conditions that are based upon continued employment or the passage of time are referred to as "Restricted Stock Unit Awards." The Committee may, in its sole discretion, waive the vesting restrictions and any other conditions set forth in any Award Agreement under such terms and conditions as the Committee shall deem appropriate.

(b) *Restrictions and Performance Criteria.* The grant, issuance, retention and/or vesting of Stock Unit Awards issued to Employees may be subject to such performance criteria and level of achievement versus such criteria as the Administrator shall determine, which criteria may be based on financial performance, personal performance evaluations and/or completion of service by the Awardee.

(c) *Termination of Service or Board Membership (Stock Unit Award).* The Administrator shall determine as of the Grant Date (subject to modification subsequent to the Grant Date) the effect a termination from membership on the Board by a Non-employee Director for any reason or a Termination of Service due to (i) Disability, (ii) Retirement, (iii) death, or (iv) otherwise (including Termination for Cause) shall have on any Stock Unit Award. Unless otherwise provided in the Award

Agreement, (y) a Termination of Service due to Disability, death or Retirement or termination from membership on the Board by a Non-employee Director due to Disability or death shall result in vesting of a prorated portion of any Stock Unit Award, based upon the full months of the applicable performance period, vesting period or other period of restriction elapsed as of the end of the month in which the Termination of Service due to Disability, death or Retirement or termination from membership on the Board by a Non-employee Director due to Disability or death occurs over the total number of months in such period; and (z) any other Termination of Service or termination from membership on the Board by a Non-employee Director shall result in immediate cancellation and forfeiture of all outstanding, unvested Stock Unit Awards.

(d) *Rights as a Stockholder.* Unless otherwise provided for by the Administrator, the Participant shall have the rights equivalent to those of a stockholder and shall be a stockholder only after Shares are issued (as evidenced by the appropriate entry on the books of the Company or of a duly authorized transfer agent of the Company) to the Participant.

(e) *Other Stock-Based Award.* An "Other Stock-Based Award" means any other type of equity-based or equity-related Award not otherwise described by the terms of this Plan (including the grant or offer for sale of unrestricted Shares), as well as any cash based award based on the attainment of performance criteria, in such amount and subject to such terms and conditions as the Administrator shall determine. Such Awards may involve the transfer of actual Shares to Participants, or payment in cash or otherwise of amounts based on the value of Shares or pursuant to attainment of a performance goal. Each Other Stock-Based Award will be evidenced by an Award Agreement containing such terms and conditions as may be determined by the Administrator.

(f) *Value of Other Stock-Based Awards.* Each Other Stock-Based Award shall be expressed in terms of Shares or units based on Shares or a target amount of cash, as determined by the Administrator. The Administrator may establish performance goals in its discretion. If the Administrator exercises its discretion to establish performance goals, the number and/or value of Other Stock-Based Awards that will be paid out to the Participant will depend on the extent to which the performance goals are met.

(g) *Payment of Other Stock-Based Awards.* Payment, if any, with respect to Other Stock-Based Awards shall be made in accordance with the terms of the Award, in cash or Shares as the Administrator determines.

(h) *Termination of Service or Board Membership (Other Stock-Based Award).* The Administrator shall determine as of the Grant Date (subject to modification subsequent to the Grant Date) the effect a termination from membership on the Board by a Non-employee Director for any reason or a Termination of Service due to (i) Disability, (ii) Retirement, (iii) death, or (iv) otherwise (including Termination for Cause) shall have on any Other Stock-Based Award. Unless otherwise provided in the Award Agreement, (y) a Termination of Service due to Disability, death or Retirement or termination from membership on the Board by a Non-employee Director due to Disability or death shall result in vesting of a prorated portion of any Other Stock-Based Award, based upon the full months of the applicable performance period, vesting period or other period of restriction elapsed as of the end of the month in which the Termination of Service due to Disability, death or Retirement or termination from membership on the Board by a Non-employee Director due to Disability or death occurs over the total number of months in such period; and (z) any other Termination of Service or termination from membership on the Board by a Non-employee Director shall result in immediate cancellation and forfeiture of all outstanding, unvested Other Stock-Based Awards.

13. Other Provisions Applicable to Awards.

(a) *Non-Transferability of Awards.* Unless determined otherwise by the Administrator, an Award may not be sold, pledged, assigned, hypothecated, transferred or disposed of in any manner other than by beneficiary designation, will or by the laws of descent or distribution, including but not limited to any attempted assignment or transfer in connection with the settlement of marital property or other rights incident to a divorce or dissolution, and any such attempted sale, assignment or transfer shall be of no effect prior to the date an Award is vested and settled. The Administrator may only make an Award transferable to an Awardee's family member or any other person or entity provided the Awardee does not receive consideration for such transfer. If the Administrator makes an Award transferable, either as of the Grant Date or thereafter, such Award shall contain such additional terms and conditions as the Administrator deems appropriate, and any transferee shall be deemed to be bound by such terms upon acceptance of such transfer.

(b) *Discretionary Adjustments.* Notwithstanding satisfaction or completion of performance criteria, to the extent specified as of the Grant Date, the number of Shares, Options or other benefits granted, issued, retainable and/or vested under an Award on account of satisfaction of such performance criteria may be reduced or increased by the Administrator on the basis of such further considerations as the Administrator in its sole discretion shall determine. Further, the Administrator shall have discretion to make adjustments (i) to applicable performance criteria, (ii) to applicable financial or other results achieved or the manner in which applicable financial or other results are calculated or evaluated for purposes of determining whether performance criteria were satisfied to account for extraordinary events occurring during or with respect to the applicable performance period. For example, if the Administrator determines that external changes or other unanticipated business conditions have materially affected the suitability of the performance criteria, or that a change in the business, operations, corporate structure or capital structure of the Company, or the manner in which it conducts its business, or acquisitions or divestitures of subsidiaries or business units, or other events or circumstances (each, an "Evaluation Event") materially affect the performance criteria or render the performance criteria unsuitable or materially affect the financial or other results on which satisfaction of performance criteria are based, then the Administrator may, in its discretion, during or for the applicable performance period, approve adjustments to the performance criteria (either up or down) or adjustments to the applicable financial or other results to offset the effect of any such Evaluation Event.

14. Dividends and Dividend Equivalents.

Awards other than Options and Stock Appreciation Rights may provide the Awardee with the right to receive dividend payments or dividend equivalent payments on the Shares subject to the Award, whether or not such Award is vested. Notwithstanding the foregoing, dividends or dividend equivalents shall not be paid with respect to Stock Awards, Stock Unit Awards or Other Stock-Based Awards that vest based on the achievement of performance goals prior to the date the performance goals are satisfied and then shall be payable only with respect to the number of Shares or Stock Units actually earned under the Award. Such payments may be made in cash, Shares or Stock Units or may be credited as cash or Stock Units to an Awardee's account and later settled in cash or Shares or a combination thereof, as determined by the Administrator. Such payments and credits may be subject to such conditions and contingencies as the Administrator may establish.

15. Adjustments upon Changes in Capitalization, Organic Change or Change of Control.

(a) *Adjustment Clause.* In the event of (i) a stock dividend, extraordinary cash dividend, stock split, reverse stock split, share combination, or recapitalization or similar event affecting the capital structure of the Company (each, a "Share Change"), or (ii) a merger, consolidation, acquisition of property or shares, separation, spin-off, reorganization, stock rights offering, liquidation, Disaffiliation, or similar event affecting the Company or any of its Subsidiaries (each, an "Organic Change"), the Administrator or the Board shall be required to make such substitutions or adjustments as it deems appropriate and equitable to preserve the economic intent of outstanding Awards to (i) the Share limitations set forth in Section 3 of the Plan, (ii) the number and kind of Shares covered by each outstanding Award, and (iii) the price per Share subject to each such outstanding Award. In the case of Organic Changes, such adjustments may include, without limitation, (x) the cancellation of outstanding Awards in exchange for payments of cash, property or a combination thereof having an aggregate value equal to the value of such Awards, as determined by the Administrator or the Board in its sole discretion (it being understood that in the case of an Organic Change with respect to which stockholders receive consideration other than publicly traded equity securities of the ultimate surviving entity, any such determination by the Administrator that the value of an Option or Stock Appreciation Right shall for this purpose be deemed to equal the excess, if any, of the value of the consideration being paid for each Share pursuant to such Organic Change over the exercise price of such Option or Stock Appreciation Right shall conclusively be deemed valid); (y) the substitution of other property (including, without limitation, cash or other securities of the Company and securities of entities other than the Company) for the Shares subject to outstanding Awards; and (z) in connection with any Disaffiliation, arranging for the assumption of Awards, or replacement of Awards with new awards based on other property or other securities (including, without limitation, other securities of the Company and securities of entities other than the Company), by the affected Subsidiary, Affiliate, or division or by the entity that controls such Subsidiary, Affiliate, or division following such Disaffiliation (as well as any corresponding adjustments to Awards that remain based upon Company securities). The Committee may adjust in its sole discretion the performance criteria applicable to any Awards to reflect any Share Change and any Organic Change and any unusual or non-recurring events and other extraordinary items, impact of charges for restructurings, discontinued operations, and the cumulative effects of accounting or tax changes, each as defined by generally accepted accounting principles or as identified in the Company's financial statements, notes to the financial statements, management's discussion and analysis or the Company's other SEC filings. Any adjustment under this Section 15(a) need not be the same for all Participants.

(b) *Change of Control.* In the event of a Change of Control, unless otherwise determined by the Administrator as of the Grant Date of a particular Award (or subsequent to the Grant Date), the following acceleration, exercisability and valuation provisions shall apply:

(i) On the date that such Change of Control occurs, any or all Options and Stock Appreciation Rights awarded under this Plan not previously exercisable and vested shall, if not assumed, or substituted with a new award, by the successor to the Company, become fully exercisable and vested, and if the successor to the Company assumes such Options or Stock Appreciation Rights or substitutes other awards for such Awards, such Awards (or their substitutes) shall become fully exercisable and vested if the Participant's employment is terminated (other than a Termination for Cause) within two years following the Change of Control.

(ii) Except as may be provided in an individual severance or employment agreement (or severance plan) to which an Awardee is a party, in the event of an Awardee's Termination of Service within two years after a Change of Control for any reason other than because of the Awardee's death, Retirement, Disability or Termination for Cause, each Option and Stock Appreciation Right held by the Awardee (or a transferee) that is vested following such Termination of Service shall remain exercisable until the earlier of the third anniversary of such Termination of Service (or any later date until which it would remain exercisable under such circumstances by its terms) or the expiration of its original term. In the event of an Awardee's Termination of Service (A) more than two years after a Change of Control, or (B) within two years after a Change of Control because of the Awardee's death, Retirement, Disability or Termination for Cause, the provisions of Sections 8(h) and 10 of the Plan shall govern (as applicable).

(iii) On the date that such Change of Control occurs, the restrictions and conditions applicable to any or all Stock Awards, Stock Unit Awards and Other Stock-Based Awards that are not assumed, or substituted with a new award, by the successor to the Company shall lapse and such Awards shall be fully vested. Unless otherwise provided in an Award Agreement at the Grant Date, upon the occurrence of a Change of Control without assumption or substitution of the Awards by the successor, any performance-based Award shall be deemed fully earned at the target amount as of the date on which the Change of Control occurs. All Stock Awards, Stock Unit Awards and Other Stock-Based Awards shall be settled or paid within thirty (30) days of vesting hereunder. Notwithstanding the foregoing, if the Change of Control would not qualify as a permissible date of distribution under Section 409A(a)(2)(A) of the Code, and the regulations thereunder, the Awardee shall be entitled to receive the Award from the Company on the date that would have applied absent this provision. If the successor to the Company does assume (or substitute with a new award) any Stock Awards, Stock Unit Awards and Other Stock-Based Awards, all such Awards shall become fully vested if the Participant's employment is terminated (other than a Termination for Cause) within two years following the Change of Control, and any performance-based Award shall be deemed fully earned at the target amount effective as of such Termination of Service.

(iv) The Committee, in its discretion, may determine that, upon the occurrence of a Change of Control of the Company, each Option and Stock Appreciation Right outstanding shall terminate within a specified number of days after notice to the Participant, and/or that each Participant shall receive, with respect to each Share subject to such Option or Stock Appreciation Right, an amount equal to the excess of the Fair Market Value of such Share immediately prior to the occurrence of such Change of Control over the exercise price per Share of such Option and/or Stock Appreciation Right; such amount to be payable in cash, in one or more kinds of stock or property (including the stock or property, if any, payable in the transaction) or in a combination thereof, as the Committee, in its discretion, shall determine, and if there is no excess value, the Committee may, in its discretion, cancel such Awards.

(v) An Option, Stock Appreciation Right, Stock Award, Stock Unit Award or Other Stock-Based Award shall be considered assumed or substituted for if following the Change of Control the Award confers the right to purchase or receive, for each Share subject to the Option, Stock Appreciation Right, Stock Award, Stock Unit Award or Other Stock-Based Award immediately prior to the Change of Control, the consideration (whether stock, cash or other securities or property) received in the transaction constituting a Change of Control by holders of Shares for each Share held on the effective date of such transaction (and if holders were offered a choice of consideration, the type of consideration chosen by the holders of a majority of the outstanding Shares); provided, however, that if such consideration received in the transaction constituting a Change of Control is not solely common stock of the successor company, the Committee may, with the consent of the successor company, provide that the consideration to be received upon the exercise or vesting of an Option, Stock Appreciation Right, Stock Award, Stock Unit Award or Other

Stock-Based Award, for each Share subject thereto, will be solely common stock of the successor company with a fair market value substantially equal to the per Share consideration received by holders of Shares in the transaction constituting a Change of Control. The determination of whether fair market value is substantially equal shall be made by the Committee in its sole discretion and its determination shall be conclusive and binding.

(c) *Section 409A*. Notwithstanding the foregoing: (i) any adjustments made pursuant to Section 15(a) of the Plan to Awards that are considered "deferred compensation" within the meaning of Section 409A of the Code shall be made in compliance with the requirements of Section 409A of the Code; (ii) any adjustments made pursuant to Section 15(a) of the Plan to Awards that are not considered "deferred compensation" subject to Section 409A of the Code shall be made in such a manner as to ensure that, after such adjustment, the Awards either continue not to be subject to Section 409A of the Code or comply with the requirements of Section 409A of the Code; (iii) the Administrator shall not have the authority to make any adjustments pursuant to Section 15(a) of the Plan to the extent that the existence of such authority would cause an Award that is not intended to be subject to Section 409A of the Code to be subject thereto; and (iv) if any Award is subject to Section 409A of the Code, Section 15(b) of the Plan shall be applicable only to the extent specifically provided in the Award Agreement and permitted pursuant to Section 24 of the Plan in order to ensure that such Award complies with Code Section 409A. Notwithstanding any provision of this Plan and Awards granted hereunder to the contrary, in light of the uncertainty with respect to the proper application of Section 409A of the Code, the Administrator reserves the right to make amendments to this Plan and Awards granted hereunder as the Administrator deems necessary or desirable to avoid the imposition of taxes or penalties under Section 409A of the Code. In any case, a Participant will be solely responsible and liable for the satisfaction of all taxes and penalties that may be imposed on a Participant or for a Participant's account in connection with this Plan and Awards granted hereunder (including any taxes and penalties under Section 409A of the Code), and neither the Company nor any of its Subsidiaries or Affiliates will have any obligation to indemnify or otherwise hold a Participant harmless from any or all of such taxes or penalties.

16. Amendment and Termination of the Plan.

(a) *Amendment and Termination.* The Administrator may amend, alter or discontinue the Plan or any Award Agreement, but any such amendment shall be subject to approval of the stockholders of the Company in the manner and to the extent required by Applicable Law. In addition, without limiting the foregoing, unless approved by the stockholders of the Company and subject to Section 16(b), no such amendment shall be made that would:

(i) subject to Section 15(a), increase the maximum aggregate number of Shares which may be subject to Awards granted under the Plan;

(ii) reduce the minimum exercise price for Options or Stock Appreciation Rights granted under the Plan; or

(iii) reduce the exercise price of outstanding Options or Stock Appreciation Rights, as prohibited by Section 8(c) without stockholder approval.

Notwithstanding anything herein to the contrary, the Administrator may amend the Plan without the approval of the stockholders of the Company if such amendment is required to satisfy any Applicable Law.

(b) *Effect of Amendment or Termination.* No amendment, suspension or termination of the Plan shall impair the rights of any Participant with respect to an outstanding Award, unless mutually agreed otherwise between the Participant and the Administrator, which agreement must be in writing and signed by the Participant and the Company, except that no such agreement shall be required if the Administrator determines in its sole discretion that such amendment either (i) is required or advisable in order for the Company, the Plan or the Award to satisfy any Applicable Law or to meet the requirements of any accounting standard, or (ii) is not reasonably likely to significantly diminish the benefits provided under such Award, or that any such diminishment has been adequately compensated, except that this exception shall not apply following a Change of Control. Termination of the Plan shall not affect the Administrator's ability to exercise the powers granted to it hereunder with respect to Awards granted under the Plan prior to the date of such termination.

(c) *Effect of the Plan on Other Arrangements.* Neither the adoption of the Plan by the Board or a Committee nor the submission of the Plan to the stockholders of the Company for approval shall be construed as creating any limitations on the power of the Board or any Committee to adopt such other incentive arrangements as it or they may deem desirable, including without limitation, the granting of restricted shares or restricted share units or stock options otherwise than under the Plan, and such arrangements may be either generally applicable or applicable only in specific cases.

17. Designation of Beneficiary.

(a) An Awardee may file a written designation of a beneficiary who is to receive the Awardee's rights pursuant to Awardee's Award or the Awardee may include his or her Awards in an omnibus beneficiary designation for all benefits under the Plan. To the extent that Awardee has completed a designation of beneficiary while employed with the Company or an Affiliate, such beneficiary designation shall remain in effect with respect to any Award hereunder until changed by the Awardee to the extent enforceable under Applicable Law.

(b) Such designation of beneficiary may be changed by the Awardee at any time by written notice. In the event of the death of an Awardee and in the absence of a beneficiary validly designated under the Plan who is living at the time of such Awardee's death, the Company shall allow the legal representative of the Awardee's estate to exercise the Award.

18. No Right to Awards or to Employment.

No person shall have any claim or right to be granted an Award and the grant of any Award shall not be construed as giving an Awardee the right to continue to be employed by the Company or its Affiliates. Further, the Company and its Affiliates expressly reserve the right, at any time, to dismiss any Employee or Awardee at any time without liability or any claim under the Plan, except as provided herein or in any Award Agreement entered into hereunder.

19. Legal Compliance.

Shares shall not be issued pursuant to an Option, Stock Appreciation Right, Stock Award, Stock Unit Award or Other Stock-Based Award unless such Option, Stock Appreciation Right, Stock Award or Other Stock-Based Award and the issuance and delivery of such Shares shall comply with Applicable Law and shall be further subject to the approval of counsel for the Company with respect to such compliance. Unless the Awards and Shares covered by this Plan have been registered under the Securities Act or the Company has determined that such registration is unnecessary, each person receiving an Award and/or Shares pursuant to any Award may be required by the Company to give a representation in writing that such person is acquiring such Shares for such persons own account for investment and not with a view to, or for sale in connection with, the distribution of any part thereof.

20. Inability to Obtain Authority.

To the extent the Company is unable to or the Administrator deems it unfeasible to obtain authority from any regulatory body having jurisdiction, which authority is deemed by the Company's counsel to be advisable or necessary to the lawful issuance and sale of any Shares hereunder, the Company shall be relieved of any liability with respect to the failure to issue or sell such Shares as to which such requisite authority shall not have been obtained.

21. Reservation of Shares.

The Company, during the term of this Plan, will at all times reserve and keep available such number of Shares as shall be sufficient to satisfy the requirements of the Plan.

22. Notice.

Any written notice to the Company required by any provisions of this Plan shall be addressed to the Secretary of the Company and shall be effective when received. Any notice to a Participant hereunder shall be addressed to the last address of record with the Company and shall be effective when sent via first class mail, courier service, or electronic mail to such last address of record.

23. Governing Law; Interpretation of Plan and Awards.

(a) This Plan and all determinations made and actions taken pursuant hereto shall be governed by the substantive laws, but not the choice of law rules, of the state of Delaware, except as to matters governed by U.S. federal law.

(b) In the event that any provision of the Plan or any Award granted under the Plan is declared to be illegal, invalid or otherwise unenforceable by a court of competent jurisdiction, such provision shall be reformed, if possible, to the extent necessary to render it legal, valid and enforceable, or otherwise deleted, and the remainder of the terms of the Plan and/or Award shall not be affected except to the extent necessary to reform or delete such illegal, invalid or unenforceable provision.

(c) The heading preceding the text of each section hereof is inserted solely for convenience of reference, and shall not constitute a part of the Plan, nor shall they affect its meaning, construction or effect.

(d) The terms of the Plan and any Award shall inure to the benefit of and be binding upon the parties hereto and their respective permitted heirs, beneficiaries, successors and assigns.

24. Section 409A.

It is the intention of the Company that no Award shall be "deferred compensation" subject to Section 409A of the Code, unless and to the extent that the Administrator specifically determines otherwise, and the Plan and the terms and conditions of all Awards shall be interpreted accordingly. The terms and conditions governing any Awards that the Administrator determines will be subject to Section 409A of the Code, including any rules for elective or mandatory deferral of the delivery of cash or Shares pursuant thereto and any rules regarding treatment of such Awards in the event of a Change of Control, shall be set forth in the applicable Award Agreement, deferral election forms and procedures, and rules established by the Administrator, and shall comply in all respects with Section 409A of the Code. The following rules will apply to Awards intended to be subject to Section 409A of the Code ("409A Awards"):

(a) If a Participant is permitted to elect to defer an Award or any payment under an Award, such election will be permitted only at times in compliance with Code Section 409A, including applicable transition rules thereunder.

(b) The Company shall have no authority to accelerate distributions relating to 409A Awards in excess of the authority permitted under Section 409A.

(c) Any distribution of a 409A Award following a Termination of Service that would be subject to Code Section 409A(a)(2)(A)(i) as a distribution following a separation from service of a "specified employee" as defined under Code Section 409A(a)(2)(B)(i), shall occur no earlier than the expiration of the six (6) month period following such Termination of Service.

(d) In the case of any distribution of a 409A Award, if the timing of such distribution is not otherwise specified in the Plan or an Award Agreement or other governing document, the distribution shall be made not later than the end of the calendar year during which the settlement of the 409A Award is specified to occur.

(e) In the case of an Award providing for distribution or settlement upon vesting or the lapse of a risk of forfeiture, if the time of such distribution or settlement is not otherwise specified in the Plan or an Award Agreement or other governing document, the distribution or settlement shall be made not later than March 15 of the year following the year in which the Award vested or the risk of forfeiture lapsed.

(f) Notwithstanding anything herein to the contrary, in no event shall the Company or the Administrator be liable for the payment of, or any gross up payment in connection with, any taxes, penalties or interest owed by the Participant pursuant to Code Section 409A.

25. Limitation on Liability.

The Company and any Affiliate which is in existence or hereafter comes into existence shall not be liable to a Participant, an Employee, an Awardee or any other persons as to:

(a) *The Non-Issuance of Shares.* The non-issuance or sale of Shares as to which the Company has been unable to obtain from any regulatory body having jurisdiction the authority deemed by the Company's counsel to be necessary to the lawful issuance and sale of any shares hereunder; and

(b) *Tax or Exchange Control Consequences.* Any tax consequence expected, but not realized, or any exchange control obligation owed, by any Participant, Employee, Awardee or other person due to the receipt, exercise or settlement of any Option or other Award granted hereunder.

26. Unfunded Plan.

Insofar as it provides for Awards, the Plan shall be unfunded. Although bookkeeping accounts may be established with respect to Awardees who are granted Stock Awards, Stock Unit Awards or Other Stock-Based Awards under this Plan, any such accounts will be used merely as a bookkeeping convenience. The Company shall not be required to segregate any assets which may at any time be represented by Awards, nor shall this Plan be construed as providing for such segregation. Neither the Company nor the Administrator shall be deemed to be a trustee of Shares or cash to be awarded under the Plan. Any liability of the Company to any Participant with respect to an Award shall be based solely upon any contractual obligations which may be created by the Plan; no such obligation of the Company shall be deemed to be secured by any pledge or other encumbrance on any property of the Company. Neither the Company nor the Administrator shall be required to give any security or bond for the performance of any obligation which may be created by this Plan.

27. Foreign Employees.

Awards may be granted hereunder to Employees who are foreign nationals, who are located outside the United States or who are not compensated from a payroll maintained in the United States, or who are otherwise subject to (or could cause the Company to be subject to) legal or regulatory provisions of countries or jurisdictions outside the United States, on such terms and conditions different from those specified in the Plan as may, in the judgment of the Administrator, be necessary or desirable to foster and promote achievement of the purposes of the Plan, and, in furtherance of such purposes, the Administrator may make such modifications, amendments, procedures, or subplans as may be necessary or advisable to comply with such legal or regulatory provisions.

28. Tax Withholding.

Each Participant shall pay to the Company, or make arrangements satisfactory to the Company regarding the payment of, any federal, state, local or foreign taxes of any kind required by law to be withheld with respect to any Award under the Plan no later than the date as of which any amount under such Award first becomes includible in the gross income of the Participant for any tax purposes with respect to which the Company has a tax withholding obligation. Unless otherwise determined by the Company, withholding obligations may be settled with Shares, including Shares that are part of the Award that gives rise to the withholding requirement; provided, however, that not more than the maximum statutory tax rates in the applicable jurisdictions may be settled with Shares that are part of the Award. The obligations of the Company under the Plan shall be conditional on such payment or arrangements, and the Company and its Affiliates shall, to the extent permitted by law, have the right to deduct any such taxes from any vested Shares or any other payment due to the Participant at that time or at any future time. The Administrator may establish such procedures as it deems appropriate, including making irrevocable elections, for the settlement of withholding obligations with Shares.

29. Cancellation of Award; Forfeiture of Gain.

All Awards shall be subject to reduction, cancellation, forfeiture or recoupment to the extent necessary to comply with (A) any clawback, forfeiture or other similar policy adopted by the Board or Committee and as in effect from time to time; and (B) applicable law. Further, to the extent that the Participant receives any amount in excess of the amount that the Participant should otherwise have received under the terms of the Award Agreement for any reason (including, without limitation, by reason of a financial restatement, mistake in calculations or other administrative error), the Participant shall be required to repay any such excess amount to the Company.

CHESAPEAKE UTILITIES CORPORATION

CASH BONUS INCENTIVE PLAN

Effective January 1, 2015

SECTION 1. INTRODUCTION

1.01 Purposes of the Plan.

The purposes of the Chesapeake Utilities Corporation Cash Bonus Incentive Plan (the "Plan") are (a) to further the long-term growth and earnings of Chesapeake Utilities Corporation (the "Company") by providing incentives and rewards to those executive officers and other key employees of the Company and its Related Companies who are in positions in which they can contribute significantly to the achievement of that growth; (b) to encourage those employees to remain as employees of the Company and its Related Companies; and (c) to assist the Company and its Related Companies in recruiting able management personnel. To accomplish these objectives, the Plan authorizes the grant of Awards, as further described herein. The Plan is intended, in part, to provide for performance based compensation which is not subject to the deduction limitation rules under Section 162(m) of the Code as in effect from time to time.

1.02 Term of the Plan.

The Plan shall be effective as of January 1, 2015, and shall remain in effect until terminated by the Board or the Committee in accordance with Section 8. Any Award granted before the termination of the Plan shall continue to be governed thereafter by the terms of the Plan and its terms as in effect on the termination date.

SECTION 2. DEFINITIONS

2.01 Definitions.

Except where otherwise indicated, the following terms shall have the definitions set forth below for purposes of the Plan:

(a) **"Applicable Law"** means the requirements of Code Section 162(m) applicable to performance based compensation.

(b) **"Award"** means a Performance Bonus Award granted under Section 5 or a Cash Bonus Award granted under Section 6.

(c) **"Beneficiary"** means the person or persons entitled, in accordance with Section 9.03, to receive any benefit payable because of the Participant's death.

(d) **"Board"** means the Board of Directors of the Company.

(e) **"Cash Bonus Award"** means the dollar amount granted by the Committee and payable to a Participant in accordance with Section 6.

(f) **"Change in Control"** means one of the following events shall have taken place after January 1, 2015:

(1) any one person, or group of owners of another corporation who acting together through a merger, consolidation, purchase, acquisition of stock or the like (a "Group"), acquires ownership of stock of the Company (or other voting securities of the Company then outstanding) that, together with the Company stock (or other voting securities of the Company then outstanding) held by such person or Group, constitutes more than fifty percent (50%) of the total fair market value or total voting power of the stock of the Company (or other voting securities of the Company then outstanding). However, if such person or Group is considered to own more than fifty percent (50%) of the total fair market value or total voting power of the stock of the Company (or other voting securities of the Company then outstanding), the acquisition of additional Company stock (or other voting securities of the Company then outstanding) by the same person or Group shall not be considered to cause a Change in Control of the Company;

Table of Contents

(2) any one person or Group acquires (or has acquired during the twelve (12) month period ending on the date of the most recent acquisition by such person or persons) ownership of stock of the Company (or other voting securities of the Company then outstanding) possessing thirty-five percent (35%) or more of the total voting power of the stock of the Company (or other voting securities of the Company then outstanding) where such person or Group is not merely acquiring additional control of the Company;

(3) a majority of the members of the Board is replaced during any twelve (12) month period by directors whose appointment or election is not endorsed by a majority of the members of the Board prior to the date of the appointment or election (the "Incumbent Board"), but excluding, for purposes of determining whether a majority of the Incumbent Board has endorsed any candidate for election to the Board, any individual whose initial assumption of office occurs as a result of an actual or threatened election contest with respect to the election or removal of directors or other actual or threatened solicitation of proxies or consents by or on behalf of a person or Group other than the Board; or

(4) any one person or Group acquires (or has acquired during the twelve (12) month period ending on the date of the most recent acquisition by such person or Group) assets from the Company that have a total gross fair market value equal to or more than forty percent (40%) of the total fair market value of all assets of the Company immediately prior to such acquisition or acquisitions. For this purpose, gross fair market value means the value of the assets of the Company, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets. A transfer of assets by the Company will not result in a Change of Control if the assets are transferred to:

(i) a stockholder of the Company (immediately before the asset transfer) in exchange for or with respect to its stock;

(ii) an entity, fifty percent (50%) or more of the total value or voting power of which is owned, directly or indirectly, by the Company immediately after the transfer of assets;

(iii) a person or Group that owns, directly or indirectly, fifty percent (50%) or more of the total value or voting power of all the outstanding stock of the Company; or

(iv) an entity, at least fifty percent (50%) of the total value or voting power of which is owned directly or indirectly, by a person described in subparagraph (f)(1), above; or

(5) Shareholders of the Company approve a plan of complete liquidation or dissolution of the Company.

However, no Change of Control shall be deemed to have occurred with respect to a Participant by reason of (I) any event involving a transaction in which the Participant or a group of persons or entities with which the Participant acts in concert, acquires, directly or indirectly, more than thirty percent (30%) of the common stock or the business or assets of the Company; or (II) any event involving or arising out of a proceeding under Title 11 of the United States Code (or the provisions of any future United States bankruptcy law), an assignment for the benefit of creditors or an insolvency proceeding under state or local law.

Notwithstanding the foregoing, if any payment or distribution event applicable to an Award is subject to the requirements of Section 409A(a)(2)(A) of the Code, the determination of the occurrence of a Change of Control shall be governed by applicable provisions of Section 409A(a)(2)(A) of the Code and regulations and rulings issued thereunder for purposes of determining whether such payment or distribution may then occur.

(g) **"Code"** means the United States Internal Revenue Code of 1986, as amended, and the regulations and rulings of general applicability issued thereunder, as in effect from time to time.

(h) **"Committee"** means a committee of three or more persons appointed by the Board to administer the Plan, each member of whom shall be (1) an "independent director" as defined by the rules of the New York Stock Exchange, (2) a "non-employee director" within the meaning of Rule 16b-3 and (3) an "outside director" within the meaning of section 162(m) of the Code.

(i) **"Company"** means Chesapeake Utilities Corporation or any successor thereto.

(j) **"Covered Employee"** means an Employee who is, or who is determined by the Committee to be likely to become, a "covered employee" within the meaning of Code Section 162(m).

(k) **"Disability"** shall have the meaning ascribed to such term in the long term disability plan maintained by the Participant's employer at the time that the determination regarding Disability is made hereunder. Notwithstanding the foregoing, if a payment under this Plan is subject to Code Section 409A, "Disability" has the meaning ascribed to such term under that Code section.

(l) **"Employee"** means a regular, active employee of the Company or a Related Company. Directors who are not employed by the Company shall not be considered Employees under the Plan, nor shall independent contractors, leased employees, consultants or anyone else designated as not eligible to participate in the Plan by the Committee.

(m) **"Final Bonus"** means the actual Performance Bonus Award earned during a Performance Period by a Participant, as determined by the Committee.

Table of Contents

(n) **"Participant"** means an Employee who meets the eligibility requirements of Section 4 with respect to one or more Performance Periods.

(o) **"Performance Bonus"** means an Award granted by the Committee and payable to a Participant in accordance with Section 5.

(p) **"Performance Criteria"** shall have the meaning set forth in Section 5.

(q) **"Performance Period"** means the twelve month period beginning on each January 1st and ending on the next succeeding December 31st during the term of the Plan, or such other time period established by the Committee from time to time with respect to which the attainment of Performance Criteria will be determined.

(r) **"Plan"** means the Chesapeake Utilities Corporation Cash Bonus Incentive Plan, as set forth herein and as amended from time to time.

(s) **"Related Company"** means a corporation, partnership, joint venture, or other entity in which the Company has a direct or indirect ownership or other proprietary interest of at least fifty percent.

(t) **"Retirement"** means a voluntary Termination of Employment by a Participant (other than by reason of death or Disability and other than in the event of Termination for Cause) from the Company and its Related Companies (i) after attaining age sixty-five (65), or (ii) after attaining age sixty (60) and having at least ten (10) years of continuous service with the Company and its Related Companies, including service with a Related Company of the Company prior to the time that such Related Company became a Related Company of the Company. For purposes of this age and/or service requirement, the Committee may, in its discretion, credit a Participant with additional years of age and/or service.

(u) **"Rule 16b-3"** means Rule 16b-3 under the Securities Exchange Act of 1934, as amended from time to time, or any successor thereto.

(v) **"Target Bonus Award"** means the potential Performance Bonus Award designated for a Participant in accordance with Section 5 that would be payable to the Participant for a Performance Period if the Performance Criteria for the Performance Period were fully (100%) achieved and no negative discretion was exercised by the Committee in regard to that Award.

(w) **"Termination of Employment"** means, for purposes of this Plan, unless otherwise determined by the Committee, ceasing to be an Employee (as determined in accordance with Section 3401(c) of the Code and the regulations promulgated thereunder) of the Company and any of its Related Companies. Unless otherwise determined by the Committee, if a Participant's employment with the Company and its Related Companies terminates but such Participant continues to provide services to the Company in a non-employee director capacity, such change in status shall not be deemed a Termination of Employment within the Performance Period during which it occurs. A Participant employed by, or performing services for, a Related Company or a division of the Company shall be deemed to incur a Termination of Employment if, as a result of a disaffiliation, such Related Company or division ceases to be a Related Company or division, as the case may be, and the Participant does not immediately thereafter become an Employee of the Company or another Related Company. Temporary absences from employment because of illness, vacation or leave of absence and transfers among the Company and its Related Companies shall not be considered Terminations of Employment. In addition, Termination of Employment shall mean a "separation from service" as defined in regulations issued under Code Section 409A whenever necessary to ensure compliance therewith for any payment of an Award conferred under this Plan that is subject to such Code section, and, for such purposes, shall be determined based upon a reduction in the bona fide level of services performed to a level equal to twenty percent (20%) or less of the average level of services performed by the Employee during the immediately preceding 36-month period.

SECTION 3. ADMINISTRATION

3.01 The Committee.

The Plan shall be administered by the Committee. The Committee shall periodically determine, in its sole discretion, the individuals who shall participate in the Plan and the amounts and other terms and conditions of Awards to be granted to such individuals under the Plan. The Committee shall administer the Plan in accordance with applicable legal requirements. All questions of interpretation and administration with respect to the Plan and Awards made hereunder shall be determined by the Committee in its sole and absolute discretion. All determinations by the Committee shall be final and conclusive upon all persons. The Committee shall act by vote or written consent of a majority of its members and its actions shall be recorded in the minutes of the Committee. Notwithstanding any other provision of the Plan, the Committee shall not have any discretion or authority to make changes to any Award that is intended to qualify as "performance-based compensation" under Code Section 162(m) to the extent that the existence of such discretion or authority would cause such Award not to so qualify.

Table of Contents

3.02 Additional Powers of the Committee.

In addition to any implied powers and duties that are needed to carry out the provisions of the Plan, the Committee shall have the following specific powers and duties:

(a) to make, amend, rescind and enforce any rules and regulations it shall deem necessary or proper for the efficient administration of the Plan;

(b) to correct administrative errors;

(c) to determine the terms and provisions for making or modifying Awards;

(d) to make all other determinations necessary or advisable for the administration of the Plan;

(e) to designate one or more officers of the Company to execute on behalf of the Company all agreements and other documents approved by the Committee under the Plan;

(f) except to the extent prohibited by Applicable Law, to delegate to one or more individuals the day-to-day administration of the Plan and any of the functions assigned to it in this Plan, including the power to approve Awards to Employees who are not Covered Employees; provided, however, that such delegation may be revoked at any time and all determinations and decisions of any delegate as to any disputed question arising under the Plan, including questions of construction and interpretation, shall be final, binding and conclusive upon all persons; and

(g) to employ one or more persons to render advice with respect to any of its responsibilities under the Plan.

SECTION 4. PARTICIPATION

4.01 Participation.

The Committee shall designate, or determine the methodology and criteria for the designation of, the Employees who are eligible to receive an Award under the Plan. In general, only key Employees who the Committee determines are in positions from which they can contribute significantly to the achievement to the long-term growth, development, and financial success of the Company or its Related Companies may be designated. An individual who is not an Employee shall not be eligible to participate in the Plan. Only the Committee may determine the eligibility of Employees who are Covered Employees.

4.02 Partial Performance Period Participation.

An Employee who becomes eligible after the beginning of a Performance Period may participate in the Plan for that Performance Period on a ratable basis. Such situations may include, but are not limited to (a) new hires; or (b) when an Employee is promoted from a position which did not previously meet the eligibility criteria. The Committee, in its sole discretion, retains the right to prohibit or allow participation in the initial Performance Period of eligibility for any of the aforementioned Employees. If an Employee participates for only a portion of a Performance Period for any reason, the Performance Criteria previously established under the Plan for that Performance Period shall apply to any Employees who become eligible after the beginning of the Performance Period, but his or her Award will be prorated. Such proration shall be based on the number of days the Employee performed services during the Performance Period while a Participant in the Plan over the total days in the Performance Period, or some similar method adopted by the Committee that results in a ratable reduction of the Award based on the partial Performance Period applicable to the Employee. In addition, in the event a Participant changes job levels during a Performance Period, the Participant's Award may be adjusted to reflect the amount of time at each job level during the Performance Period. Notwithstanding anything in this Section 4.02 or in the Plan to the contrary, the participation in the Plan for a Covered Employee who becomes eligible after the beginning of the Performance Period shall comply with the provisions of Code Section 162(m), as set forth in Section 5.

4.03 No Right to Participate.

No Participant or other Employee shall at any time have a right to be selected for participation in the Plan for any Performance Period, whether or not he or she previously participated in the Plan.

Table of Contents

SECTION 5. PERFORMANCE BONUS AWARDS

5.01 Establishment of Performance Criteria.

For each Performance Period, the Committee will establish in writing Performance Criteria based on one or more of the following performance measures of the Company (and/or one or more Related Companies or operating groups of the Company, as applicable), either individually, alternatively or in any combination, applied to either the Company as a whole or to a Related Company, business unit, or business segment, either individually, alternatively or in any combination, and measured over the Performance Period, on an absolute basis or relative to a pre-established target, to previous years' results or to a designated comparison group, in each case as specified by the Committee in the Award or by duly adopted resolution: (i) basic or diluted earnings per share; (ii) cash flow or free cash flow or net cash from operating activity; (iii) earnings (including gross margin, earnings before or after interest and taxes, earnings before taxes, and net earnings); (iv) growth in earnings or earnings per share; (v) stock price or change in stock price; (vi) return on equity or average shareholders' equity; (vii) total shareholder return; (viii) return on capital or change in working capital; (ix) return on assets or operating assets; (x) pre-tax or post-tax return on investments; (xi) revenue or gross profits; (xii) revenue growth; (xiii) earnings before interest, taxes, depreciation and amortization; (xiv) net income or net income growth; (xv) pretax income before allocation of corporate overhead and bonus; (xvi) operating income or net operating income or operating income growth; (xvii) operating profit or net operating profit (whether before or after taxes); (xviii) operating margin or operating margin growth; (xix) return on operating revenue; (xx) working capital or net working capital; (xxi) any other Generally Accepted Accounting Principles ("GAAP") financial measures; (xxii) market share; (xxiii) capital expenditures; (xxiv) capital expenditures as a percentage of total capitalization; (xxv) overhead or other expense or cost reduction; (xxvi) growth in shareholder value relative to the moving average of a peer group or equity market index; (xxvii) credit rating; (xxviii) asset quality; (xxix) cost saving levels; (xxx) core non-interest income; (xxxi) strategic plan development and implementation; (xxxii) improvement in workforce diversity; (xxxiii) customer satisfaction; (xxxiv) employee satisfaction; (xxxv) management succession plan development and implementation; (xxxvi) employee or customer retention; (xxxvii) system reliability; and (xxxviii) safety. Except as otherwise provided herein, the extent to which the Performance Criteria are satisfied will determine the amount, if any, of the Final Bonus that will be earned by each Participant (subject to Section 5.04). The Performance Criteria may vary for different Performance Periods and need not be the same for each Participant eligible for a Performance Bonus Award for a Performance Period.

5.02 Adjustment of Performance Criteria.

Once established, the Performance Criteria shall not be changed during the Performance Period. Subject to the requirements of Code Section 162(m) with respect to Covered Employees, at the time a Performance Bonus Award is made and Performance Criteria are established, the Committee is authorized to determine the manner in which the Performance Criteria will be calculated or measured to take into account certain factors over which Participants have no or limited control, including, but not limited to, cumulative effects of tax or accounting changes in accordance with U.S. generally accepted accounting principles or extraordinary charges to income.

5.03 Grant of Performance Bonus Awards.

For each Performance Period, the Committee may grant to Employees eligible to participate in the Plan, as the Committee shall determine in its sole discretion, a Target Bonus Award which is contingent on the achievement of established Performance Criteria during the Performance Period or, with respect to Employees who are not Covered Employees, the occurrence of another specified event as determined by the Committee in accordance with the terms of the Plan. In determining whether to grant a Performance Bonus Award and the nature and amount of the Target Bonus Award, the Committee shall consider, among other factors, the eligible Employee's responsibility level, performance, and potential cash compensation level. In no event shall the maximum Award that may be paid to any single Participant for any single Performance Period exceed $3,000,000 such maximum Award amount to be pro-rated if the Performance period is less than a full fiscal year of the Company.

Performance Criteria and Target Bonus Awards shall be established prior to the beginning of each Performance Period or as soon as practicable thereafter. If a Participant commences participation after the beginning of a Performance Period, Performance Criteria in effect for the Participant's position shall apply for the remaining balance of the Performance Period, unless otherwise determined by the Committee within 90 days of the date the Employee became a Participant. In all cases where the Participant is a Covered Employee, the Performance Criteria and Target Bonus Award shall be established in no event later than 90 days following the first day of the Performance Period or after twenty-five percent (25%) of the Performance Period has elapsed, if earlier, and the outcome relative to the attainment of the Performance Criteria shall not be substantially certain at the time the Performance

Table of Contents

Criteria and Target Bonus Award are established. This Section 5.03 is intended to ensure compliance with the exception from Code Section 162(m) for qualified "performance-based compensation," and shall be construed, applied and administered accordingly with respect to any Participant who is a Covered Employee.

5.04 Final Bonus Determinations.

At the end of each Performance Period, the Committee shall certify in writing the extent to which the Performance Criteria were met during the Performance Period for any Performance Bonus Awards for Covered Employees. If the Performance Criteria for the Performance Period are met, Covered Employees shall be entitled to the payment of the Performance Bonus Awards, subject to the Committee's exercise of negative discretion to reduce any Final Bonus payable to a Covered Employee based on business objectives established for that Covered Employee or other factors as determined by the Committee in its sole discretion. With respect to Participants who are not Covered Employees, the Committee will determine the Final Bonus for a Performance Period based on the Performance Criteria and other business objectives. The Committee may adjust (up or down) any Final Bonus for Participants who are not Covered Employees on the basis of such further considerations as the Committee shall determine in its sole discretion.

5.05 Termination of Employment.

(a) Termination of Employment Due to Retirement, Death or Disability. In the event of a Participant's Termination of Employment by reason of Retirement, death or Disability during the applicable Performance Period, the Final Bonus determined in accordance with Section 5.04 herein shall be reduced to reflect participation prior to termination only. The Final Bonus, if any, shall be prorated based upon the length of time that the Participant was employed by the Company during the Performance Period. In the case of a Participant's Disability, the employment termination shall be deemed to have occurred as of the date that the Committee determines was the date on which the definition of Disability was satisfied. The Final Bonus thus determined shall be paid as soon as practicable and reasonable following the end of the Performance Period in which Termination of Employment occurs, and shall be made at the same time payments are made to Participants who did not incur a Termination of Employment during the applicable Performance Period.

(b) Termination of Employment for Other Reasons. In the event of a Participant's Termination of Employment before the end of the Performance Period for a reason other than due to Retirement, death, or Disability, all of the Participant's rights to any Final Bonus for that Performance Period shall be forfeited unless otherwise determined by the Committee in its sole discretion. If a Participant incurs a Termination of Employment for any other reason prior to the date the Final Bonus, if any, is paid, all of the Participant's rights to any Final Bonus for that Performance Period shall be forfeited unless otherwise determined by the Committee in its sole discretion. Except as provided in Section 5.05(a), only Participants who are, as of the date the Final Bonus, if any, is paid, either current, active Employees or current Employees who are on a leave of absence authorized by the Company shall be entitled to any Final Bonus earned for the Performance Period. Payment of the Final Bonus shall be made at the same time payments are made to Participants who did not have a Termination of Employment during the applicable Performance Period.

(c) Other Forfeiture Events. The Committee may, in its discretion, require that all or any portion of a Final Bonus is subject to an obligation of repayment to the Company upon the violation of a non-competition and confidentiality covenant applicable to the Participant. The Committee may, in its discretion, also require repayment to the Company of all or any portion of a Final Bonus if the amount of the Final Bonus was calculated based upon the achievement of certain financial results that were subsequently the subject of a financial statement restatement, the Participant engaged in misconduct that caused or contributed to the need for the financial statement restatement, or if the amount of the Final Bonus would have been lower than the amount actually awarded to the Participant had the financial results been properly reported, and the Committee shall require repayment to the Company of any Final Bonus to the extent such repayment is required by law. This Section 5.05(c) shall not be the Company's exclusive remedy with respect to such matters. This Section 5.05(c) shall not apply after a Change in Control except if required by law.

5.06 Payment of Performance Bonus Awards.

Each Participant's Final Bonus, as determined by the Committee, shall be paid in cash, in one lump sum, subject to applicable tax and other authorized withholdings, on the last business day occurring on or before the 15th day of the third month after the end of each Performance Period. If payment is delayed due to an unforeseeable event or other administrative delays, payment shall in no event be made later than the 15th day of the third month after the end of the taxable year of the Participant in which the Final Bonus was earned. Other withholdings may include, but not be limited to, amounts previously elected to be deferred to a tax-qualified or non-qualified retirement or deferred compensation plan.

Table of Contents

SECTION 6. CASH BONUS AWARDS

6.01 Additional Cash Bonus Awards.

The Committee may also grant and pay Cash Bonus Awards at any other time as the Committee, in its discretion, determines to be appropriate in order to reward an Employee for exemplary performance results, as determined by the Committee in its sole discretion. Any such Cash Bonus Awards are not intended to qualify as performance-based compensation within the meaning of Code Section 162(m).

6.02 Payment of Cash Bonus Awards.

After the Company's financial results for a fiscal year become available, the Committee may, but shall not be required to, grant Cash Bonus Awards to one or more Participants, including but not limited to a Participant as to whom Performance Bonus Awards have been designated pursuant to Section 5 of the Plan. A Cash Bonus Award as determined by the Committee shall be paid in cash, in one lump sum, subject to applicable tax and other authorized withholdings, on the last business day occurring on or before the 15th day of the third month after the end of the Performance Period for which the Cash Bonus Award was granted. If payment is delayed due to an unforeseeable event or other administrative delays, payment shall in no event be made later than the 15th day of the third month after the end of the taxable year of the Participant in which the Cash Bonus Awards was earned. Other withholdings may include, but not be limited to, amounts previously elected to be deferred to a tax-qualified or non-qualified retirement or deferred compensation plan.

SECTION 7. PAYMENT OF AWARDS

7.01 Awards Solely from General Assets.

The Awards under the Plan shall be paid solely from the general assets of the Company. Nothing herein shall be construed to require the Company or the Board to maintain any fund or to segregate any amount for the benefit of any Participant, and no Participant or other party claiming an interest in amounts earned under the Plan shall have any right against, right to, or security or other interest in, any fund, account, or asset of the Company or any of its Related Companies from which the payment pursuant to the Plan may be made. The Plan is intended to constitute an unfunded plan for incentive compensation. To the extent that any party acquires a right to receive a payment under the Plan, such right shall be equivalent to that of an unsecured general creditor of the Company.

7.02 Plan Expenses.

All reasonable expenses of administering the Plan shall be paid by the Company.

SECTION 8. AMENDMENT AND TERMINATION

8.01 Amendment of Plan.

Except as otherwise provided in Section 8.02, the Committee, without notice, at any time and from time to time, may modify or amend, in whole or in part, any or all of the provisions of the Plan, or suspend or terminate it entirely; provided, however, that no such modification, amendment, suspension, or termination may, without the consent of a Participant, materially reduce the right of a Participant to a payment or distribution hereunder to which he or she has already become entitled, as determined under Sections 5 and 6 hereof. Shareholder approval of any amendment will be required only as required by Applicable Law. No new Award may be granted during any period of suspension of the Plan or after termination of the Plan.

8.02 Change in Control.

Notwithstanding Section 8.01, above, on or after the occurrence of a Change in Control, no direct or indirect alteration, amendment, suspension, termination or discontinuance of the Plan, no establishment or modification of rules, regulations or procedures under the Plan, no interpretation of the Plan or determination under the Plan, and no exercise of authority or discretion vested in the Committee under any provision of the Plan (collectively or individually, a "Change") shall be made if the Change (a) is not required by applicable law or necessary to meet the requirements of Rule 16b-3, Section 162(m) of the Code or Section 409A of the Code and (b) would have the effect of:

Table of Contents

(a) eliminating, reducing or otherwise adversely affecting a Participant's, former Participant's or beneficiary's rights with respect to any Award granted prior to the Change in Control;

(b) altering the meaning or operation of the definition of "Change in Control" in Section 2.01(f) (and of the definition of all the defined terms that appear in the definition of "Change in Control"), the provisions of this Section 8, or any rule, regulation, procedure, provision or determination made or adopted prior to the Change in Control pursuant to this Section 8 or any provision in any rule, regulation, procedure, provision or determination made or adopted pursuant to the Plan that becomes effective upon the occurrence of a Change in Control (collectively, the "Change in Control Provisions"); or

(c) undermining or frustrating the intent of the Change in Control Provisions to secure for Participants, former Participants and beneficiaries the maximum rights and benefits that can be provided under the Plan.

Upon and after the occurrence of a Change in Control, (1) all rights of all Participants, former Participants and beneficiaries under the Plan (including without limitation any rules, regulations or procedures promulgated under the Plan) shall be contractual rights enforceable against the Company and any successor to all or substantially all of the Company's business or assets and (2) any Performance Bonus Award (i) shall be deemed to have been earned at the maximum annual target amount, regardless of whether the specified Performance Criteria have been satisfied and (ii) shall be payable immediately following the Change in Control. These Change in Control Provisions may be altered, amended or suspended at any time before the date on which a Change in Control occurs; provided, however, that any alteration, amendment or suspension of the Change in Control Provisions that is made before the date on which a Change in Control occurs, and at the request of a person who effectuates the Change in Control, shall be treated as though it occurred after the Change in Control and shall be subject to the restrictions and limitations imposed by the preceding provisions of the immediately preceding paragraph.

8.03 Other Plans.

Nothing herein shall preclude the Committee from authorizing or approving other plans or forms of incentive compensation. The Committee shall have the right to determine the extent to which any Participant shall participate in this Plan in addition to any other plan or plans of the Company in which he shall participate.

SECTION 9. MISCELLANEOUS

9.01 No Right to Employment.

The receipt of an Award under the Plan shall not give any Employee any right to continued employment by the Company or any of its Related Companies, nor shall it limit or interfere in any way with the right of the Company or any Related Company to terminate the employment of any Participant at any time or to increase or decrease the compensation of any Participant. There is no obligation for uniformity of treatment of Participants under this Plan or otherwise. No person shall have any claim or right to be granted an Award under this Plan and the receipt of an Award shall not give an Employee the right to receive any subsequent Award.

9.02 Nontransferability.

No right or interest of any Participant in the Plan shall be assignable or transferable, other than by will or pursuant to the laws of descent and distribution, or subject to any lien, directly, by operation of law or otherwise, including, but not limited to, by execution, levy, garnishment, attachment, pledge, or bankruptcy, and any attempt to take any such action shall be null and void.

9.03 Designation of Beneficiary.

The right of the Participant to receive any payment under this Plan will pass to the Participant's Beneficiary in the event of the Participant's death. Each Participant may designate a Beneficiary to receive the Participant's Award(s) in the event of the Participant's death. The designation shall be in writing, shall be made in the form and manner prescribed by the Committee, and shall be effective only if filed with the Committee prior to the Participant's death. A Participant may, at any time prior to his death, and without the consent of his Beneficiary, change his designation of Beneficiary by filing a written notice of such change with the Committee in the form and manner prescribed by the Committee. In the absence of a designated Beneficiary, or if the designated Beneficiary and any designated contingent Beneficiary predecease the Participant, the Beneficiary shall be the Participant's surviving spouse, or if the Participant has no surviving spouse, the Participant's estate.

Table of Contents

9.04 Recipient of Payment.

(a) Except as otherwise provided in paragraph (b), below, any Award under the Plan shall be paid to the Participant, or to the Beneficiary of a deceased Participant.

(b) If the Committee deems any person entitled to receive any amount under the provisions of the Plan to be incapable of receiving or disbursing the same by reason of minority, illness or infirmity, mental incompetence, or incapacity of any kind, the Committee may, in its sole discretion, (1) apply such amount directly for the comfort, support and maintenance of such person; (2) reimburse any person for any such support theretofore supplied to the person entitled to receive any such payment; (3) pay such amount to any person selected by the Committee to disburse it for such comfort, support and maintenance, including without limitation, any relative who has undertaken, wholly or partially, the expense of such person's comfort, care and maintenance, or any institution in whose care or custody the person entitled to the amount may be; or (4) with respect to any amount due to a minor, deposit such amount to his or her credit in any savings or commercial bank of the Committee's choice, direct that such distribution be paid to the legal guardian, or if none, to a parent of such person or a responsible adult with whom the minor maintains his or her residence, or to the custodian for such person under the Uniform Gift to Minors Act or Gift to Minors Act, if such payment is permitted by the laws of the state in which the minor resides.

(c) If a payment is made under the Plan to a third party pursuant to Section 9.04(b), above, the Plan, the Board, the Committee, and the Company shall be relieved, to the fullest extent permitted by law, of any obligation to make a duplicate payment to or on behalf of the Participant or Beneficiary.

9.05 Taxes.

The Committee may make any appropriate arrangements to deduct from amounts otherwise payable to a Participant any taxes that the Committee believes to be required to be withheld by any government or governmental agency in respect of an Award. The Participant and/or his Beneficiary shall bear all taxes on amounts paid under the Plan to the extent that no taxes are withheld, irrespective of whether withholding is required.

9.06 Headings.

Any headings used in this document are for convenience of reference only and may not be given any weight in interpreting any provision of the Plan.

9.07 Severability.

If any provision of the Plan shall be held illegal or invalid for any reason, the illegality or invalidity shall not affect the remaining parts of the Plan, and the Plan shall be construed and enforced as if the illegal or invalid provision had never been inserted herein. In addition, if any provision of the Plan inadvertently causes an Award granted under the Plan to be "nonqualified deferred compensation" within the meaning of section 409A of the Code, then such Award shall be construed and enforced as if the provision had never been inserted therein.

9.08 Governing Law.

The Plan and all agreements hereunder shall be construed, administered, and regulated in accordance with the laws of the State of Delaware (excluding the choice of law provisions thereof), except as to matters pre-empted or governed by federal law.

9.09 Gender and Number.

Except where otherwise indicated by the context, any masculine term used herein also shall include the feminine; the plural shall include the singular, and the singular shall include the plural.

9.10 Successors.

All obligations of the Company under the Plan shall be binding upon and inure to the benefit of any successor to the Company, whether the existence of such successor is the result of a direct or indirect purchase, merger, consolidation, or otherwise, of all or substantially all of the business and/or assets of the Company.

July 1, 2022

Purpose

A **Spot Award** recognizes exceptional performance by an employee beyond regular day-to-day activities and assignments.

Eligibility

All employees, up to the director level, are eligible to receive a spot award. Independent contractors and temporary employees, whether contracted by the company or through an agency, are not eligible to receive an award.

Special Project/Assignment Definition

- Financial impact of the project
  - Tier 1 – Annual financial impact - $50,000 - $99,999
  - Tier 2 – Annual financial impact - $100,000 - $199,999
  - Tier 3 – Annual financial impact > $200,000
- Degree of difficulty and/or impact to overall organization
- Above and beyond normal job responsibilities

Award Criteria

The amount of a spot award should be dependent on the nature and complexity of the accomplishment and the ability of the department to fund the award.

An award is considered taxable income and will be reflected on the employee's pay statements. An award will NOT be grossed up for the tax impact.

The award should be presented to the employee within 30 days of the achievement with written recognition preferred regarding the accomplishment and award.

Award Levels	Contribution Level	Project Financial Impact		
		Tier 1	Tier 2	Tier 3
1	Basic contribution, but above and beyond	$500	$1,000	$2,000
2	Key contributor. Multiple hours contributed outside work hours.	$1,000	$2,000	$4,000
3	Engaged for extended hours during the project/process. Very high impact on incident management and made critical contribution	$1,500	$3,000	$6,000
4	Engaged through the entire project/process and were critical and central to the effort.	$2,000	$4,000	$8,000
5	Project Lead/Manager	$2,500	$5,000	$10,000

- A manager has the discretion to initiate an award for a specific employee and/or project participants, with approval from the department director and a senior officer.
- Spot awards must be proposed within 30 days of the project completion.
- Documentation must be submitted to CHRO for review and consideration with the SLT.
- Any deviations to the award amounts should be reviewed and approved by SLT.
- Once approved, the manager should clearly communicate to the recognized employee the specific outstanding achievements that led to the award. The appropriate paperwork will be submitted to payroll for processing, after final approval.

2023 Team Incentive Plan
Chesapeake Utilities Corporation and all Business Units/Verticals

General Overview
Chesapeake Utilities Corporation (CUC or the Company) and all subsidiary Business Units (BU) provide an annual Team Incentive Plan (TIP) for non-officer, eligible employees. Under the TIP, eligible employees have the opportunity to earn an annual cash bonus/incentive.

The TIP provides for a potential annual payout, no later than the end of March of the following calendar year for eligible employees that have contributed to the success of the Company.

The primary objectives of the TIP are as follows:

- Reward each employee's individual contribution to the overall Team performance results consistent with their eligibility.
- Create alignment and link performance metrics related to CUC's and BUs'/Vertical strategy, operational objectives and financial targets to individual compensation;
- Create a line of sight for each employee to clearly understand how their performance contributes to the overall success of the Company;
- Recognize and reward performance achievement of departmental / team goals and metrics.

TIP Eligibility
All non-union, non-officer, active employees may be eligible for the TIP excluding those that are, seasonal employees, summer help, and interns. Commission-based employees are eligible for a TIP on their base salary. Employees covered by a Collective Bargaining Agreement will follow the provisions negotiated.

Employees accrue eligibility for the TIP bonus throughout the calendar year by actively working for the Company. Employees are eligible for the TIP bonus only for the amount of time during the applicable calendar year during which they are **actively** employed and must be employed by the Company on the day of the TIP is paid out.

New hires must have completed at least 90 days of employment by December 31 to be eligible for the TIP payout.

Individual Performance
An employee's performance review and any progressive discipline can impact the TIP payout.

- Employees who receive a PR score below 2.75 OR
- Are on an active step of progressive discipline at the time the TIP bonus is paid out MAY NOT receive a payout. Managers should work with their HRBP to determine the severity of the step of discipline and its impact on the TIP payout.

Retirees
Retirees, those age 55 with 5 or more years of service as of December 31st, are entitled to a prorata bonus for the time worked during the calendar year. For example, an employee who works six months in the applicable calendar year and then retires is eligible to receive 50% of their potential TIP bonus for those months they were actively employed, if they meet the applicable retirement criteria.

Extended Leave of Absence
If an employee does not work for some portion of the applicable calendar year due to any extended leave of absence during which they do not receive pay from the Company including, but not limited to, disability leave or workers compensation leave, their TIP payment will be pro-rated, based on the amount of time worked during the calendar year. An employee's use of accrued vacation and/or sick time will not be considered as an extended leave for purposes of TIP eligibility. If an employee is eligible for a TIP payment and is on an extended, unpaid leave of absence on the date the TIP bonus is paid out, they will receive the TIP bonus payment when they return to active duty.

Employees hired between January 1st and December 31st will begin to accrue eligibility for the TIP bonus on their first day of employment.

Incentive Methodology
The TIP calculation excludes any bonus payments, overtime calculations or other compensation that was in addition to regular earnings or compensation. The TIP target percentage is applied to an employee's annual base salary that was in effect on December 31st of the applicable calendar year.

Performance Categories:
The TIP has the following distinct performance categories:

1. Safety
2. Team
3. Service
4. Improve
5. Grow

The following outlines the measurable categories and payout percentage levels for each category of the TIP.

1. **Safety**
   - Safety Observations and Near Miss recordings.
     - **Near Miss:** A work-related incident in which under different circumstances a CUC employee/contractor or third-party fatality, injury, illness or damage to an asset or reputation could have occurred.
     - **Safety Observation:** The identification of an unsafe behavior or hazardous condition inside or outside the work environment.

2. **Team**
   - Participation in Chesapeake Survey. Results will be visible in Gallup following the close of the survey.
   - Recognitions delivered through Gratitude application – achievers.com

3. **Service**
   - Hours of Community Support
   - Volunteer activities must align with our areas of focus:
     - Safety & Health
     - Community Development
     - Education &
     - Environmental Stewardship
   - Community service hours that contribute to our TIP goal will include:
     - Opportunities organized by the Community Affairs department
     - Opportunities organized by our Employee Resource Groups (ERGs)
     - Team building volunteer activities arranged by a department with an
     - Emphasis on one of the 4 areas of focus
   - Community affairs will track all company-wide volunteer hours organized by CA, Team/ department activities and activities of ERGs.
   - Local events must be reported to the Community Affairs department for recording

4. **Improve**
   - Phishing Failure Rate
     - Team members must report suspicious emails to BIS to preserve the integrity of our network.
     - Do not click on links in the email or respond to the email.
     - Click the “Report Phish” button at the top right hand corner of Outlook

5. **Grow**
   - Hours of Training completed in the Grove LMS

TIP Payout Opportunity

The tables below outline the TIP Tiers and the annual incentive pay opportunity targets. These tables apply to CUC and all BUs.

Goal	Measure:	Threshold 50%	Target 100%	Maximum 150%
SAFETY	# Safety Observations or Near Miss Recorded	1,000	2,000	3,000
TEAM	% of Participation in Chesapeake Survey	75%	85%	95%

	# of Recognitions Delivered	**6,500**	**15,000**	**20,000**
SERVICE	# of Hours of Community Support	**2,000**	**3,000**	**4,000**
IMPROVE	% Phishing Failure Rate	**< 7%**	**< 5%**	**< 2%**
GROW	# of Hours of Training in the Grove	**4,000**	**8,000**	**12,000**

Exceptions, Modifications, TIP Suspension or Termination

Any exceptions to the above eligibility requirements must be approved by the Chief Human Resources Officer (CHRO) and CEO of Chesapeake Utilities.

The Company reserves the right to offer performance incentive plans other than the TIP, in an effort to recruit and reward top talent. All such incentive plans must have the CHRO's approval. Management reserves the right to reduce, suspend or eliminate the TIP plan for any reason.

For more information about the details of this plan, please contact a member of Human Resources.

2025 Team Incentive Plan
Chesapeake Utilities Corporation and all Business Units/Verticals

General Overview
Chesapeake Utilities Corporation (CUC or the Company) and all subsidiary Business Units (BU) provide an annual Team Incentive Plan (TIP) for non-officer, eligible employees. Under the TIP, eligible employees have the opportunity to earn an annual cash bonus/incentive. This incentive is not based on Company financial goals, but rather shared goals in the following categories: Safety, Team, Improve, Service and Grow. These operational and safety related Team Goals promote an enterprise wide team approach among all CUC businesses. Of course, the Company funding must be there for the TIP to be paid out.

The TIP provides for a potential annual payout, no later than the end of March of the following calendar year for eligible employees that have contributed to the success of the Company.

The TIP emphasizes actions that individual employees can take that help the entire team reach Companywide goals. The primary objectives of the TIP are as follows:

- Reward each employee's individual contribution to the overall Team performance results consistent with their eligibility.
- Create alignment and link performance metrics related to CUC's and BUs'/Vertical strategy, operational objectives and safety targets to individual compensation;
- Create a line of sight for each employee to clearly understand how their performance contributes to the overall success of the Company;
- Recognize and reward performance achievement of departmental / team goals and metrics.

TIP Eligibility
All non-union, non-officer, active employees may be eligible for the TIP excluding those that are, seasonal employees, summer help, and interns. Commission-based employees are eligible for a TIP on their base salary. Employees covered by a Collective Bargaining Agreement will follow the provisions negotiated.

Employees accrue eligibility for the TIP bonus throughout the calendar year by actively working for the Company. Employees are eligible for the TIP bonus only for the amount of time during the applicable calendar year during which they are **actively** employed and must be employed by the Company on the day of the TIP is paid out.

Employees hired between January 1st and September 30th will begin to accrue eligibility for the TIP bonus on their first day of employment. New employees hired on or after October 1st of each year are not eligible for the TIP payout for that year.

Individual Performance
An employee's performance review and any progressive discipline may impact the TIP payout.

Employees who receive a PR score below 2.75 AND are on an active step of discipline at the time the TIP bonus is paid out MAY NOT receive a payout.

.

Retirees
Retirees, those age 55 with 5 or more years of service as of December 31st, are entitled to a prorata bonus for the time worked during the calendar year. For example, an employee who works six months in the applicable calendar year and then retires is eligible to receive 50% of their potential TIP bonus for those months they were actively employed, if they meet the applicable retirement criteria.

Extended Leave of Absence
If an employee does not work for some portion of the applicable calendar year due to any extended leave of absence during which they do not receive pay from the Company including, but not limited to, disability leave or workers compensation leave, their TIP payment will be pro-rated, based on the amount of time worked during the calendar year. An employee's use of accrued vacation and/or sick time will not be considered as an extended leave for purposes of TIP eligibility. If an employee is eligible for a TIP payment and is on an extended, unpaid leave of absence on the date the TIP bonus is paid out, they will receive the TIP bonus payment on the regular payout date.

Incentive Methodology
The TIP calculation excludes any bonus payments, overtime calculations or other compensation that was in addition to regular earnings or compensation. The TIP target percentage is applied to an employee's annual base salary that was in effect on December 31st of the applicable calendar year.

Performance Categories:
The TIP has the following distinct performance categories:

1. Safety	2. Team	3. Service	4. Improve	5. Grow

The following outlines the measurable categories and payout percentage levels for each category of the TIP.

1. **Safety**
   Companywide implementation of National Incident Management Systems (NIMS) training:
   - **ICS 100 (2-hour course):** Due by July 31
   - **ICS 700 (3.5-hour course):** Due by October 31
   - **Goal:** 80% participation from eligible full-time employees

   NIMS training hours will also count toward the TIP Grow Goal.

2. **Team**
   Chesapeake Speaks Gallup Employee Engagement Survey: One survey in March, goal of 90% participation.

   Gratitude Recognition Program: Goal of 20,000 employee recognitions in 2025.

3. **Service**
   Goal: Achieve at least 75% participation from eligible full-time employees.

   Employee Engagement:
   - Participate in at least one event per calendar year.
   - Additional participation is celebrated through recognition programs.

For additional information, review Chesapeake's Community Affairs Volunteer Program document.

4. **Improve**
   Goal: Further reduce phishing failure rate to less than 1.5%.

   Continued vigilance and reporting are essential to cybersecurity.

5. **Grow**
   Goal: 25,000 developmental hours completed Companywide in The Grove Learning Management System (LMS).

   Training hours must be related to skill, leadership or personal development (while still required, it excludes monthly safety meetings).

   Examples include all training courses listed in The Grove LMS, **Leadership Webinars, Engagement events, Employee Resource Groups virtual events, any Chesapeake Academy courses.**

   NIMS training under the Safety category will count toward this goal.

TIP Payout Opportunity

The table below outlines the TIP annual incentive pay opportunity targets. This table applies to CUC and all business units.

Goal	Measure:	Threshold 50%	Target 100%	Maximum 150%
SAFETY	NIMS Training Completion	**70%**	**80%**	**95%**
TEAM	% of Participation in Chesapeake Survey	**85%**	**90%**	**95%**
	# of Recognitions Delivered	**15,000**	**20,000**	**25,000**
SERVICE	% of Participation from all eligible full-time employees in the Community Volunteer Program	**50%**	**75%**	**90%**
IMPROVE	% Phishing Failure Rate	**< 5%**	**< 4%**	**< 1.5%**
GROW	# of Hours of Developmental Training in the Grove (excludes monthly safety meetings)	**20,000**	**25,000**	**30,000**

Exceptions, Modifications, TIP Suspension or Termination

Any exceptions to the above eligibility requirements must be approved by the Chief Human Resources Officer (CHRO) and/or CEO of Chesapeake Utilities.

In addition to our performance on the TIP goals, the funding of the bonus program is predicated on the overall financial performance of the Company. Our incentive plan is funded by achieving our Company's annual financial targets, which are approved by our Board of Directors each year.

The Company reserves the right to offer performance incentive plans other than the TIP, in an effort to recruit and reward top talent. All such incentive plans must have the CHRO's approval. Management reserves the right to reduce, suspend or eliminate the TIP plan for any reason.

For more information about the details of this plan, please contact a member of Human Resources.

2024 Team Incentive Plan
Chesapeake Utilities Corporation and all Business Units/Verticals

General Overview

Chesapeake Utilities Corporation (CUC or the Company) and all subsidiary Business Units (BU) provide an annual Team Incentive Plan (TIP) for non-officer, eligible employees. Under the TIP, eligible employees have the opportunity to earn an annual cash bonus/incentive.

The TIP provides for a potential annual payout, no later than the end of March of the following calendar year for eligible employees that have contributed to the success of the Company.

The TIP emphasizes actions that individual employees can take to help the entire team reach Companywide goals. The primary objectives of the TIP are as follows:

- Reward each employee's individual contribution to the overall Team performance results consistent with their eligibility.
- Create alignment and link performance metrics related to CUC's and BUs'/Vertical strategy, operational objectives and financial targets to individual compensation;
- Create a line of sight for each employee to clearly understand how their performance contributes to the overall success of the Company;
- Recognize and reward performance achievement of departmental / team goals and metrics.

TIP Eligibility

All non-union, non-officer, active employees may be eligible for the TIP excluding those that are, seasonal employees, summer help, and interns. Commission-based employees are eligible for a TIP on their base salary. Employees covered by a Collective Bargaining Agreement will follow the provisions negotiated.

Employees accrue eligibility for the TIP bonus throughout the calendar year by actively working for the Company. Employees are eligible for the TIP bonus only for the amount of time during the applicable calendar year during which they are **actively** employed and must be employed by the Company on the day of the TIP is paid out.

New employees hired on or after October 1st of each year are not eligible for the TIP payout.

Individual Performance

An employee's performance review and any progressive discipline can impact the TIP payout.

- Employees who receive a PR score below 2.75 AND
- Are on an active step of progressive discipline at the time the TIP bonus is paid out MAY NOT receive a payout. Managers should work with their HRBP to determine the severity of the step of discipline and its impact on the TIP payout.

Retirees
Retirees, those age 55 with 5 or more years of service as of December 31st, are entitled to a prorata bonus for the time worked during the calendar year. For example, an employee who works six months in the applicable calendar year and then retires is eligible to receive 50% of their potential TIP bonus for those months they were actively employed, if they meet the applicable retirement criteria.

Extended Leave of Absence
If an employee does not work for some portion of the applicable calendar year due to any extended leave of absence during which they do not receive pay from the Company including, but not limited to, disability leave or workers compensation leave, their TIP payment will be pro-rated, based on the amount of time worked during the calendar year. An employee's use of accrued vacation and/or sick time will not be considered as an extended leave for purposes of TIP eligibility. If an employee is eligible for a TIP payment and is on an extended, unpaid leave of absence on the date the TIP bonus is paid out, they will receive the TIP bonus payment when they return to active duty.

Employees hired between January 1st and September 30th will begin to accrue eligibility for the TIP bonus on their first day of employment.

Incentive Methodology
The TIP calculation excludes any bonus payments, overtime calculations or other compensation that was in addition to regular earnings or compensation. The TIP target percentage is applied to an employee's annual base salary that was in effect on December 31st of the applicable calendar year.

Performance Categories:
The TIP has the following distinct performance categories:
1. Safety
2. Team
3. Service
4. Improve
5. Grow

The following outlines the measurable categories and payout percentage levels for each category of the TIP.

1. **Safety**
    - Safety Observations and Near Miss recordings.
        - **Near Miss:** A work-related incident in which under different circumstances a CUC employee/contractor or third-party fatality, injury, illness or damage to an asset or reputation could have occurred.
        - **Safety Observation:** The identification of an unsafe behavior or hazardous condition inside or outside the work environment.

2. **Team**
    - Participation in Chesapeake Speaks Survey. Results will be visible in Gallup following the close of the survey.
    - Recognitions delivered through Gratitude platform.

3. **Service**
    - Hours of Community Support
    - Volunteer activities must align with our areas of focus:
        - Safety & Health
        - Community Development
        - Education &
        - Environmental Stewardship
    - Community service hours that contribute to our TIP goal will include:
        - Opportunities organized by the Community Affairs (CA) department
        - Opportunities organized by our Employee Resource Groups (ERGs)
        - Team building volunteer activities arranged by a department with an emphasis on one of the 4 areas of focus
    - Community affairs will track all company-wide volunteer hours organized by CA, Team/ department activities and activities of ERGs.
    - Local events must be reported to the Community Affairs department for recording

4. **Improve**
    - Phishing Failure Rate
        - Team members must report suspicious emails to BIS to preserve the integrity of our network.
        - Do not click on links in the email or respond to the email.
        - Click the “Report Phish” button at the top right hand corner of Outlook

5. **Grow**
    - Hours of Training completed in the Grove LMS

TIP Payout Opportunity
The tables below outline the TIP Tiers and the annual incentive pay opportunity targets. These tables apply to CUC and all BUs.

Goal	Measure:	Threshold 50%	Target 100%	Maximum 150%
SAFETY	# Safety Observations or Near Miss Recorded	2,000	3,000	4,000
TEAM	% of Participation in Chesapeake Survey	85%	90%	95%
	# of Recognitions Delivered	10,000	15,000	20,000
SERVICE	# of Hours of Community Support	3,000	5,000	7,000
IMPROVE	% Phishing Failure Rate	< 5%	< 4%	< 1.5%
GROW	# of Hours of Training in the Grove	20,000	25,000	27,000

Exceptions, Modifications, TIP Suspension or Termination
Any exceptions to the above eligibility requirements must be approved by the Chief Human Resources Officer (CHRO) and/or CEO of Chesapeake Utilities.

In addition to our performance on the TIP goals, the funding of the bonus program is predicated on the overall financial performance of the Company. Our incentive plan is funded by achieving our Company's annual financial targets, which are approved by our Board of Directors each year.

The Company reserves the right to offer performance incentive plans other than the TIP, in an effort to recruit and reward top talent. All such incentive plans must have the CHRO's approval. Management reserves the right to reduce, suspend or eliminate the TIP plan for any reason.

For more information about the details of this plan, please contact a member of Human Resources.

REQUESTS FOR PRODUCTION

4. **Incentive compensation.** Please provide each study the Company has in your possession, custody or control that reflects a comparison of the Company's incentive compensation to that allowed in rates in other jurisdictions.

Company Response:

While Chesapeake does have compensation analyses provided by its compensation experts, the Company has no study in its possession and control that specifically compares either or both of Chesapeake's two incentive compensation packages addressed in this case to incentive compensation approved for recovery through rates by Chesapeake, or any other company, in other jurisdictions.

10. **Property Taxes.** Please provide all documents in your possession, custody or control supporting the increase in taxes from the 2025 base period to the 2026 intermediate year and to the 2027 rate year.

Company Response:

See response to OPC interrogatory number 61.

12. **Variance Reports.** Provide copies of each written operating and capital budget variance report and variance explanation used by each Company officer to monitor and control budgets under his or her responsibility. Provide in the most detailed form (i.e. monthly, quarterly) used by the Company during 2023, 2024 and 2025.

Company Response:

Please refer to the attached files beginning "OPC POD 12". Certain responsive documents are deemed confidential by the Company, are designated as such, are being provided under separate cover.

intermediate period over the 2025 base period.

Company Response:

There are no responsive documents, as Florida City Gas does not have a pension plan.

9. **Plant.** Please provide all documents in your possession, custody or control supporting (i.e. estimates, quotes, bids, etc.) the projected plant additions and retirements by major category for each of the years the respective projections for the 2026 intermediate year and the 2027 rate years.

Company Response:

Please refer to the attached files beginning "OPC POD 9".

11. **Rate Case Expense.** Provide all documents in your possession, custody or control supporting the rate case expense costs in the 2027 rate year (invoices, contracts, etc.)

Company Response:

The Company is providing all contracts, RFP's, and currently available invoices as of 3/31/2026 that support the projected 2027 rate case expense. Please see the files starting with "OPC POD 11." Additionally, see attached file "OPC POD 11 Summary" for the currently incurred rate case expenses. Invoices that cover work unrelated to rate case

DOCUMENTS REQUESTED

28. **Storm Reserve.** Refer to the April 20, 2026 Application for Rate increase on page 11. Provide the Storm Damage Self-Insurance Reserve Study referenced.

Company Response:

Please see attached file beginning with 'OPC POD 28'.

29. **SAFE Program**. Refer to the April 20, 2026 Application for Rate increase on page 14. In section E, number 35, provide supporting cost documentation for the forecasted SAFE investments by project and associated operating expenses by type for 2026.

Company Response:

Please see attached file beginning with 'OPC POD 29'.

30. **Inflation.** Refer to the direct testimony of Matt Everngam on page 9, lines 17-19. Provide any study or analysis supporting the calculated 24.77% compounded inflation rate referenced.

Company Response:

Please see attached file beginning with 'OPC POD 30'.

31. **Acquisition Adjustment.** Refer to the direct testimony of George Navo on page 8, lines 9-10. Provide the referenced document that the witness is relying on.

Company Response:

Please see attached file beginning with 'OPC POD 31'.

Schedule C-37 O & M Compound Multiplier Calculation Page 1 of 1

Florida Public Service Commission

Company: Florida City Gas

Docket No.: 20260026-GU

Explanation: For each year since the base year of the company's last rate case, provide the amounts and percent increases associated with customers and average CPI. Show the calculation for each compound multiplier.

Type of Data Shown:
His. Base YR Last Case: 12/31/2021
His. Base YR Current Case: 12/31/2025
Witness: J. Husted

	Total Customers			Average CPI			
Year	Amount	% Increase	A Compound Multiplier	Amount	% Increase	B Compound Multiplier	Inflation & Growth Compound Multiplier (A X B)
2021	115,642		1.0000	271.0		1.0000	1.0000
2022	117,752	1.82%	1.0182	292.7	8.00%	1.0800	1.0997
2023	120,125	2.02%	1.0388	304.7	4.12%	1.1245	1.1681
2024	122,572	2.04%	1.0599	313.7	2.95%	1.1577	1.2270
2025	125,151	2.10%	1.0822	321.9	2.63%	1.1881	1.2858
2026	127,452	1.84%	1.1021	329.9	2.47%	1.2174	1.3418
2027	129,969	1.97%	1.1239	338.1	2.49%	1.2477	1.4023

Supporting Schedules:

Recap Schedules: C-33, C-34

32. **Acquisition Adjustment**. Refer to the direct testimony of George Navo on page 9, lines 1-3. Provide any Goodwill analysis the Company performed or had performed to determine whether recovery in customer rates is still allowable or justified.

Company Response:

The Goodwill analysis is the analysis provided in George Navo's testimony. See the file attached to OPC POD 31 for the accounting guidance from PWC.

33. **Payroll.** Refer to the direct testimony of George Navo on page 21, lines 3-9. Provide the forecast utilized with the October 31, 2025 employees showing the assumptions and changes to the employee complement that resulted in the forecasted payroll for 2026 and 2027.

Company Response:

Please see attached file beginning with 'OPC POD 33'.

34. **Insurance and Injuries and Damages**. Refer to the direct testimony of Joanah Baugh on page 20, lines 17-18. Provide the referenced specific estimates from the Company's insurance broker.

Company Response:

The Company did not receive formal or written premium estimates from its insurance broker for the projected test years referenced in the testimony.

Instead, the Company relied on discussions with its insurance broker regarding current market conditions and expected trends, together with the Company's recent renewal experience and historical insurance cost increases.

Accordingly, there are no separate or discrete "specific estimates" from the broker to provide.

35. **Rate Case Expense**. Refer to the direct testimony of Joanah Baugh on page 20, lines 20-22. Provide the referenced specific forecasts from consultants and attorneys as well as the in-house estimate.

Company Response:

The Company has provided forecasted expenses from consultants and attorneys in the response to OPC POD 11. For the complete estimate for all rate case expenses should this proceeding go to a full hearing, please refer to the file OPC POD 35.

36. **Plant.** Refer to the direct testimony of Brian Gilliam on page 5, lines 1-12. Provide any written directions sent to project managers that explains the bottom-up approach for forecasting the respective construction projects and what supporting documentation is required.

Company Response:

Please refer to the attached template files beginning with 'OPC POD 36'.

37. **Plant**. Refer to the direct testimony of Brian Gilliam on page 5, lines 1-12. Provide each of the project estimates submitted by project managers.

Company Response:

Please see attached files beginning with 'OPC POD 37'. Certain estimates incorporate inputs from department leadership, as well as supplementary discussions and coordination efforts, to ensure the overall capital forecast reflects a reasonable and well-supported estimate.

38. **Plant.** Refer to the direct testimony of Brian Gilliam on page 10, lines 1-13. Provide a copy of

the various proposals submitted by multiple qualified vendors for consideration and the assessments explaining why the vendor was selected.

Company Response:

Please see attached files beginning with 'OPC POD 38'. The attached materials include documentation and supporting information provided by vendors as part of the Company's vendor evaluation and selection process. These are the only responsive documents.

56. **Incentive Compensation.** Refer to the response to OPC's First Set of Interrogatories, Interrogatory No. 36. In discussing the need for recovery of incentive costs, the response states, "If we did not offer incentive compensation – or if the Commission disallows associated costs – we would need to consider increasing base salaries to remain competitive with other companies also trying to attract and retain qualified employees." Provide any Board of Directors meeting minutes wherein there was a discussion of terminating incentive compensation because some or all incentive costs were not allowed in base rates.

Company Response:

The Company does not have any Board of Director meeting minutes where there was a discussion of terminating incentive compensation. At this time regulatory agencies have allowed recovery of incentive compensation in all our jurisdictions in the most recent rate proceedings, with the exception of FCG in 2022 which was prior to CUC's acquisition of FCG. The statement of needing to consider increasing base salaries to remain competitive, if jurisdictions disallowed recovery of incentive compensation, our HR team would

need to make sure salaries and benefits including incentive compensation are sufficient to attract and retain employees.

Interrogatory No. 17

17. **Customers.** Please provide for each year 2021, 2022, 2023, 2024, 2025 and 2026 year to date the total sales by billing determinate, revenue by revenue class and provide the projected information for the 2026 intermediate period and the 2027 rate year.

Company Response: FCG objects to this request, which seeks information that has already been provided, reviewed, and assessed in the Company's previous rate case conducted in Docket No. 20220069-GU and therefore used to set the Company's current rates. Specifically, FCG objects to this request to the extent it seeks information for the period prior to May 1, 2023, which is the date upon which rates when into effect for FCG as a result of the Commission's decisions in Docket No. 20220069-GU. Data for that period has already been thoroughly reviewed in the prior rate case, predates the Company's historic test year for this case, and is simply not likely, or calculated, to lead to the discovery of admissible evidence. As such, requiring FCG to produce data for this prior period would not only be unduly time consuming, but burdensome as well. FCG also objects to this request to the extent it seeks information for the period prior to November 30, 2023, which is the date upon which FCG was acquired by Chesapeake Utilities Corporation. Information that FCG does not already have for the period prior to November 30, 2023 period, cannot be obtained without incurring additional costs. To be clear, FCG does not already have the requested information for this period. Given the additional costs, the change in ownership, and the limited time period between the date the current rates went into effect and the date FCG was acquired (i.e. May 1, 2023 – November 20, 2023), the probative value, if any, of the information is substantially outweighed by the undue burden it would place on FCG to obtain this information. Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Interrogatory No. 17, cont.

Chesapeake Utilities Corporation completed its acquisition of Florida City Gas on November 30, 2023; therefore, the data provided to satisfy this request spans December 2023 through December 2027, the test year.

Please see below for a summary of revenue, customers, and therms by rate category.

Respondent: George Navo

Interrogatory No. 17

17. **Customers.** Please provide for each year 2021, 2022, 2023, 2024, 2025 and 2026 year to date the total sales by billing determinate, revenue by revenue class and provide the projected information for the 2026 intermediate period and the 2027 rate year.

Company Response: FCG objects specifically to the request to provide 2021 information. As explained in response to OPC's interrogatory No. 107, CUC acquired FCG from FPL on November 30, 2023. CUC did not acquire all historical data for FCG at the time of the acquisition. FCG can, however, obtain information, as necessary, from FPL upon reasonable notice and upon payment to FPL for their employees' time to retrieve and provide the requested information. Additional restrictions on obtaining the historical information apply as it pertains to information that may be deemed confidential by FPL. FCG has agreed to obtain from FPL and provide to OPC - and staff -certain historical information for the period 2022-2023. This will take additional time beyond the discovery timeframes set forth in the OEP, because, again, the information is not in the possession and control of FCG at this time. FCG however maintains its objection to providing information for 2021 as that was the historical test year for the last rate case. As such, the information has been fully analyzed in the prior proceeding and was likely provided to both OPC and to Commission Staff in that prior proceeding. Thus, the burden of both time and expense imposed upon FCG in order to obtain – and pay for – retrieval of the information from FPL outweighs any benefit that may be derived from that one year of information. Moreover, it is likely that the information resides in the Commission's files for Docket No. 20220069-GU.

Notwithstanding and without waiving this objection, FCG provides the following responsive information:

Chesapeake Utilities Corporation completed its acquisition of Florida City Gas on November 30,

Interrogatory No. 17, cont.

2023; therefore, the data provided to satisfy this request spans December 2023 through December 2027, the test year.

Please see below for a summary of revenue, customers, and therms by rate category.

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: May 8, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIRST SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 2-6, 10-11, 17, 19, 21-23, 28, 34-35, 42-44, 47-51, 58, and 69-71 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: May 8, 2026

Interrogatory No. 191

191. **Legal Expense.** Refer to the response to OPC's First Set of Interrogatories, Interrogatory No. 41. Provide an explanation describing what the factor(s) is driving the increase in expense in 2025-2027 when compared to the cost in 2024 for the firms Baker & Hostetler LLP and Gunster Yoakley & Stewart PA.

Company Response:

The increase in expenses attributable to Baker & Hostetler LLP for 2025 as compared to 2024 is primarily driven by costs associated with a personal injury case.

The increase in expenses attributable to Gunster Yoakley & Stewart PA for 2025 as compared to 2024 is primarily driven by the increased volume of general regulatory matters. In addition, the prior owner has an extensive in-house legal department, while FCG and CUC maintain a smaller legal department and deploy outside services as necessary.

Respondent: George Navo

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for approval of rate increase by Florida City Gas.	Docket No. 20260026-GU Filed: June 9, 2026

DECLARATION

I hereby certify and affirm that I sponsored the Company's responses to the OFFICE OF PUBLIC COUNSEL'S FIFTH SET OF INTERROGATORIES TO FLORIDA CITY GAS, Nos. 175-177, 179, 181-184 and 191 in Docket No. 20260026-GU. The responses are true and correct to the best of my knowledge.

Under penalty of perjury, I declare that I have read the foregoing declaration and the interrogatory responses identified above, and that the facts stated therein are true.

George Navo, Declarant

Dated: June 9, 2026

Interrogatory No. 224

224. **Cost Savings.** Refer to the response to OPC's Third Set of Interrogatories, Interrogatory No. 119. Identify where the referenced reduction of $123,128 can be found in the MFR schedules for 2027, whether this reduction is associated with the former legacy system, the amount of added expense reflected in the filing associated with the improvements referenced, and, if any, where such added expenses are reflected in the MFRs for 2026 and 2027.

Company Response:

The referenced reduction of $123,128 can be found in the MFR Schedule G2 page 19g of 31. This amount reflects the elimination of costs related to discontinuance of legacy general ledger system amounting to $32,900 and legacy HR system amounting to $90,228. See response to OPC interrogatory 137 for the expenses associated with the ERP.

Respondent: Matthew Everngam and Michael Galtman

Interrogatory No. 137

137. **SAP/ERP System.** Refer to the direct testimony of Michael Galtman on page 14, lines 1-4 and page 19, lines 8-14. Are the $1,819,408 costs in addition to the $2,635,078 allocation to FCG or are they part of the allocation? If in addition to the $2,635,078 allocation to FCG provide supporting cost information for the $1,819,408.

Company Response:

The $1,819,408 reflects the ongoing maintenance and licensing costs associated with the ERP program. This amount is included in total pre-tax cost of the ERP program of $3,529,674. The after-tax amount for these expenses is $2,635,078. Please see the attached file entitled, "OPC ROG 137 ERP Expense" for the calculation.

INTERROGATORIES

Interrogatory No. 249

249. **Affiliated Transactions.** To respond to the following Interrogatories 249(a-f), refer to the response to OPC's Second Set of Interrogatories, Interrogatory No. 83, that details the transfer of Goodwill from FCG to Peninsula Pipeline Company (PPC) in March and April of 2025 summing to $20.410 million. Refer also to the reductions in plant assets and associated accumulated depreciation for plant account 367.1 in March and April 2025 as reflected on Schedules B-4 and B-9.

a. Describe all reasons why the transfers of plant assets, and associated Goodwill, from FCG to PPC were made.
b. Provide a summary of the accounting entries made on the books of FCG for the transfers in these two months by FERC account.
c. Confirm that the base revenue requirement requested in this proceeding contains none of the FCG acquisition premium transferred to PPC. If not confirmed, explain why not.
d. Indicate whether the Company made any consideration of the CUC debt costs directly assigned to FCG in this proceeding as a result of the 2025 transfer of a portion of the related assets and Goodwill to PPC. Explain answer.
e. Confirm that none of the FCG acquisition premium transferred to PPC impacts pipeline charges made by PPC to FCG that are recovered through the PGA. If not confirmed, explain why not.
f. To the extent that the revenue requirement related to these plant assets was included in the FPSC's June 2023 rate award to FCG, what adjustment to current retail base rates were made to account for any transfer of plant assets to PPC? If no adjustment was made, explain why not.

Company Response:

a. Please see Docket No. 20240141 and Order No. PSC-2025-0057 for the reasoning related to the asset transfers and goodwill from FCG to PPC. The assets were part of the PPC project FTSA approved in that docket which included the transfer of the FCG

Interrogatory No. 249, cont.

assets to PPC. The goodwill on the books is associated with the net plant value of the Company's assets and thus any plant transfer has associated goodwill tied to it. By transferring goodwill, it appropriately remains with the correlated asset and sits on the books of the appropriate business unit.

There is no reduction to account 367.1 on B-4 and B-9.

b. Please see file beginning with the title "OPC ROG 249b" for the Goodwill entries.

c. Confirmed.

d. The Company did not adjust the amount of CUC debt directly assigned to FCG as a result of the 2025 transfer of a portion of the related assets and Goodwill to PPC.

The direct assignment of debt to FCG in this proceeding is based on the financing structure used to support the acquisition of FCG and its regulated operations, rather than subsequent internal transfers of assets between affiliated entities. Accordingly, the 2025 transfer does not affect the basis on which debt costs are assigned for ratemaking purposes.

As a sensitivity, if the directly assigned debt shown on MFR Schedule G-3, page 3b, were reduced by $20.410 million with a corresponding increase to the remaining debt component on page 3c, the impact on the total weighted average cost of capital shown on Schedule G-3, page 2 would be approximately 0.02 percentage points (from 8.31% to 8.29%), indicating that any such adjustment would not be material.

e. Confirmed.

f. The transferred assets were reflected in the June 2023 rate award to FCG. However, in the approved FTSA, PPC is not currently recovering on those assets as the transferred assets were excluded from the calculation of the rate charged by PPC as specified in Order No. PSC-2025-0057. Following FCG's next rate proceeding, the transferred assets will no longer be reflected in FCG's base rates, and at that time the TSA rate adjusts to recognize recovery on the transferred assets.

Florida City Gas
Docket No. 20220069-GU
OPC's Fourth Set of Interrogatories
Interrogatory No. 151
Page 1 of 1

QUESTION:
Refer to the response to OPC's First Set of Interrogatories, No. 87. Explain the significant decline in 2021net plant additions when compared to 2020.

RESPONSE:
FCG's net plant additions, gross additions less retirements, were $43.0 million in 2020 and $8.2 million in 2021, resulting in a decrease of approximately $34.8 million. Please see below for the major drivers for the decrease:

- New Business – Decrease in net plant additions from 2020 to 2021 by approximately $12.2 million primarily due to major capital improvements for a new large industrial customer made in 2020 and lower new business in 2021 as a result of the ongoing impacts of the COVID-19 pandemic.

- Systems – Decrease in net plant additions from 2020 to 2021 by approximately $10 million due to $5.7 million for the implementations of Starnik (customer information system) and $4.3 million for the establishment of Gas and Work Management Systems in 2020.

- Operations, Safety, and Support – Decrease in net plant additions from 2020 to 2021 by approximately $10.4 million due to $7.2 million of retirements recorded in 2021 associated with the clean-up of certain components of meter retirements dating back to the acquisition of FCG by FPL, $1.6 million in capital improvements for the Cocoa Gate Station, and $1.6 million related to the implementation of a new Periodic Testing Program in 2020.

Florida City Gas
Docket No. 20220069-GU
OPC's Fifth Set of Interrogatories
Interrogatory No. 159
Page 1 of 1

QUESTION:
Refer to the response to OPC's Second Set of Interrogatories, No. 129. Was the approval of the acquisition adjustment specifically detailed in the settlement agreement in Order No. PSC-2018-0190-FOF-GU (Docket No. 20170179-GU)? If not, explain why the settlement can be viewed as approval for recovery.

RESPONSE:
No. Pursuant to Commission Order No. PSC-08-0623-PAA-GU, FCG was authorized to amortize a positive acquisition adjustment over a thirty-year period beginning November 2004. On October 23, 2017, FCG filed a petition in Docket No. 20170179-GU seeking Commission approval of a rate increase, depreciation study, and a request for interim rate relief. As part of that filing, FCG submitted Schedule MFR A-3 that clearly reflects the positive acquisition adjustment was included in the 2018 Test Year rate base. Please refer to Schedule MFR A-3, Page 1 in Docket 20170179-GU. Although FCG's current settlement agreement approved by Commission Order No. PSC-2018-0190-FOF-GU did not specifically address the acquisition adjustment, there is nothing in the settlement agreement to suggest that any portion of the acquisition adjustment included in the 2018 Test Year was disallowed or adjusted. In addition, please refer to Attachment No. 1 to this response for FCG's response to Staff's First Data Request No. 2, in Docket No. 20170179-GU (settlement data requests) regarding FCG's intent regarding the continued recovery of the acquisition adjustment in base rates.

OPC's Fifth Set of Interrogatories
Interrogatory No. 159
Attachment 1 of 1
Page 2 of 39

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for rate increase by Florida City Gas.	DOCKET NO. 20170179-GU DATED: March 16, 2018

FLORIDA CITY GAS'S RESPONSES TO STAFF'S FIRST DATA REQUEST ON STIPULATION AND SETTLEMENT

Florida City Gas's (FCG) responses to Staff's First Set of Data Requests are as follows:

Rate Case Expense

1. On page 8, paragraph 9, of the proposed Stipulation and Settlement Agreement, it states that the annual amortization of the regulatory asset established to recover the rate case expense incurred for the this rate case shall not be less than $150,000, and the amortization period runs from June 1, 2018, through May 31, 2022. This provision also states that the Company may, at its sole discretion, amortize additional amounts.

a. What is the anticipated balance of the regulatory asset on June 1, 2018?

b. Could the additional amortization authorized in this paragraph be considered in evaluating the Company's earned return on common equity under the terms of Paragraph 7 of this proposed Stipulation and Settlement Agreement?

FCG Response:

a. The forecasted balance for the regulatory asset at June 30, 2018 is $1,200,000.

b. Yes. In evaluating the Company's earned return on common equity under the terms of paragraph 7 of the proposed Stipulation and Settlement Agreement, the Company will use the actual amortized amount of rate case expense.

Respondent: Mike Morley

Florida City Gas
Docket No. 20220069-GU
OPC's Fifth Set of Interrogatories
Interrogatory No. 159
Attachment 1 of 1
Page 3 of 39

Docket No. 20170179-GU

Acquisition Adjustment

2. As part of its rate case filing, FCG requested continued approval of the 2007 Acquisition Adjustment that the Commission had approved on a provisional basis in Docket No. 060657-GU.

While the proposed Stipulation and Settlement Agreement reached by the parties asserts to be comprehensive to all issues outlined in the rate case filing, it does not directly address the Acquisition Adjustment and its continued prudence.

a. Is it the intention of the parties for the proposed Stipulation and Settlement Agreement to address the Acquisition Adjustment and its continued prudence?

b. As part of the proposed Stipulation and Settlement Agreement, have the parties agreed to stipulate their approval of the acquisition adjustment?

c. If yes, does FCG believe that this Stipulation and Settlement Agreement fulfills its obligation to demonstrate to the Commission the prudence of the Acquisition Adjustment?

FCG Response:

a. The Parties' have put forth a "black box" settlement, which, as noted, does not address the Acquisition Adjustment approved by the Commission in Docket No. 060657-GU. It can, however, be noted that the Settlement and Stipulation also does not include a specific adjustment to disallow any portion of the remaining unamortized amount associated with that Commission-approved Acquisition Adjustment.

b. Please see response to part a, above. The Parties further note that no intervenor party submitted testimony or exhibits recommending that any portion of the remaining unamortized amount associated with the Acquisition Adjustment be disallowed.

c. While the Stipulation and Settlement does not specifically address the Acquisition Adjustment, the Company provided the testimonies of Witnesses Kim and Bermudez in

support of the continued prudence of the Acquisition Adjustment. To the extent that no intervenor party provided testimony recommending an adjustment to the unamortized amount associated with the Acquisition Adjustment, and the Settlement and Stipulation does not contain a specific adjustment to the remaining unamortized amount associated with the Acquisition Adjustment, FCG believes that a sufficient demonstration has been made as to the continued prudence of the Acquisition Adjustment.

Respondent: Carolyn Bermudez

Federal Income Tax Reform

3. Please provide the method, including the calculations and schedules (formulas intact), used to determine the projected tax savings of $4,584,338.

FCG Response:

Please see Attachment Staff DR Set 1 (1-3) for the details above.

Respondent: Mike Morley

Revenue Requirement

4. Please discuss how the two step increases will be allocated to the rate classes (e.g., across the board same percentage increase to all rate classes)

FCG Response:

The attached Schedule Staff DR 1-4 and electronic file "Schedule Staff DR 1-4.xlsx" present how the Company proposes allocate the two step increases. For the first step increase the Company proposes to allocate the $2,500,000 in the same manner as the initial $8,000,000 increase net of SAFE revenues was allocated to the RS-1, RS-100, RS-600, GS-1, GS-6k, GS-

Florida City Gas

Interrogatory No. 159
Attachment 1 of 1
Page 5 of 39

25k, GS-120k and GS-1250k classes. Page 1 of the attached schedule presents this allocation for the first step. The Company proposes to place all the proposed increase for this step into the energy charges.

For the second step of $1,300,000 the Company proposes to follow the same basic method. Detail of this calculation is based on page 2 of the attached schedule. The difference is that allocation is based upon both the initial increase and the increase from the first step. The result is both steps are allocated to the classes of RS-1, RS-100, RS-600, GS-1, GS-6k, GS-25k, GS-120k and GS-1250k by the same percentages as the initial increase. Again, the Company proposes to place all the proposed increase for this step into the energy charges.

Respondent: Dan Nikolich

LNG Facility

5. Please explain whether FCG intends to use the LNG facility for purposes of selling LNG as an alternative fuel for transportation. For instance, will the LNG plant have a trucking rack and scale to allow long-haul trucks to buy LNG. If so, explain how such potential revenues from the sale of LNG will be treated by FCG.

FCG Response:

The Company has no intention to use the LNG facility for purposes of selling LNG as an alternative fuel for transportation. Florida City Gas is building the LNG facility to provide gas to address the capacity issues identified in the testimony of Witness Becker.

Respondent: Steve Wassell

6. Does FCG intend to sell any of the gas from the LNG facility to wholesale customers (e.g., another LDC, an electric utility, or a third party supplier or marketer that is not on FCG's system), and how would FCG treat such revenues?

FCG Response:
The Company does not intend to sell any of the gas from the LNG facility to wholesale customers. Florida City Gas is building the LNG facility to provide gas to address the capacity issues identified in the testimony of Witness Becker.

Respondent: Steve Wassell

Transportation Tariff

7. Please explain the methodology FCG will use to allocate the 20,000 Dth/h of additional capacity to the Third Party Shippers and please explain whether provision XI b. of the proposed Agreement was originally contemplated in the proposed transportation service tariffs or whether that provision is new to the Agreement (i.e., that Third Party Shippers would be responsible for the full 20,000 Dth/d of additional FGT capacity).

FCG Response:

FCG will allocate and release firm transportation capacity on Florida Gas Transmission to the Third Party Shippers that provide the natural gas supply for the Company's Transportation customers. The capacity allocation will be done in a way that recognizes the physical delivery rights of the firm transportation capacity contract on the interstate pipeline and the location of the Transportation customer(s) on the FCG system. The Third Party Supplier will therefore have a firm ability to deliver gas supply to the part of the FCG system where their transportation customer(s) and their potential demand for natural gas is located. Capacity will be allocated and released to Third Party Suppliers to meet the needs of our ADDQ customers and then to the

Florida City Gas
Docket No. 20220069-GU
OPC's Fifth Set of Interrogatories
Interrogatory No. 159
Attachment 1 of 1
Page 7 of 39

DCQ customers. The allocation and release of Firm Transport capacity on the interstate pipeline will continue until there is no further capacity to release. Since the system does not have the full amount of capacity needed to meet a forecasted design day not all parties will receive a release or the release they receive may not fully cover their transportation customer's load potential until such time as the Company is able to secure adequate gas supply capability to do so.

Respondent: Greg Becker

8. How many Third Party Shippers are on FCG's system?

FCG Response:

There are 11 Third Party Shippers who actively provide gas supply to Transportation customers on FCG's distribution system at this time.

Respondent: Greg Becker

9. FCG Witness Becker's rebuttal testimony stated that only one Third Party Shipper has firm capacity rights on the FGT system. Will that shipper also have to buy capacity from FCG?

FCG Response:

The Third Party Suppliers will not be purchasing capacity directly from FCG. The Company will contract for Firm Capacity on the interstate pipeline and then release the capacity to the Third Party Supplier. These releases will be conducted on the interstate pipeline's Electronic Bulletin Board "EBB" and will comply with their Federal Energy Regulatory Commission's "FERC" approved Tariff. The Third Party Supplier would then be billed directly by the interstate pipeline company as a replacement shipper to the firm capacity.

Florida City Gas
Docket No. 20220069-GU
OPC's Fifth Set of Interrogatories Interrogatory No. 159
Attachment 1 of 1
Page 8 of 39

All Third Party Suppliers will be released capacity from FCG unless they can provide documentation to the Company illustrating that they have enough Firm Capacity on FGT, with firm delivery rights to points on FCG's distribution system that correspond to the geographic location of their Transportation customers that would meet the demands of all of their ADDQ and DCQ customers.

The Company has not analyzed the specifics of the one Third Party Shipper that currently holds a very small amount of firm transportation capacity on FGT that has firm delivery rights to points on the FCG system, where the Third Party Shipper's Transportation customers are located on FCG's system or any other reasons why that Third Party Shipper may hold and be using that firm capacity on FGT.

Respondent: Greg Becker

10. Please explain whether Third Party Shippers will be required to buy their allocated share of the 20,000 Dth/d additional capacity, or whether Third Party Shippers will be able to choose to buy capacity from FCG or continue to rely solely on the FGT secondary capacity release market.

FCG Response:

The Company's position is that the Third Party Shippers will be required to take release of firm transportation capacity that the Company subscribes to which will have firm delivery rights to the FCG system.

Respondent: Greg Becker

11. Please discuss whether FCG has communicated the proposed settlement to its Third Party Shippers and how it affects them. If so, please provide a discussion on the acceptance of the proposed transportation tariff and/or proposed settlement by the shippers.

FCG Response:

The Company has communicated the Capacity Release mechanism proposed in the transportation tariff and received a letter in response from the Third Party Suppliers. Those materials were provided in the Company's response to OPC POD 6-105. The Company also provided updated materials to each Third Party Supplier that reflected the amount of capacity that would be released to them before any additional capacity is contracted for by the Company. Those materials were sent to marketers on February 26, 2018 and subsequent follow-up discussions are taking place. See the emails enclosed separately on CD (Confidential).

The Company has not communicated the proposed settlement to Third Party Suppliers but plans on setting a meeting with the Third Party Supplier group in April or May of 2018 to have a Comprehensive discussion about the settlement and implementation of capacity releases.

Respondent: Greg Becker

New Rates

12. Please state when and how FCG will notify its customers of the proposed rates effective June 1, 2018.

FCG Response:

The Company will notify customers of the proposed rates effective June 1, 2018 consistent with Commission Rule 25-22.046 - Notice and Public Information on General Rate Increase Requests and Petitions for Limited Proceedings by Electric and Gas Utilities.

The rule states, "After the Commission's issuance of an order granting or denying a rate change, the utility shall give notice to its customers of the order and the revised rates. The notice shall be approved in advance by the Commission or its staff and transmitted to the customers with the first bill containing the new rates."

The Company will notify customers via a direct mailing that will be mailed to all FCG customers the first week of May. The Company will also place a message on the bill the first month that the approved base rates are effective informing customers that the bill incorporates newly approved base rates.

Respondent: Carolyn Bermudez

Exhibit A

13. Please refer to Exhibit A to the stipulation and settlement, page 3. Should the proposed settlement charge for Reconnection (Residential-outside regular business hours) be $50 instead of the $80 as shown?

FCG Response:

Yes. Additionally, other information related to Reconnection charges in the table needs to be corrected. The table below correctly represents the Reconnection charges information.

	Present Rates	**Interim Rates**	**Proposed Settlement Rates**
Reconnection Charge (Residential)	$37.00	$37.00	$40.00
Reconnection Charge (Residential-outside regular business hours)	$37.00	$37.00	$50.00
Reconnection Charge (Non-Residential)	$80.00	$80.00	$80.00
Reconnection Charge (Non-Residential-outside regular business hours)	$80.00	$80.00	$100.00

Respondent: Dan Nikolich

Florida City Gas
Docket No. 20220069-GU OPC's
Fifth Set of Interrogatories
Interrogatory No. 159
Attachment 1 of 1
Page 11 of 39

14. Please refer to Exhibit A to the stipulation and settlement, page 3. The row for Reconnection (non residential outside regular business hours) appears twice. Should the first row with the proposed settlement charge of $50 be deleted, as the following row showing a proposed charge of $100 is correct?

FCG Response:

Yes. Please see the response to Staff DR 1-13.

Respondent: Dan Nikolich

15. Please provide the work papers showing the derivation of the proposed customer, distribution, and demand charges for all rate classes and provide proof that they are designed to produce the June 2018 additional increase in revenues contained in the stipulation and settlement ($11.5 million).

FCG Response:

The attached Schedule Staff DR 1-15 presents the Company's support for the $11.5M increase to the customer, demand and distribution charges. The $11.5M increase can viewed as two parts. The first part consists of rolling $3.5M of SAFE charges into base rates. The second part is comprised of an additional $8M needed to recover a revenue requirement of $61,847,331 to bring the total increase over base rates to $11.5M. To recover this revenue requirement, the Company proposes to increase its base rate customer, demand, and distribution charges.

The customer charge increases were based upon a comparison of the Company's current, proposed, customer costs per customer from the Class Cost of Service MFR H1 schedule updated for the tax law changes, TECO-Peoples Gas', and Florida Public Utilities customer charges presented in page two of the attachment. Based upon this comparison, the Company

proposes to move the customer charges more in line with the cost of service but not exceeding maximum of the Company's current or another utility's shown similar customer charge.

For the demand charges, based upon the schedule H MFR's, almost 99% of FCG's costs are either customer or capacity based. As such, FCG's current demand charges are below the Company's demand related capacity based costs. The Company proposes to increase demand charges by roughly the same level as the modest increment that the original $0.289 per therm demand charges were based upon 14 years ago. This results in demand charges increasing by $0.286 per therm to $0.575 per therm.

Increases to the customer and demand charges alone are not sufficient to meet the agreed upon revenue requirement. Therefore, the Company proposes to increase the distribution charges. The first page of the attachment presents the calculation of the new distribution charges. To calculate the proposed distribution charges:

1. Residential increases were maintained at the level shown on the schedule H class cost of service allocation model adjusted for the tax law changes. This resulted in an overall 7.2% increase to residential base rate revenues.
2. The remaining increase was allocated evenly arriving a 21.5% increase for the commercial and industrial classes of GS-1, GS-6k, GS-25K, GS-120k, and GS-1250k.
3. The proposed increases by class were added to the current revenues by class to arrive at the revenue requirement by class totaling $61,847,331.
4. To compute the portion of the revenue requirement to be recovered through distribution charges, the proposed miscellaneous revenues totaling $3,164,078 were backed out.

Florida City Gas
Docket No. 20220069-GU OPC's
Fifth Set of Interrogatories
Interrogatory No. 159
Attachment 1 of 1
Page 13 of 39

5. Next, using the projected test year ending December 2018 billing determinants, the proposed customer charges totaling $20,767,237 and the proposed demand charges totaling $7,764,929 were deducted from the revenue requirements by class. This results in $35,151,088 in revenue requirement to be recovered through distribution charges.
6. Finally, for each class, the distribution charge revenue requirement was divided by the projected test year number of therms to arrive at the proposed rates for each class.

Respondent: Dan Nikolich

Exhibit B

16. Please provide a revised Exhibit B to the stipulation and settlement that in addition to total Base Rate Revenues under original filed, adjusted for tax law changes, and settlement proposal, also shows as a separate line item the revenue increase associated with miscellaneous service charges.

FCG Response:

Please see the attached Schedule Staff DR 1-16 and the attached electronic file "Schedule Staff DR 1-16.xslx".

Respondent: Dan Nikolich

Docket No. 20170179-GU

Exhibit C - Depreciation

17. Please refer to Exhibit C, page 2, of the proposed Settlement, and the Direct Testimony of FCG witness Watson, Exhibit No. DAW-2, pages 42, 168, and 169 for the following Data Request. For Federal Energy Regulatory Commission (FERC) Account 380.20 - Service, Plastic (shown on page 2 of Exhibit C), please confirm that the *Proposed* and *OPC Settlement* rates of Net Salvage are both negative 45 percent, rather than the shown zero percent.

FCG Response:

Yes, the Proposed and OPC Settlement rates of Net Salvage are both negative 45 percent, rather than the shown zero percent.

Respondent: Mike Morley

18. Please refer to Exhibit C, page 1, of the proposed Settlement, and the Direct Testimony of FCG witness Watson, Exhibit No. DAW-2, page 62.

a. Please confirm that FCG still intends to implement General Plant Amortization as alluded to by the values shown on Exhibit C, page 2, of the proposed Settlement.

b. Please confirm if it is still the Company's intention to retire certain assets whose ages' are greater than the average service life of their corresponding (amortizable) accounts.

FCG Response:

a. Yes, FCG still intends to implement General Plant Amortization as alluded to by the values shown on Exhibit C, page 2, of the proposed Settlement.

b. Yes, the Company's intention to retire certain assets whose ages' are greater than the average service life of their corresponding (amortizable) accounts.

Respondent: Mike Morley

19. Please provide an estimated total annual depreciation expense differential (including plant amortization expense) based upon the depreciation rates shown on Exhibit C of the proposed Settlement, with an implementation date of January 1, 2018, to the Company's proposed "Total Depreciated Plant" expense shown on Exhibit DAW-2, page 103 of 171.

FCG Response:

Please refer to Staff DR 1-19 Attachments 1 and 2. Attachment 1 provides a comparison of depreciation expense based on the proposed settlement and the rates proposed in Exhibit DAW-2, page 103 of 171 using plant balances as of July 31, 2018 (also provided in Exhibit DAW-2, page 103 of 171. Attachment 2 provides a comparison of depreciation expense based on the proposed settlement and existing rates using the average plant balances for the 2018 test year (MFR G1-10 and 11).

Respondent: Mike Morley

Billing Determinants

20. Please refer to Page 4 of the Settlement and Stipulation, Section III.a. The settlement states the FCG shall be authorized to increase base rates and service charges "based on the projected test year December 2018 billing determinants reflected in the Minimum Filing Requirements ("MFRs") filed with the Company's Petition in this docket." Do the parties to the Stipulation and Settlement affirm that the billing determinants appearing in MFR Schedules E1 and E2 as filed on October 23, 2017 in this proceeding...

a. are the same billing determinants used to set base rates in this settlement?

b. were not revised in FCG's revised MFR schedules filed February 26, 2018?

Florida City Gas
Docket No. 20220069-GU
OPC's Fifth Set of Interrogatories Interrogatory No. 159 Attachment 1 of 1
Page 16 of 39

Docket No. 20170179-GU

FCG Response:

Yes, the billing determinants for number of customers, demand charges quantities, and therms are the same between those filed on October 23, 2017 and February 26, 2018. They are also the same determinants used to set rates for this settlement and used in the Company's response to Staff DR 1-15 with two exceptions. MFR's E1 and E2 show demand charge quantities (DCQ's) that were still based upon the current tariff which specifies separate winter and summer DCQ. Under the filed tariff, and per the testimony of Witness Nikolich, the Company has proposed going to one annual DCQ for the entire year rather than separate winter and summer periods. That leads the updated DCQ billing determinant in therms as shown below:

	Seasonal DCQ		**Annual DCQ**	
	GS-120k	GS-1250K	GS-120k	GS-1250K
Jan-18	172,347	198,876	172,347	198,876

Respondent: Dan Nikolich

Florida City Gas
Docket No. 20220069-GU OPC's Fifth Set of Interrogatories
Interrogatory No. 159 Attachment 1 of 1
Page 17 of 39

21. Please refer to Page 4 of the Settlement, Section III.a. Is it the intent of the parties to set the base rates for the step revenue increases discussed in this section based on the December 2018 billing determinants appearing in MFR Schedules E1 and E2 as filed in this proceeding on October 23, 2017? If not, please explain how the parties expect the billing determinants used to implement the step increases to base rates will be determined.

FCG Response:

Yes. Please refer to the Company's response to Staff DR's 1-4 and 1-15 that discuss and present how the two step process will employ the billing determinants to set rates.

Respondent: Dan Nikolich

Other Cost Recovery

22. Please refer to page 6 of the Settlement, Section VI – Other Cost Recovery. This section states, in part;

"As part of the base rate freeze, agreed to herein, the Company will not seek approval to defer for later recovery in rates, any costs incurred or reasonably expected to be incurred from the Effective Date through and including May 31, 2022, which are of the type which historically or traditionally have been or would be recovered in base rates, unless such deferral and subsequent recovery is expressly authorized herein or otherwise agreed to by each of the Parties."

Please indicate whether FCG contemplates seeking approval to defer any specific costs to be recovered in rates after May 31, 2022 which have already been "otherwise agreed to by each

OPC's Fifth Set of Interrogatories
Interrogatory No. 159
Attachment 1 of 1
Page 20 of 39

Florida City Gas
Docket No. 20170179
Schedule 1

Item No.		Amount	Tickmark	MFR / WP Location 1	Explanation
1	Change in Current Income Tax	(3,855,349)	A/	Schedule 3, Line 43	This was calculated utilizing the "As Filed" Total Rate Base of $299,278,151 multiplied by the change in cost of capital at the new explansion factor. See Schedule 3 for details of the calculation.
2	Excess Deferred Tax Amortization	(1,093,333)	B/	Schedule 3.5, cell O28	FCG determined the amount of $(1,093,333) on line three (3) listed as Excess Deferred Tax by taking the 2018 amortization of the protected excess deferred income tax liability of $1,016,422 less the 2018 amortization of the unprotected excess deferred income tax asset of $207,864. The result was then multiplied by the revenue expansion factor of 1.3522 (refer to Schedule 3.7 and Schedule 3.8). The 2018 amortization amounts for the protected and unprotected excess deferred income tax amounts are provided in the Company's response to OPC ROG 8-176, attachment OPC ROG 8-176-2.
3	Change in Cost of Capital - Elimination of Bonus Depreciation	364,344	C/	Schedule 3, Line 24	This was calculated utilizing the "As Filed" Total Rate Base of $299,278,151 multiplied by the change in cost of capital at the old explansion factor. See Schedule 3 for details of the calculation.
4	$4.6M Components of Revised Revenue Requirement	$ (4,584,338)			For further details please refer to OPC ROG 8-175, and Staff ROG 16-18

A/ Change in federal income tax rate from 35% to 21% and resulting impacts on operating income and the gross revenue conversion factor.

B/ Amortization of excess deferred taxes - protected and basis adjustments to property excess deferred taxes are amortized under the average rate assumption method and unprotected excess deferred taxes are amortized over 5 years

C/ Primarily due to the loss of bonus depreciation in 2018 in accordance with the tax reform act. The Company did incorporate the allowance of 50% in 2018 bonus depreciation for property acquired prior to September 2017. The loss of bonus depreciation in 2018 resulted in a lower tax to book difference in depreciation expense of approximately $38 million.

Q4: 2024-02-21 Earnings Summary

EPS of $1.64 beats by $0.08 | Revenue of $185.34M (-1.05% Y/Y) misses by $49.27M

Chesapeake Utilities Corporation (CPK) Q4 2023 Earnings Conference Call February 22, 2024 8:30 AM ET

Company Participants

Beth Cooper – Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary
Jeff Householder – Chairman, President and Chief Executive Officer
Jim Moriarty – Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer

Conference Call Participants

Paul Fremont – Ladenburg
Brian Russo – Sidoti
Chris Ellinghaus – Siebert Williams Shank

Operator

Good day, and welcome to the Chesapeake Utilities' Fourth Quarter and Full Year 2023 Earnings Conference Call. At this time all participants have been placed on a listen-only mode and the floor will be opened for your questions following the presentation. [Operator Instructions]

I would now like to turn the call over to Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary. Please go ahead.

Beth Cooper

Thank you, and good morning, everyone. I'm Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary of Chesapeake Utilities. We appreciate you joining us today for our fourth quarter and full year 2023 earnings call. Today's presentation can be accessed on our website under the Investors page and Events and Presentation subsection. After our prepared remarks, as we typically do, we will open the call up for questions.

As you saw in our press release, we delivered excellent performance in 2023. Our incremental earnings from regulatory initiatives and growth investments, including one month of results from Florida City Gas, more than offset lower energy consumption due to warmer temperatures across our service territories, along with the year's significant increase in interest costs. These items are detailed within the financial results that we will cover in just a few minutes. With me today are Jeff Householder, Chairman of the Board, President and Chief Executive Officer; and Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer; as well as other members of our management team who are joining us remotely.

On Slide 3, we have our typical disclaimers. I would like to remind you that matters discussed in this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results. The safe harbor for forward-looking statements section of the company's 2023 annual report on Form 10-K provides further information on the factors that could cause such statements to differ from our actual results. Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share, and the accompanying information includes the appropriate disclosures in accordance with the SEC's Regulation G. A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation, our earnings release and our 2023 Form 10-K.

Now I'd like to turn the call to Jeff. Jeff?

Jeff Householder

Thank you, Beth. Good morning, and thank you for joining our call today. I'll begin with Slide 4, our financial highlights for the year. In 2023, our team executed successfully on all fronts, leading to our 17th year of increased earnings, excluding the Florida City Gas transaction costs. We also had a milestone 20th consecutive year of increased annual dividends. In spite of significantly warmer temperatures and rising interest rates, we generated adjusted EPS of $5.31, representing 5.4% growth over 2022, largely driven by incremental gross margins of $33.9 million. The team's collective efforts drove this performance while successfully consummating the largest acquisition in our history, closing the transaction in record time. Our legacy businesses continued their impressive growth trajectory as we invested $211 million in capital projects, advanced our regulatory initiatives, and prudently managed expenses. We continued expanding our footprint with strong customer gains in our regulated natural gas distribution businesses, with an impressive 5.4% average residential customer growth rate for our combined Delmarva service territories and nearly 4% in Florida.

We also delivered on several opportunities to expand our natural gas transmission systems, and we're not slowing down. Currently, Peninsula Pipeline has four projects before the Florida Public Service Commission for approval. These projects include over 35 miles transmission infrastructure designed to meet growing customer demand in our gas distribution systems. Additionally, Eastern Shore Natural Gas's Worcester Resiliency upgrade project is progressing well. We'll discuss these expansion projects in more detail later in the presentation.

Of course, our most significant growth effort in 2023 was the successful completion of the Florida City Gas acquisition. It was a strategic move for us, more than doubling our footprint in a very attractive market where we have already operated for 40 years. We expect the transaction to drive significant incremental earnings growth well into the future as we deploy our operational and regulatory expertise on a much broader scale. Late in the fourth quarter of 2023, we began the process of integrating our Florida natural gas businesses, which we'll discuss in a moment. But I'd like to note that we are already executing on projects that demonstrate the value of this strategic acquisition.

For example, we are finishing the regulatory applications for new capital projects to connect three landfill RNG sites to FCG's distribution system. We expect these filings to be submitted before the end of the month. In December, we also once again expanded our propane footprint in North Carolina, adding 3,000 new customers with the acquisition of J.T. Lee and Son's propane assets. This acquisition allows us to expand within growth areas in North Carolina and capture synergies with our prior acquisitions in the state.

Our performance in 2023, along with our expectations for FCG's contributions, validates our strategic growth models and reinforces our commitment to achieving our earnings and capital guidance. Today, we are reaffirming our outlook for $6.15 to $6.35 per share in 2025 and $7.75 to $8 in 2028, as well as our five-year capital expenditure guidance of $1.5 billion to $1.8 billion by 2028. We're looking at 2024 as a transition year as we continue the FCG integration and execute on the organic opportunities across our combined businesses. For this reason, we're providing 2024 EPS guidance of $5.33 to $5.45 per share to give you more clarity on our pathway to 2028.

Turning now to Slide 5, where we provide details on the growth drivers behind the $33.9 million of incremental margin that we achieved, you can see that we were able to more than offset the impact of the warmer weather and interest rate increases. The key drivers of growth in 2023 were our regulated infrastructure replacement programs and improved cost recovery mechanisms, rate changes resulting from the recent Florida natural gas base rate proceeding, our pipeline expansions and natural gas distribution organic growth and increased fees in margins per gallon in our propane business. In addition, FCG contributed $8.7 million in December after the completion of the transaction.

On Slide 6, we break down our 2023 capital investments, which surpassed $211 million. Approximately 80% of the capital investment in our legacy businesses was in our Regulated Energy segment.

I'd like to take a moment to highlight just a couple of the capital projects that we completed in 2023, and that will contribute to incremental margin in 2024. Eastern Shore Natural Gas completed its Southern Expansion project in the fourth quarter of 2023, which will produce adjusted gross margin of $2.3 million in 2024 and beyond. And Peninsula Pipeline completed its Beachside Pipeline Expansion early in the second quarter of 2023. That project contributed $1.8 million to our gross margin in 2023, and will continue to contribute approximately $2.4 million in future years.

Our regulated investments in safety and reliability under our approved infrastructure programs will also continue, including programs like GUARD and SAFE in Florida, where we are able to recognize timely cost recovery on these investments.

Last year, we also launched the largest business transformation and technology improvement initiative in the company's history. The first step in the five-year initiative is the implementation of our SAP customer service application, which is intended to improve the customer experience in our regulated utilities, standardized processes across our distribution systems, and drive operational efficiencies. We currently have regulatory approval to defer the cost of the CIS technology implementation, and we'll seek permanent rate recovery of these technology improvements as appropriate in upcoming rate cases or limited proceedings.

Slide 7 shows the impressive customer growth in our regulated natural gas distribution utilities. Our average annual residential customer additions far outpaces the national average, and this trend is expected to continue. You can also see the step change that the FCG acquisition brings in terms of incremental customers.

Looking ahead, our customer base is projected to grow annually by approximately 3% in Florida and 4% on Delmarva over the next five years. These projections are driven by expected customer demand in our service territories, which have very attractive demographics as well as our backlog of open lots in existing communities. We have continued to see strong residential customer growth even with the increases in mortgage rates over the past year.

Our disciplined capital investments will drive earnings growth well into the future. Slide 8 shows our major projects and initiatives that will drive incremental margin of approximately $15 million and $11 million in 2024 and 2025, respectively.

I'll take a brief moment to highlight a few of the new projects shown here. Our Worcester Resiliency Upgrade project, which Jim will speak about shortly, is an $80 million capital investment currently pending before FERC. We also recently filed four Peninsula Pipeline projects with the Florida Public Service Commission. These transmission projects are designed to increase supply capacity and enhance system reliability, primarily for our distribution operations.

We continue to expand our systems in Florida to meet customer demand. Once approved, we will begin construction immediately and expect to begin generating margins in late 2024 or early 2025.

As I mentioned earlier, we are also finalizing the regulatory filings for three RNG transmission projects that will provide pathways for produced RNG to get to market via the Florida City Gas distribution systems. These new projects are also expected to begin generating margin at the end of 2024 and into early 2025.

As shown on Slide 9, on November 30, 2023, we successfully completed the FCG acquisition in record time, thanks to the dedication and enthusiasm of our team. Any organization is only as good as its people, and we were thrilled to officially welcome Florida City Gas employees to the Chesapeake Utilities family late last year.

We're lucky to have such a great group join our team. Culturally, there's a strong fit, which certainly helps keep our integration and growth plans on track and on time. Strategically, Florida City Gas also meshes well with our legacy businesses with significant opportunities to drive growth, identify operational synergies and begin to pursue recovery of the transaction premium.

We began the integration process for purpose in December, and Beth will discuss our plans in more detail shortly. I'll discuss a few of the broader areas now. One, there are one-time transaction synergies. For example, several FCG management employees return to their former NextEra positions, and we've been able to absorb these jobs within our existing management team.

Two, we are pursuing operating efficiencies across the Florida Natural Gas businesses as well as our entire enterprise. Again, as an example, we will jointly administer both the FPU and FCG infrastructure replacement programs and find operational efficiencies as a result. Three, we are executing proactive regulatory initiatives. For example, we will begin the work to consolidate various tariff provisions as we did previously with our other gas utilities, along with the initial efforts to address the goodwill related to the FCG transaction.

And four, we will make prudent capital investments on a much broader scale. I've already mentioned a couple of times the RNG transmission project filings that we're preparing, and we had previously noted the significant expected capital investments over the next five years for FCG infrastructure replacement and to meet FCG customer demand. The key takeaway here is that the FCG acquisition, along with continued robust investment in our legacy businesses, supports our goal of delivering top quartile performance for years to come.

Moving to Slide 10. In December, Sharp added to its propane footprint by acquiring operating assets from JT Lee & Sons in Cape Fear, North Carolina. We added 3,000 customers, about 800,000 gallons of annual propane distribution and 60,000 gallons of propane storage, and we were happy to welcome their talented team. As we said last year, we are not pursuing additional large transformational deals like FCG, but may undertake smaller bolt-on transactions like this one that provides scale and operating efficiencies.

With that, I'll turn the call back to Beth. Beth?

Beth Cooper

Thanks, Jeff. I'll begin with Slide 11, which shows the key drivers of our 2023 performance. Our core businesses continued to generate strong performance, delivering $1.50 of incremental EPS this year. And this was in the face of headwinds from significantly warmer weather that lowered customer consumption and impacted earnings by $0.54.

Higher operating expenses linked to growth in our core business resulted in a $0.47 impact, representing only 48.1% of the incremental margin. We were diligent about managing cost to offset warmer temperatures. The company was not immune to the challenging economic environment and the impact that had on interest rates. Those higher rates drove a $0.45 offset. One month of incremental earnings from the Florida City Gas acquisition generated an $0.18 uplift.

As Jeff said, these results are exclusive of the contribution from Florida City Gas' $25 million reserve surplus amortization mechanism or RSAM, which was approved by the Florida Public Service Commission in June 2023. The RSAM is recorded as an increase or decrease to accrued removal costs on the balance sheet with a corresponding increase or decrease to depreciation and amortization expense. The RSAM provided a $5.1 million pretax or $0.20 per share reduction to depreciation expense in 2023.

On Slide 12, you can see that adjusted gross margin for 2023 increased $33.9 million and operating income increased $7.9 million or 5.5% for the year. Excluding Florida City Gas transaction-related expenses, our operating income increased $18.2 million or 12.8%. Interest charges were over 50% higher this year as the effects of the ongoing rising rate environment continued throughout the end of the year, and we incurred additional financing costs associated with Florida City Gas. Again, despite these impacts, adjusted EPS for the year improved by $0.27 per share, representing 5.4% growth.

Moving to Slide 13. Adjusted gross margin for our Regulated Energy segment was up 10.4% over last year. Operating income also increased, delivering 18.4% growth as adjusted, driven primarily by, first, permanent rate changes associated with the Florida Natural Gas rate base rate proceedings, second, Florida City Gas' earnings contribution for December, third, continued strong customer growth in natural gas distribution operations, including propane CGS conversions, fourth, additional pipeline expansions in our natural gas transmission entities, and finally, incremental margin from our regulated infrastructure program.

These factors were partially offset by the weather related reductions in customer consumption as discussed earlier. Adjusted gross margin for the unregulated energy segment increased 2.2% over last year. As you can see on Slide 14, while at the operating income level our results were down by 10.7% versus last year. Lower consumption largely from weather drove the performance, although we partially mitigated this through rate and fee management within propane and Aspire Energy.

Slide 15 shows our history of strong dividend growth and specifically the approximate 9% dividend compounded annual growth rate that we have delivered over the last 10 years. This dividend growth has been a key component of the more than 12% compound annual shareholder return over the same period. We are proud of this history and are committed to continuing our track record of driving value and returns for our shareholders. Our philosophy remains grounded in the pursuit of top quartile earnings growth, which drives top tier dividend growth, as well as continued reinvestment of 45% to 50% of our earnings back into the business to support continued capital investments.

Slide 16 shows our earnings outlook, including our diluted EPS outlook for 2024, 2025 and 2028. As you know, we typically provide a medium and longer-term earnings outlook, which aligns with our long-term strategic plan and outlook as well as our investment plans and expected returns. We recognize that we are now a larger company with a markedly larger footprint and more significant growth opportunities.

We are also integrating a company that was a subsidiary of a much larger entity, but which is complementary to our existing operations. Therefore, this year we are providing current year guidance as an exception. Our outlook includes our expectations for integration synergies and efficiencies, as well as some of the scale opportunities that come from deploying our expertise across a broader enterprise. It also reflects the delay in margin ramp from new capital projects that we have identified given our expected timelines for the required approvals and construction.

On Slide 17, we have outlined the pathway to our 2024 guidance. Importantly, we continue to expect strong contributions from our legacy assets as well as Florida City Gas. Our legacy businesses are expected to generate approximately $0.40 to $0.50 per share of incremental earnings. Florida City Gas is projected to add about $0.35 to $0.45 of earnings per share, which includes the interest cost associated with financing the acquisition.

We see incremental opportunities to add an additional approximately $0.20 to $0.30 per share across the enterprise as we continue the integration. And finally, the shares issued to finance Florida City Gas will result in an impact of about $1 per share as shown on this slide. We are providing these incremental ranges to give you an indication of the relative size of the contributing factors, and we expect to be able to tighten the incremental ranges over the year as we implement our plan to get us to $5.33 to $5.45 per share.

So let me touch on some of these initiatives and the levers we are pulling to achieve our targets. First, we have cost savings or synergies. This is the broadest category with the largest expected impact for 2024. This bucket includes immediate opportunities from one-off transaction synergies as Jeff mentioned, as well as additional savings we have identified.

Already, we have realized cost savings by eliminating some duplicative roles, including several leadership positions where FCG team members remained with NextEra. We also achieved synergies from the absence of certain corporate and shared service costs that NextEra had allocated to this business. Offsetting a portion of these synergies though are some transition costs we are paying to NextEra until we convert over their systems.

Additionally, we will also incur some incremental corporate expenses in such areas as audit fees and insurance. In addition, as you know, we have spent considerable time working to optimize our operations while fostering the culture that has underscored our success. We have worked to eliminate operational silos by simplifying our organizational structure, moving toward greater standardization of our processes, improving technology, and increasing collaboration across our businesses. We are continuing these efforts recognizing we have additional opportunities for these types of improvements across our now larger enterprise.

Finally, we will continue to be laser focused on managing our payroll and T&E expenses in the same way and following the same approach we have exhibited over the last several years in managing our cost. As you can see on this slide in green, we also have a number of key levers that we are managing in order to achieve our near-term guidance that provide a pathway to achieving our long-term guidance.

While we have shown some of them as equal pieces, the reality is that some of these may contribute more to our earnings in 2024 as a percentage than in 2025, and some of these areas will have a longer ramp, but a more significant ongoing impact. For example, we are evaluating a number of proactive regulatory initiatives, including considering the timing of a recovery of a portion of the goodwill and consolidating best practices among the two natural gas utilities in regards to many of the various recovery mechanisms.

These are just two of the many regulatory items we are evaluating. We do know that we will continue to utilize the $25 million RSAM that we mentioned earlier to enable Florida City Gas to achieve its allowed return.

On the technology front, we are already underway in the planning for the Florida City Gas billing system to convert to our new billing system. We have begun dedicating some of the Florida City Gas team members to this effort, which will continue to ramp throughout the year. We also expect to generate savings as we more broadly integrate them to our various systems.

The next area, asset optimization or utilization has become another common phrase within the Chesapeake organization. We continuously look at our facilities and assets with an eye towards streamlining our operations. As we look across our larger organization, we see opportunities to eliminate duplicative or underutilized facilities and assets. We also have more strategic initiatives which provide the greatest upside when we think about the next five years.

Chesapeake has consistently identified and executed upon opportunities across its value chain to generate incremental margin growth. Already, Marlin has contracted with Florida City Gas to provide backup service in their highly concentrated, but growing markets. Additionally, we are considering multiple opportunities to utilize our intrastate pipeline operations to support growth opportunities across the system.

These are just some of the many similar opportunities that we are pursuing. And in terms of new capital investment, our earnings growth has been driven by the execution of prudent capital investment plans. We talked about similar plans for Florida City Gas when we announced the deal, and we are really excited about the expected capital investment opportunities created through these new service territories.

In the near-term, you will see us accelerate both the safe and guard replacement programs. As Jeff mentioned earlier, we also expect to file very soon and announce the financial economics associated with three capital projects, where we will connect RNG to Florida City Gas' system. We are also well underway on multiple intrastate pipeline projects that we hope to announce later this year. Again, while we will begin to see an impact from opportunities to accelerate infrastructure replacement programs and new projects in 2024, these will really pay off more over time and are a key driver of our 2025 and longer term 2028 outlook.

As I mentioned and as shown to the right, we've already recognized benefits from the transaction in just three short months. We are committed to achieving the guidance we have established for 2024, 2025 and the longer term and look forward to updating you on our progress throughout the year.

Turning to Slide 19, we show our forecasted 2024 to 2028 capital investment and as you can see, we are reaffirming our previous capital investment guidance of $1.5 billion to $1.8 billion by 2028 and we continue to expect an approximate run rate of $300 million to $360 million per year, including for 2024.

On Slide 20, we show more detail on this projected capital expenditure spend for the five-year period. As you can see, with Florida City Gas, we are more heavily weighted toward our regulated energy segment with almost 90% of our capital expenditure plan dedicated to our regulated asset base. These investments will drive continued regulated customer growth, bolster the safety and reliability of our systems, and by investing in pipelines and interconnect, create additional pathways to market for sustainable fuels.

More specifically, we expect to invest between $600 million and $645 million in regulated distribution growth, $435 million to $590 million in regulated transmission growth, $300 million to $340 million in regulated infrastructure programs, $140 million to $165 million in investments in our unregulated businesses and $70 million to $90 million in support of our five year technology roadmap.

Turning to Slide 21. With our FCG financing plan, our top priority was to maintain a strong balance sheet and we executed a financing plan consistent with an investment grade ratings profile. As this slide shows, we accomplished our financing objectives, achieving an equity to total capitalization ratio of 47% at the end of 2023.

On October 31, we priced a $550 million private placement with a weighted coupon rate of 6.54%. In early November, we raised about $380 million in gross proceeds post-green shoot in an equity offering. As a result, we issued 4.4 million shares, resulting in 22.2 million shares outstanding at year end. For the year, stockholders equity increased by $413 million or approximately 50%, primarily driven by our equity financing for the Florida City Gas acquisition, our strong net income performance and issuances through our dividend reinvestment and stock compensation plan. This was partially offset by dividend payments of approximately $44 million.

We are also reinvesting about 55% or greater of our earnings back into our business to fund future capital investments. Historically, we have also dribbled out smaller amounts of equity over time to manage to our target capital structure. We will continue to follow this strategy as we carry out our five year capital plans.

As you can see on Slide 22, we have a long-term debt profile that has minimal maturities over the next two years. This gives us the flexibility to execute on our robust capital plan while making progress on the integration and navigating through the uncertain economic environment.

Now, I would like to touch on our financing capacity and requirements, which are highlighted on Slide 23. The strength of our balance sheet and our liquidity position supports our investment plan. We have remaining capacity on our shelf agreements and revolving credit facility, which provides more immediate access to debt capital.

From 2024 through 2028 we anticipate securing additional permanent financing to support our capital projection, which we will do through an appropriate mix of equity and debt with a target to achieve an equity to total capitalization ratio of 50% by 2028. Finally, as promised last quarter post-acquisition, we will be pursuing a credit rating.

With that, I will now turn the call over to Jim. Jim?

Jim Moriarty

Thank you, Beth and good morning. It's great to be with you all today. Moving to Slide 24, we provide an overview of key regulatory initiatives that were recently completed or are well underway. In Florida, we have three full quarters of earnings associated with the permanent rate changes from our recent Florida rate case and we expect to recognize close to $17.2 million in 2024.

Florida City Gas rates became effective on May 1, 2023 with an incremental $14.1 million rate increase and an allowed ROE of 8.5% to 10.5%. On January 30, 2024, we filed a rate case for our Maryland division, Sandpiper Energy and Elkton Gas, which I will cover in more detail on the next slide. Our proposal to consolidate the three entities builds off of the process that we followed in Florida. While each jurisdiction is different we are looking forward to a similarly constructive process in Maryland.

On the infrastructure side, we have a number of program initiatives underway, including the GUARD and SAFE programs in Florida. These programs are contributing to our ability to maintain safe and reliable service for our customers, which also contribute to margin growth over the next 10 years.

Let me spend a few minutes highlighting our Maryland rate case shown on Slide 25. As I mentioned, we proposed consolidating our three Maryland distribution companies into one legal entity required to come back pursuant to a previous regulatory filing for Sandpiper Energy, we are proposing a $6.9 million rate increase, which is the first rate increase we have sought in 16 years. Inclusive in the filing are other tariff changes, including a new technology cost recovery rider, a proposed underserved area rate which will enable expansions to meet demand, as well as a program for evaluating extensions to multifamily projects.

On Slide 26, we highlight another significant project well underway, the Worcester Resiliency Upgrade, an approximately $80 million project for a liquefied natural gas storage project in Maryland. This facility, which consists of five low-profile horizontal storage tanks will allow Eastern Shore Natural Gas to provide critical energy service during the peak winter heating season, particularly to our growing distribution utilities on the Delmarva Peninsula.

The FERC held a public scoping session for the local community in December, and it was rewarding to hear all attendees speak in favor of the project. Eastern Shore continues to execute its robust public outreach and engagement program, most recently holding update meetings with officials representing the project area and also conducting emergency response training with first responders. The FERC's environmental assessment is the next major milestone, which is anticipated to be issued in April of 2024.

I would like to spend a moment to review the hydrogen initiatives we have underway to help advance hydrogen's potential as a common fuel source. In the near term, as shown on Slide 27, we are helping to foster a productive and supportive landscape with dedicated initiatives related to safety, awareness, training, education and community involvement as well as conducting real-world testing. The work is laying the foundation for eventual hydrogen production and delivery to end users or for industrial processes through service contracts.

As a partner on the MACH2 Hydrogen Hub project, we are working to bring affordable and environmentally responsible solutions to customers in Delaware, Southern New Jersey, and Southeastern Pennsylvania. Beyond MACH2, we have made Marlin fleet investments and have conducted tests at eight flags to demonstrate hydrogen's potential as a viable option for industrial gas users.

We are also working on other sustainable energy initiatives and look forward to updating you at the appropriate time. As we have highlighted many times, our company culture is firmly rooted in the safety of our teams and communities. In line with our culture, we implemented our safety data management system in 2023 and then unveiled the system to our employees at the beginning of 2024. In addition, we broke ground on our second safety town located in DeBary, Florida on January 31, 2024. We will share more detail on our dedicated safety programs in our inaugural safety and reliability report, which will be published soon.

We are transitioning this year from a single large sustainability report to three smaller focused topical reports as well as through investor-focused tables. This enhanced reporting approach will drive more routine reporting that ensures a steadier release of fresh information throughout the year through these reports, and we will share the data widely through our micro site, press releases, and social media.

Finally, I would like to showcase a recent achievement that really demonstrates the entrepreneurial, innovative and competitive market mindset embedded throughout our entire enterprise. Recently, at our first dairy manure RNG facility at Full Circle Dairy in Florida, we introduced a groundbreaking new technology. A fully self-contained CNG, RNG fueled farm irrigation and waste pumping unit. This unit, which will be delivered in March of 2024, opens future opportunities for farms to convert equipment to CNG, RNG fuel.

I would like to congratulate this team and all of our teams that work hard every day on equally impressive projects.

With that, I will turn the call back to Jeff. Jeff?

Jeff Householder

Thank you, Jim. In summary, we remain committed to delivering on the attractive opportunities across our growth platforms. That includes executing on the incremental opportunities provided by the FCG acquisition and achieving returns that deliver value to our stakeholders. We believe that our disciplined investments will continue to drive top quartile earnings performance into the future.

In addition to the transformative projects we initiated and completed in 2023, we continue to take a customer-centric view of our energy delivery mission and are excited about our initiatives to enhance the customer experience. Altogether, Chesapeake Utilities is an attractive investment opportunity. Our shareholders benefit from an energized team that is focused on customers and investments to serve those customers in growing service areas. We are very committed to continuing our long-term history of superior performance.

With that, we'll take your questions. Thank you. Operator?

Question-and-Answer Session

Operator

The floor is now open for questions. [Operator Instructions] Our first question comes from Paul Fremont with Ladenburg. Please go ahead.

Paul Fremont

Thank you very much and congratulations on a great quarter. I guess my first question is, do you have a sense of when you would file a full general rate case in Florida?

Beth Cooper

Well, I can start that off and then Jeff, and Jim feel free to add any additional comments. Paul, both of the Florida natural gas units, both our own FPU and Florida City Gas. And we just in last year and received rate increases. And so, as we talked about on the phone, particularly in the case of Florida City Gas. The RSAM mechanism that they have available to them. It enables them to achieve the approved ROE bands that the PSC authorized and that they are allowed to earn. And so really for us, our focus on right now is trying to evaluate when will be the appropriate time that we may seek to go in and actually tried to get a portion of the goodwill as an acquisition premium full recovery there. And so that's really the focus right now and integrating the operations.

So we've not really focused on the requirement for rate increase at this point. And as we've talked about a lot on the call. One of the things that we are really excited about by this transaction are the opportunities that we see in terms of new investments so out of the gate, that's our focus. And those are the areas on the regulatory side that we're really focused on as well. Jeff, I don't know if you want to add anything or Jim?

Jeff Householder

I would add a comment that we are taking a look at the rates on our electric operation in Florida. Well, it's been a while since we've been, and we've made some fairly significant investments in the system. And so that might be the next likely Canada to best serve the gas unit. So we're in very recently.

Paul Fremont

Great. And then if I look at Slide 17, identified additional opportunities of that $0.20 to $0.30, does that primarily represent cost savings synergies in Florida or is that something else?

Beth Cooper

That really – Paul, that really encompasses when you look at Slide 18 and you look at I'll call it the doughnut of things that we see across the enterprise. It is some combination of those six areas with the biggest portion that we've identified in 2024 will certainly come out of that cost and operating synergies and efficiencies. As we move forward that's where I talked a little bit about right as you get into next year and the year after certainly, those pieces of the pie that are focused on new – in a new capital investment infrastructure programs, margin from the value chain as well as regulatory strategy will be a bigger piece. But all of them will play some piece in achieving that $0.20 to $0.30. That's included on Slide 17.

Paul Fremont

Great. And last question for me, can you just give us an update on where the propane business stands so far in 2024?

Beth Cooper

Well, we haven't really put any information out on that. I know, certainly with some of the reports that have been out on temperatures this year relative to last year were certainly colder on relative to the long-term normal. I think, the reports that you see and I don't think it's inconsistent in our service areas overall, still not going back to some of those 10-year normal temperatures that we expect. But again, year-over-year coming out of the gate colder than the prior year.

Paul Fremont

Great. Thank you very much.

Beth Cooper

Thank you, Paul, appreciate your feedback and questions.

Operator

Thank you. [Operator Instructions] Our next question comes from Brian Russo with Sidoti.

Brian Russo

Hi, good morning.

Beth Cooper

Good morning.

Brian Russo

Thanks for all the additional detail. But just to follow up on the focus on the acquisition, premium adjustment of recovery in Florida. When – what's the next step? And I assume that's not included in your 2025 and 2028 earnings guidance?

Beth Cooper

So Brian, as we mentioned, we're about three – right now about three months into the acquisition. And I think certainly in the near term, as we think about 2024 and 2025, we are evaluating an appropriate time to go back for a portion of that. I would not – at this point, we've not heavily factored that in at least in the near term, but it is something if we have that opportunity. I think certainly, Jeff, Cheryl [ph] and the team, Jim and the team, we would certainly pursue at the right time, but right now, again, we're focused on getting the business integrated. We've got the synergies that we've talked about.

We've got the capital investments that Jeff spoke to. You're going to hear about three of those coming here in the near future, getting those off and running. And then there are some things on the regulatory side, particularly from a best practices perspective that we're going to be focused on out of the gate.

Jeff and Jim, feel free. Any additional comments you both might want to add?

Jim Moriarty

No, I think that covered it, Beth. I mean, I would remind folks that it took us a little while to gather the savings data that's really necessary in Florida to meet the FIVE factor tests or demonstrating that we can recover parts and pieces of the premium without adversely impacting rate payers. So that's usually a year-long process, and then we would likely look to recover something, we'll begin a filing process potentially next year. There may be some other sort of small-scale things we can do along the way. But our primary focus, frankly, is growing through all of that, and we think we've got a pretty good plan in place to do it.

Brian Russo

Okay. Great. And then just to clarify, the CapEx multiyear table that you've laid out, is that all accounted for in terms of investments and projects that triangulates with the longer-term guidance? So for example, if you were to announce another propane acquisition, is that incremental to the existing capital budget that you've laid out?

Beth Cooper

That's a great question, Brian.

What I would say is given Sharp's history, they will do some – they've done some small acquisitions. And then on the propane side, our five-year projection that we've given you on the capital would include some potential very, very small propane type transaction, certainly not the larger one that we did a couple of years ago. We don't factor those types of things. But our track record and knowing the service territories and the small opportunities that may be out there now with our expanded footprint, that would be something that we might be comfortable including because they're very small.

Beyond that, the projects that we have in here, you're familiar with our strategic planning process that we've talked about many times in the past. But we take a look at all the different projects that we're working on. Some of them certainly five years out, you haven't locked in. But what you look at are the opportunities that are out there, you look at the run rate of the projects that you've achieved. You look at what capacity needs are going to be in each of our service territories. And we have a good handle on that now, certainly with Delmarva and FPU, but now with Florida City gas. And so that gives us real comfort into some of the dollars that we're putting out there and the things that we're thinking about, particularly on the regulated side.

Brian Russo

Okay. Great. And then just lastly, your outlook for distribution customer growth in Delmarva and Florida, it seems as if it's below what, I guess, the trailing 12 months was. It looks like you're forecasting 3% in Florida versus 4% in 2023, and the same with Delmarva, 4% over the next five years versus the 5% that you reported in 2023. Just can you give a little bit more insight while still well above the national average and clearly a differentiator? Just curious what you're seeing there?

Beth Cooper

Sure. Sure. Great question, Brian, we came up with those estimates based upon what is in our current backlog and what we've signed up. So what we've not included in our numbers are, for example, potential developments that might utilize natural gas that we're talking with, but they're not under contract. So you're absolutely right, going to a place of could there be a higher growth rate? Absolutely, if we sign-up additional developments and may become part of our backlog.

But we don't – what we don't want to do is come out and speculate on things that are not under contract. The other thing that I would point out is, in particular, if you look at that information that we have around natural gas distribution margin growth, that core growth, particularly in Florida, what you see is there's a very significant portion that's also being driven by commercial and industrial growth. And so that's another key component here that should stay strong as well. But what we tried to do is build our ranges based on what we've signed and what we know is out there in terms of development where service can still be connected.

Jeff Householder

I would add, Brian that we have been trying to be relatively conservative in some of these estimates as is not unusual for us. And thinking about the mortgage interest rate increases that have occurred that haven't really dampened construction activity in our service areas, but we keep expecting that it might – it might, we haven't seen much of that yet. But I think from our perspective, forecasting on the conservative side is the right way to go. We may – if construction continues at the levels that we've seen over the last several years, we might well exceed those numbers.

Brian Russo

Okay. Great. Thank you very much.

Beth Cooper

Thank you.

Operator

Thank you. Our next question comes from Chris Ellinghaus with Siebert Williams Shank. Please go ahead.

Chris Ellinghaus

Hey everybody. How are you?

Beth Cooper

Good morning.

Chris Ellinghaus

Good morning. In the margin uplift slide, the uplift for the Florida rate case kind of seems on the small side relative to the way I would typically think about seasonality for you. Can you just sort of talk about what leads you to your margin expectation for the first quarter?

Beth Cooper

In terms of from Florida City Gas or?

Chris Ellinghaus

From the rate case for the stub part in the first quarter.

Beth Cooper

Well, keep in mind that for us, we did not have a full year of permanent rates at the rate increase level. So that's why we have that incremental amount that's factoring in and actually moving up from $14 million to over $17 million in 2024. So that's the additional piece that you're seeing come through.

Chris Ellinghaus

Okay. Following up on the customer growth question. It sort of looks like in the fourth quarter, there was a little bit of a slowing in customer growth. Is that an economic slowdown that you're seeing at all?

Beth Cooper

I think that goes to what Jeff mentioned, is that we've continued to expect just given where mortgage rates have been that there might be more of a dampening. I know when we look at our backlogs and the number of customers that are in there, it certainly seems like growth is going to continue, but there could be some of that, that causes it to back off a little bit if that does pick up. Jeff, I don't know if there's anything else you might want to add to that, but…

Jeff Householder

No. I mean we have a general downturn in many of our service territories as you kind of come into the winter anyway. And so there are some limitations, frankly, in some of the towns that we serve on being able to operate, to construct service lines and those sorts of things during the winter period. So they're hugely a little bit of a downturn, but I think the economies has something to do with that as well, as Beth indicated.

Chris Ellinghaus

Okay. On Page 14 of the press release, you identified reduced demand for CNG, LNG, RNG of a nickel for the fourth quarter. Are you not ascribing that to weather effects?

Beth Cooper

No, that actually had to do, Chris, with on a – if you look at the year, so to speak, the year was pretty flat, but there was some certain quarters year-over-year were higher than others. So there's not really a change from a demand perspective. It's more the timing of some of the contracts that Marlin had entered into. And so Marlin continues to have high utilization that hasn't changed. Again, it's just the timing of when some of the contracts basically came to an end.

Chris Ellinghaus

Okay. And you did mention that Marlin has acquired some hydrogen trailers. As you do some of these projects like the Boynton Beach project or whatever on the distribution side, is there any capital included in those projects for anything in preparation of hydrogen, or is it too early for that?

Jeff Householder

Yes, it's probably a little early, although we are, in fact, thinking about that. One of the issues that we find in our systems, especially those on Delmarva, but certainly in the new construction activity and the developments in Florida. Most of that is plastic. And so we're in decent shape there. Should we find ourselves down the road in a situation where we're blending hydrogen into the natural gas streams. Some of the metal steel facilities that we have, we're going to have to think a little bit about what that looks like as we keep going.

Chris Ellinghaus

Okay, great. Thanks for the details. Appreciate it.

Beth Cooper

Thank you.

Operator

[Operator Instructions] We have no further questions at this time. I'll now turn the call back to Jeff Householder for any additional or closing remarks.

Jeff Householder

Well, thank you. We appreciate very much your participation in our call this morning. We believe we have a solid plan in place to achieve our 2024 guidance, the plan that also lays the groundwork for 2025 and beyond. As always, thank you for your interest in Chesapeake Utilities, and goodbye.

Operator

Thank you. This does conclude today's Chesapeake Utilities Fourth Quarter and Full Year 2023 Earnings Conference Call. Please disconnect your line at this time.

CHESAPEAKE
UTILITIES
CORPORATION

Fourth Quarter and Full Year 2023

Earnings Conference Call

February 22, 2024

Today's Presenters

Jeff Householder
Chairman of the Board, President, and Chief Executive Officer

Beth Cooper
Executive Vice President, Chief Financial Officer, Treasurer, and Assistant Corporate Secretary

Jim Moriarty
Executive Vice President, General Counsel, Corporate Secretary, and Chief Policy and Risk Officer

CHESAPEAKE UTILITIES CORPORATION

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward--looking statements may be identified by the use of words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities Annual Report on Form 10-K for the year ended December 31, 2023 filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share (“EPS*”). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Year End 2023 Financial Highlights

EXTENDING our consecutive earnings and dividend record

- Adjusted EPS of **$5.31**[1/], reflecting a greater than **5%** growth rate over the prior year
- **17th** consecutive year with increased earnings[2/]
- **63rd** consecutive year of paying dividends and **20th** consecutive year annualized dividends increased

driven by

STRONG INVESTMENT and REGULATORY INITIATIVES in our legacy businesses

- Adjusted gross margin growth of **$33.9** million over 2022, driven by regulatory initiatives, continued pipeline expansion projects, natural gas organic growth, incremental margin from Florida City Gas (FCG) and strong propane margin and fees
- Continued strong residential customer growth - average annual increase of **5.4%** and **3.9%**, respectively, on Delmarva and in Florida
- Deployed **$211 million** on new capital investments in our legacy businesses - **80%** are regulated investments
- Four additional transmission projects currently in the regulatory/permitting review process

while executing

SUCCESSFUL strategic acquisitions that will help propel future growth

- Completed the acquisition of Florida City Gas for **$923 million** in just over two months, doubling our presence in high growth Florida
  - Integration is underway on this largest acquisition in company history, and will continue during 2024
  - Several projects pending to connect locally landfill-produced RNG to FCG's distribution system
  - Along with continued investment in our legacy businesses, will lead to transformational growth over the next several years
- Expanded our propane footprint in North Carolina, adding **3,000** new customers, by acquiring J.T. Lee and Son's

and confidently

REAFFIRMING our previous guidance and PROVIDING 2024 guidance.

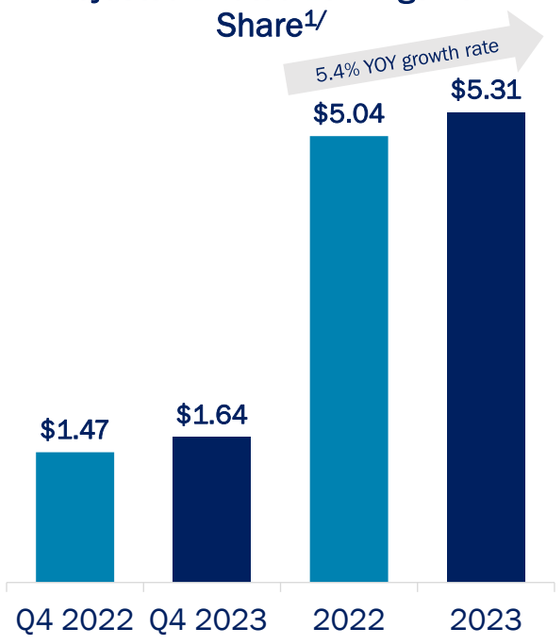
- Providing 2024 EPS guidance between **$5.33-$5.45**
- Reaffirming our 5-year capital expenditure guidance of **$1.5B-$1.8B** by 2028, with **$300M-$360M** expected in 2024
- Reaffirming our EPS guidance between **$6.15-$6.35** for 2025 and **$7.75-$8.00** for 2028

CHESAPEAKE UTILITIES CORPORATION

[1/] See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share
[2/] Excludes TCJA impact in 2017; 2023 excludes transaction-related costs associated with the FCG acquisition

2023 Financial Performance

Adjusted Diluted Earnings Per Share[1/]



Key Adjusted Gross Margin Drivers

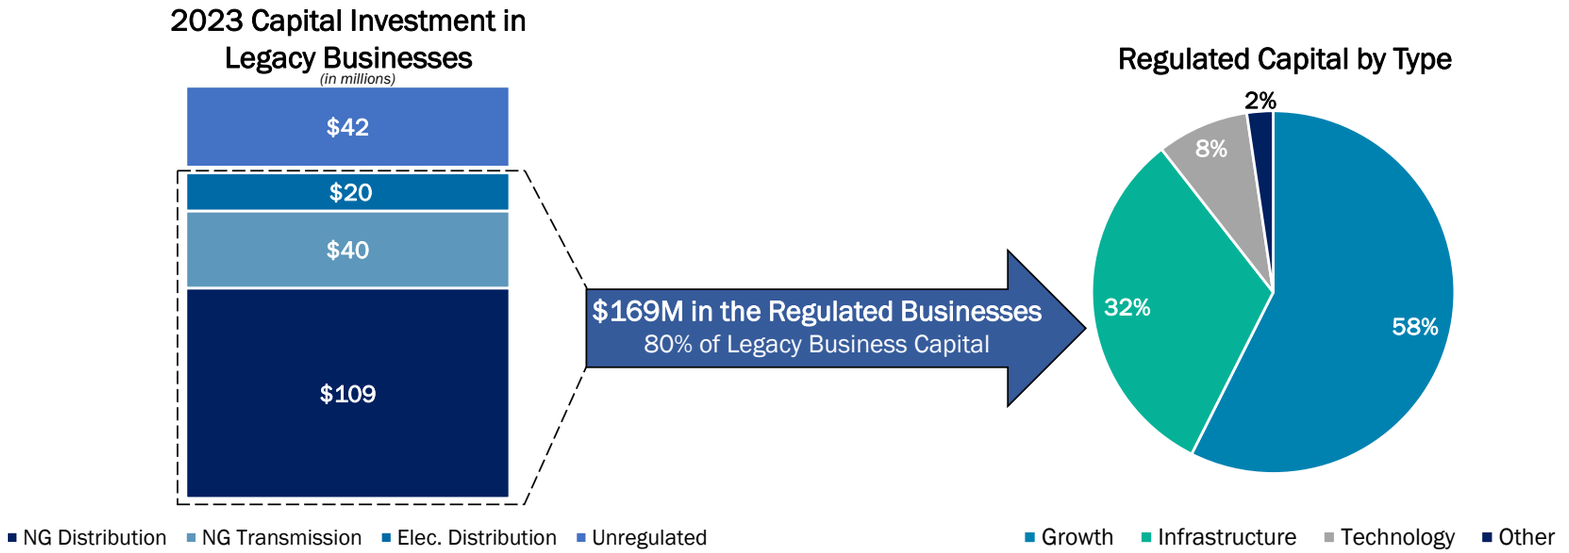
$15.6M Regulated Infrastructure Programs and Recovery Mechanisms	**$11.0M** Pipeline Expansions and Natural Gas Organic Growth	**$8.8M** Higher Propane Margins per Gallon and Fees
$8.7M Contribution from Acquisition of FCG	**$1.1M** Increased Gathering Fees for Aspire Energy	**$1.0M** Adjusted Gross Margin from Off-System Natural Gas Capacity Sales

-$13.6M Lower Customer Consumption Related to Warmer Weather

[1/] Diluted Earnings Per Share Growth from Continuing Operations; 2023 excludes transaction-related costs associated with the FCG acquisition

Significant Investment in Our Legacy Businesses

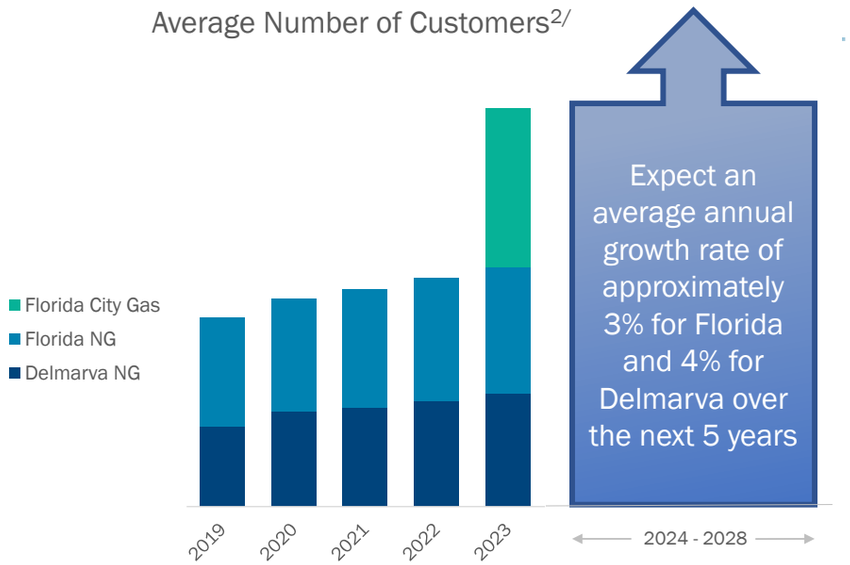
In 2023, we invested $211 million in our legacy businesses, with 80% of that in our regulated operations



Customer growth in our service jurisdictions remains strong and will continue to drive significant capital investment through the 2028 guidance period

Regulated Natural Gas Distribution Customer Growth

Our average annual residential customer growth rate for our legacy natural gas distribution businesses far outpaces the national average annual customer growth rate[1/].



- Above average annual growth rate for residential customers over the period 2021 to 2023
- From April 2020 to July 2023, Florida ranked 2nd in the nation for population growth [3/]
- Our Delaware service territory includes Sussex County, the fastest growing county in the state [3/]
- Growth in the Maryland counties we serve outpaced statewide growth [3/]
- As of the end of 2023, current backlog of 60,000 lots in existing communities

[1/] Source: EIA. Over the period 2019-2022, the latest year available, the average annual natural gas distribution customer growth rate in the U.S. was approximately 1%.
[2/] FCG customer count reflects number of customers as of December 31, 2023
[3/] U.S. Census Bureau, Population Division

Major Projects and Initiatives Update

Our projects and initiatives underway will continue to drive margin growth while new projects and regulatory initiatives will drive additional margin growth across our guidance period

Project/Initiative *(in thousands)*	Year Ended December 2021	2022	2023	Estimate for Fiscal 2024	2025
Pipeline Expansions:					
Guernsey Power Station	$ 187	$ 1,377	$ 1,478	$ 1,482	$ 1,478
Southern Expansion	-	-	586	2,344	2,344

Total	$ 8,952	$ 17,824	$ 38,099	$ 52,981	$ 63,972
Year-Over-Year Change				$ 14,882	$ 10,991

New projects in various stages of the regulatory / permitting process

Worcester Resiliency Upgrade Project - $80 million

- LNG storage peaking facility to meet critical service needs on the Delmarva Peninsula

East Coast Reinforcement Projects - $35.8 million

- Two projects (Boynton Beach and New Smyrna Beach) to increase supply capability and enhance reliability for FPU's distribution systems

Central Florida Reinforcement Projects

- Two projects (Plant City, Lake Mattie) to enhance delivery to FPU's distribution systems

FCG RNG Projects

- Several projects pending to connect locally landfill-produced RNG to FCG's distribution system

[1] *Includes adjusted gross margin generated from interim services through the project in-service date in September 2023.*
[2] *Includes adjusted gross margin during 2023 comprised of both interim rates and permanent base rates which became effective in March 2023.*
[3] *Rate case application filed with the Maryland PSC in January 2024.*

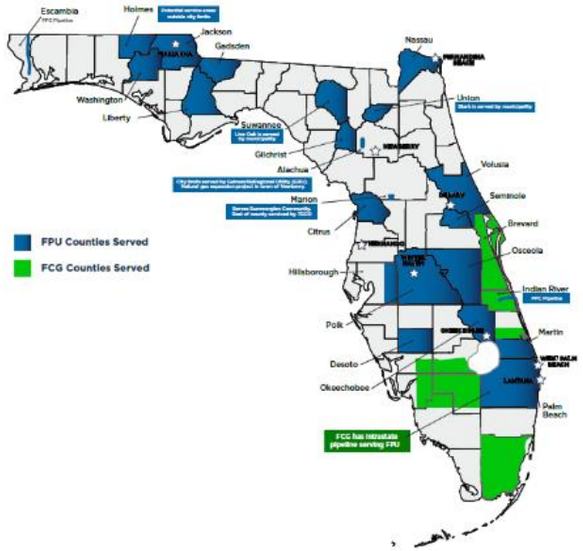
Florida City Gas Acquisition and Integration Progress

178 Florida City Gas employees joined the Chesapeake Utilities Corporation team

Expands Platform in Florida
High growth utility jurisdiction; gas system expansion opportunities

Enhances Scale and Efficiency
CPK has extensive operational and regulatory expertise

Financial Benefits
Builds on CPK's track record of successful M&A



Largest acquisition in CPK history completed on November 30, 2023

- Financed with net proceeds of an equity offering of $366M and $550M of uncollateralized senior notes
- Immediately more than doubled our customer base in Florida

Integration efforts are ongoing and will continue throughout 2024

- Introduced HyperCare team to make "Day One" and near-term onboarding process as smooth as possible
- Anticipate successful integration and moving forward together as one company
- Operating synergies to continue in 2024 with expected additional benefit in future years

Sharp Energy propane acquisition - JT Lee and Son's

Acquisition expands Sharp Energy's footprint once again in North Carolina

Sharp first established a presence in North Carolina in 2021

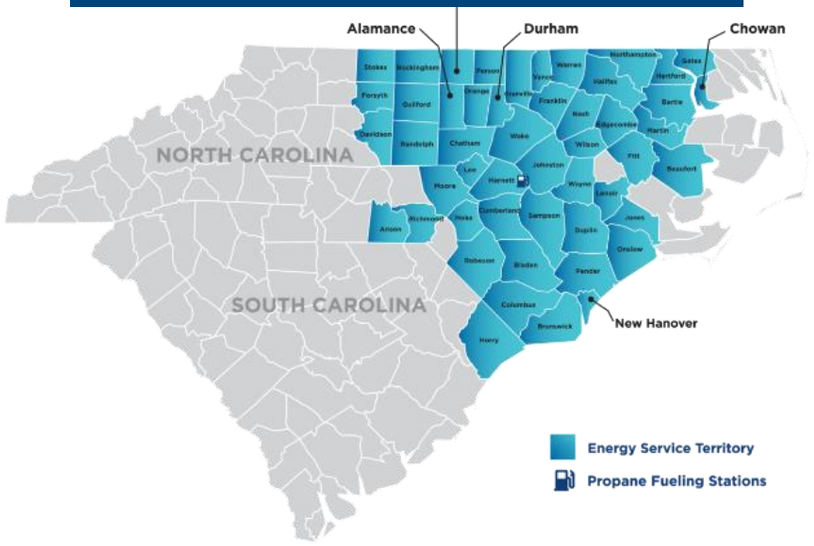
The acquisition of J.T. Lee and Son's is Sharp's 2nd acquisition in North Carolina since that time

- Acquisition highlights:

Approximately 3,000 new customers	Approximately 800,000 gallons of propane distributed annually	Bulk plant with 60,000 gallons of propane storage

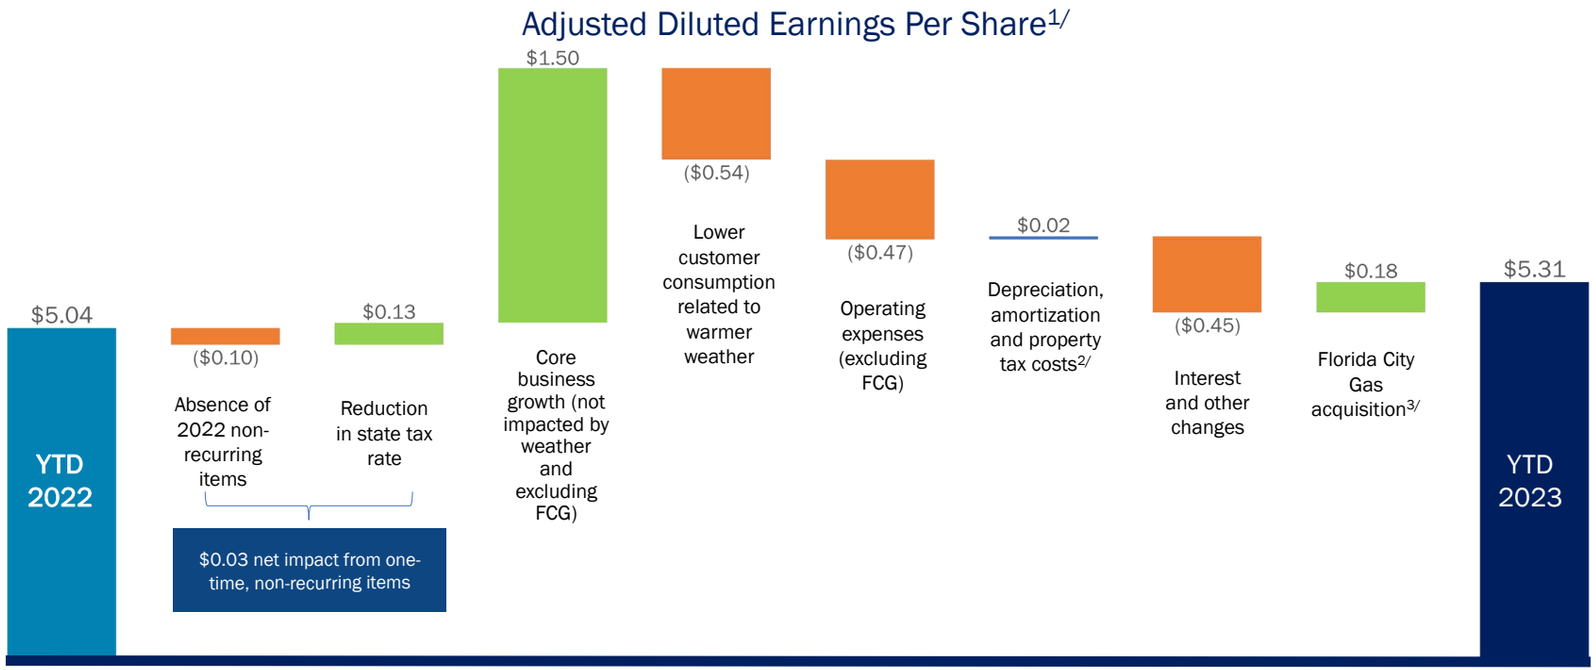
- Expands Wilmington, North Carolina-area footprint
- Expected to provide cost savings and other synergistic benefits
- Efficiencies include additional storage capacity

Our propane presence in the Carolinas continues to grow



Key Drivers of Performance – Year Ended December 31, 2023

Despite warmer weather and challenging interest rate and economic environments, our core businesses performed well, complemented by earnings related to the Florida City Gas acquisition on November 30, 2023



1/ See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share
2/ Includes a benefit from RSAM of $5.1 million, pre-tax, or $0.20 per share
3/ Does not include RSAM benefit, which is included in depreciation expense

Year-End 2023 Financial Summary

Solid performance, despite significantly warmer weather and continued inflationary environment

Consolidated *(in thousands except per share data)*	Fiscal Year 2023	Fiscal Year 2022	Change $	Change %
Total Adjusted Gross Margin[1]	**$ 454,123**	$ 420,198	$ 33,925	8.1%
Operating Income	**150,803**	142,933	7,870	5.5%
Other Income (Expense), Net	**1,438**	5,051	(3,613)	-71.5%
Interest Charges	**36,951**	24,356	12,595	51.7%
Pre-tax Income	**115,290**	123,628	(8,338)	-6.7%
Income Taxes	**28,078**	33,832	(5,754)	-17.0%
Net Income	**$ 87,212**	$ 89,796	$ (2,584)	-2.9%
Diluted EPS	**$ 4.73**	$ 5.04	$ (0.31)	-6.2%
Net Income (GAAP)	**$ 87,212**	$ 89,796	$ (2,584)	-2.9%
Transaction-related expenses, net [2]	**10,625**	-	10,625	N/A
Adjusted Net Income (Non-GAAP)[1]	**$ 97,837**	$ 89,796	$ 8,041	9.0%
Adjusted Earnings Per Share - Diluted (Non-GAAP)[1]	**$ 5.31**	$ 5.04	$ 0.27	5.4%

Excluding transaction-related expenses, operating income increased $18.2 million, or 12.8%

[1]See appendix for GAAP to non-GAAP reconciliations.
[2]Transaction-related expenses represent costs incurred attributable to the announced acquisition of FCG including, but not limited to, legal, consulting, audit and financing fees.

Regulated Energy Segment – Financial Summary

Our legacy business results reflect continued expansion efforts and customer growth; The Florida City Gas acquisition contributed one month of strong earnings

(in thousands)	Fiscal Year		Change	
	2023	2022	$	%
Adjusted Gross Margin[1]	**$ 333,587**	$ 302,252	$ 31,335	10.4%
Dep., amort. & property taxes	**71,653**	73,961	(2,308)	(3.1)%
FCG transaction-related expenses[2]	**10,355**	-	10,355	N/A
Other operating expenses	**125,380**	112,974	12,406	11.0%
Operating income	**$ 126,199**	$ 115,317	$ 10,882	9.4%

2023 Highlights

- Operating income up **18.4%** (excluding FCG transaction costs) driven by:
  - Permanent rate changes associated with Florida natural gas base rate proceeding
  - Contribution for one full month of earnings in 2023 attributable to Florida City Gas
  - Organic growth in natural gas distribution operations, including propane CGS conversions
  - Pipeline expansions by our natural gas transmission entities
  - Incremental margins from regulated infrastructure programs
  - Partially offset by reduced customer consumption which was due primarily to warmer weather

[1]See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin

[2]Transaction-related expenses represent costs incurred attributable to the acquisition of FCG including, but not limited to, legal, consulting, audit and financing fees.

Unregulated Energy Segment – Financial Summary

Higher propane margins and fees as well as increased margins for the other unregulated energy businesses significantly offset warmer weather

(in thousands)	Fiscal Year 2023	Fiscal Year 2022	Change $	Change %
Adjusted Gross Margin[1]	**$120,656**	$118,067	$ 2,589	2.2%
Dep., amort. & property taxes	**19,525**	17,809	1,716	9.6%
Other operating expenses	**76,705**	72,908	3,797	5.2%
Operating income	**$ 24,426**	$ 27,350	$ (2,924)	-10.7%

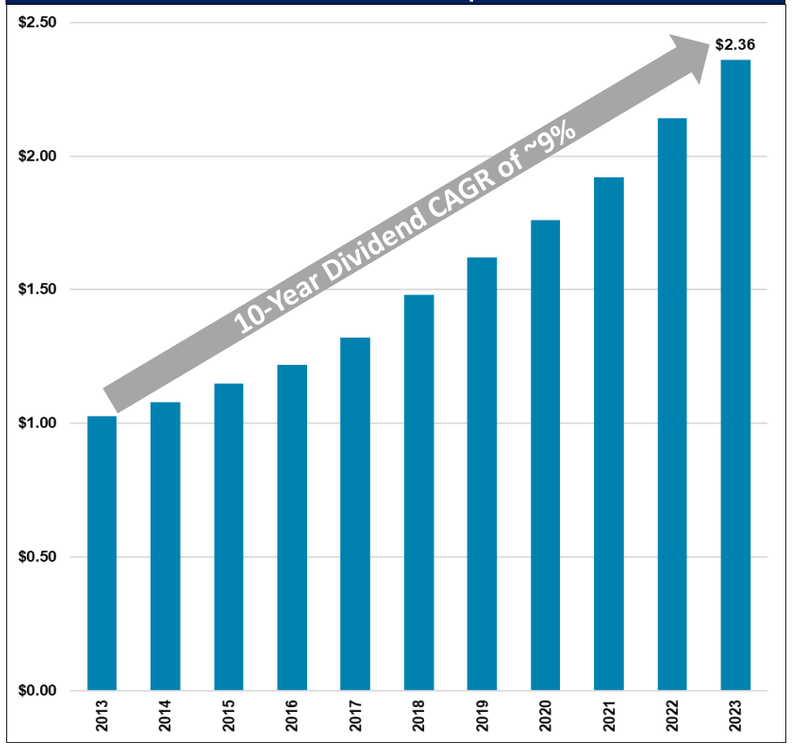
2023 Highlights

- Warmer weather impacted operating income
  - Increased propane margins and service fees offset much of the impact related to reduced customer consumption, which was primarily due to warmer weather
  - Increase in gathering margins and consumption for Aspire Energy
  - Increase in electric generation margins for our Eight Flags CHP facility

[1]See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin

Three Decades of Dividend Growth Drive Shareholder Return

Annualized Dividend per Share



12%+ Compound Annual Shareholder Return over 10 years

63 Consecutive Years of Dividend Payments – Since 1960

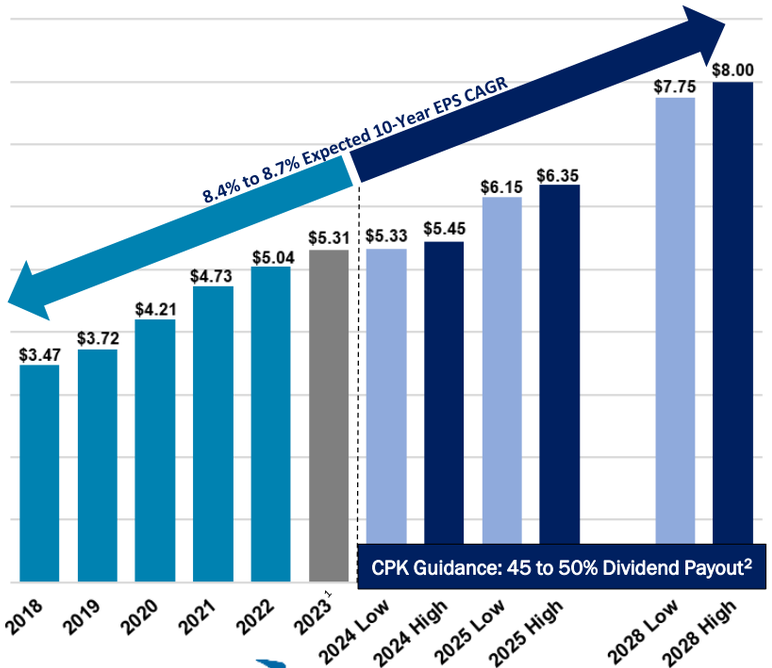
Earnings Outlook

Guidance expected to drive increased shareholder value

Earnings Per Share - Diluted



Earnings Growth Driven by Capital Investment

- 2023 Earnings Per Share of $5.31[1]
  - ~9% CAGR over last 10 years
  - 17 yrs of consecutive Adjusted EPS growth
- **2024 EPS Guidance of $5.33 to $5.45**
- **2028 EPS Guidance reiterated: $7.75 to $8.00**

Dividend Growth Supported by Earnings

- 20 Consecutive Years of Dividend Increases
- Current Annualized Dividend of $2.36/share
  - ~9% CAGR over last 10 years
- **Targeting Long-term DPO of 45 - 50%[2]**
  - Enables CPK to reinvest more back into growth plan

Best in Class Shareholder Return

- Annual shareholder return >85th percentile among peer group[3] the past 5, 10, 15 & 20 year periods
- >300% increase in stock price over the past 15 years drives a $2.1B Increase in Market Cap
- Highest P/E[4] ratio in peer group[3] at year end 2023

[1]Adjusted EPS excludes transaction-related expenses incurred attributable to the acquisition of FCG
[2]Future dividends are subject to board approval
[3]Peer Group includes select group of 10 CKP peer companies. Details can be found in the Annual Report on Form 10-K
[4]Price-to-Earnings ratio based on analyst consensus next twelve months EPS

CHESAPEAKE UTILITIES CORPORATION

Pathway to 2024 EPS[1/] Guidance

Our 2024 target is based on continued growth from our legacy businesses, a full year of contribution from the acquisition of FCG, and additional opportunities we have identified[2/]

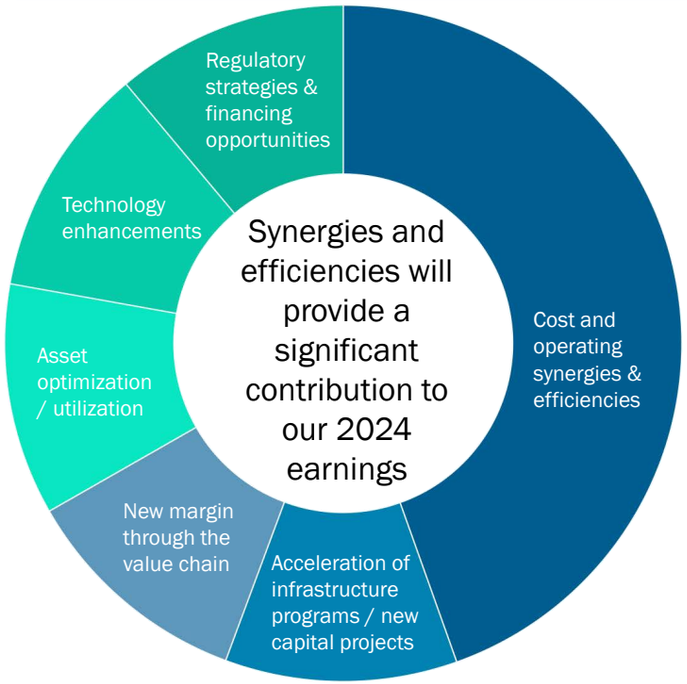
Adjusted Diluted Earnings Per Share[1/]

[1/] Diluted Earnings Per Share Growth from Continuing Operations; 2023 excludes transaction-related costs associated with the FCG acquisition

[2/] The actual contributions of each category, as well as others not defined above, may vary

Executing on the Identified 2024 Pathway

Our team has already begun to execute on additional opportunities to propel earnings growth in 2024 and will continue to evaluate and execute opportunities



We are already on the pathway for 2024

Post acquisition synergies
Payroll savings due to multiple leadership roles not joining CPK as well as NextEra allocated costs being eliminated

Executed on additional opportunities bringing:

Additional margin
Accelerating project in-service dates and executing new service agreements

Expense savings
Operating costs savings across CPK enterprise

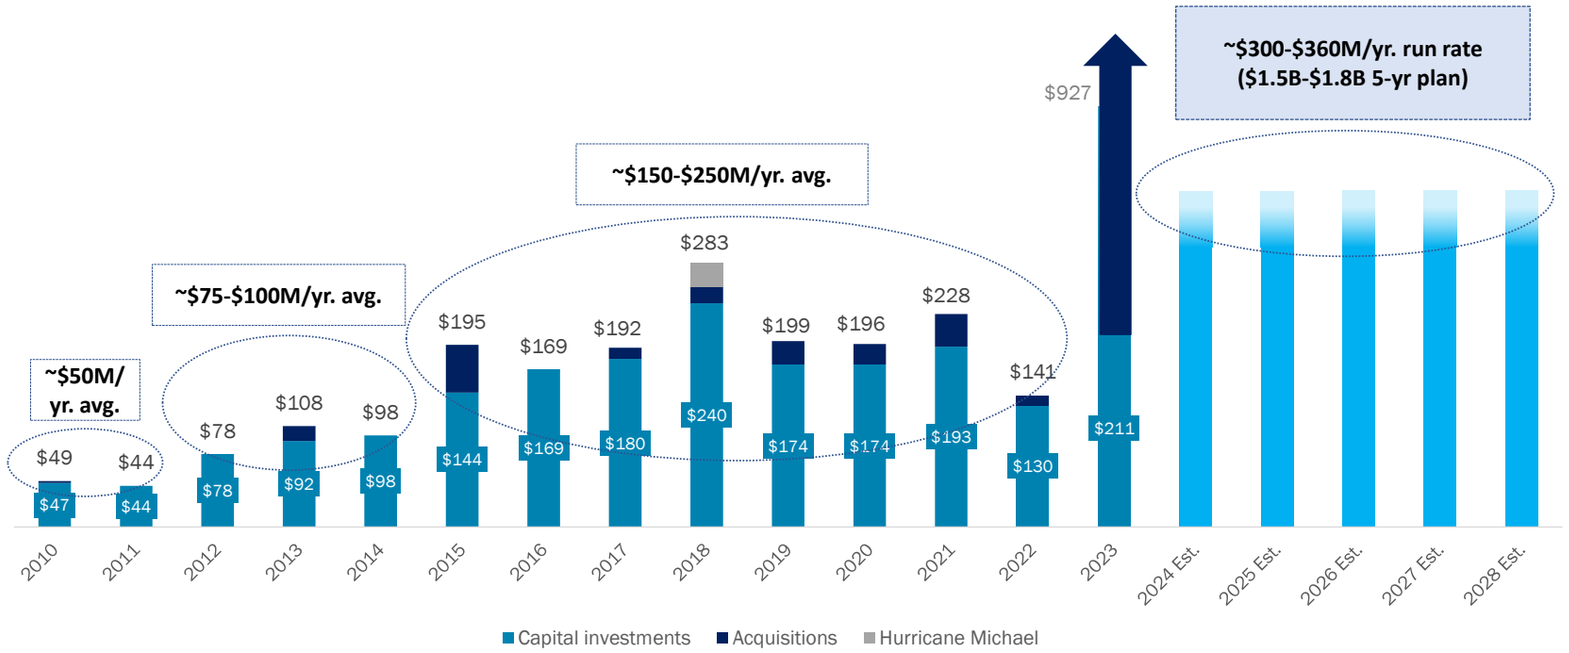
Identified new projects with the potential for a 2024 impact
Three projects planned to connect locally produced landfill RNG to FCG's system

CHESAPEAKE UTILITIES CORPORATION

[1/] The actual contributions of each opportunity category, as well as others not defined above, may vary

Long Track Record of Growing Capital Expenditures

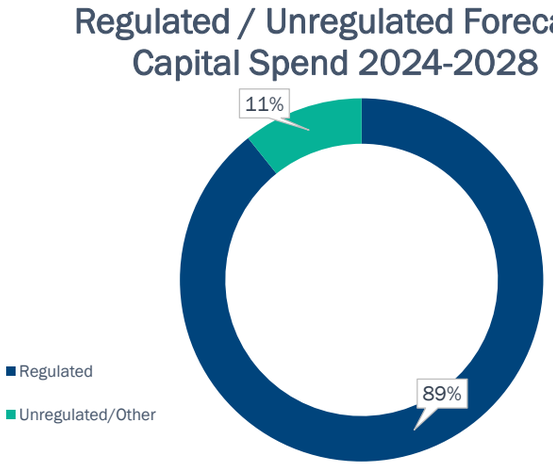
We reaffirm our previous capital investment plan guidance of $1.5B-$1.8B by 2028.



Amounts in chart reflected in millions

5-year Projected Capital Expenditures Breakdown

89% of our 5-year capital expenditure plan is projected to be invested into our regulated businesses.



Key Drivers of Investment Plan

- Investment in natural gas distribution systems to serve growing customer base and ensure safety and reliability (both legacy systems and FCG)
- Investment in gas transmission pipelines to support the utility systems, serve large users and uphold safety and reliability, including pipeline opportunities related to the FCG acquisition
- Investments in our unregulated operating business to support continued growth
- Investments in sustainable energy, such as pipelines and interconnects, to create a pathway to market for sustainable fuels
- Investments in technology to support enterprise resource planning and other systems necessary to support growth

Spend Type	5-Year Projected Capital Investment Range (in millions)
Regulated Distribution Growth	$600 - $645
Regulated Transmission Growth	$435 - $590
Regulated Infrastructure	$300 - $340
Unregulated	$140 - $165
Technology	$70 - $90

CHESAPEAKE UTILITIES CORPORATION

Capital Structure Overview – Strong Balance Sheet to Support Growth

(in thousands)	12/31/2023	12/31/2022
Stockholders' equity	$ 1,246,104	$ 832,801
Long-term debt, net of current maturities	1,187,075	578,388
Total permanent capitalization	$ 2,433,179	$ 1,411,189
Current portion of long-term debt	18,505	21,483
Short-term debt	179,853	202,157
Total capitalization and short-term financing	$ 2,631,537	$ 1,634,829
Equity to Permanent Capital	51.2%	59.0%
Equity to Total Capitalization	47.4%	50.9%
New Long-Term Debt Issuance	$ 630,000	$ 50,000
Net New Equity Issuances	$ 371,508	$ 8,916

Stockholders' Equity increased $413M since the end of 2022 primarily driven by:

- Permanent Equity Financing for the Florida City Gas Acquisition of ~$366M
- Strong Net Income performance of ~$87M
- Dividend Reinvestment and Stock Compensation Plans increases of ~$5M
- Reduced by Continued Dividend payments of ~$44M

FCG Acquisition Permanent Financing

Strong Balance Sheet Pre-FCG

53% Equity to Capitalization at 9/30/23

New Long-Term Debt

- $550M: Issued in Nov 2023
- ~6.5% Avg. Interest Rate
- 6 tranches with tenors from 3-15 yrs

New CPK Equity

- ~4.4M: New shares in Nov 2023
- ~$380M Gross proceeds

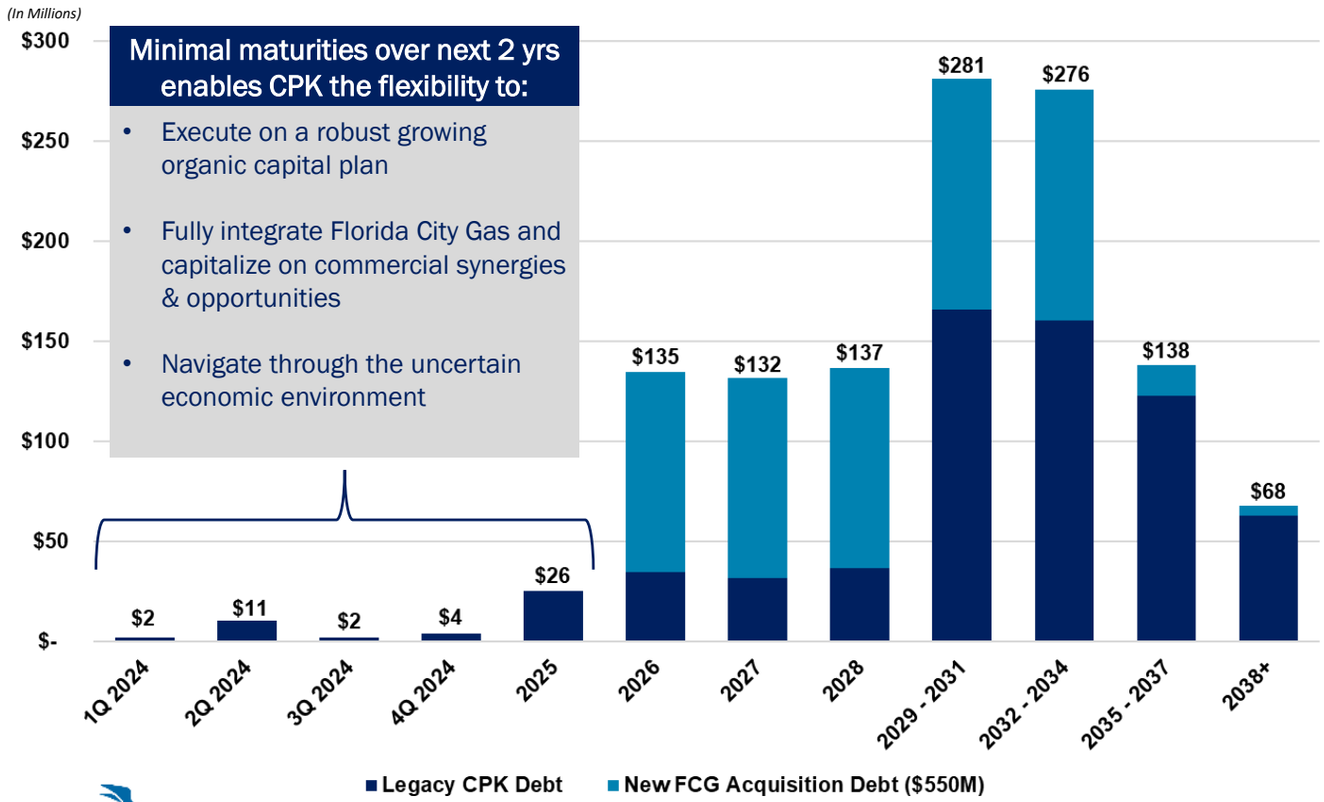
Long-Term Debt

- ~$1.2B with an Average Interest Rate <5%

Short-Term Debt

- $375M Facility with ~$180M outstanding
  - 1 year tranche: $175M, SOFR +0.75%
  - 5 year tranche: $200M, SOFR + 0.95%
- Maintaining a $50M interest rate swap at 3.98% through September 2025

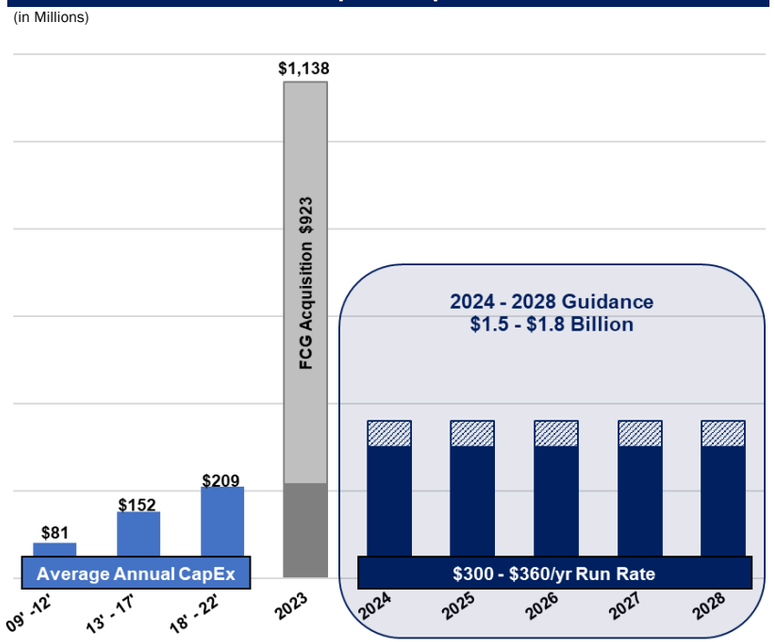
Long-Term Debt Profile – Positioned to Execute Growth Plan



Financing Capacity and Requirements

Strong balance sheet supports high quality capital plan

Growth Capital Expenditures



Strong Balance Sheet & Sufficient Liquidity Supports Investments

- 47% Equity to Capitalization at year-end 2023
- Liquidity:
  - $255M Capacity on Shelf Agreements
  - $375M Revolving Credit Facility
- Minimal debt maturities over the next 2 years

Growing Capital Investment Plan

- $1.5 - $1.8B 5-Year Capital Investment Plan Guidance through 2028
  - $300 - $360M Annual Run-Rate
  - Integration of FCG commercial synergies & identified investment opportunities
  - Focus on regulated natural gas distribution & transmission

Balanced Approach to Financing

- Permanent financing to include a mix of Equity and Debt to target a long-term Equity to Capitalization of 50%
- We will be pursuing an initial credit rating

CHESAPEAKE UTILITIES CORPORATION

Regulatory Strategy Drives Earnings

Rate Case Initiatives

Florida Public Utilities

- Rates became effective March 1, 2023
- $17.2 million rate increase; allowed ROE of 10.25% and equity percentage of 55%
- Consolidated four natural gas distribution entities

Florida City Gas

- Rates became effective May 1, 2023
- $14.1 million rate increase; allowed ROE of 8.5%-10.5%
- Reserve surplus amortization mechanism authorizes FCG to earn within its approved ROE range

Maryland LDCs

- Rate case filed January 30, 2024
- Propose consolidating our three MD distribution companies
- Separately filed combined depreciation studies

Infrastructure Programs

Florida Public Utilities and Florida City Gas

- GUARD and SAFE programs – combined projected capital investment of $410 million over a 10-year period
- Programs enhance the safety, reliability and accessibility of portions of our Florida natural gas distribution systems

Florida Public Utilities-Electric

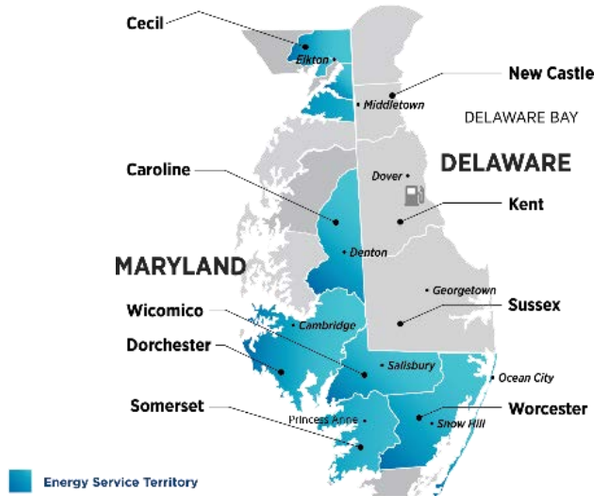
- Storm Protection Plan and Storm Protection Plan Cost Recovery mechanisms
- Capital investment of over $8 million for 2023 with continued investment going forward

Eastern Shore Natural Gas

- No specified limit on capital investment or time frame
- Recovery mechanism for capital costs associated with mandated highway and railroad relocate projects and compliance with new PHMSA regulations requiring the replacement of existing ESNG facilities

Rate Case: Maryland Natural Gas Distribution

Maryland rate case seeking to consolidate our three Maryland distribution entities and obtain a rate increase for the first time in 16 years[1/]



Rate case filed on January 30, 2024

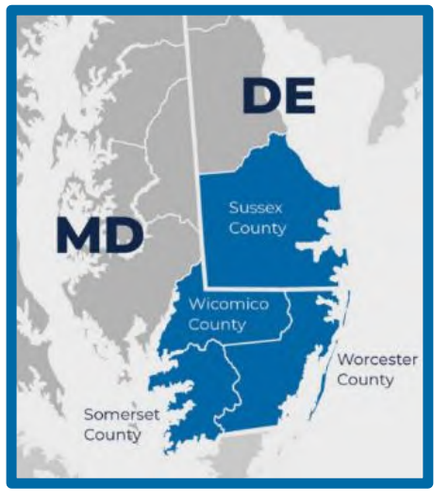
- Required come-back filing
- Proposing a $6.9M rate increase
- Seeking to consolidate our three MD natural gas distribution entities[2/] into one legal entity – Chesapeake Utilities of Maryland
- Proposing certain other tariff changes, including:
  - establishing a new technology cost recovery rider,
  - rolling certain investments into base rates,
  - establishing a regulatory asset for an anticipated energy efficiency filing, and
  - establishing an under-served area (USA) rate and a program for evaluating extensions to multi-family projects
- Separately filed a consolidated depreciation study to revise depreciation rates on a consolidated basis

[1/] In 2019, prior to being acquired by CPK, Elkton Gas was approved for a rate increase of approximately $90.5K; prior to that, Elkton had not increased rates since 2008.

[2/] Currently: Chesapeake Utilities-Maryland Division, Sandpiper Energy, Inc. and Elkton Gas Company

Federal Certificate Proceeding: Worcester Resiliency Upgrade

Eastern Shore Natural Gas project designed to meet critical energy service to customers during the peak winter heating season



- $80 million planned liquefied natural gas storage facility in Bishopville, MD
- Project consists of five low-profile horizontal storage tanks allowing for up to 0.5 million gallons of storage plus pipeline looping and additional upgrades
- Improvements will help protect against weather-related disruptions, keeping energy prices affordable
- 30-year agreements with customers

July 2023
ESNG held a public information session for the local community

August 2023
ESNG files project application with FERC[1/]

October 2023
Open House held by ESNG for the local community

December 2023
Public scoping session for the local community held by FERC

April 2024
FERC's Environmental Assessment anticipated to be issued

December 2024
FERC's issuance of Order authorizing the project anticipated

3Q 2025
Anticipated in-service date

Chesapeake Utilities' Hydrogen Focus and Near-term Initiatives

Hydrogen has the potential to become a more common fuel source in the lower-carbon energy future

CPK has a two-part strategy to help educate and further hydrogen's potential as a common fuel source:

Near- and Medium-Terms

- *Helping to shape hydrogen's potential to become a common fuel source in the future by fostering safety, awareness, training, education and community involvement and conducting real-world testing*

Long-Term

- *Provide hydrogen to end-users or for industrial processes though service contracts that align with CPK's long-standing strategy to provide energy that supports a more sustainable future*

Developing the foundation for the long-term:

- ✓ Our Marlin Gas Services subsidiary has invested in hydrogen transport trailers
- ✓ Marlin transported hydrogen for blending with natural gas at our Eight Flags CHP facility to demonstrate hydrogen is a viable option for industrial gas users
- ✓ CPK is an active participant in the Mid-Atlantic Clean Hydrogen Hub[1/] – MACH2™. Our role involves:
  - Promoting safety and workforce development through awareness, training and education at our state-of-the-art Safety Town facility in Dover, DE
  - Evaluating hydrogen production and delivery to the transportation sector
- ✓ Partnering with higher level educational institutions in multiple service territories to advance R&D initiatives
- ✓ Utilize Safety Town to test hydrogen on company assets, such as pipes, meters and valves to lead to greater understanding and expansion of hydrogen use

Initiatives will continue to evolve as a greater amount of R&D related to hydrogen is conducted and legislation and regulation continue to evolve.

[1/] MACH2™ is a collaboration between Delaware, southern New Jersey and southeastern Pennsylvania, which was awarded federal funding up to $750 million in October 2023, one-third of which is estimated to be allocated to Delaware

Chesapeake Utilities – A Culture of Safety and Innovation

First and foremost, we are focused on the safety of our people, the communities we serve and the reliability of our systems

- Our Safety Data Management System was implemented in 2023 and rolled out to all employees in early 2024
- We broke ground on our second Safety Town, located in DeBary, Florida, on January 31, 2024

- More information on our safety programs, initiatives, and progress made towards achieving our safety targets will be available in our upcoming Safety and Reliability report

Our special culture nurtures an entrepreneurial, innovative and competitive market mindset across the organization

- As construction of our first dairy manure RNG facility at Full Circle Dairy (Lee, Florida) is underway, we are introducing groundbreaking technology - a fully contained CNG/RNG fueled self-contained farm irrigation and waste pumping unit
- The unit, expected to be delivered to the facility in March 2024, opens future opportunities for farms looking to convert equipment to be CNG/RNG-fueled

Investment Proposition – Committed to Superior Performance

We continually increase shareholder value through our:

Our foundation for growth remains strong

TRACK RECORD

Over and over, we have proven we get it done; we have a long history of top-tier earnings and dividend growth

- Consistently beating expectations, recording 17 years of consecutive earnings per share growth* and 20 consecutive years of increasing the dividend

ENERGIZED TEAM

We have the expertise to balance project development and execution

- Our team prioritizes our people, our customers, our assets and our communities while striving to deliver growth and value for our stakeholders

FINANCIAL DISCIPLINE

We are steadfast in our commitment to top quartile earnings performance & maintaining a strong balance sheet

- Providing EPS guidance for 2024 between $5.33 to $5.45 and reaffirming our targeted 2025 EPS between $6.15 to $6.35, growing to $7.75 to $8.00 by 2028, an 8% CAGR over the period

PLATFORMS FOR GROWTH

We identify and execute steady, return-oriented capital investments across our business units

- Building on our most recent five-year expenditures of $1.9 billion, our cap ex guidance of $1.5 billion to $1.8 billion through 2028, driven by our legacy businesses and benefits from Florida City Gas acquisition

CHESAPEAKE UTILITIES CORPORATION

* Earnings per share growth excludes TCJA impact in 2017; 2023 excludes transaction-related costs associated with the FCG acquisition

Weather Impacted Customer Consumption During 2023

Exceptionally Warm Weather Across All Service Areas

- Warmer temperatures throughout the year have significantly impacted our earnings
- More significant impact on Delmarva and in Ohio given the heat load in our northern service areas
- Mitigating actions to overcome warmer weather have included:
  - regulatory initiatives including changes in rate design
  - organic growth
  - increased propane margins and fees
  - contributions from FCG

Mission, Vision and Values

OUR Mission

We deliver energy that makes life better for the people and communities we serve.

OUR Vision

We will be a leader in delivering energy that contributes to a sustainable future.

OUR Values

Care

We put people first.
Keep them safe. Build trusting relationships. Foster a culture of equity, diversity and inclusion. Make a meaningful difference everywhere we live and work.

Integrity

We tell the truth.
Ensure moral and ethical principles drive our decision-making. Do the right thing even when no one is watching.

Excellence

We achieve great things together.
Hold each other accountable to do the work that makes us better, every day. Never give up.

CHESAPEAKE UTILITIES CORPORATION

FOR IMMEDIATE RELEASE
February 21, 2024
NYSE Symbol: CPK

CHESAPEAKE UTILITIES CORPORATION REPORTS FISCAL YEAR 2023 RESULTS

- **Full Year 2023 earnings per share ("EPS")* was $4.73, including transaction-related expenses attributable to the acquisition of Florida City Gas ("FCG") of $0.58 per share, compared to $5.04 per share in 2022**
- **Adjusted EPS**, which excludes the transaction-related expenses, was $5.31 for the year ended 2023, or an increase of 5.4 percent over 2022**
- **EPS for the fourth quarter of 2023 was $1.26, including transaction-related expenses of $0.38 per share, versus $1.47 per share for the fourth quarter of 2022**
- **Adjusted EPS** for the fourth quarter of 2023 increased by 12 percent to $1.64 compared to the fourth quarter of 2022**
- **Adjusted gross margin** increased by $33.9 million during the year driven by regulatory initiatives, natural gas organic growth and continued pipeline expansion projects, increased propane margins and fees and incremental margin from FCG**
- **Significantly warmer than normal temperatures impacted customer consumption throughout 2023, lowering both EPS and Adjusted EPS by approximately $0.54 per share for the full year and $0.14 for the fourth quarter**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the year and the fourth quarter ended December 31, 2023. The Company's acquisition of FCG was completed on November 30, 2023, and the financial results of FCG have been included from the acquisition date.

For 2023, adjusted net income**, which excludes transaction-related expenses related to the acquisition of FCG, was $97.8 million compared to $89.8 million in 2022, representing approximately 9 percent growth. Adjusted EPS** for the year ended December 31, 2023 was $5.31 compared to $5.04 per share reported in the prior-year, representing growth of more than 5 percent.

Full year earnings were driven by contributions from the Company's regulatory initiatives, organic growth in the Company's natural gas distribution businesses and continued pipeline expansion projects, increased propane margins and fees, and contributions from FCG. These improvements were partially offset by significantly warmer weather in some of our service territories throughout the year, increased interest expense attributable to higher rates on our short-term borrowings, and the impact of new senior notes and common shares issued in connection with the FCG acquisition.

In the fourth quarter of 2023, the Company's adjusted net income was $33.1 million, compared to $26.2 million reported in the fourth quarter of 2022. Adjusted EPS in the fourth quarter of 2023 was $1.64 per share, compared to $1.47 per share reported in the same prior-year period, representing growth of approximately 12 percent.

Earnings for the fourth quarter of 2023 were primarily driven by the factors discussed for the full year, with enhanced margin contributions during the quarter partially offset by reduced customer consumption compared to the prior-year period and lower adjusted gross margin from virtual pipeline services.

--more--,

2-2-2-2

“In 2023, Chesapeake Utilities delivered its 17th year of consecutive record earnings, excluding transaction costs related to our Florida City Gas acquisition, despite rising interest rates and significantly warmer temperatures,” commented Jeff Householder, chairman, president and CEO. “Our team executed on all fronts, with our legacy businesses continuing to make growth investments, advance regulatory initiatives and prudently manage expenses. Our regulated natural gas distribution businesses gained customers at more than twice the national average, we executed on several opportunities to expand our natural gas transmission systems, and our non-regulated businesses also contributed meaningfully. In November, we successfully completed the FCG acquisition and immediately began to integrate the business, which will drive significant incremental earnings growth, as we deploy our operational and regulatory expertise on a broader scale. Our collective efforts resulted in year-to-date Adjusted EPS of $5.31 versus 2022 EPS of $5.04, largely driven by incremental adjusted gross margin of $33.9 million."

“Our performance in 2023, coupled with the expected contribution of FCG and validation of our financial models for 2024, reinforces our commitment to achieving our 2025 guidance of $6.15-$6.35 per share. We are also introducing guidance of $5.33-$5.45 per share for 2024, which will be a transitional year as we begin to realize the impact of our FCG integration efforts. Across the organization, we remain committed to delivering on the attractive opportunities across our growth platforms, including executing on the incremental opportunities driven by FCG, achieving another record year of performance and driving increased shareholder value,” concluded Householder.

Acquisition of Florida City Gas

On November 30, 2023, the Company completed the acquisition of FCG for $923.4 million in cash, including working capital adjustments, pursuant to the previously disclosed stock purchase agreement with Florida Power & Light Company. Upon completion of the acquisition, FCG became a wholly-owned subsidiary of the Company and is included within the Company's Regulated Energy segment. FCG serves approximately 120,000 residential and commercial natural gas customers across eight counties in Florida, including Miami-Dade, Broward, Brevard, Palm Beach, Hendry, Martin, St. Lucie and Indian River. Its natural gas system includes approximately 3,800 miles of distribution main and 80 miles of transmission pipe. Results for FCG are included within the Company's consolidated results from the acquisition date.

In June 2023, FCG received approval from the Florida Public Service Commission ("PSC") for a $23.3 million total increase in base revenue in connection with its May 2022 rate case filing. The new rates, which became effective as of May 1, 2023, included the transfer of its Safety, Access, and Facility Enhancement ("SAFE") program provisions from a rider clause to base rates, an increase in rates associated with a liquefied natural gas facility, and approval of FCG's proposed reserve surplus amortization mechanism ("RSAM") with a $25.0 million reserve amount. The RSAM is recorded as either an increase or decrease to accrued removal costs on the balance sheet, with a corresponding increase or decrease to depreciation and amortization expense.

Capital Investment and Earnings Guidance

Because of the significance of the FCG acquisition, the Company is providing annual guidance for 2024, the first full year as a combined company. The Company expects to generate EPS of $5.33 to $5.45 per share in 2024 given the investment opportunities within and surrounding FCG, incremental margin opportunities present across the Company’s value chain, regulatory initiatives, operating synergies and other factors. The Company is also affirming its previously announced 2024 capital expenditure guidance of $300 million to $360 million.

From a longer-term EPS perspective, the Company is also reaffirming its 2025 EPS guidance range of $6.15 to $6.35, as well as the 2028 EPS guidance range of $7.75 to $8.00 per share. This would imply an

3-3-3-3

EPS growth rate of approximately 8 percent from the current 2025 EPS guidance range, or since 2018, an 8.5 percent growth rate.

The Company continues to support its previously introduced capital expenditure guidance for the five-year period ended 2028 that will range from $1.5 billion to $1.8 billion.

**Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit's and the overall Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 5.31**	$ 5.04	**$ 1.64**	$ 1.47

[1] Transaction-related expenses for the year ended December 31, 2023 represent costs incurred attributable to the acquisition of FCG, including pretax operating expenses of $10.4 million associated with legal, consulting and audit fees and $4.1 million of interest charges related to pretax fees and expenses associated with the Bridge Facility.

Operating Results for the Years Ended December 31, 2023 and 2022

Consolidated Results

(in thousands)	Year Ended December 31, 2023	Year Ended December 31, 2022	Change	Percent Change
Adjusted gross margin**	**$ 454,123**	$ 420,198	$ 33,925	8.1 %
Depreciation, amortization and property taxes	**91,180**	91,795	(615)	(0.7)%
FCG transaction-related expenses	**10,355**	—	10,355	N/A
Other operating expenses	**201,785**	185,470	16,315	8.8 %
Operating income	**$ 150,803**	$ 142,933	$ 7,870	5.5 %

Operating income during 2023 was $150.8 million, an increase of $7.9 million or 5.5 percent compared to the prior year. Excluding transaction-related expenses associated with the acquisition of FCG, operating income increased $18.2 million or 12.8 percent compared to the prior year. Adjusted gross margin during 2023 was positively impacted by regulatory initiatives, organic growth in the Company's natural gas distribution businesses and continued pipeline expansion projects, increased propane margins and fees and contributions from FCG. These increases were partially offset by a $13.6 million reduction in adjusted gross margin from reduced customer consumption resulting from the significantly warmer temperatures in our northern service territories throughout the year. Higher operating expenses were largely associated with increased employee costs driven by growth initiatives, the ongoing competitive labor market and higher benefits costs compared to the prior-year period. Increases in depreciation and amortization expense attributable to growth projects that were placed into service during the current year were offset by reductions related to revised depreciation rates approved in the Company's Florida Natural Gas rate case and electric depreciation study filing, and a $5.1 million RSAM adjustment from FCG.

7-7-7-7

Regulated Energy Segment

(in thousands)	Year Ended December 31, 2023	2022	Change	Percent Change
Adjusted gross margin**	**$ 333,587**	$ 302,252	$ 31,335	10.4 %
Depreciation, amortization and property taxes	**71,653**	73,961	(2,308)	(3.1)%
FCG transaction-related expenses	**10,355**	—	10,355	N/A
Other operating expenses	**125,380**	112,974	12,406	11.0 %
Operating income	**$ 126,199**	$ 115,317	$ 10,882	9.4 %

The key components of the increase in adjusted gross margin** are shown below:

(in thousands)	
Rate changes associated with the Florida natural gas base rate proceeding [(1)]	$ 13,361
Contribution from the acquisition of FCG	8,687
Natural gas growth including conversions (excluding service expansions)	6,214
Natural gas transmission service expansions	4,812
Contributions from regulated infrastructure programs	2,597
Changes in customer consumption, driven by significantly warmer temperatures	(5,096)
Other variances	760
Year-over-year increase in adjusted gross margin**	**$ 31,335**

[(1)] Includes adjusted gross margin contributions from interim rates and permanent base rates that became effective in March 2023.

The major components of the increase in other operating expenses are as follows:

(in thousands)	
Payroll, benefits and other employee-related expenses	$ 5,054
FCG operating expenses	4,190
Facilities expenses, maintenance costs and outside services	1,416
Customer service related costs	764
Regulatory expenses	658
Other variances	324
Year-over-year increase in other operating expenses	**$ 12,406**

Unregulated Energy Segment

(in thousands)	Year Ended December 31, 2023	2022	Change	Percent Change
Adjusted gross margin**	**$ 120,656**	$ 118,067	$ 2,589	2.2 %
Depreciation, amortization and property taxes	**19,525**	17,809	1,716	9.6 %
Other operating expenses	**76,705**	72,908	3,797	5.2 %
Operating income	**$ 24,426**	$ 27,350	$ (2,924)	(10.7)%

8-8-8-8

The major components of the change in adjusted gross margin** are shown below:

(in thousands)	
Propane Operations	
Increased propane margins and fees	$ 8,821
Propane customer consumption - primarily weather related	(8,235)
Decreased customer consumption due to conversion of customers to our natural gas system	(793)
Aspire Energy	
Increase in gathering margin	1,141
Increased customer consumption	496
Eight Flags	
Increased electric generation margin	1,018
Other variances	141
Year-over-year increase in adjusted gross margin**	**$ 2,589**

The major components of the increase in other operating expenses are as follows:

(in thousands)	
Increased payroll, benefits and other employee-related expenses	$ 3,959
Other variances	(162)
Year-over-year increase in other operating expenses	**$ 3,797**

Operating Results for the Quarters Ended December 31, 2023 and 2022

Consolidated Results

	Three Months Ended December 31,			
(in thousands)	**2023**	**2022**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 130,331**	$ 115,297	$ 15,034	13.0 %
Depreciation, amortization and property taxes	**20,262**	23,274	(3,012)	(12.9)%
FCG transaction-related expenses	**6,456**	—	6,456	N/A
Other operating expenses	**56,298**	49,071	7,227	14.7 %
Operating income	**$ 47,315**	$ 42,952	$ 4,363	10.2 %

9-9-9-9

Operating income for the fourth quarter of 2023 was $47.3 million, an increase of $4.4 million or 10.2 percent compared to the same period in 2022. Excluding transaction-related expenses associated with the acquisition of FCG, operating income increased $10.8 million or 25.2 percent compared to the same period in 2022, despite warmer temperatures in the Company's northern service territories during the quarter. Adjusted gross margin during the quarter was positively impacted by regulatory initiatives, organic growth in the Company's natural gas distribution businesses and continued pipeline expansion projects, increased propane margins and fees, and contributions from FCG. These increases were partially offset by a $3.9 million reduction in adjusted gross margin from reduced customer consumption attributable to intra-period weather volatility experienced in our northern service territories during the quarter. Also offsetting the increase in adjusted gross margin were higher employee costs driven by growth initiatives, the ongoing competitive labor market and higher benefits costs. Depreciation and amortization expense during the fourth quarter of 2023 includes the effects of the revised depreciation rates approved in the Company's Florida Natural Gas rate case and electric depreciation study filing, and the $5.1 million RSAM adjustment from FCG.

Regulated Energy Segment

	Three Months Ended December 31,			
(in thousands)	**2023**	**2022**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 93,458**	$ 79,452	$ 14,006	17.6 %
Depreciation, amortization and property taxes	**15,238**	18,736	(3,498)	(18.7)%
FCG transaction-related expenses	**6,456**	—	6,456	N/A
Other operating expenses	**37,393**	29,601	7,792	26.3 %
Operating income	**$ 34,371**	$ 31,115	$ 3,256	10.5 %

The key components of the increase in adjusted gross margin** are shown below:

(in thousands)	
Contribution from the acquisition of FCG	$ 8,687
Rate changes associated with the Florida natural gas base rate proceeding [(1)]	1,921
Natural gas transmission service expansions	1,836
Natural gas growth including conversions (excluding transmission service expansions)	1,536
Contributions from regulated infrastructure programs	841
Changes in customer consumption - primarily related to weather	(1,824)
Other variances	1,009
Period-over-period increase in adjusted gross margin**	$ 14,006

[(1)] Includes adjusted gross margin contributions from permanent base rates that became effective in March 2023.

The major components of the increase in other operating expenses are as follows:

(in thousands)	
FCG operating expenses	$ 4,190
Payroll, benefits and other employee-related expenses	2,753
Other variances	849
Period-over-period increase in other operating expenses	**$ 7,792**

10-10-10-10

Unregulated Energy Segment

(in thousands)	Three Months Ended December 31, 2023	2022	Change	Percent Change
Adjusted gross margin**	**$ 36,838**	$ 35,874	$ 964	2.7 %
Depreciation, amortization and property taxes	**5,025**	4,540	485	10.7 %

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Thursday, February 22, 2024 at 8:30 a.m. Eastern Time to discuss the Company's financial results for the fourth quarter and year ended December 31, 2023. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com. For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.267.6316
International: 203.518.9848
Conference ID: CPKQ423

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas transmission and distribution, electricity generation and distribution, propane gas distribution, mobile compressed natural gas utility services and solutions, and other businesses.

Please note that Chesapeake Utilities Corporation is not affiliated with Chesapeake Energy, an oil and natural gas exploration company headquartered in Oklahoma City, Oklahoma.

** Transaction-related expenses attributable to the acquisition of FCG have been excluded from the Company's non-GAAP measures of adjusted net income and adjusted EPS. See previous tables for a reconciliation of these items against the related GAAP measures.

15-15-15-15

Recently Completed and Ongoing Major Projects and Initiatives

The Company constantly pursues and develops additional projects and initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes the major projects and initiatives recently completed and currently underway. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year. The discussion of the Company's major projects accompanying this table, includes those projects which began generating adjusted gross margin in the current year, or those which are expected to contribute adjusted gross margin beginning in future years. A comprehensive discussion of all projects reflected below can be found in the Company's 2023 Annual Report on Form 10-K. The Company's practice is to add new projects and initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated.

	Adjusted Gross Margin**			
	Year Ended December 31,		Estimate for Calendar Year	
(in thousands)	2022	2023	2024	2025
Pipeline Expansions:				
Guernsey Power Station	$ 1,377	**$ 1,478**	$ 1,482	$ 1,478
Southern Expansion	—	**586**	2,344	2,344

Total	$ 17,824	**$ 38,099**	$ 52,981	$ 63,972

[1] Includes adjusted gross margin generated from interim services through the project in-service date in September 2023.
[2] Includes adjusted gross margin during 2023 comprised of both interim rates and permanent base rates which became effective in March 2023.
[3] Rate case application filed with the Maryland PSC in January 2024. See additional information provided below.

16-16-16-16

Discussion of Major Projects and Initiatives

Pipeline Expansions

Southern Expansion
Eastern Shore installed a new natural gas driven compressor skid unit at its existing Bridgeville, Delaware compressor station that provides 7,300 Dts/d of incremental firm transportation pipeline capacity. The project was placed in service in the fourth quarter of 2023.

Beachside Pipeline Expansion
In June 2021, Peninsula Pipeline and FCG entered into a Transportation Service Agreement for an incremental 10,176 Dts/d of firm service in Indian River County, Florida, to support Florida City Gas' growth along the Indian River's barrier island. As part of this agreement, Peninsula Pipeline constructed approximately 11.3 miles of pipeline from its existing pipeline in the Sebastian, Florida area east under the Intercoastal Waterway and southward on the barrier island. The project was completed and went into service in April 2023. Subsequent to the acquisition of FCG, the agreement is now an affiliate agreement.

North Ocean City Connector
During the second quarter of 2022, the Company began construction of an extension of service into North Ocean City, Maryland. The Company's Delaware natural gas division and its subsidiary, Sandpiper Energy, Inc. installed approximately 5.4 miles of pipeline across southern Sussex County, Delaware to Fenwick Island, Delaware and Worcester County, Maryland. The project reinforces the Company's existing system in Ocean City, Maryland and enables incremental growth along the pipeline. Construction of this project was completed in the second quarter of 2023. The Company filed a natural gas rate case application with the PSC for the state of Maryland in January 2024 as discussed below. Adjusted gross margin in connection with this project is contingent upon the completion of the rate case and inclusion of the project in rate base.

St. Cloud / Twin Lakes Expansion
In July 2022, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with the Company's Florida subsidiary, Florida Public Utilities ("FPU"), for an additional 2,400 Dts/day of firm service in the St. Cloud, Florida area. As part of this agreement, Peninsula Pipeline constructed a pipeline extension and regulator station for FPU. The extension supports new incremental load due to growth in the area, including providing service, most immediately, to the residential development Twin Lakes. The expansion also improves reliability and provides operational benefits to FPU's existing distribution system in the area, supporting future growth. Construction is complete and the project went into service in July 2023.

Wildlight Expansion
In August 2022, Peninsula Pipeline and FPU filed a joint petition with the Florida PSC for approval of its Transportation Service Agreement associated with the Wildlight planned community located in Nassau County, Florida. The project enables the Company to meet the significant growing demand for service in Yulee, Florida. The agreement allows the Company to build the project during the construction and build-out of the community, and charge the reservation rate as each phase of the project goes into service. Construction of the pipeline facilities will occur in two separate phases. Phase one consists of three extensions with associated facilities, and a gas injection interconnect with associated facilities. Phase two

will consist of two additional pipeline extensions. Various phases of the project commenced in the first quarter of 2023, with construction on the overall project continuing through 2025.

Lake Wales
In February 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with the Company's Florida natural gas distribution business, FPU, for an additional 9,000 Dt/d of firm service in the Lake Wales, Florida area. The PSC approved the petition in April 2023. Approval of the agreement enabled Peninsula Pipeline to complete the acquisition of an existing pipeline in May 2023 that is being utilized to serve the Company's current and new natural gas customers.

Newberry
In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dt/d of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of propane community gas systems in Newberry was made in November 2023, and the Florida PSC is scheduled to vote on this in March 2024. The Company anticipates beginning the conversions of the community gas systems in the second quarter of 2024.

Worcester Resiliency Upgrade
In August 2023, Eastern Shore filed an application with the FERC requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, DE and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. Eastern Shore has requested certificate authorization by December 2024, with a target in-service date by the third quarter of 2025.

East Coast Reinforcement Projects
In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU’s distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC is scheduled to vote on the projects in March 2024.

Central Florida Reinforcement Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU’s distribution system in the areas of Plant City and Lake Mattie with an additional 5,000 Dts/day and 8,700 Dts/day, respectively.

CNG/RNG/LNG Transportation and Infrastructure

18-18-18-18

The Company has made a commitment to meet customer demand for CNG, RNG and LNG in the markets we serve. This has included making investments within Marlin Gas Services to be able to transport these products through its virtual pipeline fleet to customers. To date, the Company has also made an infrastructure investment in Ohio, enabling RNG to fuel a third-party landfill fleet and to transport RNG to end use customers off its pipeline system. Similarly, the Company announced in March 2022, the opening of a high-capacity CNG truck and tube trailer fueling station in Port Wentworth, Georgia. As one of the largest public access CNG stations on the East Coast, it will offer a RNG option to customers in the near future. The Company constructed the station in partnership with Atlanta Gas Light, a subsidiary of Southern Company Gas.

The Company is also involved in various other projects, all at various stages and all with different opportunities to participate across the energy value chain. In many of these projects, Marlin will play a key role in ensuring the RNG is transported to one of the Company's many pipeline systems where it will be injected. The Company includes its RNG transportation services and infrastructure related adjusted gross margin from across the organization in combination with CNG and LNG projects.

As new projects are finalized, we will provide additional detail on those projects at that time. Discussed below is a current project in which we are in the construction phase:

Full Circle Dairy
In February 2023, the Company announced plans to construct, own and operate a dairy manure RNG facility at Full Circle Dairy in Madison County, Florida. The project consists of a facility converting dairy manure to RNG and transportation assets to bring the gas to market. The first injection of RNG is projected to occur in the first half of 2024.

Regulatory Initiatives

Florida Gas Utility Access and Replacement Directive ("GUARD") Program
In February 2023, FPU filed a petition with the Florida PSC for approval of the GUARD program. GUARD is a ten-year program to enhance the safety, reliability, and accessibility of portions of the Company's natural gas distribution system. The Company identified various categories of projects to be included in GUARD, which include the relocation of mains and service lines located in rear easements and other difficult to access areas to the front of the street, the replacement of problematic distribution mains, service lines, and maintenance and repair equipment and system reliability projects. In August 2023, the Florida PSC approved the GUARD program, which included $205 million of capital expenditures projected to be spent over a 10-year period.

FCG SAFE Program
In June 2023, the Florida PSC issued the approval order for the continuation of the SAFE program beyond its 2025 expiration date and inclusion of 150 miles of additional mains and services located in rear property easements. The SAFE program is designed to relocate certain mains and facilities associated with rear lot easements to street front locations to improve FCG's ability to inspect and maintain the facilities and reduce opportunities for damage and theft. In the same order, the Commission approved a replacement of 160 miles of pipe that was used in the 1970s and 1980s and shown through industry research to exhibit premature failure in the form of cracking. The program includes projected capital expenditures of $205 million over a 10-year period.

19-19-19-19

Maryland Natural Gas Rate Case

In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we are seeking approval of the following: (i) permanent rate relief of approximately $6.9 million; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses under the new corporate entity which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. The outcome of the application is subject to review and approval by the Maryland PSC.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

Weather had a significant impact on adjusted gross margin during 2023, driven largely by significantly warmer weather in some of the Company's service territories resulting in reduced consumption. This resulted in adjusted gross margin being negatively impacted by approximately $13.6 million compared to 2022.

The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the year and quarter-to-date periods ended December 31, 2023 compared to the respective 2022 periods.

HDD and CDD Information

	Year Ended December 31,			Quarter Ended December 31,

20-20-20-20

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula and in our legacy Florida operations increased by approximately 5.4 percent and 3.9 percent, respectively, during 2023.

On the Delmarva Peninsula, a larger percentage of the adjusted gross margin growth was generated from residential growth given the expansion of gas into new housing communities and conversions to natural gas as our distribution infrastructure continues to build out. In Florida, as new communities continue to build out due to population growth and the additional infrastructure to support the growth, there is increased load from both residential customers as well as new commercial and industrial customers. The details on adjusted gross margin attributable to customer growth for our legacy natural gas distribution operations are provided in the following table:

	Adjusted Gross Margin**	
	For the Year Ended December 31, 2023	
(in thousands)	Delmarva Peninsula	Florida [1]
Customer growth:		
Residential	$ 1,895	$ 1,599
Commercial and industrial	589	2,131
Total customer growth	$ 2,484	$ 3,730

[1] Customer growth amounts for our legacy Florida operations include the effects of revised rates associated with the Company's natural gas base rate proceeding, but exclude the effects of the FCG acquisition.

21-21-21-21

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $1.1 billion, which includes $923.4 million attributable to the purchase of FCG and $3.9 million related to an acquisition in the propane distribution business. The following table shows total capital expenditures for the year ended December 31, 2023 by segment and by business line:

(in thousands)	For the Year Ended December 31, 2023
Regulated Energy:	
Natural gas distribution	$ 109,245
Natural gas transmission	40,179
Electric distribution	19,745
Total Regulated Energy	169,169
Unregulated Energy:	
Propane distribution	14,287
Energy transmission	5,469
Other unregulated energy	20,508
Total Unregulated Energy	40,264
Other:	
Corporate and other businesses	1,762
Total Other	1,762
Legacy capital expenditures	**211,195**
FCG Acquisition [(1)]	**926,702**
Total 2023 Capital Expenditures	**$ 1,137,897**

[(1)] Includes amounts for the acquisition of FCG net of cash acquired and their capital expenditures from the date of the acquisition through December 31, 2023. For additional information regarding acquisitions refer to Note 4 in the Company's Annual Report on Form 10-K for the year ended December 31, 2023.

22-22-22-22

The following table shows a range of the forecasted 2024 capital expenditures by segment and by business line:

(in thousands)	2024 Low	2024 High
Regulated Energy:		
Natural gas distribution	$ 150,000	$ 170,000
Natural gas transmission	90,000	120,000
Electric distribution	25,000	28,000
Total Regulated Energy	265,000	318,000
Unregulated Energy:		
Propane distribution	13,000	15,000
Energy transmission	5,000	6,000
Other unregulated energy	13,000	15,000
Total Unregulated Energy	31,000	36,000
Other:		
Corporate and other businesses	4,000	6,000
Total 2024 Forecasted Capital Expenditures	**$ 300,000**	**$ 360,000**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth and availability of capital. Historically, actual capital expenditures have typically lagged behind the forecasted amounts. See “Capital Investment and Earnings Guidance” discussed above for additional information on our capital expenditure forecast.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 47 percent as of December 31, 2023 and included the impacts associated with financing the FCG acquisition.

[1] In accordance with the Florida PSC approval of our natural gas base rate proceeding, effective March 1, 2023, our natural gas distribution businesses in Florida (FPU, FPU-Indiantown division, FPU-Fort Meade division and Chesapeake Utilities CFG division) have been consolidated and amounts above are now being presented on a consolidated basis consistent with the final rate order.

[2] Operating revenues and volumes for FCG include amounts from the acquisition date. Customer totals for FCG reflect actual amounts at December 31, 2023 since the period from the acquisition covered only one month.

[3] Operating Revenues from "Other" sources include unbilled revenue, under (over) recoveries of fuel cost, conservation revenue, other miscellaneous charges, fees for billing services provided to third parties and adjustments for pass-through taxes.

Q1: 2024-05-08 Earnings Summary

EPS of $2.10 misses by $0.04 | Revenue of $245.74M (12.66% Y/Y) misses by $32.81M

Chesapeake Utilities Corporation (CPK) Q1 2024 Results Conference Call May 9, 2024 8:30 AM ET

Company Participants

Lucia Dempsey - Head of Investor Relations
Jeff Householder - President, Chief Executive Officer & Chairman
Beth Cooper - EVP, Chief Financial Officer, Treasurer & Assistant Corporate Secretary
Jim Moriarty - EVP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer

Conference Call Participants

Tate Sullivan - Maxim Group
Paul Fremont - Ladenburg

Operator

[Operator Instructions] Welcome to the Chesapeake Utilities Corporation's First Quarter 2024 Earnings Conference Call. [Operator Instructions] I would now like to turn the call over to Lucia Dempsey, Head of Investor Relations.

Lucia Dempsey

Thank you, and good morning, everyone. My name is Lucia Dempsey, and I'm thrilled to have joined Chesapeake Utilities Corporation last month as the new Head of Investor Relations. I'm looking forward to meeting many of you at AGA next week or at other opportunities in the coming weeks and months.

Today's presentation can be accessed on our website under the Investors page and Events & Presentation subsection. After our prepared remarks, we will open up the call for questions.

With me today are Jeff Householder, Chair of the Board, President and Chief Executive Officer; Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary; and Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer.

On Slide 3, we show our typical disclaimers while I remind you that matters discussed in this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results.

The safe harbor for forward-looking statements section of our 2023 annual report on Form 10-K provides further information on the factors that could cause such statements to differ from our actual results.

Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share, and the accompanying information includes the appropriate disclosures in accordance with the SEC's Regulation G.

A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation, our earnings release and our first quarter Form 10-Q. Now, it is my distinct pleasure to turn the call over to Jeff.

Jeff Householder

Thank you, Lucia. Good morning, and thanks to all of you for joining our call today. I'll begin with Slide 4. This quarter, our team once again executed on our long-standing strategic growth plan. Over the past several years, we've been focused on 3 fundamental drivers to support earnings growth.

First, we work hard to identify and prudently deploy investment capital that meets the service demands created by a significant customer growth. Our geographic footprint is an advantage here. Our service territories continue to experience a customer growth rate that is more than double the industry average.

Second, we proactively manage our regulatory agenda to support the approval and cost recovery of our capital projects. You'll hear us describe in a moment several projects currently in front of state and federal regulators with total investment well over $200 million.

And the third and perhaps most important of our strategic growth drivers, is the continued business transformation of our company, which is focused on our people, processes, technology and organizational structure. Our continuous improvement initiatives enable us to manage an ever-expanding business.

Turning to Slide 5. This morning, you will hear us touch on service delivery to customers and other operational accomplishments, the FCG acquisition integration process, capital project execution, regulatory advances and a number of efficiency improvements. I'm happy to report that 2 of the more significant concerns facing our company and our industry, weather and interest rates have been at least through the first quarter, far less impactful to earnings than what we experienced in 2023.

While the 2024 winter was warmer than normal in our service areas, we've been able to manage through it. Customer consumption increased in the first quarter compared to Q1 of 2023. And as we all know, interest rates appear to have at least stabilized with no increase so far this year.

Our regulated natural gas transmission and distribution businesses continue to grow. We will mention today several system expansions, which are in various stages of approval, permitting or construction. In our nonregulated businesses, we realized contributions from increased propane consumption as well as increased propane margin and service fees. This served to offset much of the warmer-than-normal weather impact.

Our Florida City Gas integration plan is on track and on schedule. And importantly, our FCG business delivered incremental margin in line with our expectations. This quarter, we immediately recognized the positive impact from our integration efforts and didn't miss a beat with our accelerated capital investment plans across our larger footprint.

We're now even more confident about our opportunities to propel future earnings growth in Florida, including through 4 projects and an expansion of the SAFE program, which are all currently filed for approval with the Florida Public Service Commission.

Across our enterprise, we are steadily advancing the capital investment projects, regulatory filings and business transformation initiatives that will support future growth and optimize our operations within our larger footprint.

We are particularly pleased to have just received approval from the Florida Public Service Commission on Tuesday for 3 new transmission expansion projects that support increased customer demand.

We remain confident in our ability to achieve our 2024 adjusted EPS guidance of $5.33 to $5.45 and our longer-term outlook for 2025 and '28 as we continue to drive shareholder value by delivering on the attractive opportunities throughout our businesses.

I will now turn to Slide 6, which covers results for the quarter. Adjusted earnings per share was $2.10 in the first quarter of this year. We also generated adjusted gross margin of $165 million, a $35 million increase over the first quarter of last year. FCG represented $25 million in adjusted gross margin in Q1. This was driven by an incremental contribution from the 2023 rate case as well as continued customer growth.

Our legacy businesses contributed another $10 million of adjusted gross margin growth, driven by contributions from incremental transmission expansion projects and organic growth in our natural gas distribution businesses, contributions from our regulated infrastructure programs and Florida natural gas base rate proceeding, higher customer consumption, increases in Aspire Energy gathering fees and higher propane consumption margins per gallon and fees.

Turning now to Slide 7. We remain intently focused on achieving synergies, optimizing operations across the enterprise and accelerating capital investment opportunities. We're taking a good look at our operations and processes, taking a best of both approach to things like customer care and project management. In places where our legacy business processes were stronger, we're bringing that strength to Florida City Gas and vice versa.

Our work so far has been encouraging. There are a lot of commonalities to our approaches and cultures, and our teams have been really engaged to learn from each other. And while the integration work continues, we are now operating as one company, and our efforts to leverage our greater footprint, optimize efficiencies and invest in growth are being applied across the whole enterprise.

Slide 8 shows the major projects and initiatives that are driving approximately $16 million of incremental adjusted gross margin growth. We have submitted 11 pipeline projects to the Florida Public Service Commission, representing approximately $152 million of capital investment. 7 of these have now been approved and 4 are under review with decisions expected this summer.

This is a record number of project filings and approvals for us. It demonstrates our ability to accelerate investment as a combined business. It also speaks to the magnitude of future growth opportunities in Florida, one of the key reasons the FCG acquisition was important to our strategy.

This quarter, we added 2 new Peninsula Pipeline company transmission projects to the table, Boynton Beach and New Smyrna Beach, representing a combined $5 million in adjusted gross margin for 2025. These extension projects will support FPU's distribution systems in the Boynton and New Smyrna Beach communities.

Those expansions are driven by the needs for increased natural gas supply to coastal portions of the state that are experiencing significant population growth. On the infrastructure replacement side, we have a number of programs well underway, including the Guard, SAFE and Storm Protection programs in Florida and the capital surcharge program on the Eastern Shore.

These programs support our ability to maintain safe and reliable service for our customers and will contribute to margin growth over the next 10 years. As new projects are developed and receive approval, they will be added to this table.

As shown on Slide 9, we've hit the ground running in 2024 with our capital investments. We've ramped up spending considerably to take advantage of both the magnitude of the growth opportunities before us and the scale benefits that bolster our ability to execute.

I'd like to emphasize that with $70 million of CapEx spent in the first quarter, we're wasting no time executing on the opportunities to drive growth in margin that provide the basis for our Florida City Gas acquisition and that are abundant throughout our larger organization.

We're also delivering on business transformation projects that are bringing enterprise-wide efficiencies. Our investment projects are laying important groundwork for our long-term growth. We are bolstering the safety and reliability of our systems and investing in the pipelines and interconnects that are meeting customer demand while also creating and reinforcing our pathways to market.

I'll now turn the call to Beth.

Beth Cooper

Thanks, Jeff, and good morning, everyone. It is great to catch up with you today. We had another successful quarter with adjusted EPS of $2.10 per share, $0.06 higher than the first quarter of last year, driven by solid performance across all our businesses. As you can see on Slide 10, our recent acquisitions, largely Florida City Gas contributed $0.84 in adjusted EPS.

Our Florida City Gas unit achieved solid customer growth and benefited from its 2023 rate case outcome. Our legacy businesses also generated strong earnings, delivering $0.26 of incremental EPS this year, and we had $0.06 of contribution from increased customer consumption due to colder weather.

I want to point out that while temperatures were colder than last year, they were still about 10% to 12% warmer than the normal temperatures, calculated using a 10-year average in both our Delmarva and Ohio service territories.

As always, we are prudently managing expenses, especially our payroll and travel and entertainment expenses and optimizing our operations, which drove an $0.08 benefit to adjusted EPS this quarter. These gains were balanced by a few factors: a $0.05 offset from depreciation, amortization and property tax, a $0.34 offset from acquisition-related expenses and an approximate $0.73 offset related to the Florida City Gas financing costs.

Turning now to Slide 11. Adjusted gross margin increased by 27% to approximately $165 million. Operating income increased by $25 million or 45% to approximately $80 million. Excluding transaction and transition-related expenses, operating income increased by $26 million or 47%. We are proud of this strong gross margin improvement and most importantly, almost all of this improvement fell to net income.

As a result, our adjusted net income improved by 29% to $47 million. This is a significant accomplishment and demonstrates the diligence of our team as we continue to optimize our operations, increase collaboration across our businesses and drive efficiencies.

Moving to Slide 12. Our adjusted gross margin for our Regulated Energy segment improved by 36% over last year and operating income improved by 57%, excluding nonrecurring transaction and transition costs.

This improvement was the result of Florida City Gas earnings contribution, organic growth in our natural gas distribution operations, including several minor propane community gas system conversions, pipeline expansions by our natural gas transmission entities, permanent rate changes associated with our Florida legacy, natural gas base rate proceeding and finally, incremental margins from our regulated infrastructure programs.

I want to point out that we achieved 4.2% and 3.6% organic natural gas distribution growth on Delmarva and in Florida, respectively. As shown on Slide 13, our Unregulated Energy segment delivered an 8% adjusted gross margin improvement and a 24% operating income improvement. The biggest driver was higher propane consumption driven by the colder weather.

We also saw higher propane margins and service fees, including from our recent JT. Lean Suns acquisition. Finally, we benefited from an increase in rates, gathering margins and consumption from Aspire Energy.

Turning to Slide 14. Our team is driven by our commitment to safety, accountability and dependability. This collaborative culture enables our tireless pursuit of top quartile earnings performance, driven by prudent capital investment and regulatory initiatives.

With our earnings growth, we are able to reinvest 50% to 55% of our earnings back into the business to support our capital investments while also generating top-tier dividend growth. Our financing and reinvestment strategy aligns to a target dividend payout of 45% to 50%, and we are committed to this range through 2028.

Given the strength of our performance and our confidence in our capital investment strategy, we are reiterating our 2024 adjusted EPS guidance of $5.33 to $5.45, our 2025 guidance of $6.15 to $6.35 per share and our 2028 guidance of $7.75 to $8 per share.

Our top financing priority is to maintain a strong balance sheet to support our growth plans, and we continue to execute on a financing plan consistent with an investment-grade ratings profile. In the first quarter of this year, stockholders' equity increased by $35 million as a result of our retained earnings. At the end of the first quarter of 2024, we had an equity to total capitalization ratio of over 48% versus 47% at the end of 2023.

We continue to target an equity total capitalization ratio of 50% by 2028 at the latest. Customarily, we dribble out smaller amounts of equity over time to manage to our target capital structure. We will continue to do this as we carry out our 5-year capital plans.

On Slide 16, we show our strong history of consistent dividend growth. We are proud to have a 10-year dividend CAGR of approximately 9% through year-end 2024. This quarter, we announced a significant 8.5% dividend increase of $0.05 per share to $0.64 per share per quarter.

Our Board made this decision in line with our balanced capital allocation strategy to reflect the strength of our performance and our confidence in our future growth prospects, while also allowing for a high level of earnings reinvestment to fund future capital investments. This strategy continues to support top quartile earnings growth to facilitate top quartile dividend growth.

Turning now to Slide 17. Our pathway to our 2024 EPS guidance is comprised of multiple important drivers: first, strong incremental contributions from our legacy businesses of approximately $0.40 to $0.50 per share. Second, a full year of Florida City Gas results, including the interest costs associated with financing the acquisition, representing about $0.35 to $0.45 per share; and third, incremental opportunities of approximately $0.20 to $0.30 per share from our integration, business transformation and cost management activities across the enterprise.

The impact of these factors is partially offset by dilution of about $1 per share due to the equity issuance completed to finance the Florida City Gas acquisition. Moving to Slide 18. I want to provide a few highlights from our integration accomplishments as well as some detail on our incremental opportunities to drive earnings growth.

This quarter, we were focused on seamlessly welcoming and orienting our new team members to our organization and culture, which is very much aligned with Florida City Gas. We conducted an employee engagement survey so that we have a solid baseline of sentiment upon which we can build and grow. We also completed our rebranding, which helps to solidify our One Team approach.

We acted on additional margin opportunities with our service agreements, working to reduce our reliance on the transition service agreements with NextEra. We are in the process of leveraging the Florida City Gas after-hours call center for our whole enterprise, which will standardize and enhance the customer experience. We're also integrating our cybersecurity protocols in order to maintain our consistent secure risk profile.

Importantly, we're also making steady progress on our infrastructure projects in Florida, which Jim will touch on shortly, and we're ramping up our capital spend. We are moving forward with new projects, including 3 projects that will connect locally produced landfill RNG to Florida City Gas system.

Successfully executing on our business transformation projects such as our technology improvement initiative, remains a high priority. We're also continuing to manage our costs prudently across the business. In summary, our initiatives remain on track, and we are very excited about our progress and the opportunities ahead. Now, I'd like to turn the call over to Jim.

Jim Moriarty

Thank you, Beth, and good morning, everyone. I'll begin with Slide 19, where we present our rate case initiatives and infrastructure programs. In Florida, we've been operating at our new effective rates for nearly a year in our Florida Public Utilities and Florida City Gas jurisdictions with allowed ROEs of 10.25% and between 8.5% and 10.5%, respectively. 2024 will be our first full year with these increased rates.

As we discussed on our last call, we filed a joint application for a natural gas rate case with the Maryland PSC in January 2024. Our application seeks approval for tariff changes, including a new technology cost recovery rider, a proposed underserved area rate, which will enable expansions to meet demand as well as the program for evaluating extensions to multifamily projects.

We also filed a separate depreciation study associated with our Maryland utilities. We are continuing to have a productive engagement with our regulators and are optimistic about our continued path to a constructive outcome. As Jeff mentioned, we are making significant headway with our infrastructure programs in flooring, which are designed to continually improve the safety and reliability of service.

In April 2024, we filed a petition with the Florida PSC to more closely align the SAFE and Guard programs. Specifically, we requested modifications that will enable us to accelerate remediation on the pipes that need it the most as well as facilities that have obsolete or exposed pipe. We expect these modifications to add about $50 million in CapEx associated with the SAFE program.

When combined with the GUARD program, this represents approximately $460 million of natural gas distribution infrastructure investments over the next 10 years. Turning to Slide 20, which shows numerous Florida transmission projects driven by customer growth.

I'll take a moment to highlight a few recent updates. First, we have 7 approved projects, which total about $106 million in capital expenditures. In April 2024, the Florida PSC approved our Newberry expansion project, which secondarily included the acquisition and conversion of propane community gas systems in Newberry. This is expected to begin in the second quarter of this year.

We have delivered service via the community gas system for many years, and the timing is now appropriate to convert those systems over and bring natural gas service to the area to support future expansion. We have successfully executed conversions like this many times in the past, and we are excited to bring both the transmission and distribution infrastructure to this area.

For our Wildlight pipeline expansion project, where we have now received Phase I and Phase II approvals, growth continues at a record pace. We are now ready to construct Phase 2, which involves the installation of 2 new steel pipeline segments.

In March of 2024, the Florida PSC approved 2 new Peninsula Pipeline East Coast transmission projects. There, we are constructing natural gas transmission extensions to support our distribution system growth in Boynton Beach and New Smyrna Beach, which Jeff talked about earlier.

On Tuesday, we received approval for $42 million in additional expansion projects, which include extensions to support recent and expected population growth in the state Cloud, Plant City and Lake Mattie communities in Florida.

And finally, we have 4 projects under PSC review, including the Pioneer Supply Header Pipeline project, which will enhance natural gas availability in Southeast Florida and our trio of RNG projects, representing $46 million of CapEx, which will connect 3 landfill RNG projects to our FCG distribution system.

Moving now to Slide 21, which covers our Eastern Shore Worcester resiliency upgrade project, which will be an approximately $80 million liquefied natural gas storage project in Maryland. This initiative, which will provide critical energy service to customers during the peak winter heating season will help protect against weather-related disruptions, keeping energy prices affordable. This is especially important as we are dealing with an increasing number of extreme weather events across the country.

On April 26, FERC issued a positive environmental assessment report for this project, a major milestone that our entire team can be proud of. We remain optimistic about our continued progress as we proceed to our anticipated in-service date in the third quarter of 2025.

Turning now to Slide 22. I would like to cover some of our sustainability initiatives and other recent innovations and awards. In April, we were proud to publish our Safety and Reliability report, the first in our series of micro sustainability reports. In the coming months, we will release our second micro report covering our environmental stewardship efforts.

We're also very proud to launch a first-of-its-kind, energy efficiency program in Delaware this year. The program includes 3 residential initiatives, which we anticipate will reduce consumption by the equivalent of 1,055 households annual energy usage. This innovative program builds on our long-standing energy efficiency and conservation efforts that go back to many decades.

At Full Circle Dairy, we continue to progress towards completion of our first full-scale RNG production facility, and we expect our first injection of RNG produced there in the first half of 2024. This project is anticipated to capture and redirect more than 1,100 metric tons of methane per year, the equivalent of the emissions from powering 3,500 homes annually.

I would also like to commend our employee resource groups, led by the green DRG for coordinating our recent Earth Day and Arbor Day activities. As an example, we partnered with the Arbor Day Foundation on an energy-saving trees program, where our team members could request a locally appropriate tree to plant on their property. The Arbor Day Foundation's resources then help them determine an optimal planting site for the greatest energy and money saving benefits.

In January, we supported the Food Bank of Delaware with a $50,000 donation and donated as well a number of park benches made from recycled plastic pipe. We plan to donate similar benches to other nonprofit organizations, municipalities, parks and trails within our service areas.

Later this month, we will celebrate receiving the Torch Award for Ethics from the Delaware Better Business Bureau. This distinction is given to companies that put integrity into action, and we are incredibly honored to receive this award. As you can see, our team is excelling in all areas of the business and beyond, making life better for our employees, customers and communities remains paramount in everything we do.

With that, I will turn the call to Jeff for concluding remarks.

Jeff Householder

Thank you. This year, we are off to a very strong start, marked by a steady execution of our Florida City Gas integration, strong investments in growth in technology advancements in our regulatory initiatives and prudent expense management. Our newly combined team in Florida is working collaboratively and efficiently with none of the integration speed bumps that can sometimes occur with acquisitions.

We're excited about what we will accomplish together. We're well positioned to deliver on the significant and attractive opportunities across our enterprise and to continue our track record of driving top quartile earnings performance.

The projects in our plan will enable us to continually improve the customer experience, reach new customers and explore new pathways to safe, reliable energy delivery. And, by leveraging our deep expertise and experience, we are executing our strategy in a way that is valuable to our team, our communities, our customers and our shareholders.

We remain intently focused on sustaining our history of superior performance, and we look forward to sharing our progress.

With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

[Operator Instructions] Our first question is coming from Tate Sullivan with Maxim Group.

Tate Sullivan

First, to follow up on the comments on the liquefied natural gas storage facility in Maryland, is that not yet in your incremental gross margin table? This is my first question.

Beth Cooper

That is correct, Tate. We're waiting for the final approval. And then at that point in time, we will include a gross margin estimate. But as we indicated in the update, as you heard, we're really pleased we're on schedule, most recently with the environmental assessment being issued.

Tate Sullivan

And has site work started on that project? Or will construction start the plum upon the FERC order and its construction time line estimated based on a table about 9 months? It seems sort of fast.

Beth Cooper

That's correct. We have already begun preparing for the site by having some of the work done related to the tank manufacturing. So, that is well underway. We've also basically contracted for the purchase of the land once we get the appropriate approval. So, that's why once the final approval for the project is received, we can work pretty quickly to get everything constructed and be ready to go next year.

Tate Sullivan

And last for me is for Florida City Gas customer growth. Is it still expected to be similar to your natural gas operations that you had before a client sort of City Gas?

Beth Cooper

It's a little bit more in metropolitan area. So, the growth relative to somewhere like in the Jacksonville area may not be quite as high, but still it's relatively good, strong customer growth that we continue to experience there as well.

Operator

Our next question comes from Paul Fremont with Ladenburg.

Paul Fremont

Congratulations on a great quarter. You talk about sort of margin improvement in propane and gathering, can you tell us where the margins are today and what they were previously?

Beth Cooper

Sure. I mean, we don't typically disclose the actual margin level itself. But certainly, as you're coming through, Paul, the first quarter, there's a lot of volume that happens primarily in that first quarter. And some of the margin expansion that we saw was a result of weather still staying above normal. And so, we've provided a calculation where we talk about the weather impact to the tune of about $1.5 million or $0.05 per share in terms of what our results would have been if weather had been normal.

I can tell you, in the propane business, we've had the benefit for the last several years, 5 years plus where in periods where we have experienced warmer-than-normal temperatures, the rate increases, the margin increases have been somewhat of a natural hedge.

I can also tell you that as we've come out of the first quarter, margins have stayed a little higher than normal. But keep in mind, our volumes cut down significantly in the second and third quarters because you're not in those heating seasons.

On the Aspire side, we've worked really hard in terms of our rate design. And so, you've seen us be able to adjust our rates to also compensate for some of the weather impact. And so that's what you're also seeing come through the numbers in the first quarter.

Paul Fremont

And are you in a position yet to sort of indicate what type of cost savings you're expecting in Florida post acquisition?

Beth Cooper

We are not at this point coming out with specific dollar amounts. I mean, you can see that if you look at our results for the quarter, and we've talked about in the past, our operating expenses, exclusive of depreciation, amortization and property taxes as a percentage of gross margin.

And relative to what we looked like in 2023, there is certainly an improvement in that metric. And we're going to continue to fully integrate the business, make sure that we're accomplishing everything that we set out to do. I think if you looked at us, we've evaluated ourselves in the past relative to our peers. We've had a real focus on cost management, and that's going to continue.

But the real story around Florida City Gas for us is not so much just cost management, but it's also the opportunity to capitalize on the growth opportunities and more so some various regulatory strategies that we think we can deploy there. And so, right out of the gate, and hopefully this came through in the slides, we were pretty happy to report, that we've got 7 projects that we've gotten approval for.

Not all of those, we have margin estimates out for because 3 just got approved this week in Florida. We've got another 4 in the pipeline that you'll hear more about in the future, 3 of which are projects for Florida City Gas. One is an asset also a project that's associated with them.

So, there's a lot going on, Paul. We've actually stepped up as we had anticipated, and you see that ramp. And so, that's really exciting to us and what we can do there and then again, the regulatory strategy. So, we're down a path on all of those. And again, if you look at that metric, I think that will give you some comfort that we are achieving synergies.

We're just not coming out with a lot of specifics because, again, we're 1 quarter in. We're trying to accomplish a lot of different things on many fronts. But stay tuned. Hopefully, again, like you said, things continue as planned. It started to out great again for the first quarter.

Paul Fremont

And then last question. You've given us sort of an equity to total capitalization target of sort of 45% to 50% sort of near term. What does that equate to potentially in terms of FFO to debt? And can you give us any insight into planned equity issuance over the course of your forecast period?

Beth Cooper

Sure. So, let me start with the first part of it. So, our target equity to total capitalization is actually 50% to 60%. And we're actually at about 48% as of the end of the first quarter, slightly ahead of where we actually thought we might be in some of our projections. But over the next 5 years, you're going to see us move back to our target capital structure of 50% to 60% equity.

What you also heard us talk about was the fact that we are reinvesting back into the business somewhere between 50% to 55% of our earnings. Right now, our dividend payout is in the upper 40s. And so, that enables us to put a strong amount of earnings back into the business and infused equity that's very competitively priced. And so, for the quarter, you actually saw suggest about $35 million into our equity from retained earnings.

As we look out, certainly, we're looking at FFO to debt. We don't put a lot of metrics out on that. But as we did the transaction, we wanted to make sure we stayed at an investment-grade level. That was important to us. And so, you're going to see us be well into the teams on our FFO to debt, mid-teens to upper teens as we look at it. And then finally, from a financing, we will access the capital markets as needed.

We have historically dribbled out equity over time. I think with the strong cash flow that's coming from our larger enterprise and looking at the cash flow, certainly, for the first quarter, you can see it. We will need some small equity infusions, but there's a lot of cash that's going to be able to be reinvested back into the business.

You'll see us doing some debt refinancings at the appropriate time. But you won't see any heavy, heavy equity lift, certainly like you would have seen with the transaction or anything like that, small dribbling amount over time. And if I missed anything, please let me know, Paul.

Paul Fremont

No. Just does that equity issuance include this year or not?

Beth Cooper

We'll see as the year progresses, certainly, it could be some very small amounts, but nothing that would be deemed significant.

Operator

[Operator Instructions] It appears we have no further questions at this time. I will now turn the program back over to Jeff Householder for closing remarks.

Jeff Householder

Thank you again for joining today's call. We are very pleased with our first quarter performance, including the many capital projects that we've initiated. We look forward to seeing many of you at the AGA Financial Forum that's coming up. Goodbye.

Operator

Thank you. This concludes Chesapeake Utilities Corporation's First Quarter 2024 Earnings Conference Call. Please disconnect your line at this time, and have a wonderful day.

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward--looking statements may be identified by the use of words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities Annual Report on Form 10-K for the year ended December 31, 2023 filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

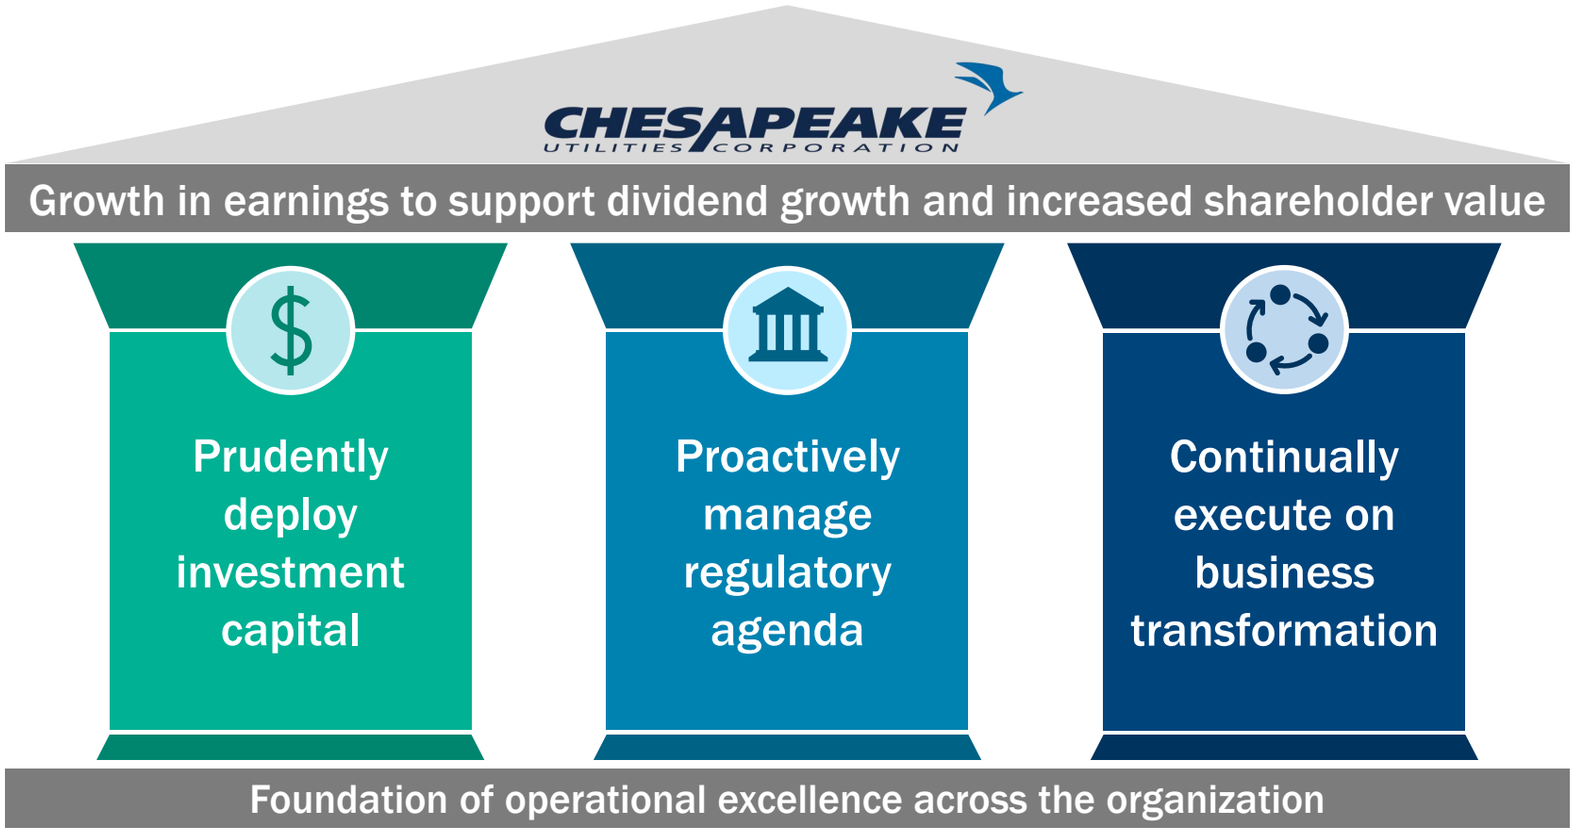
This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share (“EPS*”). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Executing On Our Long-Term Growth Plan



Q1 2024 Highlights: Continuing to Build Momentum

Operational Accomplishments

- Increasing margin contributions from **continued transmission expansions**
- Regulated natural gas distribution **customer growth of 2x** national average
- Realized **meaningful contribution from non-regulated businesses**
- Weather was colder than last year, but **warmer than normal**
- Prudently **managing expenses** amid impact of FCG financings and challenging economic environment

Florida City Gas (FCG) Integration

- Delivered **incremental margin contributions from FCG**
- Executing **capital investment plan consistent with acquisition expectations**
- Realized **efficiencies by leveraging enterprise-wide processes** including management of SAFE & GUARD programs
- Filed **three new RNG projects with the Florida Public Service Commission (PSC)** and one supply header project to support demand for natural gas service
- Filed for a **$50 million increase** in the SAFE program with the Florida PSC

Strategic Capital Investments

- Reaffirmed **2024 capital investment guidance of $300M to $360M**
- Multiple **regulatory initiatives approved** supporting natural gas demand
- Multiple **expansions of transmission systems under construction** to support strong customer growth
- Continuing our **business transformation initiatives to support our larger footprint** and achieve operational efficiencies

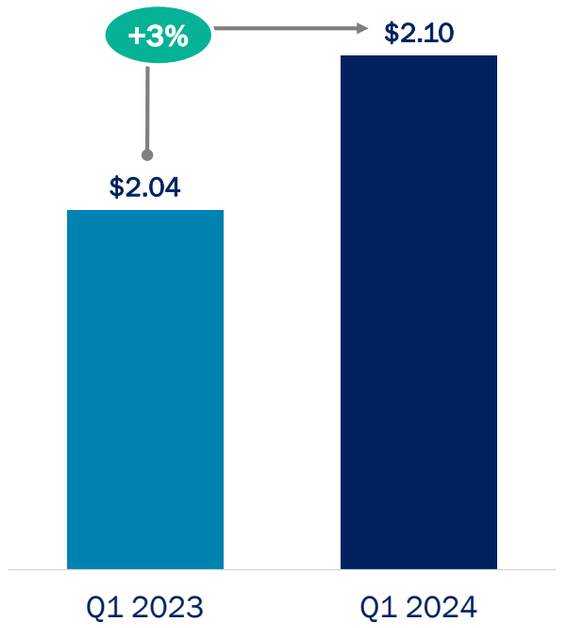
Remain on track to achieve 2024 Adjusted EPS guidance of $5.33-$5.45 and longer-term 2025 and 2028 outlook

CHESAPEAKE UTILITIES CORPORATION

[1] See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share.
[2] Excludes TCJA impact in 2017; 2023 excludes transaction-related costs associated with the FCG acquisition.

Q1 2024 Strong Financial Performance

Adjusted Diluted Earnings Per Share[1]



Key Adjusted Gross Margin Drivers

$25.4M Contribution from FCG and other acquisitions	**$3.5M** Pipeline Expansions and Natural Gas Organic Growth	**$2.8M** Regulated Infrastructure Programs and Recovery Mechanisms
$1.9M Changes in Customer Consumption	**$1.0M** Increased Gathering Fees for Aspire Energy	**$0.6M** Higher Propane Margins per Gallon and Fees

[1] *Diluted Earnings Per Share Growth from Continuing Operations; 2024 excludes transaction and transition-related costs associated with the FCG acquisition.*

FCG Integration Fully On-Track

- Reviewing operational efficiencies
- Consolidating processes and resources
- Analyzing technology enhancements

- "Best of Both" approach to customer care, project management and operations
- Sharing resources and insight between legacy and FCG businesses

- Identifying capital projects to drive growth as one combined company
- Leveraging regulatory expertise to accelerate project reviews and approvals

Major Projects and Initiatives Driving Adj. Gross Margin Growth

Our projects and initiatives underway will continue to drive adjusted gross margin growth while new projects and regulatory initiatives will increase earnings across our guidance period

Project/Initiative *(in thousands)*	Three Months ended March 31, 2024	Three Months ended March 31, 2023	Year Ended December 2023	Estimate for Fiscal 2024	Estimate for Fiscal 2025
Pipeline Expansions:					
Southern Expansion	$ 586	$ -	$ 586	$ 2,344	$ 2,344

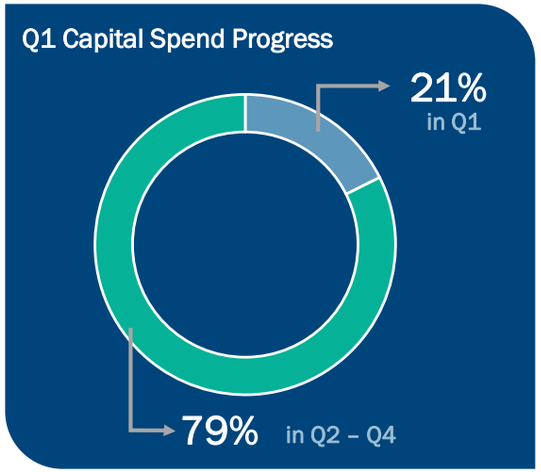
Peninsula Pipeline Company
East Coast Transmission Projects

Capex: $35.8 million
2025 Gross Margin: $5.1 million
Full-Year Annualized Margin: $6.3 million

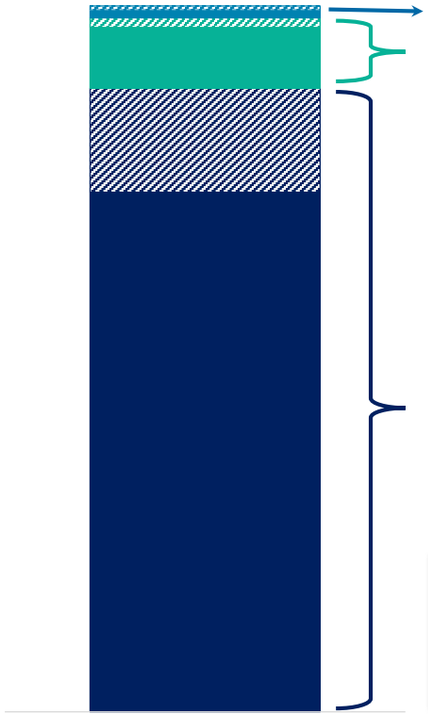
- Boynton Beach and New Smyrna Beach to increase supply capability and enhance reliability for FPU's distribution systems

[1] *Includes adjusted gross margin during 2023 comprised of both interim rates and permanent base rates which became effective in March 2023.*
[2] *Rate case application and depreciation study filed with the Maryland PSC in January 2024.*

2024 Capital Investment On Track to Drive Margin Growth



Quarter-to-date capital expenditures on track, with $70.6M in spending on strategic growth opportunities and technology transformation



$300 - $360M 2024E Capital Expenditures

General Corporate CapEx: $4 - $6M

Unregulated Energy CapEx: $31 - $36M

- Propane Distribution: $13 - $15M
- Energy Transmission: $5 - $6M
- Other Unregulated: $13 - $15M

Regulated Energy CapEx: $265 - $318M

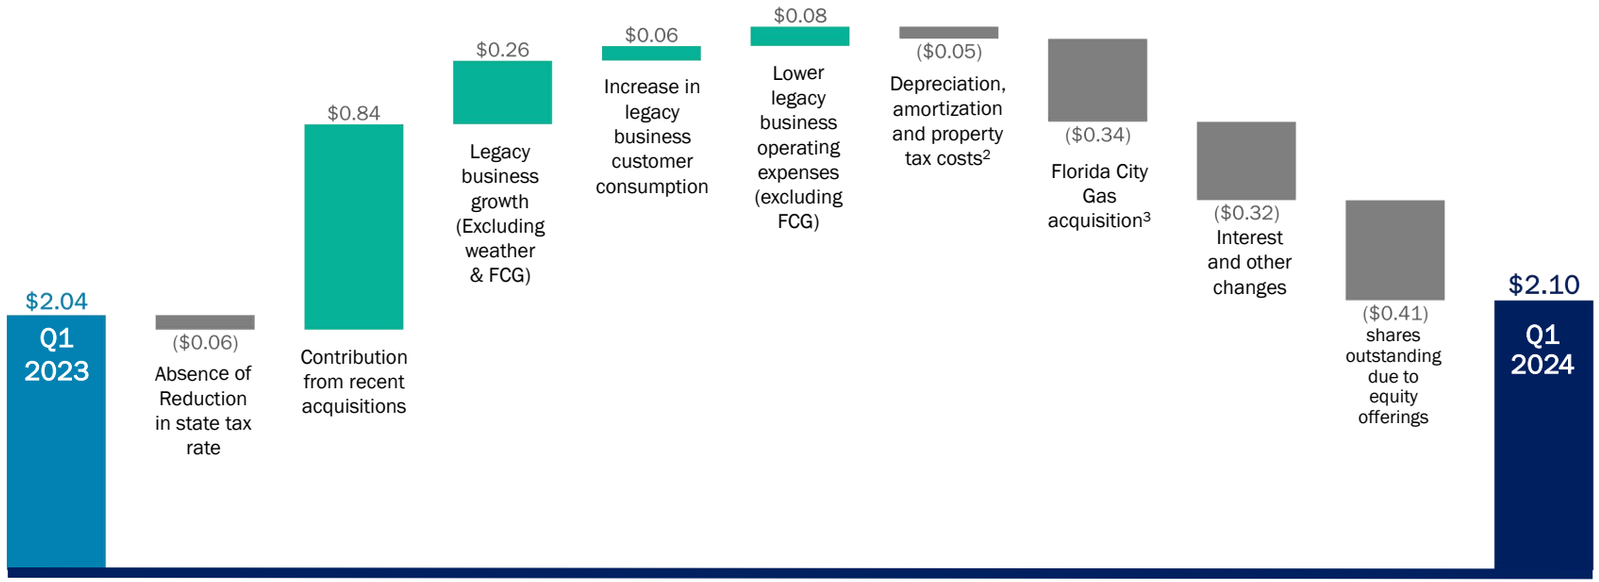
- Natural Gas Distribution: $150 - $170M
- Natural Gas Transmission: $90 - $120M
- Electric Distribution: $25 - $28M

We remain on track for 5-Year CapEx Plan of **$1.5 – $1.8B**

Key Drivers of Performance – Three Months Ended March 31, 2024

Our core business performance, strong customer demand and recent acquisition of Florida City Gas drove increased earnings per share, only partially offset by financing costs related to the FCG acquisition.

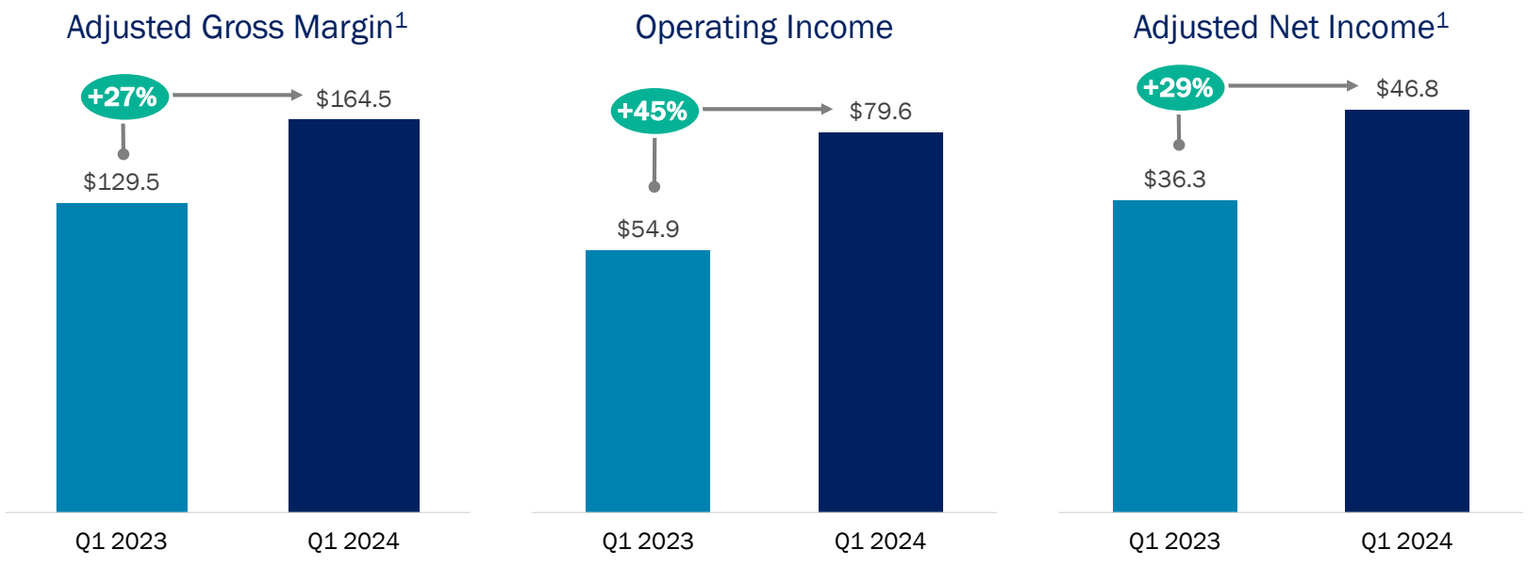
Adjusted Diluted Earnings Per Share[1]



[1] *See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share.*
[2] *Includes a benefit from RSAM of $3.4 million, pre-tax, or $0.11 per share.*
[3] *Does not include RSAM benefit, which is included in depreciation expense.*

Increasing Gross Margin Driving Bottom-Line Income Growth

Gross margin growth drove higher bottom-line net income: both approaching 30% growth



Excluding transaction and transition-related expenses[2], operating income increased $25.6 million, or 47%

[1] See appendix for a reconciliation of non-GAAP metrics. [2] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to transition services, consulting, system integration, rebranding and legal fees.

Regulated Energy Segment Generates Strong Margin and Operating Income Growth

Strong gross margin, coupled with expense management, drove $20M in higher operating income

(in thousands)	First Quarter 2024	First Quarter 2023	Change $	Change %
Adjusted Gross Margin[1]	**$ 118,508**	$ 86,982	$ 31,526	36.2%
Depreciation, amort. & property taxes	**20,955**	18,670	2,285	12.2%
Transaction and transition-related expenses[2]	**921**	-	921	N/A
Other operating expenses	**38,523**	30,687	7,836	25.5%
Operating income	**$ 58,109**	$ 37,625	$ 20,484	54.4%

Q1 2024 Highlights

Operating income up **57%** (excluding FCG transaction and transition-related expenses) driven by:

- Contribution of earnings attributable to Florida City Gas
- Organic growth in natural gas distribution operations, including propane CGS conversions
- Pipeline expansions underway by our natural gas transmission entities
- Permanent rate changes associated with Florida natural gas base rate proceeding
- Incremental margins from regulated infrastructure programs

CHESAPEAKE UTILITIES CORPORATION

[1]See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin. [2]Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to transition services, consulting, system integration, rebranding and legal fees.

Unregulated Energy Segment Drives 24%+ Operating Income Growth

Higher propane margins and fees as well as increased margins for the other unregulated energy businesses drove increased earnings for the quarter.

(in thousands)	First Quarter 2024	First Quarter 2023	Change $	Change %
Adjusted Gross Margin[1]	**$ 46,049**	$ 42,594	$ 3,455	8.1%
Depreciation, amort. & property taxes	**5,155**	4,822	333	6.9%
Other operating expenses	**19,465**	20,527	(1,062)	-5.2%
Operating income	**$ 21,429**	$ 17,245	$ 4,184	24.3%

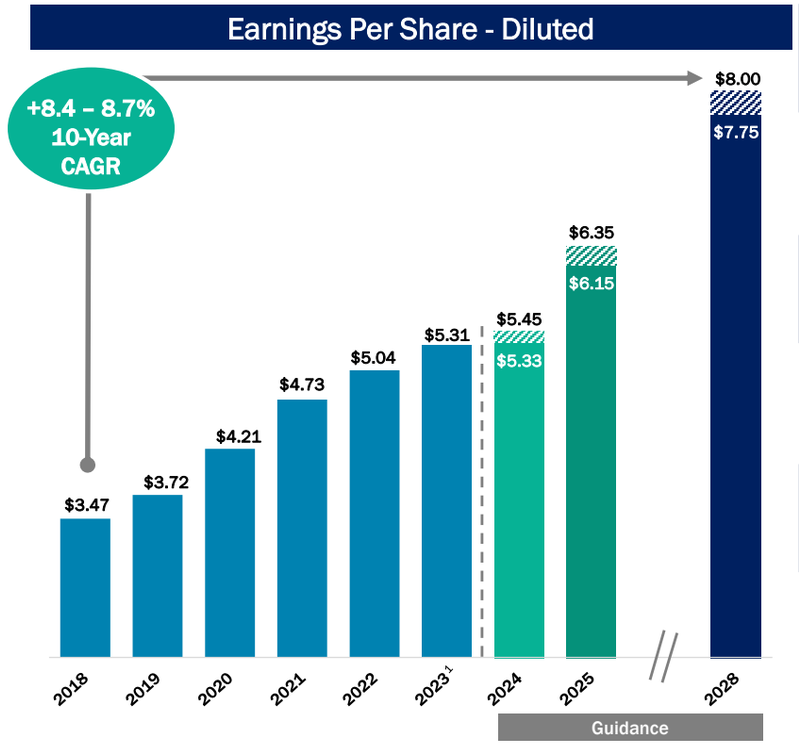
Q1 2024 Highlights

Cooler weather over prior year impacted operating income

- Increased propane consumption, which was primarily due to colder weather
- Increased propane margins and service fees
- Acquisition of J.T. Lee and Son's, which was completed in December 2023, also contributed to higher propane margins
- Increase in rates, gathering margins and consumption for Aspire Energy

[1] *See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin.*

Earnings Guidance Affirmed; Driving Increased Shareholder Value



Earnings Growth Driven by Capital Investment

- **1Q 2024 Adjusted Earnings Per Share of $2.10[1]**
- 2024 Adj. EPS Guidance of $5.33 to $5.45
- 2025 EPS Guidance of $6.15 to $6.35
- 2028 EPS Guidance reiterated: $7.75 to $8.00

Dividend Growth Supported by Earnings

- 21 Consecutive Years of Dividend Increases
- **Current Annualized Dividend of $2.56/share**
  - 9% CAGR over last 10 years
- **Targeting Long-term DPO of 45 - 50%[2]**
  - Enables CPK to reinvest in growth plan

Best in Class Shareholder Return

- Annual shareholder return >95th percentile among peer group[3] the past 5, 10, 15 & 20 year periods
- >300% increase in stock price over the past 15 years drives a $2.1B Increase in Market Cap
- Highest P/E[4] ratio in peer group[3] at end of 1Q24

[1] Adjusted EPS excludes transaction-related expenses incurred attributable to the acquisition of FCG. [2] Future dividends are subject to board approval.
[3] Peer Group includes select group of 10 CKP peer companies. Details can be found in the Annual Report on Form 10-K.
[4] Price-to-Earnings ratio based on analyst consensus next twelve months EPS.

Capital Structure Overview – Strong Balance Sheet to Support Growth

(in thousands)	3/31/2024	12/31/2023
Stockholders' equity	$ 1,280,903	$ 1,246,104
Long-term debt, net of current maturities	1,185,166	1,187,075
Total permanent capitalization	$ 2,466,069	$ 2,433,179
Current portion of long-term debt	18,511	18,505
Short-term debt	170,355	179,853
Total capitalization and short-term financing	$ 2,654,935	$ 2,631,537
Equity to Permanent Capital	51.9%	51.2%
Equity to Total Capitalization	48.2%	47.4%
New Long-Term Debt Issuance	$ -	$ 630,000
Net New Equity Issuances	$ 821	$ 371,508

Stockholders' Equity increased $35M since the end of 2023 primarily driven by:

- Strong Net Income performance of ~$46M
- Dividend Reinvestment and Stock Compensation Plans increases of ~$1M
- Reduced by Continued Dividend payments of ~$13M

Recent Highlights

- March 2023: $80M New Long-Term Debt
- Nov 2023: FCG Acquisition Financing
  - $550M of New Long-term Debt
  - 4.4M New CPK Shares
- 53% Equity to Capitalization prior to FCG Financing

Long-Term Debt

- ~$1.2B with an Average Interest Rate <5%

Short-Term Debt

- $375M Facility with ~$170M outstanding
  - 1 year tranche: $175M, SOFR +0.75%
  - 5 year tranche: $200M, SOFR + 0.95%
- Maintaining a $50M interest rate swap at 3.98% through September 2025

Three Decades of Dividend Growth Drive Shareholder Return

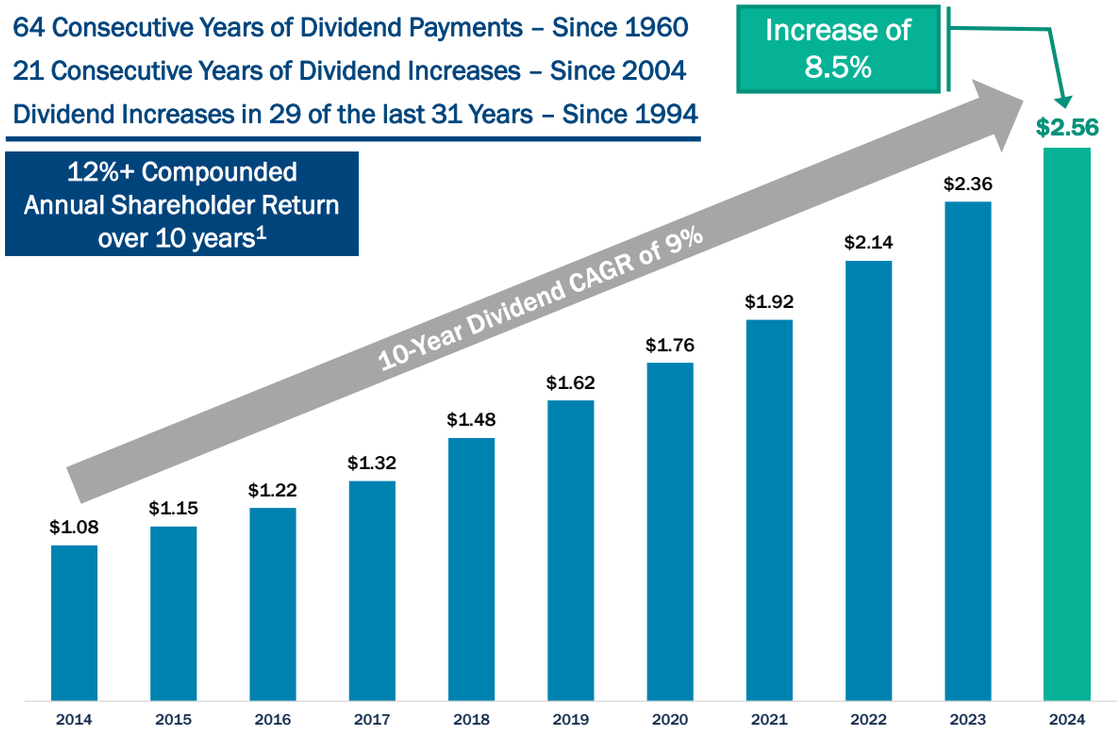
Annualized Dividend per Share

64 Consecutive Years of Dividend Payments – Since 1960

21 Consecutive Years of Dividend Increases – Since 2004

Dividend Increases in 29 of the last 31 Years – Since 1994

12%+ Compounded Annual Shareholder Return over 10 years[1]



Quarterly Dividend History

	Ex-Dividend Date	Amount per Share
2Q 2024	6/14/2024	$0.6400
1Q 2024	3/14/2024	$0.5900

1Q 2019	3/14/2019	$0.3700

CHESAPEAKE UTILITIES CORPORATION

[1] *Calculated through 12/31/2023.*

Pathway to 2024 EPS[1] Guidance

Our 2024 target is based on continued growth from our legacy businesses, a full year of contribution from FCG, and additional opportunities we have identified[2]

Adjusted Diluted Earnings Per Share[1]

[1] Diluted Earnings Per Share Growth from Continuing Operations; 2023 excludes transaction-related costs associated with the FCG acquisition.
[2] The actual contributions of each category, as well as others not defined above, may vary.

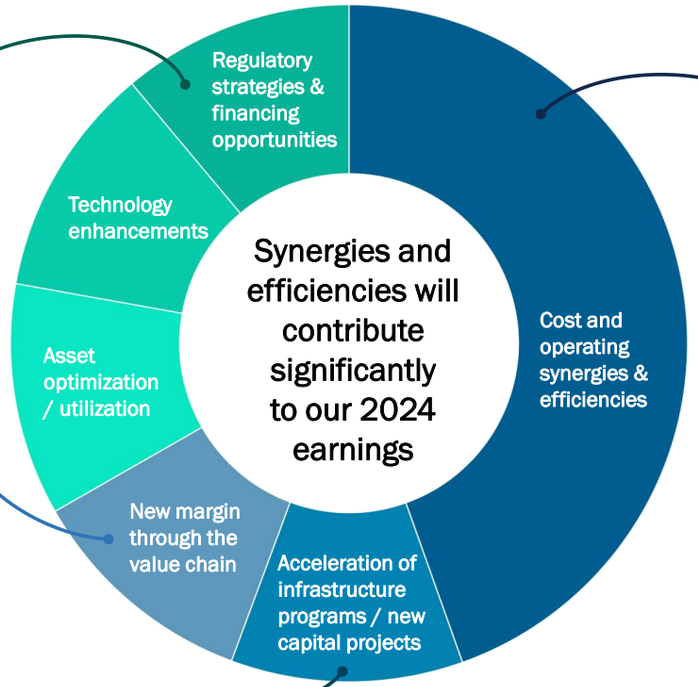
Executing on the Identified 2024 Pathway

Our team has begun to execute on additional opportunities to propel earnings growth in 2024

- Expansion of SAFE Program
- Alignment on Pipeline Infrastructure Programs

- New Marlin Reservation Agreements
- New Pipeline Projects

- Timing of investment in SAFE Program
- Three New RNG Projects



- Combining natural gas leadership
- Optimizing support services
- Reducing reliance on Transition Service Agreements
- Integrating cyber security platforms
- Transitioning to digital platform
- Continuing cost management
- Updating depreciation studies

Regulatory Strategy Drives Earnings

Rate Case Initiatives

Florida Public Utilities

- Rates became effective March 1, 2023
- $17.2 million rate increase; allowed ROE of 10.25% and equity percentage of 55%
- Consolidated four natural gas distribution entities

Florida City Gas

- Rates became effective May 1, 2023
- $14.1 million rate increase; allowed ROE of 8.5% -10.5%
- Reserve surplus amortization mechanism authorizes FCG to earn within its approved ROE range

Maryland LDCs

- Rate case filed January 30, 2024
- Propose consolidating our three MD distribution companies
- Separately filed combined depreciation studies

Infrastructure Programs

Florida Public Utilities and Florida City Gas

- GUARD and SAFE: combined projected capital investment of $410 million over a 10-year period; additional $50 million SAFE program expansion under review
- Programs enhance the safety, reliability and accessibility of portions of our Florida natural gas distribution systems

Florida Public Utilities-Electric

- Storm Protection Plan and Storm Protection Plan Cost Recovery mechanisms
- Capital investment of over $13 million for 2024 with continued investment going forward

Eastern Shore Natural Gas

- No specified limit on capital investment or time frame
- Recovery mechanism for capital costs associated with mandated highway and railroad relocate projects and compliance with new PHMSA regulations requiring the replacement of existing ESNG facilities

Significant Regulatory Progress on Recent Florida Transmission Projects

7 Approved

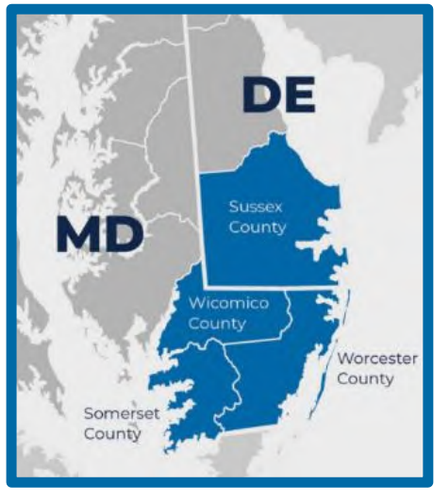
4 Under Review by Commission

	Est. CapEx
Newberry Expansion, Wildlight Phase 2, Boynton Beach Pipeline, New Smyrna Beach Pipeline	~$106M
Lake Mattie Expansion, Plant City Expansion, and St. Cloud Expansion[1]	
Indian River RNG, Brevard RNG, Medley RNG, and Pioneer Supply Header Pipeline[2]	~$46M

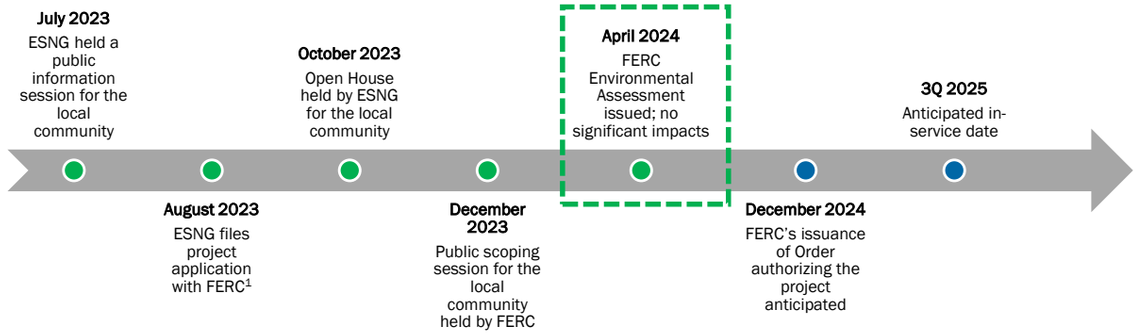
[1] *Approved by the Florida Public Service Commission on May 7, 2024; expected to be added to the Projects Table in Q2 2024.*
[2] *Pioneer Supply Header Pipeline not included in $46M estimate as total capital expenditures for the project are still being determined.*

Worcester Resiliency Upgrade Project Proceeding On Schedule

Eastern Shore Natural Gas project designed to meet critical energy service to customers during the peak winter heating season



- $80 million planned liquefied natural gas storage facility in Bishopville, MD
- Project consists of five low-profile horizontal storage tanks allowing for up to 0.5 million gallons of storage plus pipeline looping and additional upgrades
- Improvements will help protect against weather-related disruptions, keeping energy prices affordable
- 30-year agreements with customers



[1] FERC = Federal Energy Regulatory Commission.

FCG transaction and transition-related expenses, net[1]	**0.03**	-
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 2.10**	2.04

[1] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transition services, consulting, system integration, rebranding and legal fees. [2] Weighted average shares for the quarter ended March 31, 2024 reflect the impact of 4.4 million common shares issued in November 2023 in connection with the acquisition of FCG.

Weather Impacted Customer Consumption in the First Quarter

Moderately Colder Weather Across All Service Areas

- Increased customer consumption in the quarter driven primarily by weather resulted in a $1.9M increase in adjusted gross margin.
- The 13% increase in HDDs compared to the prior-year period was concentrated largely in Delmarva and Ohio given the heat load in our northern service areas
- While temperatures were colder than the prior-year period, still approximately 10-12% warmer compared to normal temperatures in our Delmarva and Ohio service territories.

Delmarva		Three Months Ended March 31,		Variance Year-over-Year

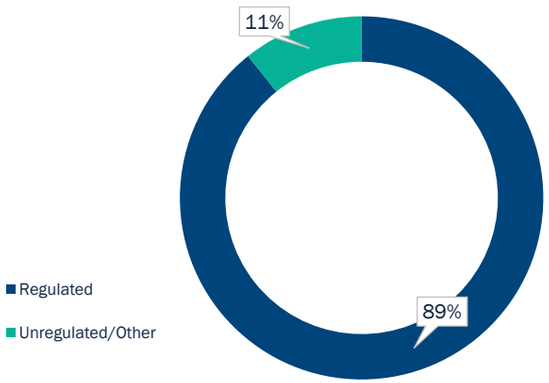
5-Year Projected Capital Expenditures Breakdown

89% of our 5-year capital expenditure plan is projected to be invested into our regulated businesses.

Regulated / Unregulated Forecast Capital Spend 2024-2028



Key Drivers of Investment Plan

- Investment in natural gas distribution systems to serve growing customer base and ensure safety and reliability (both legacy systems and FCG)
- Investment in gas transmission pipelines to support the utility systems, serve large users and uphold safety and reliability, including pipeline opportunities related to the FCG acquisition
- Investments in our unregulated operating business to support continued growth
- Investments in sustainable energy, such as pipelines and interconnects, to create a pathway to market for sustainable fuels
- Investments in technology to support enterprise resource planning and other systems necessary to support growth

Spend Type	5-Year Projected Capital Investment Range (in millions)
Regulated Distribution Growth	$600 - $645
Regulated Transmission Growth	$435 - $590
Regulated Infrastructure	$300 - $340
Unregulated	$140 - $165
Technology	$70 - $90

Note: Historic Adjusted EPS presented from continuing operations.

[1] Beginning in the third quarter of 2023, the Company's earnings per share metric was adjusted to exclude transaction-related expenses attributable to the announced acquisition of FCG including, but not limited to, legal, consulting, audit and financing fees.

[2] The sum of the four quarters does not equal the full year amount due to rounding and the impact of average share counts

Mission, Vision and Values

OUR Mission

We deliver energy that makes life better for the people and communities we serve.

OUR Vision

We will be a leader in delivering energy that contributes to a sustainable future.

OUR Values

Care

We put people first.
Keep them safe. Build trusting relationships. Foster a culture of equity, diversity and inclusion. Make a meaningful difference everywhere we live and work.

Integrity

We tell the truth.
Ensure moral and ethical principles drive our decision-making. Do the right thing even when no one is watching.

Excellence

We achieve great things together.
Hold each other accountable to do the work that makes us better, every day. Never give up.

FOR IMMEDIATE RELEASE
May 8, 2024
NYSE Symbol: CPK

CHESAPEAKE UTILITIES CORPORATION REPORTS FIRST QUARTER 2024 RESULTS

- **Earnings per share ("EPS")* for the first quarter of 2024 was $2.07 compared to $2.04 per share for the first quarter of 2023**
- **Adjusted EPS** for the first quarter of 2024, which excludes transaction and transition-related expenses attributable to the acquisition and integration of Florida City Gas ("FCG"), increased by three percent to $2.10 compared to $2.04 per share for the first quarter of 2023**
- **Adjusted gross margin** growth of $35.0 million during the first quarter driven by contributions from FCG, natural gas organic growth and continued pipeline expansion projects, additional customer consumption, and regulatory initiatives**
- **Completed filings for seven projects representing more than $85 million of capital investment to support growth initiatives in Florida, including for FCG**
- **Warmer than normal temperatures in our Delmarva and Ohio service territories reduced operating income by approximately $1.5 million, or $0.05 per share**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the three months ended March 31, 2024.

Net income for the first quarter of 2024 was $46.2 million compared to $36.3 million in the first quarter of 2023. Excluding transaction and transition related expenses associated with the fourth quarter 2023 acquisition of FCG, adjusted net income was $46.8 million, or $2.10 per share compared to $2.04 per share reported in the same prior year period.

Adjusted earnings for the first quarter of 2024 were driven by incremental margin contributions from FCG; growth in the Company's natural gas distribution businesses and continued pipeline expansion projects to support distribution growth; higher customer consumption; incremental contributions associated with regulated infrastructure programs; and contributions from the Company's Florida natural gas base rate proceeding. These improvements were partially offset by higher operating expenses primarily attributed to the addition of FCG and increased interest expense related to debt issued in connection with financing the acquisition.

"During the first quarter, we continued to build on the momentum from our strong finish to 2023. While the weather in our service areas was colder than it was last year, temperatures were warmer than normal for our respective territories. Nonetheless, our team once again executed on all fronts, and we remain on track to achieve our 2024 earnings guidance of $5.33-$5.45 on an adjusted EPS basis and our longer-term outlook," commented Jeff Householder, chair, president and CEO.

"Our success is driven by our progress integrating our FCG and Chesapeake families, pursuing growth investments across all of our businesses, advancing regulatory initiatives and prudently managing expenses. Specifically, the team advanced the FCG integration, delivering efficiencies from consolidating the SAFE and GUARD programs, and filed for three new pipeline projects with the Florida Public Service Commission which will serve RNG projects developed by third parties in proximity to our distribution system and serve to improve resilience and increase capacity to serve our customers. Our regulated natural gas distribution businesses continued to gain customers at more than twice the national average, we executed on numerous opportunities to expand our natural gas transmission systems, and we realized meaningful contributions from our non-regulated businesses.

"We are undertaking numerous initiatives in our march to our 2025 guidance of $6.15-$6.35 per share. We have immediately recognized positive impacts from our FCG integration efforts, continued our business transformation to support our larger footprint and accelerated the capital investment opportunities we identified to propel earnings growth. Filing for seven new capital investment projects with the Florida Public Service Commission during the quarter is a record for our Company. Across the enterprise, our team remains committed to delivering on the attractive opportunities across our businesses, positioning our company for future growth and contributing to another record year of performance that will drive increased shareholder value," concluded Householder.

Earnings and Capital Investment Guidance

The Company continues to support its 2024 EPS guidance of $5.33 to $5.45 in adjusted earnings per share given the incremental margin opportunities present across the Company's businesses, investment opportunities within and surrounding FCG, regulatory initiatives and operating synergies. The Company also supports its previously announced 2024 capital expenditure guidance of $300 million to $360 million.

From a longer-term perspective, the Company is also reaffirming its previously announced capital expenditure guidance for the five-year period ended 2028 that will range from $1.5 billion to $1.8 billion. This investment profile is projected to result in a 2025 EPS guidance range of $6.15 to $6.35, as well as a 2028 EPS guidance range of $7.75 to $8.00 per share. This implies an EPS growth rate of approximately 8 percent from the previous 2025 EPS guidance range, or since 2018, an 8.5 percent growth rate.

**Unless otherwise noted, EPS and Adjusted EPS information are presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs

3-3-3-3

presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Adjusted Gross Margin

	For the Three Months Ended March 31, 2024			
(in thousands)	Regulated Energy	Unregulated Energy	Other and Eliminations	Total

Adjusted Gross Margin (Non-GAAP)	**$ 86,982**	**$ 42,594**	**$ (36)**	**$ 129,540**

[1] Operations & maintenance expenses within the condensed consolidated statements of income are presented in accordance with regulatory requirements and to provide comparability within the industry. Operations & maintenance expenses which are deemed to be directly attributable to revenue producing activities have been separately presented above in order to calculate Gross Margin as defined under US GAAP.

Adjusted Net Income and Adjusted EPS

(in thousands, except per share data)	Three Months Ended March 31,	
	2024	2023
Net Income (GAAP)	**$ 46,168**	$ 36,344
FCG transaction and transition-related expenses, net [1]	**677**	—
Adjusted Net Income (Non-GAAP)	**$ 46,845**	$ 36,344
Weighted average common shares outstanding - diluted [2]	**22,306**	17,832
Earnings Per Share - Diluted (GAAP)	**$ 2.07**	$ 2.04
FCG transaction and transition-related expenses, net [1]	**0.03**	—
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 2.10**	$ 2.04

[1] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transition services, consulting, system integration, rebranding and legal fees.

[2] Weighted average shares for the quarter ended March 31, 2024 reflect the impact of 4.4 million common shares issued in November 2023 in connection with the acquisition of FCG.

5-5-5-5

Operating Results for the Quarters Ended March 31, 2024 and 2023

Consolidated Results

	Three Months Ended March 31,			
(in thousands)	**2024**	**2023**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 164,527**	$ 129,540	$ 34,987	27.0 %
Depreciation, amortization and property taxes	**26,110**	23,490	2,620	11.2 %
FCG transaction and transition-related expenses	**921**	—	921	NMF
Other operating expenses	**57,911**	51,135	6,776	13.3 %
Operating income	**$ 79,585**	$ 54,915	$ 24,670	44.9 %

Operating income for the first quarter of 2024 was $79.6 million, an increase of $24.7 million compared to the same period in 2023. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $25.6 million or 46.6 percent compared to the prior-year period. Adjusted gross margin in the first quarter of 2024 was positively impacted by FCG, natural gas organic growth and continued pipeline expansion projects, higher customer consumption, incremental contributions associated with regulatory initiatives, and contributions from the Company's unregulated businesses. Higher operating expenses largely associated with FCG were partially offset by lower employee benefits and incentive compensation costs compared to the prior-year period. Increases in depreciation, amortization and property taxes attributable to growth projects and FCG were partially offset by lower depreciation in our electric operations due to revised rates in the electric depreciation study filing approved in December 2023 and a $3.4 million reserve surplus amortization mechanism ("RSAM") adjustment from FCG.

Regulated Energy Segment

	Three Months Ended March 31,			
(in thousands)	**2024**	**2023**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 118,508**	$ 86,982	$ 31,526	36.2 %
Depreciation, amortization and property taxes	**20,955**	18,670	2,285	12.2 %
FCG transaction and transition-related expenses	**921**	—	921	NMF
Other operating expenses	**38,523**	30,687	7,836	25.5 %
Operating income	**$ 58,109**	$ 37,625	$ 20,484	54.4 %

6-6-6-6

The key components of the increase in adjusted gross margin** are shown below:

(in thousands)		
Contribution from FCG	$	24,959
Natural gas growth including conversions (excluding service expansions)		1,916
Natural gas transmission service expansions		1,622
Rate changes associated with the Florida natural gas base rate proceeding [(1)]		1,498
Contributions from regulated infrastructure programs		1,278
Other variances		253
Quarter-over-quarter increase in adjusted gross margin**	**$**	**31,526**

[(1)] Includes adjusted gross margin contributions from permanent base rates that became effective in March 2023.

The major components of the increase in other operating expenses are as follows:

(in thousands)		
FCG operating expenses	$	10,413
Payroll, benefits and other employee-related expenses		(1,787)
Other variances		(790)
Quarter-over-quarter increase in other operating expenses	**$**	**7,836**

Unregulated Energy Segment

	Three Months Ended March 31,			
(in thousands)	**2024**	**2023**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 46,049**	$ 42,594	$ 3,455	8.1 %
Depreciation, amortization and property taxes	**5,155**	4,822	333	6.9 %
Other operating expenses	**19,465**	20,527	(1,062)	(5.2)%
Operating income	**$ 21,429**	$ 17,245	$ 4,184	24.3 %

The major components of the change in adjusted gross margin** are shown below:

(in thousands)		
Propane Operations		
Increased propane customer consumption	$	1,388
Increased propane margins and service fees		559
Contributions from acquisition		438
Aspire Energy		
Increased margins - rate changes and gathering fees		938
Increased customer consumption		309
Other variances		(177)
Quarter-over-quarter increase in adjusted gross margin**	**$**	**3,455**

7-7-7-7

The major components of the decrease in other operating expenses are as follows:

(in thousands)		
Decreased payroll, benefits and other employee-related expenses	$	(1,177)
Other variances		115
Quarter-over-quarter decrease in other operating expenses	**$**	**(1,062)**

Forward-Looking Statements

Matters included in this release may include forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements. Please refer to the Safe Harbor for Forward-Looking Statements in the Company's 2023 Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the first quarter of 2024 for further information on the risks and uncertainties related to the Company's forward-looking statements.

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Thursday, May 9, 2024 at 8:30 a.m. Eastern Time to discuss the Company's financial results for the three months ended March 31, 2024. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.343.5419
International: 203.518.9731
Conference ID: CPKQ124

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas transmission and distribution, electricity generation and distribution, propane gas distribution, mobile compressed natural gas utility services and solutions, and other businesses.

Please note that Chesapeake Utilities Corporation is not affiliated with Chesapeake Energy, an oil and natural gas exploration company headquartered in Oklahoma City, Oklahoma.

* Refer to Major Projects and Initiatives Table for additional information.

** Transaction and transition-related expenses attributable to the acquisition and integration of FCG have been excluded from the Company's non-GAAP measures of adjusted net income and adjusted EPS. See reconciliations above for a detailed comparison to the related GAAP measures.

11-11-11-11

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes all major projects and initiatives that are currently underway or recently completed. The Company's practice is to add new projects and initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, all compared to the Company's prior quarter filings. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's first quarter 2024 Quarterly Report on Form 10-Q.

Detailed Discussion of Major Projects and Initiatives

Pipeline Expansions

St. Cloud / Twin Lakes Expansion

In July 2022, Peninsula Pipeline filed a petition with the Public Service Commission ("PSC") for the State of Florida for approval of its Transportation Service Agreement with the Company's Florida subsidiary, Florida Public Utilities ("FPU"), for an additional 2,400 Dts/day of firm service in the St. Cloud, Florida area. As part of this agreement, Peninsula Pipeline constructed a pipeline extension and regulator station for FPU. The extension supports new incremental load due to growth in the area, including providing service, most immediately, to the residential development Twin Lakes. The expansion also improves reliability and provides operational benefits to FPU's existing distribution system in the area, supporting future growth. The project went into service in July 2023.

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of an amendment to its Transportation Service Agreement with FPU for an additional 10,000 Dts/day of firm service in the St. Cloud, Florida area. Peninsula Pipeline will construct pipeline expansions that will allow FPU to serve the future communities that are expected in that area. The Florida PSC approved the projects in May 2024.

Newberry Expansion

In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dts/day of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of existing Company owned propane community gas systems in Newberry was made in November 2023. The Florida PSC approved it in April 2024. Conversions are anticipated to begin during the second quarter of 2024.

East Coast Reinforcement Projects

In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024.

Central Florida Reinforcement Projects

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Plant City and Lake Mattie with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024.

13-13-13-13

Pioneer Supply Header Pipeline Project

In March 2024, Peninsula Pipeline filed a petition with the Florida PSC for its approval of Firm Transportation Service Agreements with both FCG and FPU for a project that will support greater supply growth of natural gas service in southeast Florida. The project consists of the transfer of a pipeline asset from FCG to Peninsula Pipeline. Peninsula Pipeline will proceed to provide transportation service to both FCG and FPU using the pipeline asset, which provides opportunities for additional project development.

Alternative Natural Gas Projects

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for its approval of its Transportation Service Agreements with FCG for projects that will support the transportation of additional supply into FCG's distribution system. The projects are driven by continued growth in the regions and will facilitate additional transportation capacity, including the transportation of pipeline quality gas produced from landfills through FCG's system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian-River County, and Miami-Dade County.

Regulatory Initiatives

Maryland Natural Gas Rate Case

In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we are seeking approval of the following: (i) permanent rate relief of approximately $6.9 million; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. The outcome of the application is subject to review and approval by the Maryland PSC. Rate changes are suspended until December 2024.

Maryland Natural Gas Depreciation Study

In January 2024, our Maryland natural gas distribution businesses filed a joint petition for approval of their proposed unified depreciation rates with the Maryland PSC. The outcome of the filing is subject to review by the Maryland PSC which is expected to be completed in the third quarter of 2024.

FCG SAFE Program

In April 2024, FCG filed a petition with the Florida PSC to more closely align the SAFE Program with FPU's GUARD program. Specifically, the requested modifications will enable FCG to accelerate remediation related to problematic pipe and facilities consisting of obsolete and exposed pipe. If approved, these efforts will serve to improve the safety and reliability of service to FCG's customers. These modifications, if approved, result in an estimated additional $50 million in capital expenditures associated with the SAFE Program which would increase the total projected capital expenditures to $255 million over a 10-year period.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

For the first quarter of 2024, higher consumption driven primarily by colder weather compared to the first quarter of 2023 resulted in a $1.9 million increase in adjusted gross margin. While temperatures were colder than the prior-year period, they were approximately 11.7 percent and 10.3 percent warmer, respectively, compared to normal temperatures in our Delmarva and Ohio service territories. Assuming normal

14-14-14-14

temperatures, as detailed below, we estimate that operating income would have been higher by approximately $1.5 million, or $0.05 per share. The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the three months ended March 31, 2024 and 2023.

HDD and CDD Information

	Three Months Ended March 31,		
	2024	**2023**	**Variance**
Delmarva			
Actual HDD	**1,962**	1,774	188
10-Year Average HDD ("Normal")	**2,221**	2,285	(64)
Variance from Normal	**(259)**	(511)	
Florida			
Actual HDD	**470**	344	126
10-Year Average HDD ("Normal")	**470**	505	(35)
Variance from Normal	**—**	(161)	
Ohio			
Actual HDD	**2,659**	2,384	275
10-Year Average HDD ("Normal")	**2,965**	2,965	—
Variance from Normal	**(306)**	(581)	
Florida			
Actual CDD	**181**	323	(142)
10-Year Average CDD ("Normal")	**217**	192	25
Variance from Normal	**(36)**	131	

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula and in the legacy Florida Natural Gas distribution business increased by approximately 4.2 percent and 3.6 percent, respectively, for the three months ended March 31, 2024.

The details of the adjusted gross margin increase are provided in the following table:

	Adjusted Gross Margin** For the Three Months Ended March 31, 2024	
(in thousands)	**Delmarva Peninsula**	**Florida**
Customer growth:		
Residential	$ 490	$ 880
Commercial and industrial	156	390
Total customer growth [(1)]	**$ 646**	**$ 1,270**

15-15-15-15

[1] Customer growth amounts for the legacy Florida operations include the effects of revised rates associated with the Company's natural gas base rate proceeding, but exclude the effects of FCG.

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $70.6 million for the three months ended March 31, 2024. The following table shows a range of the forecasted 2024 capital expenditures by segment and by business line:

	2024	
(in thousands)	**Low**	**High**
Regulated Energy:		
Natural gas distribution	$ 150,000	$ 170,000
Natural gas transmission	90,000	120,000
Electric distribution	25,000	28,000
Total Regulated Energy	265,000	318,000
Unregulated Energy:		
Propane distribution	13,000	15,000
Energy transmission	5,000	6,000
Other unregulated energy	13,000	15,000
Total Unregulated Energy	31,000	36,000
Other:		
Corporate and other businesses	4,000	6,000
Total 2024 Forecasted Capital Expenditures	**$ 300,000**	**$ 360,000**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital. Historically, actual capital expenditures have typically lagged behind the forecasted amounts.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 48 percent as of March 31, 2024.

Beth Cooper - EVP, Chief Financial Officer, Treasurer & Assistant Corporate Secretary
James Moriarty - Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer

Conference Call Participants

Paul Fremont - Ladenburg
Tate Sullivan - Maxim Group

Operator

Welcome to the Chesapeake Utilities Corporation Second Quarter 2024 Earnings Conference Call. At this time, all participants have been placed in a listen-only mode and the floor will be open for your questions following the presentation. [Operator Instructions]

I would now like to turn the call over to Lucia Dempsey, Head of Investor Relations. Please go ahead.

Lucia Dempsey

Thank you, and good morning, everyone. This is Lucia Dempsey, Chesapeake, Head of Investor Relations and I appreciate you joining us this morning.

Today's presentation can be accessed on our website under the Investors page and events and presentations subsection. After our prepared remarks, we will open up the call for questions.

On slide two, we show our typical disclaimers while I remind you that matters discussed on this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results. The safe harbor for forward-looking statements section of our 2023 annual Report on form 10-K provides further information on the facts that could cause such statements to differ from our actual results.

Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share, and the information presented today includes the appropriate disclosures in accordance with the SEC's Regulation G.

A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation, our earnings release and our second quarter Form 10-Q.

Here at Chesapeake Utilities, safety is our first priority. We start all meetings with a safety moment and will do so here with a safety moment on emergency preparedness as we are already in the midst of hurricane season. Our subsidiary, Florida Public Utilities, recently completed its annual hurricane preparation drill, during which our team practiced our emergency response procedures. Lessons learned in this drill have already been put to the test during Hurricane Debby earlier this week. Our customers have experienced minimal disruptions in service and we are grateful to team members across the organization who responded efficiently to keep us operating safely.

SPU overall continues to show improved reliability metrics, which can be attributed to the system strengthening work the team has done as part of the storm protection plan. This work has improved the frequency and duration of electric outages by 11.3% and 9.7%, respectively, when compared with June 2023.

On an individual level, whether you live in an area impacted by hurricanes or not, being prepared for emergencies is critical. In fact, putting together a disaster supplies kit is one of the safety challenges for Chesapeake team members this quarter.

FEMA recommends a personal emergency kit with food, water and supplies to last for at least 72 hours. Ready.gov has helpful guides and checklists that you can use to prepare for yourself and your loved ones.

I'll now introduce our presenters today. Jeff Householder, Chair of the Board, President and Chief Executive Officer, will provide an update on our high growth service areas, capital investment plan and business transformation efforts, including the Florida City gas integration.

Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary will discuss our financial results, strong balance sheet and dividend as well as earnings growth trajectory. And Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer, will review our regulatory strategy, including key project approvals and recent company awards.

With that, it's my pleasure to turn the call over to Jeff.

Jeff Householder

Thank you, Lucia. Good morning and thanks to all of you for joining our call today. I'll begin with slide five.

Adjusted earnings per share this quarter was $0.86, bringing our year-to-date 2024 EPS to $2.96. Our results are well aligned with our expectations with strong contributions from our Florida City Gas and legacy operations offset by FCG operating expenses and financing costs.

We generated adjusted gross margin of approximately $127 million this quarter, a 27% increase over the second quarter of last year and adjusted net income of approximately $19 million, up 19% from the same period last year.

Our year-to-date earnings performance, combined with our growth expectations for the remainder of 2024 enable us to reaffirm our full year 2024 adjusted earnings per share guidance of $5.33 to $5.45. Our progress with integrating FCG, coupled with our increased level of capital projects and regulatory initiatives also enable us to reaffirm our 2025 and 2028 EPS guidance.

As I'll discuss in more detail shortly, our 2024 capital growth plan remains on track, with $160 million invested in the first half of this year and $300 million to $360 million expected for full year 2024.

Turning to slide six. We operate in some of the fastest growing areas of the country, which enable us to deploy sustainable capital investments to meet the needs of growing customer demand. Customer growth remains strong in both Delmarva and Florida, with each area seeing a 3.7% increase in residential customers in the second quarter of this year relative to the same period last year.

We expect strong population growth to continue in our service areas. In spite of increased interest rates, we are regularly executing contracts with builders and developers for gas service to new residential developments. Customers are looking for gas service in their new homes, and we expect to continue to add customers at significantly higher rates and have been typical for our industry.

Cecil county is one particular example of substantial growth in our Delmarva service area. In 2018, Chesapeake began constructing natural gas distribution infrastructure in a key commercial quarter in Cecil County, Maryland, which is strategically located between Baltimore and Philadelphia. The initial distribution capacity extending from our Eastern Shore pipeline attracted a number of key businesses and distribution centers to the area, including IKEA, FedEx and Amazon, driving substantial demand for additional natural gas service and infrastructure.

Since then, we've purchased the adjoining Elkton gas operation from SJI. They gave us a more local field operation and have installed at least 28 miles of gas distribution along I-95 to serve incremental demand growth, and we used a state energy grant to extend natural gas infrastructure to support the Cecil County library as well.

Cecil County is a great example of the growth we're seeing throughout our service areas, as well as the critical role that Chesapeake's natural gas infrastructure investments play in our communities to drive critical economic development and job creation.

The opportunity to serve significant customer growth and demand is the basis for our overall growth strategy, which in turn drives sustainable earnings growth. Over the past several years, we have been consistently focused on three fundamental drivers to support earnings growth, as shown on slide seven.

First, we work hard to identify and prudently deploy capital investment in projects that align with customer demand and enable us to continue providing safe and reliable energy delivery services to support customer growth. Our capital investment plan is primarily comprised of system expansion investments to serve new customers as well as capital to support our multiple infrastructure programs that contribute to the reliability of our systems and investments in technology that support enhanced operational efficiency and customer service.

Second, we proactively manage our regulatory agenda to support cost recovery of our capital projects. As the majority of our capital plan is aimed at serving new and existing customers in our regulated businesses, we're working closely with governmental agencies to secure permitting for our capital construction projects and with federal and state regulators to ensure appropriate cost recovery for these investments, which bring safe, reliable and affordable services to customers for years to come. And Jim will go into more detail on this shortly.

The third, and perhaps most important, given our recent overall enterprise growth, is continued business transformation, which focuses on our people, processes, systems and organizational structure. Our continuous improvement initiatives enable us to ensure long term success in an ever-changing environment. Not only do we need to be transforming the organization given our growth, but at the same time considering and planning for where we're headed.

Capital deployment is our primary growth driver, and on slide eight you can see that we've already made significant progress toward identifying and initiating $1.3 billion of our five-year capital investment plan of $1.5 billion to $1.8 billion. This includes capital for a number of ongoing infrastructure initiatives and approved projects across our regulated businesses, as well as approximately $80 million in identified technology investments thus far.

While we are fundamentally a regulated utility company, we look for opportunities to leverage our related businesses in ways that might not be possible for others. Our growth plan over the next several years includes multiple examples of our business units working together to meet the needs of customers.

Our transmission businesses will continue to expand so our distribution companies can meet increased customer supply needs. Our propane unit will grow and hold customers until our natural gas systems reach new areas. Marlin Gas Services will increase the transport of CNG, RNG or LNG to provide market area supply to our systems, helping to meet both baseload and peaking customer needs.

I would also note that all of the $1.3 billion of specifically identified projects on slide eight are related to our regulated businesses. As we make additional progress achieving our five-year capital guidance, we will identify additional regulated and non-regulated investments.

Slide nine shows our progress toward our 2024 capital expenditure guidance of $300 million to $360 million, with approximately 48% or $160 million, invested in the first half of this year. Our team is focused on efficiently deploying the remaining capital in 2024 on growth opportunities and business transformation initiatives across the company, including advancing multiple growth projects that provide the basis for our FCG acquisition.

Slide 10 provides additional detail on the major projects that are driving nearly $300 million of capital investment and over $36 million of additional adjusted gross margin in 2024 and 2025 combined. This table now includes projects within both our Delmarva and Florida footprints.

This last quarter, we've added seven new projects representing nearly $11 million of incremental adjusted gross margin in 2025. The first three new projects are St. Cloud, Lake Mattie and Plant City, which received PSC approval in May of this year. These Florida natural gas expansion projects represent $42 million in capital expenditures and will support the significant population growth in these Central Florida communities, including the second St. Cloud expansion in less than a year.

The next three new projects provide renewable natural gas, or RNG, transportation infrastructure in Florida's Indian River, Brevard and Miami Dade counties, representing a combined $46 million of capital. These projects were approved by the Florida PSC last month and will benefit our customers by bringing RNG produced from local landfills into our system, while also reinforcing system reliability and sustainability.

The latest addition is the Warwick extension, a transmission expansion project with an estimated capital cost of $9 million. This project will reinforce supply in the growing Middletown, Delaware area and enhanced capacity in the southern portion of Cecil County, Maryland to meet customer demand and support future growth. The margin of these major projects reinforces our existing 2024 and 2025 EPS guidance ranges, and I'm pleased with our team's continued execution on project development, including completing the necessary regulatory filings, obtaining regulatory approvals, and constructing projects on time and on budget.

Turning to slide 11, our third fundamental growth driver is focused on continued business transformation. The FCG integration is critical here, and we remain on track with bringing the remaining transitional services in-house, optimizing operations, identifying and realizing synergies, and most importantly, accelerating capital investment opportunities to serve customers. We continue to implement ways to operate seamlessly as one company, and our efforts to leverage our greater footprint, optimize efficiencies and invest in growth are benefiting the whole enterprise.

We also are continuing our journey to transform our customer care and field services functions to achieve world-class performance. Our goal is to streamline processes and drive efficiencies within many functional areas, including customer service, billing and invoicing, and operational field services, in an effort to provide a better overall experience for our customers.

Later this month, we will go live with our SAP system implementation. The technology system is a major step to support the operational transformation we've been working toward for the last few years. We've had a number of internal cross functional teams highly engaged with SAP, IBM and others to ensure a successful launch. We'll also continue to implement technology upgrades across the enterprise, including transitioning FCG onto the SAP system next spring.

And with that, I'll turn to Beth to discuss our financial results in more detail.

Beth Cooper

Thanks Jeff, and good morning, everyone. It is great to be with you today. Our financial results, as shown on slide 12, demonstrate another successful quarter with adjusted gross margin of approximately $127 million, up 27% from the second quarter of last year, driven by the addition of Florida City Gas as well as solid performance across all of our businesses.

Operating income for the quarter increased 44% to approximately $41 million, reflecting effective cost management initiatives that added to the strong adjusted gross margin growth. Excluding transaction and transition related expenses, operating income was up approximately $14 million, or 49%, when compared with the second quarter of last year.

As a result of our continued business integration, optimization and collaboration efforts, we drove much of this operating income to the bottom line, with adjusted net income up 19% to approximately $19 million for the quarter and up 26% to approximately $66 million for the first half of 2024 compared with the same periods in 2023.

I'll now turn to slide 13 and highlight some of the key drivers of our second quarter adjusted earnings per share of $0.86. Our Florida City Gas operations contributed $0.77 in adjusted EPS, reflecting strong customer growth and seasonally consistent natural gas demand. Our legacy natural gas growth, infrastructure and transmission operations generated $0.13 of incremental EPS this quarter as we continue to see consistently strong customer demand for natural gas and incremental earnings from our capital investments placed into service in the last year.

These gains were offset by a few factors, including $0.33 of operating expenses related to Florida City Gas, $0.11 of increased expenses related to payroll and related costs, insurance, depreciation and amortization, and property taxes, and approximately $0.50 related to financing the Florida City Gas acquisition.

Moving to slide 14. Adjusted gross margin for our Regulated Energy segment was approximately $103 million this quarter, up 34% from the second quarter of last year. Operating income also significantly improved, up 38% to $41 million, excluding non-recurring transaction and transition costs. This improvement was primarily driven by strong earnings contribution from Florida City Gas, organic growth in our natural gas distribution operations, and incremental margins from our transmission service expansions and regulated infrastructure programs.

As shown on slide 15, our Unregulated Energy segment also delivered solid improvements relative to the second quarter of last year, with adjusted gross margin up 3% to $23 million and operating income improving to $238,000 for the second quarter of 2024. As we've discussed in the past, volumes for these businesses are typically lower in the second quarter due to warmer temperatures.

I'll now shift to slide 16 to review our capital structure and financing plan. Maintaining a strong balance sheet, adequate liquidity, and access to competitively priced capital is critical to support our fundamental growth driver of prudent capital deployment. To this end, we continue to execute on a financing plan consistent with an investment grade credit profile.

We ended the second quarter of 2024 with an equity to total capitalization ratio of 48%, up from 47% at the end of the year 2023. We continue to target an equity to total capitalization ratio of 50% and will issue small amounts of equity over time through our existing direct stock purchase and dividend reinvestment, retirement savings and other standard equity programs, and we'll look to reestablish an ATM program at the appropriate time to move closer toward that target.

We also took several steps in July and August of this year to support our growth investment plan and manage our overall debt costs. First, we amended our revolving credit facility, upsizing it by $75 million to a total of $450 million and extending the maturity by several years.

Second, we have entered into an interest rate swap on $50 million for five years at a rate of 3.97%. Our liquidity also remains strong with 70% or nearly $500 million of liquidity available under our revolving credit facility and private placement shelf facility. We will continue to evaluate and advance our equity to total capital ratio towards our target capital structure to ensure we remain well-positioned to execute on our growth strategy over the next several years.

Slide 17 shows our strong history of consistent dividend growth. Our 10-year dividend CAGR through 2024 is approximately 9%. Last quarter, we announced a significant dividend increase of $0.05 per share representing 8.5% year-over-year growth. Yesterday, our Board approved the second quarter dividend of $0.64 per share payable on October 7, 2024 to shareholders of record as of September 16, 2024.

Our dividend is a key component of our balanced capital allocation strategy and our target payout ratio of 45% to 50% is designed to return value to shareholders while also allowing for earnings reinvestment to fund future growth capital investments. We believe this strategy enables our investors to benefit from long-term top quartile earnings growth, which in turn facilitates top quartile dividend growth.

Speaking of earnings growth, slide 18 demonstrates our consistent earnings per share performance with our 2028 EPS guidance range, reflecting a 10-year EPS CAGR of approximately 8.5%. This growth is driven by our tireless pursuit of top quartile earnings performance, led by our fundamental growth pillars of prudent capital investment, proactive regulatory initiatives and continuous operational improvements.

Our year-to-date 2024 performance is in line with our expectations and I am proud of our team's hard work thus far in the year. We have a longstanding record of meeting our targets and will continue that trajectory. So, we are reaffirming our 2024 adjusted EPS guidance of $5.33 to $5.45 per share, our 2025 guidance of $6.15 to $6.35 per share, and our 2028 guidance of $7.75 to $8 per share.

Before I turn the call to Jim, I'd like to review our path to our 2024 EPS guidance as shown on slide 19. Our confidence in achieving this guidance is driven by several key factors. First, we expect incremental contributions from our legacy businesses to drive approximately $0.40 to $0.50 of incremental earnings per share.

Second, a full year of FCG operations net of interest expense related to the acquisition, financing should add roughly $0.35 to $0.45 per share. And third, we anticipate incremental opportunities of approximately $0.20 to $0.30 per share from our business transformation, regulatory and cost management initiatives across the enterprise. These factors are partially offset by dilution of about $1 per share due to the equity issuance completed to finance the Florida City Gas acquisition. The ranges provided here on this slide are consistent with the ranges we communicated last quarter, And I'd like to reiterate our focus on driving shareholder value by delivering on the attractive opportunities throughout our enterprise.

With that, it's my pleasure to turn the call over to Jim. Jim?

James Moriarty

Thank you, Beth, and good morning, everyone. As Jeff discussed earlier, a proactive regulatory agenda is our second fundamental growth driver and I would like to share several updates in this area.

Starting with slide 20, we now have 11 projects representing over $150 million of capital that have been approved since the fourth quarter of last year, demonstrating strong regulatory support for meeting customer needs through natural gas infrastructure expansions.

Last month, the Florida PSC approved three new renewable gas transmission projects in Florida's Indian River, Brevard and Miami-Dade counties. In addition to supporting energy sustainability, these RNG projects increase gas supply and strengthen system reliability and flexibility for these growing communities.

Construction also continues on schedule for our other recently approved transmission expansion projects, including buildouts for new and growing Florida communities in Wildlife, Boynton Beach, New Smyrna Beach, Lake Mattie, Plant City and St. Cloud.

Slide 21 provides an update on a project designed to support growth and resiliency in the Delmarva region, our Eastern Shore Worcester Resiliency Upgrade, or WRU, which is a liquefied natural gas storage project in Maryland. This $80 million project consists of five low profile storage tanks that can hold up to 500,000 gallons of LNG.

WRU will provide critical energy service to customers during the peak winter/heating season and will protect against weather related disruptions, keeping energy prices affordable so that no one is left behind. We are anticipating FERC approval by the end of 2024 and remain on track for construction to begin in the first quarter of 2025 for an in-service date in the third quarter of 2025.

Our infrastructure programs detailed on slide 22 are an important part of our service offerings and growth strategy, particularly as they are supported by regulatory mechanisms that ensure timely cost recovery. These programs include the Capital Cost Surcharge program for the Eastern Shore system, the SAFE and GUARD programs for natural gas infrastructure in Florida, and the Storm Protection Plan for our Florida electric operations. In total, these programs represent over $350 million of capital expenditures in the next five years and approximately $12 million and $19 million of adjusted gross margin in 2024 and 2025, respectively.

Turning to slide 23. Our rate case strategy is also a key driver of effective cost recovery and return on investment. 2024 is our first full year with increased rates in Florida's natural gas operations, where we operate with allowed ROEs of 10.25% for Florida public utilities and between 8.5% and 10.5% for Florida City Gas.

At the start of this year, we filed for a rate increase and updated depreciation study for our combined natural gas entities in Maryland. We are pleased with the progress thus far in the case, which includes an approved depreciation study settlement for $1.2 million in annual depreciation expense savings retroactive to January of 2023.

We recently have been participating in productive settlement discussions on the remainder of the case and appreciate the constructive conversations we've had with regulators thus far. We are also moving forward with two additional rate cases. In May, we submitted an intent to file with the Delaware PSC for our Delaware LVCs, and in June we completed a similar filing with the Florida PSC for adjusted rates for FPU Electric. We expect to file both of those rate cases later this month.

We also continue to move forward with innovative and sustainable investments, including our Full Circle Dairy RNG facility as shown on slide 24. The facility is now in the commissioning phase and has been producing RNG for the last two months. We successfully completed initial injections of RNG into our system beginning in Yulee, Florida in June using the virtual pipeline capabilities of our Marlin Gas Services subsidiary. Our RNG strategy continues to evolve as the market matures.

Looking ahead, we are poised to execute on opportunities that enable us to use our existing transportation services and construction expertise to provide pathways to market for RNG producers.

Turning now to slide 25, I would like to cover our sustainability initiatives and recent recognitions. We look forward to publishing our second Micro Sustainability Report during the third quarter, which will focus on our environmental stewardship offers. We are proud to share that two of our subsidiaries received accolades this quarter. Florida City Gas was named easiest to do business with by Escalent, a data analytics and advisory firm. We're proud to have our FCG colleagues as part of our family and we celebrate this achievement.

Our propane distribution subsidiary, Sharp Energy received the 2024 award for Best Gas Company by Metropolitan magazine. This recognition reflects the reader's choice for the finest business in the Delmarva region and underscores our longstanding commitment to providing our customers with high quality products and excellent service.

In addition, we were honored to be named Best for Corporate Governance in the US by World Finance this quarter. This marks our second time being recognized with this prestigious award and is a credit to our team as well as the strong corporate governance principles and standards embedded throughout our organization.

All of these recognitions confirm our significant efforts to deliver excellence and create value for our stakeholders. Making life better for our employees, customers and the communities we serve remains paramount in everything we do.

With that, I will turn the call to Jeff for concluding remarks.

Jeff Householder

Thanks, Jim. This year is a critical transition for us as we execute on integrating FCG, achieving our 2024 EPS and capital guidance, advancing the organization forward on multiple fronts to achieve the significant growth embedded in our 2025 EPS guidance, and making significant customer focused capital investments to support our long-term growth plan. I'm very pleased with our progress in these areas, including delivering financial results that remain in line with our full year expectations and represent top quartile earnings performance.

Recently, we've been described as small, but mighty by the financial community, and I think that description is accurate. Whether we are executing on and integrating acquisitions, achieving top quartile financial results, or advancing customer focused investments, we're proud of our track record of delivering results and are focused on maintaining that record in the future.

Chesapeake continues to be a special place to work and remains a unique investment opportunity marked by a significant track record of superior performance, strong opportunities for growth, and top quartile long-term shareholder returns.

With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

Thank you. The floor is now open for questions. [Operator Instructions] Thank you.

Our first question will come from Paul Fremont with Ladenburg. Please go ahead.

Paul Fremont

Great, thanks and congratulations on a good quarter. I guess, my first question relates to sort of the RNG investments, including -- maybe starting with the Full Circle Dairy. Is the RNG project itself owned by Chesapeake, or who is that owned by?

Jeff Householder

Good morning. This is Jeff. Yes, we are owning and operating through contract, the Full Circle Dairy facility.

Paul Fremont

Okay. And is that a regulated investment, or does that fall under sort of the non-regulated category?

Jeff Householder

It's a non-regulated investment at this point. We actually own that facility through a subsidiary of one of our regulated utilities in Florida. And we are pursuing, as you may know, a variety of tariff adjustments and potentially at some point some legislative action that would allow us to move that facility into the regulated utility. And so, we'll see. We don't -- obviously, we don't own the dairy farm or the cows, but we just have the digester and the lagoon and the operating facility that's processing the biogas and RNG.

Paul Fremont

So, I would assume that project is going to be eligible for 45Z tax credits. Is that something that you would expect to realize over the course of the next three years?

Jeff Householder

We would. Beth, you want to jump in on that one, yes.

Beth Cooper

That's correct. We would. That's something by us getting it constructed in the timeframe that we did, we would have that tax. Yeah.

Paul Fremont

And is there sort of any estimate on sort of a contribution that you would expect from those tax credits?

Beth Cooper

We can put that out. We've not disclosed that to date. This isn't a huge project overall, but we can come back to you, Paul, with that information.

Paul Fremont

And then the other three that you talked about, which I think are landfill projects in Florida, those are within the regulated utility.

Jeff Householder

Those are -- and again, we don't own the landfill, obviously, and we don't own the gas processing equipment even in these particular examples. What we are doing is providing the pipeline connection between the RNG processor and our distribution facilities. And in this particular case, these particular cases, all that's being done through our Peninsula pipeline transmission business, the intrastate pipe business that we own in Florida, that we are moving that gas from the processor through Peninsula pipeline into our distribution facilities.

Beth Cooper

And so, Paul, what Jeff says, you can think about this not dissimilarly to what we did with the project in Ohio with a fire where we picked up gas at a landfill and we actually moved it through a fire system. That's the same thing Peninsula pipeline is going to do with these projects.

Paul Fremont

Great. And then my last question, I think, has to do with, you're at a 48% equity ratio now. What -- how should we think about the timing to get to your targeted 50%?

Beth Cooper

We are looking to do that over the next year to year and a half to move back there. Certainly, we will look at the market. We've been monitoring that relative to interest rates and where our equity is in regards to kind of the market valuation. So, you could see us move a little quicker, a little slower, but certainly we're making strides. Our initial forecast coming out of the transaction, we didn't expect to be moving, as quickly as we have already being at 48% six months after the transaction. So, you'll consider -- you'll still see us move pretty quickly as long as the market cooperates.

Paul Fremont

Great. Thank you so much.

Beth Cooper

Thank you.

Jeff Householder

Thank you.

Operator

[Operator Instructions]

We will take our next question from Tate Sullivan with Maxim Group. Please go ahead.

Tate Sullivan

Hi. Thanks, Jeff. Following up on the renewable natural gas supply projects, I mean, in the adjusted gross margin table for '25, estimating $5.5 million incremental contributions. So, are all three of those projects in Florida City Gas territory, and are these the first RNG projects in those service -- in FCG's service territory?

Jeff Householder

They all are in Florida City Gas service territory. And I believe they are the first renewable natural gas connections that FCG is doing.

Tate Sullivan

And there's no existing processing equipment at the landfills. And is the project timeline for all three, roughly a year or so, based on approval?

Jeff Householder

There are no processing facilities that would convert the biogas into renewable natural gas with a standard that would meet our requirements for pipeline injection. At this point, they're in the process. These are three independent processing companies that are engaged in this, and they are in the process of building those facilities. And they probably do, come on. I can get you the exact dates, but they are, give or take about a year out. We'll probably have some of the pipeline facilities in place a little before then?

Tate Sullivan

And then also all three involve supply pipeline extensions to the landfills themselves, is that correct?

Jeff Householder

That's correct. We're building those, as I mentioned, through our Peninsula pipeline intrastate transmission business in Florida, and they'll interconnect from the processor at the landfill back into the FCG distribution system.

Tate Sullivan

Is this quite a scalable opportunity in Florida? I mean, was the regulator -- regulating body receptive to these projects? I mean, it seems like it could be duplicated across landfills.

Jeff Householder

Yes. I mean, we will certainly look at that. The regulator did approve the three pipeline expansions on PPC serving into our affiliate FCG. And any time we can find that kind of a situation and the economics make sense on the pipeline expansion, then we're certainly up for that. And we have other opportunities, I think, to engage our Marlin CNG business in transporting that gas if it doesn't make economic sense to build a pipeline.

Tate Sullivan

Great. Very impressive. Okay. Thank you very much.

Operator

Thank you. There are no further questions at this time. I'll turn the call back over to Jeff Householder for any closing remarks.

End of Q&A

Jeff Householder

Thank you. We appreciate you joining us this morning, and we certainly appreciate your continued interest in Chesapeake Utilities. And we'll speak with you soon. Goodbye.

Operator

Thank you. And this concludes Chesapeake Utilities Corporation's second quarter 2024 earnings conference call. Please disconnect your line at this time and have a wonderful day.

Second Quarter 2024

Earnings Call Presentation

CHESAPEAKE UTILITIES CORPORATION

August 9, 2024

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward-looking statements may be identified by the use of words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities Annual Report on Form 10-K for the year ended December 31, 2023 filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share (“EPS*”). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Safety Moment: Hurricane & General Emergency Preparedness

FLORIDA PUBLIC UTILITIES

- Completed its annual **Hurricane Season Preparedness Drill** in July
- Lessons learned were already put to the test this past week with **Hurricane Debby**
- While there were significant impacts to communities in Florida and beyond, we are grateful that outages have been limited
- **Our teams have responded efficiently** to ensure safe and reliable service for our customers
- FPU continues to show **improved electric reliability metrics**, including reducing the frequency and duration of outages by ~10%

FEMA

Personal Emergency Preparedness

- Being prepared means having your own food, water and other supplies to last for at least 72 hours
- A disaster supplies kit is a collection of basic items your household may need in the event of an emergency
- Visit Ready.gov for a checklist of supplies, including a printable version from FEMA

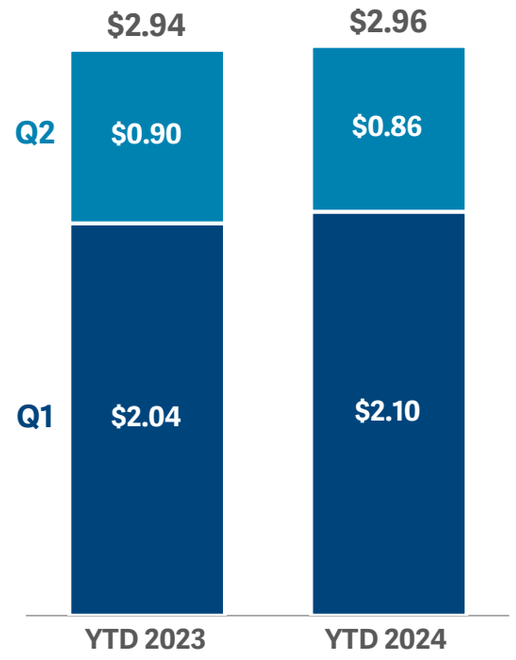
Continued Strong Financial Performance in 2024

Adjusted Diluted EPS[1]



Key Financial Highlights

Q2 2024 Results

- Adjusted Gross Margin: $126.6M, up 27% from Q2 2023
- Adjusted Net Income: $19.3M, up 19% from Q2 2023

Earnings Guidance Reaffirmed

- FY 2024 Adjusted EPS of **$5.33 - $5.45** per share
- FY 2025 Adjusted EPS of **$6.15 - $6.35** per share
- FY 2028 Adjusted EPS of **$7.75 - $8.00** per share

CapEx Guidance Reaffirmed

- YTD 2024 Capital Expenditures of **$160M**
- 2024 Capital Expenditure Guidance: **$300M - $360M**
- 2024 - 2028 5-Year CapEx Guidance: **$1.5B - $1.8B**

[1] *Adjusted Diluted Earnings Per Share Growth from Continuing Operations; 2024 excludes transaction / transition-related costs associated with the FCG acquisition.*

High-Growth Service Areas Drive Investment Opportunities

Strong Customer Growth

Q2 2024 vs Q2 2023

CHESAPEAKE UTILITIES CORPORATION

Executing On Our Long-Term Growth Plan

5-Year Capex Guidance is On-Track and Achievable

~$1.3 billion of identified capital projects support our 5-year CapEx guidance of $1.5 - $1.8 billion

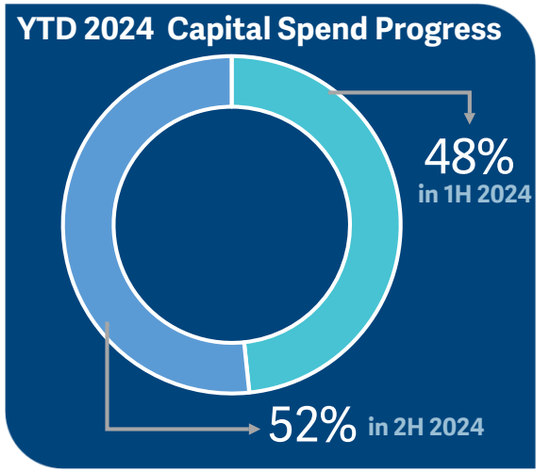
Segment	5-Year Guidance
Regulated Distribution	$600 - $645M
Regulated Transmission	$435 - $590M
Regulated Infrastructure	$300 - $340M
Unregulated Businesses	$140 - $165M
Technology	$70 - $90M
Total	$1.5 - $1.8B

We have already made significant progress identifying capital projects, many of which are also already underway

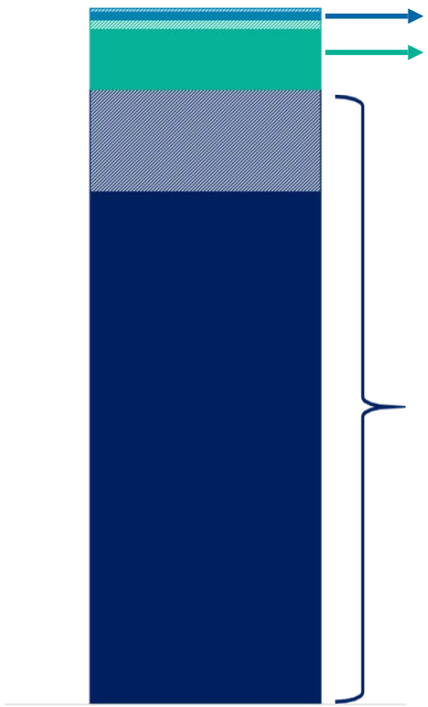
Identified Regulated CapEx	5-Year Spend
Natural Gas LDC Organic Growth	$625M
Newberry, Wildlight Phase 2	$28M
Boynton Beach, New Smyrna	$36M
Lake Mattie, St. Cloud, Plant City	$42M
Other Approved Pipeline Projects	$49M
Worcester Resiliency	$80M
GUARD / SAFE Programs[1]	$230M
Eastern Shore Capital Surcharge	$75M
Florida Electric Storm Protection Plan	$50M
Technology Transformation	$80M
Total Identified & Ongoing Capital	~$1.3B

[1] *Includes $50 million requested in April 2024 but not yet approved.*

2024 Capital Investment On Track to Drive Margin Growth



Year-to-date capital expenditures on track, with $160M in spending on strategic growth opportunities and technology transformation



$300 - $360M

2024E Capital Expenditures

General Corporate CapEx: $4 - $6M

Unregulated Energy CapEx: $31 - $36M

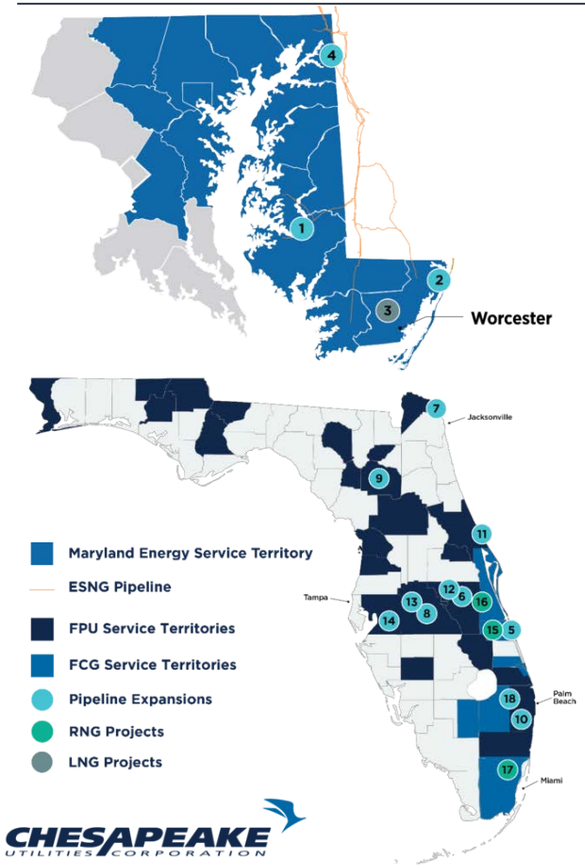
- Propane Distribution: $13 - $15M
- Energy Transmission: $5 - $6M
- Other Unregulated: $13 - $15M

Regulated Energy CapEx: $265 - $318M

- Natural Gas Distribution: $150 - $170M
- Natural Gas Transmission: $90 - $120M
- Electric Distribution: $25 - $28M

We remain on track for 5-Year CapEx Plan of **$1.5 – $1.8B**

Organic Growth Driving Delmarva + Florida Investments



#	Project Name	Status	In-Service	Total CapEx	Adj. Gross Margin ($M)

16	Brevard RNG[3]	In-Progress		~$6M		
17	Medley RNG[3]	In-Progress		~$22M		
18	Pioneer Supply Header	In-Service	Q3 2024	—	—	—
			Totals:	**$290M**	**$9.4**	**$26.7**

[1] Regulatory recovery through the Maryland General Rate Case so no margin impact in 2024. [2] Expected in-service in late December 2025 so no 2025 margin expected. [3] Approval received in July 2024 from the Florida PSC for these RNG transportation projects, which facilitate additional capacity from landfills through FCG's system.

Making Strides with Business Transformation

We are continually evaluating and improving our people, processes, systems and structures in order to ensure long-term success and growth in an ever-changing environment.

FLORIDA CITY GAS

Achieving Operational Synergies
Consolidating processes and resources and incorporating operations into existing systems

Optimizing Operations
"Best of Both" approach to identify and implement efficiencies and operations throughout Florida

Accelerating Investment Opportunities
Moving forward on regulatory approvals and construction to support FCG service area growth

1CX SIMPLIFY • ENGAGE • TRANSFORM

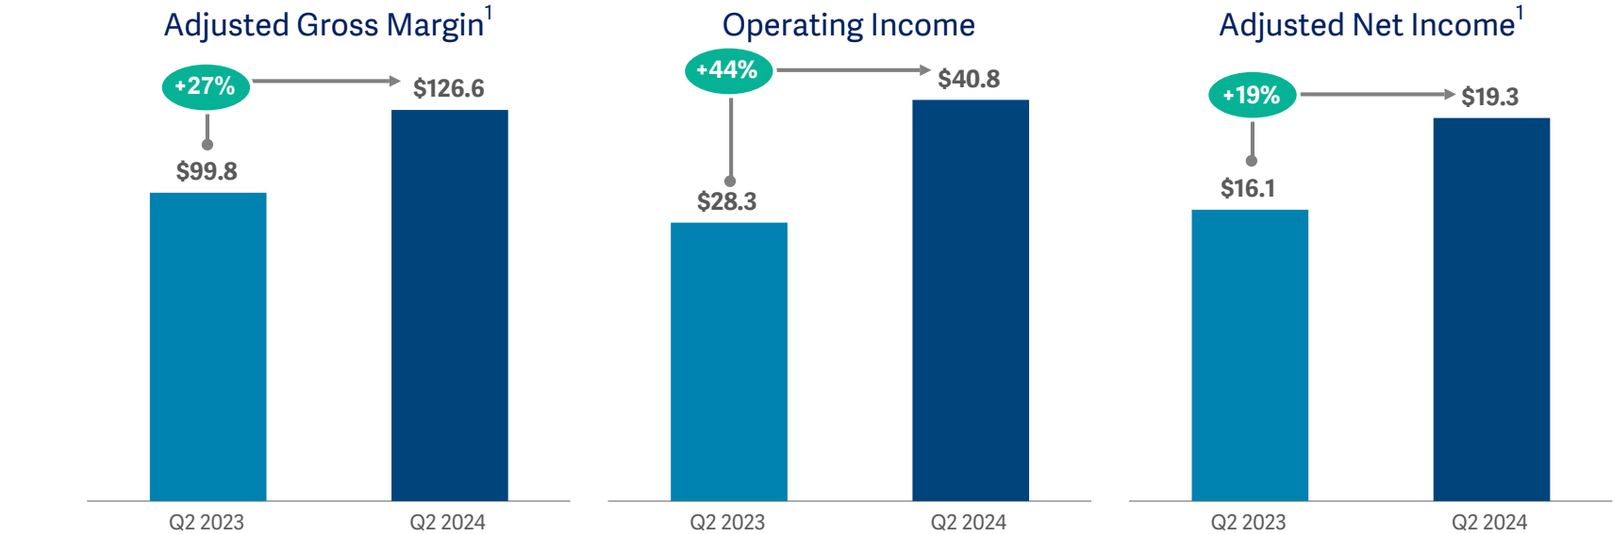
In August 2024, CPK is implementing an **SAP customer information system** to enhance our service platforms, streamline processes and improve efficiency across 4 key workstreams:

- Billing & Invoicing
- Customer Service
- Device and Work Management
- Finance and Contracting (FICA)

SAP will be implemented for FCG in Spring 2025

Increasing Adj. Gross Margin Driving Bottom-Line Growth

Gross margin growth drove higher operating income and bottom-line net income, averaging 30%+ growth.



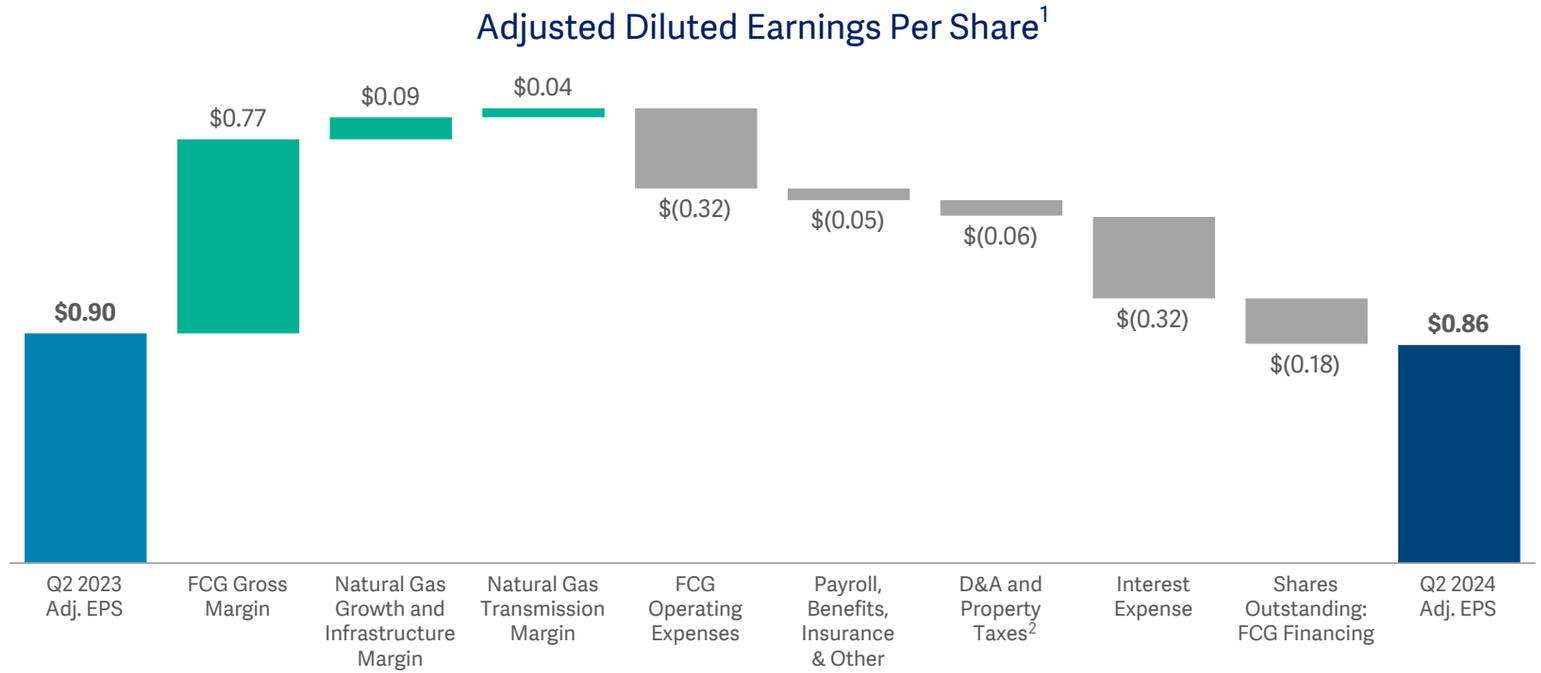
YTD:	Q2 2023	Q2 2024
Adjusted Gross Margin[1]	$229.3	$291.2
Operating Income	$83.3	$120.4
Adjusted Net Income[1]	$52.5	$66.1

Excluding transaction & transition-related expenses[2], Q2 2024 operating income increased $13.8M, or 49%

[1] See appendix for a reconciliation of non-GAAP metrics. [2] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transaction costs, transition services, consulting, system integration, rebranding and legal fees.

Key Drivers of Performance – Three Months Ended June 30, 2024

Adjusted EPS for the second quarter benefited from our core business performance and recent acquisition of Florida City Gas; offset primarily by financing costs related to the FCG acquisition.



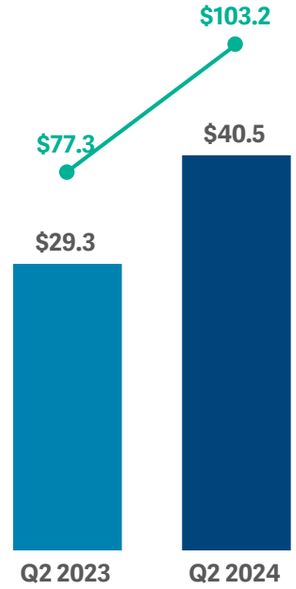
[1] *See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share.*
[2] *Includes a benefit from RSAM of $2.3 million, pre-tax, or $0.08 per share.*

Regulated Energy Segment Generates Operating Income Growth

Adj. Gross Margin[1] up **34%** & Operating income up **38%,** driven by:

- **$23.4M** from FCG operations & growth
- **$1.8M** from natural gas growth, conversions and service expansions
- **$1.3M** from transmission expansions and regulated infrastructure programs

*Partially offset by primarily **$8.6M** of FCG operating expenses*



Adjusted Gross Margin[1]	**$**	**77.3**	**$**	**103.2**
D&A + Property Taxes		18.9		22.9
Transaction + Transition Expense[2]		—		1.4
Other Operating Expenses		29.1		38.5
Operating Income (Loss)	**$**	**29.3**	**$**	**40.5**

Note: Dollars in millions. Table may not foot due to rounding.
[1] See appendix for a reconciliation of non-GAAP metrics. [2] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transaction costs, transition services, consulting, system integration, rebranding and legal fees.

Improvement in Unregulated Energy Segment Relative to Q2 2023

Adjusted Gross Margin[1] up **3%,** driven by:

- **$0.6M** from higher Marlin virtual pipeline services
- **$0.3M** from increased margins for Aspire Energy in Ohio
- **$0.3M** from propane operations

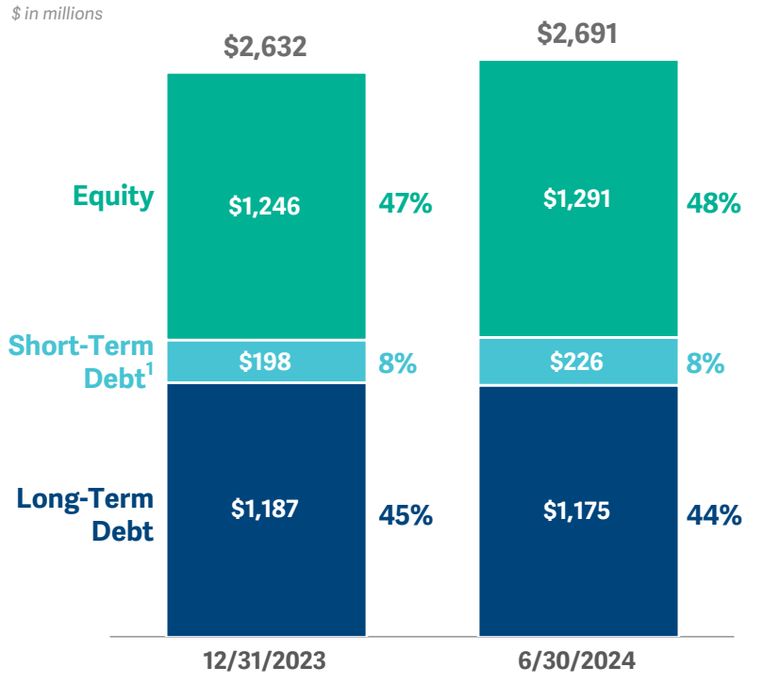
Partially offset by ***$0.5M*** *of increased insurance and vehicle expenses*

		Q2 2023		Q2 2024
Adjusted Gross Margin[1]	**$**	**22.6**	**$**	**23.4**
D&A + Property Taxes		4.8		3.8
Other Operating Expenses		18.9		19.3
Operating Income (Loss)	**$**	**(1.0)**	**$**	**0.2**

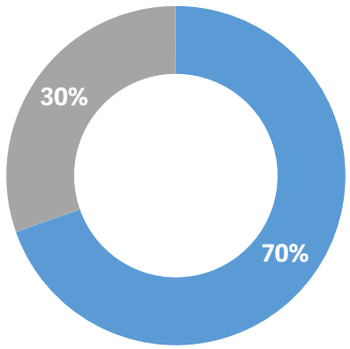
Note: Dollars in millions.
[1]See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin.

Strong Balance Sheet Supports Growth Plan

Total Capitalization



Total Liquidity[2]



Total available liquidity of

$491M

out of Total Capacity of $705M

Recent Financing Activity

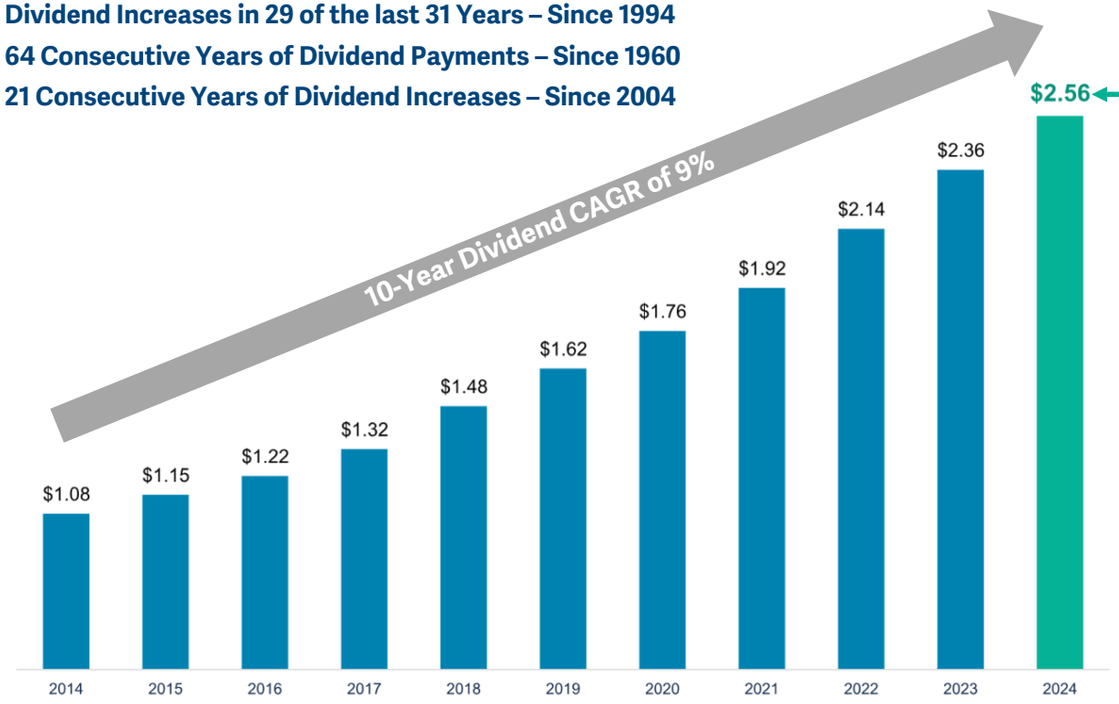
- Upsized, amended and extended our Revolving Credit Facility ("Revolver") by $75M to $450M
- Entered into an interest rate swap on $50 million for five years at 3.97%

[1] *Short-term debt for both periods includes short-term borrowing as well as the current portion of long-term debt.*
[2] *Total liquidity includes the upsized $450M Revolver and $255M of Private Placement Shelves.*

Three Decades of Dividend Growth Drive Shareholder Return

Annualized Dividend per Share

Dividend Increases in 29 of the last 31 Years – Since 1994
64 Consecutive Years of Dividend Payments – Since 1960
21 Consecutive Years of Dividend Increases – Since 2004



Increase of 8.5%

12%+ Compounded Annual Shareholder Return over 10 years[1]

Targeting Long-Term Dividend Payout Ratio of 45 - 50%

enables CPK to reinvest to support growth plan

CHESAPEAKE UTILITIES CORPORATION

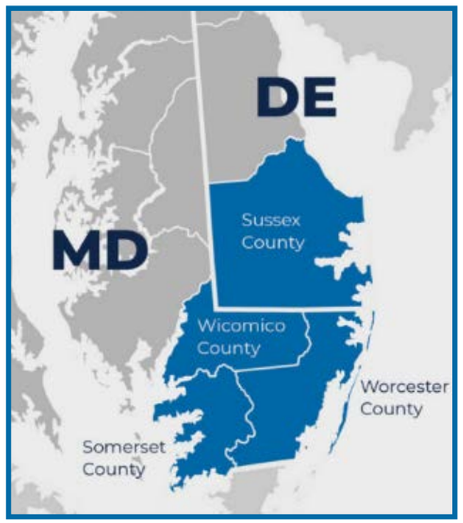
Q3 2023	Worcester Resiliency Upgrade Project	CapEx: ~$80M

11 Projects: $152M

Worcester Resiliency Upgrade Project Proceeding On Schedule

Eastern Shore Natural Gas LNG Storage project designed to meet critical energy service to customers during the peak winter heating season.



- $80 million planned liquefied natural gas storage facility in Bishopville, MD
- Project consists of five low-profile horizontal storage tanks allowing for up to 500 thousand gallons of storage plus pipeline looping and additional upgrades
- Incremental storage capacity will help protect against weather-related disruptions, to support affordable energy prices
- Easements now complete
- Discussions for tank delivery plan are underway
- Equipment purchase orders and engineering / designs being organized
- Expecting FERC Approval by year-end 2024 for construction start Q1 2025

380M^3 Liquified Natural Gas Storage Tanks

CHESAPEAKE UTILITIES CORPORATION

Approved Infrastructure Programs Support Capital Growth

Gas

Eastern Shore

Capital Cost Surcharge

5-Year CapEx	**$50-100M**
'24E Gross Margin	**$4.0M**
'25E Gross Margin	**$4.4M**

- **February 2018:** Received approval for program that allows recovery of costs for highway or railroad relocation projects related to equipment replacements

Elkton Gas

- **Aldyl-A pipeline replacement** recently completed under PSC-Approved STRIDE filing

Florida City Gas

SAFE Program

10-Year CapEx[1]	**$255M**
2024E Gross Margin	**$2.7M**
2025E Gross Margin	**$5.3M**

- **April 2024:** Filed petition to more closely align SAFE program with FPU's GUARD program to accelerate remediation for problematic, obsolete, and exposed pipe
- Proposal represents an incremental $50 million, leading to total project capital expenditures of **$255 million** over 10 years

Florida Public Utilities

GUARD Program

10-Year CapEx	**$205M**
2024E Gross Margin	**$3.2M**
2025E Gross Margin	**$5.6M**

- **August 2023:** GUARD program approved, to improve safety, reliability and accessibility of portions of the natural gas distribution system, including relocation, replacement, and/or repair of equipment and assets
- Represents **$205 million** of capital expenditures over 10 years

Electric

Florida Public Utilities

Storm Protection

5-Year CapEx	**$50-75M**
'24E Gross Margin	**$2.4M**
'25E Gross Margin	**$4.0M**

- **Q4 2022:** Received approval for FPU Electric's Storm Protection Plan and associated Storm Protection Plan Cost Recovery Mechanism

[1] *Includes $50 million requested in April 2024; approval expected from the Florida PSC in September 2024.*

Constructive Regulatory Environments for Rate Cases

Complete

Florida Public Utilities
- Rates effective March 1, 2023
- $17.2 million rate increase; ROE of 10.25% and equity of 55%

Florida City Gas
- Rates effective May 1, 2023
- $14.1 million rate increase; allowed ROE of 8.5% -10.5%

In Progress

Maryland LDCs: Chesapeake Utilities, Sandpiper Energy & Elkton Gas Company

- Filed January 30, 2024, proposing a $6.9M rate increase & requesting an 11.5% ROE
- Reached a finalized settlement in the depreciation study, representing **depreciation expense savings of $1.2 million per year, retroactive to January 2023**
- Proposed consolidation of our three MD natural gas distribution entities into one legal entity: "Chesapeake Utilities of Maryland, Inc."
- Proposing other tariff changes, including establishing a new technology cost recovery rider, rolling certain investments into base rates, establishing a regulatory asset for an anticipated energy efficiency filing, and establishing an under-served area (USA) rate and a program for evaluating extensions to multi-family projects
- **Settlement conferences occurring this month, with constructive conversations thus far**

Soon-to-be Filed

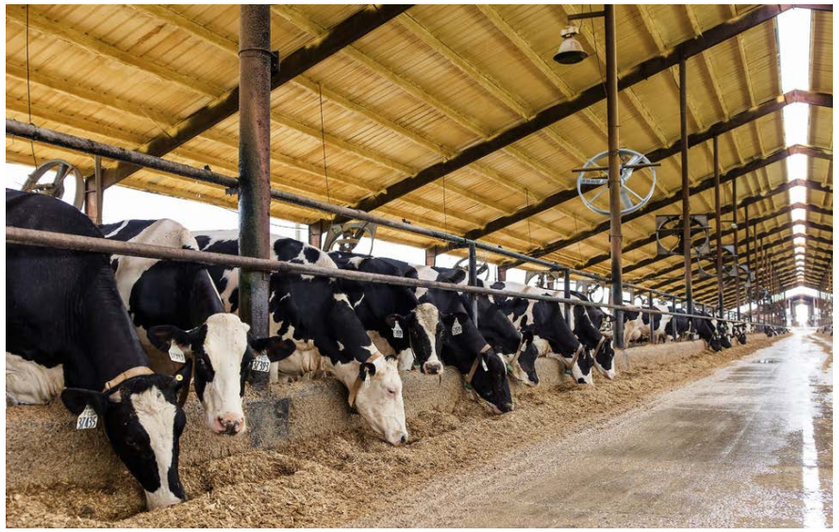
Delaware LDCs

- Submitted an "Intent to File" with Delaware PSC in May 2024
- Projected to file in August 2024

Florida Electric

- Submitted an "Intent to File" with Florida PSC in June 2024
- Projected to file in August 2024

Full Circle Dairy in Production & Commissioning Phase



We are poised to execute on opportunities that enable us to use our existing transportation services and construction expertise to provide market pathways for RNG producers.

Full Circle Dairy RNG Facility

- Project is now producing RNG and in commissioning phase
- During June 2024, the first month of production, ~4,700 dekatherms of RNG have been captured and transported for use
- This RNG is then transported and injected into the Chesapeake Utilities system in Yulee, Florida by CPK subsidiary Marlin Gas Service, via their virtual pipeline capabilities
- Once fully operational, Full Circle Dairy is expected to produce an average of 100,000 dekatherms annually
- This represents an emissions reduction equivalent to over 6,000 gasoline-powered vehicles

Working Toward Excellence on All Fronts

Sustainability Reporting

Second Micro-Sustainability Report on **Environmental Stewardship** to be issued in Q3 2024

Corporate Awards

Escalent Names Florida City Gas **"Easiest to Do Business With"**

Sharp Energy recognized as **2024 Best Gas Company** by Metropolitan Magazine

For the second time, CPK named **Best for Corporate Governance** in the U.S. by World Finance

Why Chesapeake Utilities?

CPK's unique combination of operational expertise, growth potential and consistent delivery of long-term shareholder return connects our strong historical track record with our future success.

Growth since 2003:

- 10x Asset Growth
- 10x Adj. Net Income Growth
- 5x Customers Served

Expertise

Nimble, yet powerful, organization with an experienced management team that gets things done

Innovative & diligent team focused on operational execution & delivering results

Delmarva: Growing demand for natural gas distribution

Florida: Strong residential growth and favorable environment

Growth

Attractive & diversified geographical exposure, with multiple sources of organic & acquisitive growth

Expected to spend $1.5 - $1.8 billion in Capital Expenditures from 2024 - 2028

EPS 10-Year CAGR of **8+%**

Dividend 10-Year CAGR: **9%**

>95th Percentile for Peer TSR

Return

Focused on best-in-class shareholder return, balancing earnings growth and dividend growth

45-50% Long-Term Dividend Payout Ratio supports growth and return on capital

We will be a leader in delivering energy that contributes to a sustainable future.

CHESAPEAKE UTILITIES CORPORATION

FOR IMMEDIATE RELEASE
August 8, 2024
NYSE Symbol: CPK

CHESAPEAKE UTILITIES CORPORATION REPORTS SECOND QUARTER 2024 RESULTS

- **Net income and earnings per share ("EPS")* were $18.3 million and $0.82, respectively, for the second quarter of 2024, and $64.4 million and $2.89, respectively, for the six months ended June 30, 2024**
- **Adjusted net income and Adjusted EPS**, which exclude transaction and transition-related expenses attributable to the acquisition and integration of Florida City Gas ("FCG"), were $19.3 million and $0.86, respectively, for the second quarter of 2024 and $66.1 million and $2.96, respectively, for the six months ended June 30, 2024**
- **Adjusted gross margin** growth of $61.8 million during the first half of 2024 driven by contributions from FCG, natural gas organic growth and continued pipeline expansion projects, regulatory initiatives and additional customer consumption**
- **Multiple pipeline projects received approval to proceed, supporting continued natural gas demand in Delaware and Florida and driving incremental margins for 2025 and beyond**
- **Results continue to track in line with Management's expectations, and the Company continues to affirm 2024 EPS and capital guidance**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the three and six months ended June 30, 2024.

Net income for the second quarter of 2024 was $18.3 million ($0.82 per share) compared to $16.1 million ($0.90 per share) in the second quarter of 2023. Excluding transaction and transition-related expenses associated with the fourth quarter 2023 acquisition of FCG, adjusted net income was $19.3 million, or $0.86 per share compared to $16.1 million ($0.90 per share) reported in the prior-year period. The net income and adjusted net income growth represented 13.3 percent and 19.5 percent, respectively.

For the second quarter of 2024, incremental contributions from FCG, additional margin from regulated infrastructure programs, and growth in the Company's natural gas distribution businesses and continued pipeline expansion projects to support distribution growth were offset by the financing impacts of the FCG acquisition, including increased interest expense related to debt issued and additional shares outstanding.

During the first half of 2024, net income was $64.4 million ($2.89 per share) compared to $52.5 million ($2.94 per share) in the prior-year period. Excluding the transaction and transition-related expenses, adjusted net income was $66.1 million ($2.96 per share) compared to $52.5 million ($2.94 per share) for the same period in 2023.

Earnings for the first half of 2024 were primarily impacted by the factors discussed for the second quarter as well as additional adjusted gross margin from increased customer consumption experienced earlier in the year.

2-2-2-2

"Our results this quarter demonstrate the opportunities in our high-growth service areas, the value of our unregulated businesses and our commitment to operational excellence," said Jeff Householder, chair, president and CEO. "We continue to remain on-track with the integration of FCG, experienced continued strong customer growth of approximately 4 percent across our Delmarva and Florida footprints and managed expenses prudently, driving 41 percent of adjusted gross margin to operating income on a year-to-date basis."

"This performance is in line with our expectations for 2024 and is driven by our ability to execute on our growth strategy: developing and investing record levels of capital, advancing our regulatory agenda and continuing our business transformation efforts," Householder continued. "Through the second quarter of this year, we invested $160 million in capital expenditures, received regulatory approval for three (3) new transportation projects, and are going live with a new enterprise-wide utility billing system in the third quarter. Our achievements thus far enable us to affirm our full-year 2024 adjusted EPS guidance of $5.33 to $5.45 per share and 2024 capital expenditures guidance of $300 to $360 million. The team's consistent focus on customer service and our growth strategy positions us for continued longer-term growth as well."

Earnings and Capital Investment Guidance

The Company continues to affirm its 2024 EPS guidance of $5.33 to $5.45 in adjusted earnings per share given the incremental margin opportunities present across the Company's businesses, investment opportunities within and surrounding FCG, regulatory initiatives and operating synergies.

The Company also affirms its previously announced 2024 capital expenditure guidance of $300 million to $360 million, as well as the capital expenditure guidance for the five-year period ended 2028 that will range from $1.5 billion to $1.8 billion. This investment forecast is projected to result in a 2025 EPS guidance range of $6.15 to $6.35, as well as a 2028 EPS guidance range of $7.75 to $8.00. This implies an EPS growth rate of approximately 8 percent from the 2025 EPS guidance range.

**Unless otherwise noted, EPS and Adjusted EPS information are presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should

3-3-3-3

be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Adjusted Gross Margin

	For the Three Months Ended June 30, 2024

Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 2.96**	$ 2.94

[1] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transaction costs, transition services, consulting, system integration, rebranding and legal fees.

[2] Weighted average shares for the three and six months ended June 30, 2024 reflect the impact of 4.4 million common shares issued in November 2023 in connection with the acquisition of FCG.

Operating Results for the Quarters Ended June 30, 2024 and 2023

Consolidated Results

(in thousands)	Three Months Ended June 30, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 126,632**	$ 99,800	$ 26,832	26.9 %
Depreciation, amortization and property taxes	**26,703**	23,628	3,075	13.0 %
FCG transaction and transition-related expenses	**1,374**	—	1,374	NMF
Other operating expenses	**57,765**	47,826	9,939	20.8 %
Operating income	**$ 40,790**	$ 28,346	$ 12,444	43.9 %

Operating income for the second quarter of 2024 was $40.8 million, an increase of $12.4 million or 43.9 percent compared to the same period in 2023. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $13.8 million or 48.7 percent compared to the prior-year period. An increase in adjusted gross margin in the second quarter of 2024 was driven by contributions from the acquisition of FCG, incremental margin from regulatory initiatives, natural gas organic growth and continued pipeline expansion projects and improvements from the Company's unregulated businesses. Higher operating expenses were driven largely by the operating expenses of FCG, increased payroll, benefits and other employee-related expenses, and higher insurance and vehicle expenses compared to the prior-year period. Increases in depreciation, amortization and property taxes attributable to growth projects and FCG were partially offset by a $2.3 million reserve surplus amortization mechanism ("RSAM") adjustment from FCG and lower depreciation from our electric operations due to revised rates from an approved electric depreciation study.

6-6-6-6

Regulated Energy Segment

(in thousands)	Three Months Ended June 30, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 103,247**	$ 77,255	$ 25,992	33.6 %
Depreciation, amortization and property taxes	**22,863**	18,854	4,009	21.3 %
FCG transaction and transition-related expenses	**1,374**	—	1,374	NMF
Other operating expenses	**38,505**	29,110	9,395	32.3 %
Operating income	**$ 40,505**	$ 29,291	$ 11,214	38.3 %

The key components of the increase in adjusted gross margin** are shown below:

(in thousands)	
Contribution from FCG	$ 23,367
Margin from regulated infrastructure programs	1,340
Natural gas growth including conversions (excluding service expansions)	1,253
Natural gas transmission service expansions, including interim services	563
Other variances	(531)
Quarter-over-quarter increase in adjusted gross margin**	**$ 25,992**

(1) Includes adjusted gross margin contributions from permanent base rates that became effective in March 2023.

The major components of the increase in other operating expenses are as follows:

(in thousands)	
FCG operating expenses	$ 8,597
Payroll, benefits and other employee-related expenses	679
Other variances	119
Quarter-over-quarter increase in other operating expenses	**$ 9,395**

Unregulated Energy Segment

(in thousands)	Three Months Ended June 30, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 23,413**	$ 22,635	$ 778	3.4 %

(in thousands)	
Propane Operations	
Contributions from acquisition	$ 160
Increased propane customer consumption	117
CNG/RNG/LNG Transportation and Infrastructure	
Increased level of virtual pipeline services	587
Aspire Energy	
Increased margins - rate changes and gathering fees	251
Other variances	(337)
Quarter-over-quarter increase in adjusted gross margin**	**$ 778**

The major components of the increase in other operating expenses are as follows:

(in thousands)	
Increased insurance related costs	$ 283
Increased vehicle expenses	246
Other variances	(48)
Quarter-over-quarter increase in other operating expenses	**$ 481**

Operating Results for the Six Months Ended June 30, 2024 and 2023

Consolidated Results

	Six Months Ended June 30,			
(in thousands)	**2024**	**2023**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 291,159**	$ 229,340	$ 61,819	27.0 %
Depreciation, amortization and property taxes	**52,813**	47,118	5,695	12.1 %
FCG transaction and transition-related expenses	**2,295**	—	2,295	NMF
Other operating expenses	**115,676**	98,961	16,715	16.9 %
Operating income	**$ 120,375**	$ 83,261	$ 37,114	44.6 %

Operating income for the first half of 2024 was $120.4 million, an increase of $37.1 million compared to the same period in 2023. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $39.4 million or 47.3 percent compared to the prior-year period. An increase in adjusted gross margin in the first half of 2024 was driven by contributions from the acquisition of FCG, natural gas organic growth and continued pipeline expansion projects, incremental margin from regulatory initiatives, higher customer consumption and contributions from the Company's unregulated businesses. Higher operating expenses largely associated with FCG were partially offset by lower payroll, benefits and other employee-related expenses compared to the prior-year period. Increases in depreciation, amortization and property taxes attributable to growth projects and FCG were partially offset by a $5.7 million RSAM adjustment from FCG and lower

8-8-8-8

depreciation from our electric operations due to revised rates from an approved electric depreciation study.

Regulated Energy Segment

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes all major projects and initiatives that are currently underway or recently completed. The Company's practice is to add new projects and initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, as compared to the Company's prior quarterly filings. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's second quarter 2024 Quarterly Report on Form 10-Q.

[2] Rate case application and depreciation study filed with the Maryland PSC in January 2024. See additional information provided below.

15-15-15-15

Detailed Discussion of Major Projects and Initiatives

Pipeline Expansions

St. Cloud / Twin Lakes Expansion

In July 2022, Peninsula Pipeline filed a petition with the Public Service Commission ("PSC") for the State of Florida for approval of its Transportation Service Agreement with the Company's Florida subsidiary, Florida Public Utilities ("FPU"), for an additional 2,400 Dts/day of firm service in the St. Cloud, Florida area. As part of this agreement, Peninsula Pipeline constructed a pipeline extension and regulator station for FPU. The extension supports new incremental load due to growth in the area, including providing service, most immediately, to the residential development Twin Lakes. The expansion also improves reliability and provides operational benefits to FPU's existing distribution system in the area, supporting future growth. The project went into service in July 2023.

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of an amendment to its Transportation Service Agreement with FPU for an additional 10,000 Dts/day of firm service in the St. Cloud, Florida area. Peninsula Pipeline will construct pipeline expansions that will allow FPU to serve the future communities that are expected in that area. The Florida PSC approved the project in May 2024, and it is expected to be complete in the fourth quarter of 2025.

Newberry Expansion

In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dts/day of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of existing Company owned propane community gas systems in Newberry was made in November 2023. The Florida PSC approved it in April 2024. The Company began the conversions of the community gas systems in the second quarter of 2024.

East Coast Reinforcement Projects

In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024. Construction is projected to be complete in the first and second quarters of 2025 for Boynton Beach and New Smyrna Beach, respectively.

Central Florida Reinforcement Projects

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system around the Plant City and Lake Mattie areas of Florida with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024. Completion of the projects is projected for the fourth quarter of 2024 for Plant City and the fourth quarter of 2025 for Lake Mattie.

Warwick
In July 2024, the Company announced plans to extend Eastern Shore's transmission deliverability by constructing an additional 4.4 miles of six inch steel pipeline. The project will reinforce the supply and growth for our Delaware division distribution system and expand further into Maryland for anticipated future growth. The project is estimated to be in service during the fourth quarter of 2024.

Pioneer Supply Header Pipeline Project
In March 2024, Peninsula Pipeline filed a petition with the Florida PSC for its approval of Firm Transportation Service Agreements with both FCG and FPU for a project that will support greater supply growth of natural gas service in southeast Florida. The project consists of the transfer of a pipeline asset from FCG to Peninsula Pipeline. Peninsula Pipeline will proceed to provide transportation service to both FCG and FPU using the pipeline asset, which supports continued customer growth and system reinforcement of these distribution systems. The Florida PSC approved the petition in July 2024.

Renewable Natural Gas Supply Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of Transportation Service Agreements with FCG for projects that will support the transportation of additional renewable energy supply to FCG. The projects, located in Florida's Brevard, Indian River and Miami-Dade counties, will bring renewable natural gas produced from local landfills into FCG's natural gas distribution system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian-River County, and Miami-Dade County. Benefits of these projects include increased gas supply to serve expected FCG growth, strengthened system reliability and additional system flexibility. The Florida PSC approved the petition at it's July 2024 meeting with the projects estimated to be completed in the first half of 2025.

Regulatory Initiatives

Maryland Natural Gas Rate Case
In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we are seeking approval of the following: (i) permanent rate relief of approximately $6.9 million; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. The outcome of the application is subject to review and approval by the Maryland PSC. Rate changes are suspended until December 2024.

Maryland Natural Gas Depreciation Study
In January 2024, the Company's Maryland natural gas distribution businesses filed a joint petition for approval of its proposed unified depreciation rates with the Maryland PSC. A settlement agreement between the Company, PSC staff and the Office of People's Counsel was reached and the final order approving the settlement agreement went into effect in July 2024 which will include an annual benefit of $1.2 million.

FCG SAFE Program
In April 2024, FCG filed a petition with the Florida PSC to more closely align the SAFE Program with FPU's GUARD program. Specifically, the requested modifications will enable FCG to accelerate remediation related to problematic pipe and facilities consisting of obsolete and exposed pipe. If approved, these efforts will serve to improve the safety and reliability of service to FCG's customers. These modifications, if approved, will result in an estimated additional $50 million in capital expenditures associated with the SAFE Program which would increase the total projected capital expenditures to $255 million over a 10-year period. The Commission decision is expected in September 2024.

17-17-17-17

Delaware Natural Gas Rate Case
In May 2024, the Company's Delaware natural gas division provided notice to the Delaware PSC of its intent to file a petition seeking a general rate base increase based on a test period ending in December 2024. The filing is expected to be submitted to the Delaware PSC in August 2024 and the outcome of the application will be subject to review and approval by the Delaware PSC.

FPU Electric Rate Case
In June 2024, the Company provided notice to the Florida PSC of its intent to file a petition seeking a general rate base increase based on a 2025 projected test year. The filing is expected to be submitted to the Florida PSC in August 2024 and the outcome of the application will be subject to review and approval by the Florida PSC.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption
Weather was not a significant factor to adjusted gross margin in the second quarter of 2024 compared to the same period in 2023.

For the six months ended June 30, 2024, higher consumption which includes the effects of colder weather conditions compared to the prior-year period resulted in a $1.8 million increase in adjusted gross margin. While temperatures through June 30, 2024 were colder than the prior-year period, they were approximately 12.5 percent and 12.8 percent warmer, respectively, compared to normal temperatures in our Delmarva and Ohio service territories.

The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the three and six months ended June 30, 2024 and 2023.

	Three Months Ended June 30,			Six Months Ended June 30,		
	2024	**2023**	**Variance**	**2024**	**2023**	**Variance**
Delmarva

Variance from Normal	**137**	(15)		**101**	116	

18-18-18-18

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula increased by approximately 3.7 percent and 3.9 percent, respectively, for the three and six months ended June 30, 2024 while our legacy Florida Natural Gas distribution business increased by approximately 3.7 percent and 3.6 percent, respectively, during the same periods.

The details of the adjusted gross margin increase are provided in the following table:

	Adjusted Gross Margin**			
	Three Months Ended June 30, 2024		Six Months Ended June 30, 2024	
(in thousands)	Delmarva Peninsula	Florida	Delmarva Peninsula	Florida
Customer growth:				
Residential	$ 352	$ 647	$ 842	$ 1,527
Commercial and industrial	124	130	280	520
Total customer growth [1]	**$ 476**	**$ 777**	**$ 1,122**	**$ 2,047**

[1] Customer growth amounts for the legacy Florida operations include the effects of revised rates associated with the Company's natural gas base rate proceeding, but exclude the effects of FCG.

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $159.5 million for the six months ended June 30, 2024. The following table shows a range of the forecasted 2024 capital expenditures by segment and by business line:

	2024	
(in thousands)	Low	High
Regulated Energy:		
Natural gas distribution	$ 150,000	$ 170,000
Natural gas transmission	90,000	120,000
Electric distribution	25,000	28,000
Total Regulated Energy	265,000	318,000
Unregulated Energy:		
Propane distribution	13,000	15,000
Energy transmission	5,000	6,000
Other unregulated energy	13,000	15,000
Total Unregulated Energy	31,000	36,000
Other:		
Corporate and other businesses	4,000	6,000
Total 2024 Forecasted Capital Expenditures	**$ 300,000**	**$ 360,000**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 48 percent as of June 30, 2024.

Q3: 2024-11-07 Earnings Summary

EPS of $0.80 beats by $0.13 | Revenue of $160.14M (21.73% Y/Y) misses by $11.71M

Chesapeake Utilities Corporation (CPK) Q3 2024 Earnings Call November 8, 2024 8:30 AM ET

Company Participants

Lucia Dempsey - Head, Investor Relations
Jeff Householder - Chair, President and Chief Executive Officer
Beth Cooper - Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary
Jim Moriarty - Executive Vice President, General Counsel and Corporate Secretary and Chief Policy and Risk Officer

Conference Call Participants

Tate Sullivan - Maxim Group
Paul Fremont - Ladenburg
Chris Ellinghaus - Siebert Williams Shank

Operator

Welcome to Chesapeake Utilities Corporation's Third Quarter 2024 Earnings Conference Call. [Operator Instructions] I'd like to turn the call over to Lucia Dempsey, Head of Investor Relations. Please go ahead.

Lucia Dempsey

Thank you, and good morning, everyone. Today's presentation can be accessed on our website under the Investors page and Events and Presentations subsection. After our prepared remarks, we will open the call up for questions.

On Slide 2, we show our typical disclaimers, while I remind you that matters discussed on this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results. The Safe Harbor for forward-looking statements section of our 2023 annual report on Form 10-K provides further information on the factors that could cause such statements to differ from our actual results.

Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share. And the information presented today includes the appropriate disclosures in accordance with the SEC's Regulation G. A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation in our earnings release and in our third quarter Form 10-Q.

Here at Chesapeake Utilities, safety is our first priority. We start all meetings with a safety moment, and we'll do so here with a moment on motor vehicle safety, as highlighted on Slide 3. The time change and shift into cooler temperatures, though we haven't quite seen that yet, provides us an opportunity to check and update fluid levels, windshield wipers, roadside emergency supplies and ensure oil changes are on schedule. Also be aware of how the time change affects morning and evening visibility and exercise more caution around wet or slippery roads and increased traffic around holiday travel.

I'll now introduce our presenters today. Jeff Householder, Chair of the Board, President and Chief Executive Officer, will provide an update on demand in our growing service areas, capital investment plan and business transformation efforts, including an update on the Florida City Gas integration. Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary, will discuss our financial results, strong balance sheet and dividend and earnings growth trajectory. And Jim Moriarty, Executive Vice President, General Counsel and Corporate Secretary and Chief Policy and Risk Officer, will review our regulatory strategy, government affairs efforts and other company updates.

With that, it's my pleasure to turn the call over to Jeff.

Jeff Householder

Thank you, Lucia. Good morning, and thanks to all of you for joining our call today. I'll begin with Slide 5. Adjusted earnings per share this quarter was $0.80, bringing our year-to-date 2024 earnings per share to $3.76. Our results are well aligned with our expectations, with strong contributions from both Florida City Gas and our core natural gas operations. Our year-to-date earnings performance, combined with our growth expectations for remainder of 2024, enable us to reaffirm our full year 2024 adjusted earnings per share guidance of $5.33 to $5.45. Continued expectations of strong demand growth, along with our pipeline of capital projects and regulatory initiatives, drive customer value and enable us to reaffirm our 2025 and 2028 EPS guidance ranges. And as I'll discuss in more detail shortly, our 2024 capital growth plan remains on track with $257 million invested in the first 9-months of this year and $300 million to $360 million expected for full year 2024.

Turning to Slide 6. I'd like to start with a short update on Hurricane season. Overall, our systems fared well through Hurricanes Debby, Helene and Milton, for which we are grateful. While we did have a number of electric customers lose power during Hurricane Helene, we were able to restore power for the majority of our impacted customers within the first 24 hours.

I'm pleased with the work our teams have been doing to practice our emergency response procedures and improve the quality and resiliency of our infrastructure and systems, which enabled us to respond quickly and effectively in communicating with customers and restoring their power.

Our integration of Florida City Gas also continues on track as we make additional progress on standardizing operations, engaging with teammates and exploring investment opportunities to serve the significant growth in our new service areas. Slide 7 provides additional detail on this growth as we are fortunate to operate in some of the fastest-growing areas of the country, enabling us to deploy sustainable capital investments to meet the needs of growing customer demand.

We had another quarter of outstanding customer growth in both Delmarva and Florida, with each area again experiencing a 3.9% increase in residential customers in the third quarter of this year relative to the same period last year. We expect strong population growth to continue on our service areas, as evidenced by a substantial number of new residential communities planned or in early-stage development in both Delmarva and Florida, over the next several years. Customers want natural gas service in their homes, so we expect these projects will continue to support strong customer growth.

The opportunity to serve increasing customer demand is the basis for our overall growth strategy, which in turn drives sustainable earnings growth. To achieve this growth, we remain consistently focused on three fundamental drivers to support earnings growth, as shown on Slide 8.

First, we work hard to identify and prudently deploy investment capital in projects that align with customer demand and enable us to continue providing safe and reliable energy delivery services. Second, we proactively manage our regulatory agenda to support cost recovery of our capital projects. Third, and equally as important, given our recent and future overall enterprise growth is business transformation, which prioritizes continuous improvement initiatives that enable us to ensure long-term success in an ever-changing environment.

Capital deployment is our primary growth driver. And on Slide 9, you can see that we've made significant progress toward identifying and initiating at least $1.3 billion of our 5-year capital investment plan of $1.5 billion to $1.8 billion. Of particular note, nearly $1 billion of this identified capital requires no additional regulatory approval or support.

While we are fundamentally a regulated utility company, we look for opportunities to leverage our related businesses to work together to meet the needs of customers. Although our current slate of identified projects reflect significant regulated investment, we are moving forward on identifying additional regulated and complementary nonregulated investments in 2025 and beyond.

Slide 10 shows we are making excellent progress toward our 2024 capital expenditure guidance of $300 million to $360 million, with $257 million invested through September of this year, including approximately $100 million spent in the third quarter alone. Our team is focused on efficiently deploying the remaining capital through the balance of the year, including advancing multiple growth projects that were drivers of our FCG acquisition, undertaking capital projects previously approved, and implementing technology that supports our ongoing business transformation.

Slide 11 provides additional detail on the major projects that are driving nearly $300 million of capital investment and over $36 million of additional adjusted gross margin in 2024 and ‘25 across Delmarva and Florida. All in progress investments remain on track as we focus on managing these construction projects safely and effectively.

I’d like to note one new project this quarter, Number 18, the Miami Inner Loop. In September, our Peninsula Pipeline Company filed for Florida Public Service Commission approval of the transportation service agreement with Florida City Gas for a series of projects to enhance infrastructure in the Miami area. Referred collectively as the Miami Inner Loop, this expansion will support growth in FCG’s distribution system through new transportation projects and system connection points.

Turning to Slide 12. Our third fundamental growth driver is continual business transformation to support long-term enterprise growth. In August, we successfully implemented a new company-wide SAP system, which has operated well over the last 3 months. This is a major step to support the operational transformation we’ve been working towards, for the past few years, and we’re already seeing a number of benefits and efficiencies with our new billing and field services system.

We will also continue to implement additional technology upgrades across the enterprise, including transitioning FCG onto the SAP system next spring and assessing system upgrades to address additional process improvements across the organization.

And with that, I’ll turn to Beth to discuss our financial results in more detail.

Beth Cooper

Thanks, Jeff, and good morning, everyone. It is great to be here with you today. Our financial results, as shown on Slide 13, demonstrate another quarter of strong growth with adjusted gross margin of approximately $122 million, up 29% from the third quarter of last year, driven by the addition of Florida City Gas as well as solid performance across all of our businesses.

Strong margin growth, coupled with operational efficiencies drove significant growth in adjusted net income, up 48% to approximately $18 million for the quarter and up 30% to approximately $84 million for the first 9 months of 2024 compared to the same period in 2023. We also reported strong growth in adjusted earnings per share this quarter, up $0.11 to $0.80, a 15% increase over the third quarter of 2023.

I'll now turn to Slide 14 and highlight some of the key drivers of our third quarter 2024 adjusted EPS. Florida City Gas operations contributed $0.75 in adjusted EPS, reflecting another quarter of strong customer growth. Our legacy natural gas growth, infrastructure and transmission operations generated $0.11 of incremental EPS this quarter, driven by strong demand for natural gas and additional margin from infrastructure projects completed in 2024.

Our Marlin virtual pipeline services delivered an additional $0.04 per share of benefit in the third quarter of 2024 as we expanded offerings for existing and new customers. Increased consumption in our natural gas distribution business added an additional $0.03 per share this quarter. These gains were partially offset by a few factors, including primarily $0.28 of operating expenses related to Florida City Gas, $0.02 of increased expenses related to payroll and insurance expenses, and approximately $0.46 related to financing the Florida City Gas acquisition.

Moving to Slide 15. Adjusted gross margin for our Regulated Energy segment was approximately $102 million this quarter, up 35% from the third quarter of last year. Operating income also grew substantially, up 76% to $44 million, excluding nonrecurring transaction and transition costs. This improvement was primarily driven by: first, strong earnings contribution from Florida City Gas; secondly, organic growth in our natural gas distribution operations; and finally, incremental margins from our transmission service expansions and regulated infrastructure programs.

As shown on Slide 16, our Unregulated Energy segment also delivered solid improvement relative to the third quarter of last year, with adjusted gross margin up 6% to approximately $20 million for the third quarter of 2024. As just discussed, an increase in our Marlin virtual pipeline services drove the majority of the improvement in our unregulated business this quarter, and we look forward to continuing to grow that business based upon the increasing demand we see in the market.

I'll now shift to Slide 17 to review our capital structure and financing plan. Maintaining a strong balance sheet, adequate liquidity and access to competitively priced capital is critical to support our capital investment plan. To this end, we continue to execute on a financing plan consistent with an investment-grade credit profile.

Our liquidity also remained strong this quarter with nearly 70% of our revolving credit facility and private placement shelf facilities available at the end of September. We ended the third quarter of 2024 with an equity to total capitalization ratio of 49%, up from 47% at the end of 2023, which is on the cusp of our target equity to total capitalization range of 50% to 60%, as we've already issued approximately $64 million in equity through September of this year, primarily via our existing equity programs, including the dividend reinvestment and direct stock purchase plan. Lastly, on November 1, 2024, we issued $100 million of 5.20% senior notes due October 2029 to further strengthen our balance sheet and support our capital growth plan.

Slide 18 shows our strong history of consistent dividend growth of approximately 9%. Our dividend is a key component of our balanced capital allocation strategy and our current target payout ratio is designed to return value to shareholders, while also allowing for earnings reinvestment to fund future growth capital investment. We believe this strategy enables our investors to benefit from long-term top quartile earnings and dividend growth.

Speaking of earnings growth, Slide 19 demonstrates our consistent earnings per share performance with our 2028 EPS guidance range reflecting a 10-year EPS growth CAGR of approximately 8.5%. Our year-to-date 2024 performance is in-line with our expectations, enabling us to reaffirm our 2024 adjusted EPS guidance range of $5.33 to $5.45 per share, including the acceleration towards our target capital structure. Similarly, we are also reaffirming our 2025 guidance of $6.15 to $6.35 per share and our 2028 guidance of $7.75 to $8 per share.

Finally, Slide 20 shows our path to our full year 2024 EPS guidance range of $5.33 to $5.45. We remain on track with strong contributions from our legacy business and acquisition of Florida City Gas, offset only by the impacts from the acquisition financing.

With that, it's my pleasure to turn the call over to Jim.

Jim Moriarty

Thank you, Beth, and good morning, everyone. As Jeff discussed earlier, a proactive regulatory agenda is our second fundamental growth driver, and I would like to share several updates in this area, as shown on Slide 21. For our Maryland jurisdiction, in September 2024, we received approval for a $2.6 million revenue increase. On November 7th, we filed a Phase 2 proceeding to determine a schedule for incorporating this increase into customer rates. On August 12th, we filed a rate case in our Delaware jurisdiction, proposing a $12.1 million rate increase and an ROE of 11.5%. We also requested interim rate relief of $2.5 million, which was approved with an effective date of October 11, 2024.

On August 22nd, we filed a rate case for our Florida electric operations, proposing a $12.6 million rate increase and an 11.3% ROE. That filing also included a request for $1.8 million in interim rates, which were approved with an effective date of November 1, 2024. We look forward to constructive conversations with our regulators on these filings in order to implement updated rates in the first half of 2025.

We also continue to move forward with sustainable investments and recently reached an important milestone at our Full Circle Dairy RNG facility, as shown on Slide 22. We have completed commissioning at Full Circle Dairy and hosted a ribbon-cutting ceremony last week to mark the start of full RNG production operations.

Since the start of test production in June, nearly 21,000 dekatherms of RNG have been captured at Full Circle and injected into our system in Yulee, Florida by our Marlin virtual pipeline capabilities. The site reached an additional milestone last week when it received qualified RIN status, or Q-RINS, which allows Full Circle Dairy to generate the highly regarded D3 RINS. This qualification also enabled us to generate and monetize RINS for all historical production to date. Overall, our RNG strategy will continue to evolve as the market matures, and we will evaluate opportunities that enable us to use our existing transportation services and construction expertise to provide pathways to market for RNG producers.

Slide 23 provides an update on our Eastern Shore Worcester Resiliency Upgrade, or WRU project, which is an $80 million liquefied natural gas storage project designed to support growth and resiliency on the Delmarva region. In September, members of our operations services team traveled to South Korea to meet with the manufacturer of the five low-profile LNG tanks. Production remains on schedule, and the team was pleased with the quality of the production and the efficiency of the organization overall. We anticipate FERC approval by the end of 2024 and remain on track for construction to begin in the first quarter of 2025 for an in-service date in the third quarter of 2025.

On the legislative front, we remain focused on maintaining consistent dialogue with governing bodies at the local, state and federal levels in order to further strengthen and expand our relationships and ensure an understanding of the demands of the communities and customers we serve to deliver affordable, reliable and domestic energy. We are preparing to work with the new administration in Congress, along with the state and local political leadership as the next legislative sessions begin in January. We expect a continued focus on energy and tax policy, while offering opportunities to educate our elected representatives on the work that we do and advocate for what our customers and communities seek, the efficient delivery of affordable, reliable and domestic natural gas so that no one is left behind.

Turning now to Slide 25. I would like to cover our sustainability initiatives and recent community engagements. In September, we published our second micro sustainability report, which focuses on our environmental stewardship efforts. In addition to providing additional information on our environmental commitments to our communities, we reported a 25% reduction in Scope 1 and Scope 2 greenhouse gas emissions since 2019 and a 10% reduction in emissions from 2022 to 2023.

Our third micro report, which will focus on community impact, DEI initiatives and our investments in people, communities and customers, will be released in early 2025. In the aftermath of Hurricanes Helene and Milton, the company donated $50,000 across three organizations to support recovery efforts in heavily affected areas. We consider it vital to stand with our fellow utility companies and communities impacted by the hurricanes to provide essential services to those in need. Delivering excellence for all stakeholders is the foundation for long-term growth and success, enabling us to continue serving our customers and driving value for our shareholders for years to come.

With that, I will turn the call to Jeff for concluding remarks.

Jeff Householder

Thanks, Jim. This year has been a critical turning point as we demonstrate our ability to integrate the meaningful acquisition of FCG, deliver on our 2024 EPS and capital guidance ranges and position the organization to achieve the significant growth embedded in our 2025 EPS guidance through capital investments and regulatory initiatives.

We have continued to execute on our plan this past quarter, including delivering financial results that remain in-line with our full year expectations and represent top quartile earnings performance. While the weather has provided a less favorable backdrop as we began the fourth quarter, we will remain focused on our three key growth pillars throughout the remainder of 2024 and look forward to updating you on our full year accomplishments and forward-looking goals for 2025 and beyond.

With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

Thank you. [Operator Instructions] And our first question is coming from Tate Sullivan with Maxim Group. Please go ahead.

Tate Sullivan

Hi, thank you. I'm sorry if I missed it, but you covered the short-term impact to your service territories from the hurricanes. But does this help increase the amount of spending you can do in the future on ongoing storm hardening infrastructure work? Or is there something in future rate cases that will help you increase the rate base related to that?

Beth Cooper

Thank you, Tate, and good morning. First off, I would say we were very fortunate in that the service areas that we're primarily serving in the state. There was minimal impact to our operations. And so, as we talked about on the call, Jeff mentioned, we had customers that were out of service for a little less than 24 hours. So, in terms of CapEx and what we're doing in terms of our storm protection and improvement plans, those plans continue. Nothing has really changed or accelerated because of the hurricanes. What we did see and we will continue to see is that our system is becoming more and more reliable and resilient, and that was certainly the case with these three.

Tate Sullivan

Thank you, Beth. And Jeff, can you comment on the Florida City Gas? I mean, the customer count, average customers increased quarter-over-quarter. Should we just look at it, the customer growth opportunity set with Florida City Gas is very similar to the growth of Florida natural gas distribution in general? Or are there different pockets of higher growth?

Jeff Householder

I think that's – I think in general, they are very similar. We're certainly seeing significant activity on City Gas's system in the Port St. Lucie area. I mean that continues to be an area of substantial growth as the population in South Florida kind of continues to migrate a little farther north. Although we're happy with what we see in – certainly in the Brevard County areas and in Miami as well. But St. Lucie is probably the big driver of growth from a residential customer perspective.

Now if you look to commercial and industrial, things move around a little bit. We're seeing significant opportunities in the Miami area relative to those customer classes. And again, on FBU's territory in Florida, lots of development in our Central Florida areas. So we're still seeing the Wildlight development up in Nassau County, almost into Georgia, growing by leaps and bounds. So we're pretty happy with what we see. I think we've been reporting about a 3.9% growth rate in residential customers, and we frankly see that continuing into the future.

Tate Sullivan

Understood. Thank you.

Operator

Thank you. And we will take our next question from Paul Fremont with Ladenburg. Please go ahead.

Paul Fremont

Hey. Congratulations. My – I guess just my first question has to do with, are you taking any regulatory action in advance of a possible Supreme Court decision that's coming up in Florida in the first quarter of '25 on RSAM?

Beth Cooper

Well, there is currently – there is a hearing scheduled as it relates to the RSAM proceeding, and we will certainly be participating in that. And what I would say, Paul, as we have discussed and we have talked about in the past, certainly, there is that second tranche of RSAM, and that will – if we are able to pursue that, we will certainly rest with what happens with this proceeding. But keep in mind, we at legacy Chesapeake historically have approached the whole depreciation realm, thinking about it from a depreciation study perspective. So, that same opportunity or bucket of dollars is out there, whether it's looked at under an RSAM mechanism or whether we would like to pursue it more as a traditional type of depreciation study. So, we are following that proceeding very closely. But again, we see opportunities given how we have historically pursued depreciation studies.

Paul Fremont

We are talking about…

Beth Cooper

I was going to ask Jim to also comment on that.

Jim Moriarty

Good morning Paul. Hope all is well. We are looking forward to the oral argument on December 10th of the Florida Supreme Court. And we will be helping others defend the decision of the Florida Public Service Commission. As you can imagine, we do a lot of thinking about what that means and what it could mean. So, as Beth stated, we are fully engaged on the issue, and we are looking for a positive outcome. But if not, we will make sure to bring it back in, under our depreciation approach.

Paul Fremont

So, I mean I think it by your answer, you are going to wait until the Supreme Court issues its final decision before initiating any regulatory action, is that fair?

Beth Cooper

We are evaluating whether or not, we will await that. We haven't made any final decision. Certainly, we will announce if we decide to go down that path. But we are still looking at it, Paul. We have been following it very closely.

Paul Fremont

Great. Also I guess how does the Republican control on a Federal level impact potential investment opportunities that you might have in either your pipeline business or LNG – adding to your LNG re-gasification?

Jim Moriarty

I think it's a very good question, Paul, and one that we are evaluating as well. We have always had a very favorable constructive relationship with our Federal regulators at FERC and elsewhere. And any time we have had a project on the front end, we work closely with all the stakeholders so that there were few, if any, protests to what we would propose. And we will continue that approach. I think what you will find is a lot of doors opening maybe a little quicker than they did in the past. But we are very excited about our Worcester Resiliency project on the Eastern Shore. So, I think we are going to see a lot of wind at our backs in the energy industry generally as we go forward and try and make sure that this country continues to benefit from all the resources we have here domestically.

Paul Fremont

And then last question for me. In terms of the Phase 2 Maryland proceeding, will that also deal with the unification of the three franchises?

Jim Moriarty

That's the plan, Paul. We made the filing yesterday on Phase 2. And now the other parties will weigh in, and then we will all be before the ALJ.

Paul Fremont

Right. Thank you so much.

Jim Moriarty

Thank you, Paul.

Beth Cooper

Thank you.

Operator

[Operator Instructions] And we will take our next question from Chris Ellinghaus with Siebert Williams Shank. Please go ahead.

Chris Ellinghaus

Hey. Good morning everybody.

Beth Cooper

Good morning Chris.

Chris Ellinghaus

Jeff, is there anything that – through the FCG integration at this point that you have learned either about operations or about incremental investment opportunities that were not what you were expecting?

Jeff Householder

I think the level of potential opportunity has probably increased a little bit from what we were expecting before we got a good look at the unit. Nothing outrageously higher than what we had been reporting, but there is certainly growth there that we are pretty happy with. We are also seeing some operational synergies that we are beginning to harvest, frankly. They also, at City Gas had a number of things, like a 24/7 emergency call response center, that we have been able to leverage in our other operations areas. And so there are a variety of things like that. They were seeing that, I think promote the sort of synergies that we were hoping to find along with the growth opportunities that are a little bit more robust probably than we had originally anticipated. So, it's – so far, it's – we haven't had any particular shocks to the system from acquiring that unit. It's been more favorable generally speaking, I would say. Beth, I don't know if you have anything to add to that.

Beth Cooper

No, I would agree. I think you have already seen those three RNG projects. You have seen the safe investment program increase by $50 million. We have gone in for that. We have made some other filings that actually take the best of what both entities are doing. So, overall, I don't think – I think, Chris, where you were going, is there anything that may be more negatively. We have seen, I would say, no, the opposite is true.

Jeff Householder

Yes. The Miami Loop project, the Inner Loop project that we are talking about on this call is a good example of that. That's a $70 million project. We had assumed that we would be able to do things like that. But I think now, Beth, we are probably a project – the Miami Inner Loop, I think, is project number 12…

Beth Cooper

That's right, yes.

Jeff Householder

That we filed with the PSC in Florida for small-scale transmission expansions, a lot of that surrounding certainly the Miami area. And so I think we will see additional projects like that as we began to try to provide for a more robust delivery of gas capacity into South Florida.

Chris Ellinghaus

Okay. Great. Yes, I wanted to ask you about the Inner Loop project. What's the timeline for that?

Jeff Householder

Jim, we filed that, what – a handful of weeks ago, I guess, fairly recently. I don't have the exact date off the top of my head. I would expect the commission to look at that over the next two months or three months, and we will begin construction, hopefully, sometime in Q1 of next year. It's a fairly significant set of projects, as we have described. And so, we will put that into service at least partially next year. And it will begin to do exactly what we are trying to do, which is to improve the deliverability of gas service into places in South Florida, especially Miami, where we are seeing growth and opportunity, especially in some of the – we are seeing a lot of on-shoring and re-shoring of manufacturing these days across the industry, and we are seeing that in things like cement production in South Florida coming back into the country. And so we have opportunities to increase deliverability into South Florida and take advantage of those industrial increases. So, that's what we are trying to do.

Chris Ellinghaus

Okay. Great. On Slide 20, you have been showing us this one bucket of additional opportunities for the year. Can you provide any color on where you stand in that bucket and what – sort of what you have been reaping so far?

Beth Cooper

So that, Chris, includes opportunities that we have in both, on Delmarva and in Florida as we look across the enterprise. So, again, there are things that we are doing, for example, from a control room perspective. There are things that we are doing as it relates to some of the infrastructure programs and the management and some of those savings and costs that are happening there. You are seeing a lot already. If you look at our expenses for the quarter and look at it on a year-to-date basis, there is really three things that are happening. Number one, it's those synergies, some of which I just mentioned. Number two, you are seeing our business transformation efforts continue. In the third quarter, we went live with our Project 1CX in our utility billing system, in our legacy operations, and that has created not only efficiencies in how we do things, but also there is increased – some increased capitalization of costs as we are implementing that technology. So – and then, as you kind of move down that list and look at some of those other things, we are very active on the regulatory front in various jurisdictions. We have been successful in Maryland. I know the timing there is a little pushback, but we have been successful. And so, with all of those things, coupled with even the most recent debt placement and where we were able to place that debt. So, there is a lot of things as we lay out year-end, you are going to see – there is just many things that are going on across this enterprise, that are working to positively help us stay within that guidance range.

Chris Ellinghaus

Okay. That helps. One more thing, can you give us any color on what was involved in the Marlin improvement in the quarter?

Beth Cooper

So, there has been – really, there has been a real focus there and a shout out to the management within our Marlin team who has had a focus really over the last year, we have talked about it in terms of the types of contracts and projects that we are entering into. So, we are focused on, number one, let's ensure that we are locking in contracts that look like longer term contracts and are not more emergency one-time, you can't recur type contracts. So, that's been the first thing. The second thing that's been happening and you are hearing us talk about, our role in RNG transportation. We are having more and more projects that we are taking on and services that we are providing kind of like on-hold services. And Jeff, I don't know if there is anything else you would want to add there.

Jeff Householder

Maybe just one comment, we have spent a fair amount of time over the last handful of years building the asset base in Marlin so that we actually could look at that whole unit from a more commercial point of view. And we have done that, and we have moved the guy, Justin Stankiewicz into that role, that has a commercial view of the marketplace. He also has been running our renewable gas operations for a while. And so, that marriage between getting the tanks and the trucks and everything, the compressors and all the other equipment and assets we needed together at Marlin to actually take it out and begin to market it, has now come to the pass, and we have got people there that are interested in going out and looking for business that we now have the opportunity to actually satisfy the orders that come in. And so we are seeing a lot of that occurring and we will continue going forward to balance that commercialization of the business with the asset needs of the business and try to keep the kind of progress and success that you are seeing going.

Chris Ellinghaus

Okay. Thanks. Appreciate the details everybody.

Beth Cooper

Thank you, Chris.

Operator

Thank you. And it appears that there are no further questions at this time. I will now turn the program over to Jeff Householder for closing remarks.

Jeff Householder

Well, thank you very much for joining us. We always appreciate the interest in Chesapeake Utilities. I hope you have a great Thanksgiving and we will talk to you soon.

Operator

Thank you. This concludes Chesapeake Utilities Corporation's third quarter 2024 earnings conference call. Please disconnect your line at this time and have a wonderful day.

Third Quarter 2024

Earnings Call Presentation

CHESAPEAKE UTILITIES CORPORATION

November 8, 2024

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward-looking statements may be identified by the use of words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities Annual Report on Form 10-K for the year ended December 31, 2023 filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share (“EPS*”). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Safety Moment: Safe Driving Habits for Fall & Winter

CUC Safe

- As seasons change, check / update fluids, windshield wipers & roadside emergency supplies
- Be aware of lower visibility as the time change shifts sunrise and sunset
- Leave extra room between your car and others to account for wet, slippery roads
- Avoid using cruise control when driving on any slippery surface, such as ice or snow
- Leave extra time to manage traffic and less-experienced drivers around holidays
- Treat exhaustion and intoxication as equally deadly while driving

Continued Strong Financial Performance in Q3 2024

Adjusted Diluted EPS[1]

Key Financial Highlights

Q3 2024 Results

- Adjusted Gross Margin: $121.9M, up 29% from Q3 2023
- Adjusted Net Income: $18.1M, up 48% from Q3 2023
- Adjusted EPS: $0.80, up 16% from Q3 2023

Earnings Guidance Reaffirmed

- FY 2024 Adjusted EPS of **$5.33 - $5.45** per share
- FY 2025 Adjusted EPS of **$6.15 - $6.35** per share
- FY 2028 Adjusted EPS of **$7.75 - $8.00** per share

CapEx Guidance Reaffirmed

- YTD 2024 Capital Expenditures of **$257M**
- 2024 Capital Expenditure Guidance: **$300M - $360M**
- 2024 - 2028 5-Year CapEx Guidance: **$1.5B - $1.8B**

CHESAPEAKE UTILITIES CORPORATION

[1] *Adjusted Diluted Earnings Per Share from Continuing Operations; 2024 excludes transaction / transition-related costs associated with the FCG acquisition.*

Operational Updates

Hurricane Update

- No significant damage from Hurricanes Debby, Helene, or Milton
- ~13,000 Florida Electric customers did lose power during Hurricane Helene, but power was largely restored within 24 hours
- Our Emergency Response Plans operated effectively and our systems benefited from the reinforcement and resiliency investments we've been making
- Grateful to team members across the organization who worked together to be responsive in serving our customers while prioritizing safety

FLORIDA CITY GAS — The Journey Continues

Achieving Operational Synergies
Consolidating processes and resources and incorporating operations into existing systems

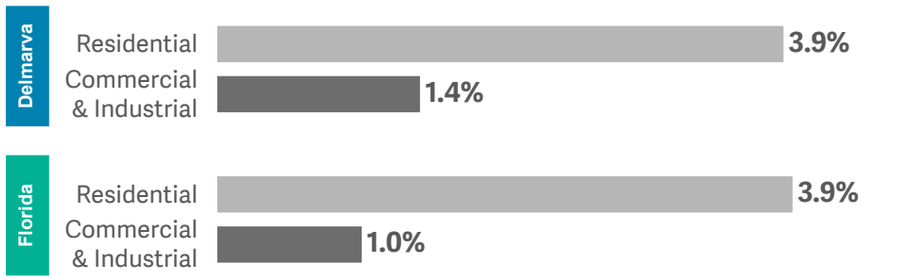
Optimizing Operations
"Best of Both" approach to identify and implement efficiencies and operations throughout Florida

Accelerating Investment Opportunities
Moving forward on regulatory approvals to support FCG service area growth and make infrastructure improvements

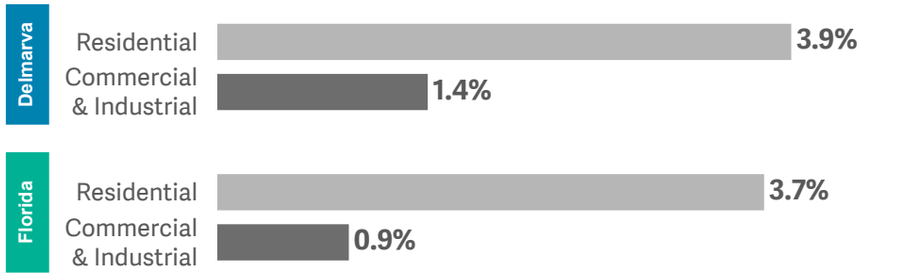
High-Growth Service Areas Drive Investment Opportunities

Strong Customer Growth

Q3 2024 vs Q3 2023



YTD 2024 vs YTD 2023

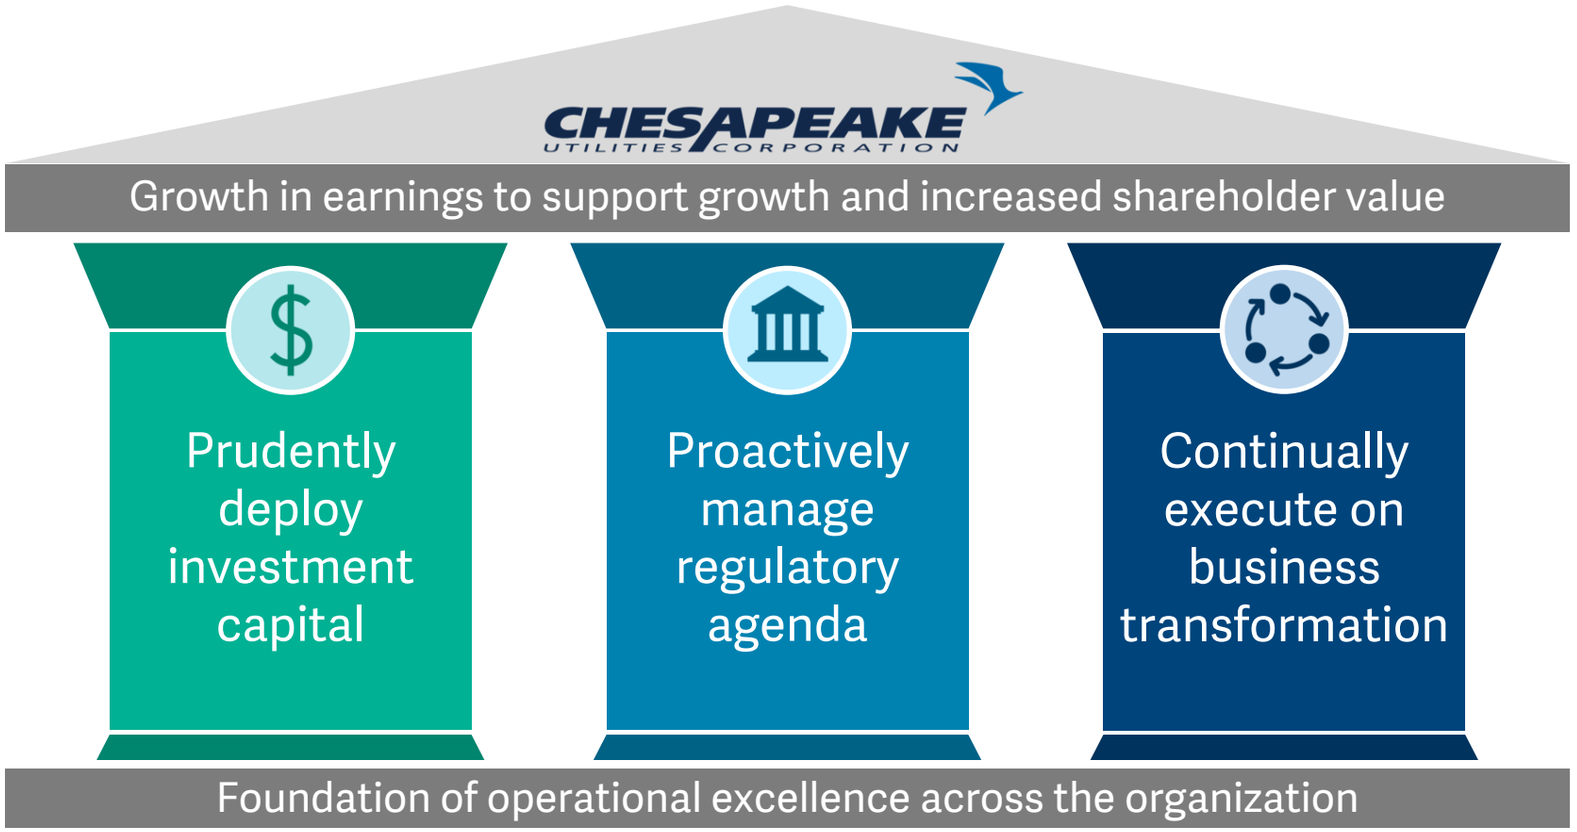


Strong growth expected to continue, with

50+

new housing developments expected to be built within our Delmarva and Florida service areas in each of the next 4 years

Executing On Our Long-Term Growth Plan



5-Year Capex Guidance is On-Track and Achievable

~$1.3 billion of identified capital projects support our 5-year CapEx guidance of $1.5 - $1.8 billion

Segment	5-Year Guidance
Regulated Distribution	$600 - $645M
Regulated Transmission	$435 - $590M
Regulated Infrastructure	$325 - $375M
Unregulated Businesses	$100 - $140M
Technology	$70 - $90M
Total	$1.5 - $1.8B

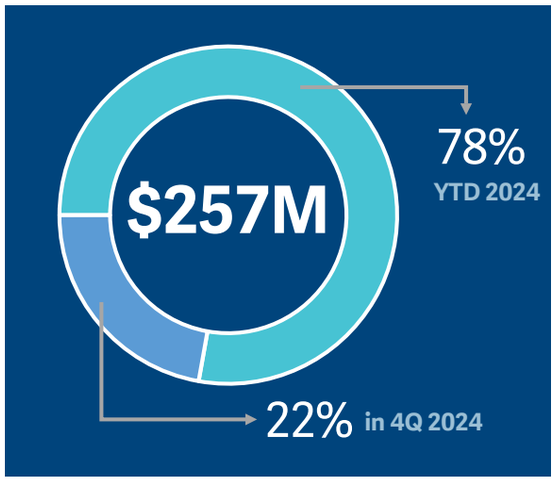
Identified Regulated CapEx	5-Year Spend
Natural Gas LDC Organic Growth	$625M
Worcester Resiliency	$80M
Newberry, Wildlight Phase 2	$28M
Boynton Beach, New Smyrna	$36M
Lake Mattie, St. Cloud, Plant City	$42M
Other Approved Pipeline Projects	$49M
GUARD / SAFE Programs[1]	$230M
Eastern Shore Capital Surcharge	$75M
Florida Electric Storm Protection Plan	$50M
Technology Transformation	$80M
Total Identified & Ongoing Capital	~$1.3B

$1B+ of capital spend has existing regulatory approvals or recovery mechanisms

[1] *Includes $50 million requested in April 2024 and approved by the Florida PSC in September 2024.*

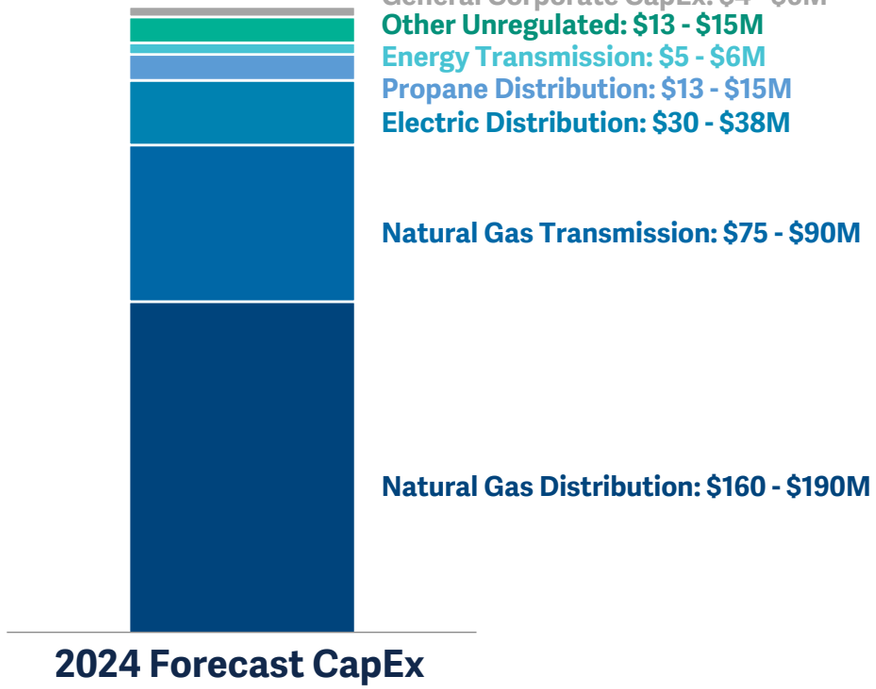
2024 Capital Investment On Track to Drive Margin Growth

YTD 2024 Capital Spend



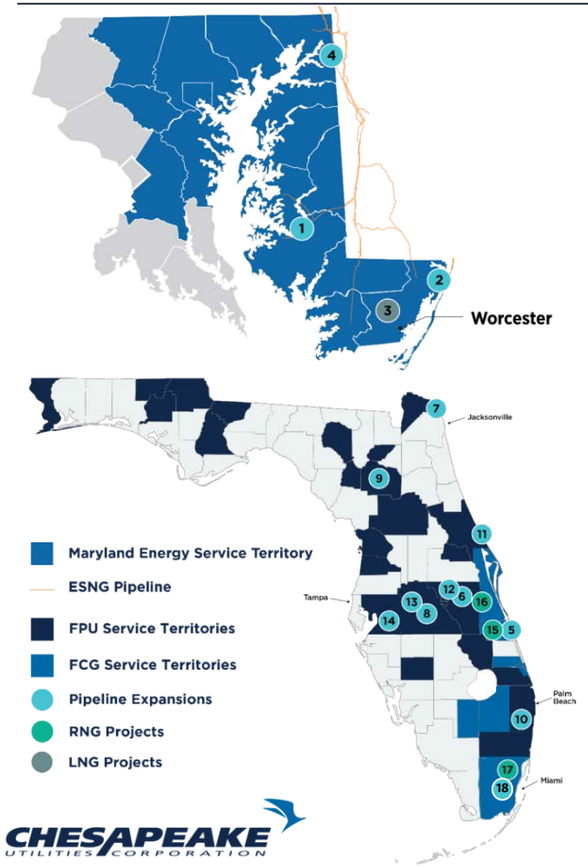
YTD 2024 Capital Expenditures on track, driven by growth projects, infrastructure investments and technology

$300 - $360M



Note: Bar chart graphically depicts midpoint of each range. Natural Gas Transmission & Distribution and Electric Distribution ranges have been slightly reallocated.

Organic Growth Driving Delmarva & Florida Investments



#	Project Name	Status	In-Service	Total CapEx	Adj. Gross Margin ($M)	
					2024E	2025E
1	Southern Expansion	In-Service	Q4 2023	~$14M	$2.3	$2.3
2	North Ocean City Connector	In-Service	Q2 2023[1]	~$6M	—	—

4	Warwick Extension	In-Progress	Q4 2024	~$9M	$0.3	$1.9
5	Beachside Expansion	In-Service	Q2 2023	~$11M	$2.5	$2.4
6	St. Cloud / Twin Lakes	In-Service	Q3 2023	~$4M	$0.6	$0.6
7	Wildlight Phase 1 & 2	In-Progress	2023-2025	~$25M	$1.4	$3.0
8	Lake Wales	In-Service	Q2 2023	~$2M	$0.5	$0.5
9	Newberry Expansion	In-Progress	Q2 2024	~$15M	$1.4	$2.6
10	Boynton Beach	In-Progress	Q1 2025	~$21M	—	$3.3
11	New Smyrna Beach	In-Progress	Q2 2025	~$15M	—	$1.7
12	St. Cloud Expansion	In-Progress	Q4 2025	~$20M	—	$2.2
13	Lake Mattie	In-Progress	Q4 2025[2]	~$18M	—	$0.8
14	Plant City	In-Progress	Q4 2024	~$4M	$0.1	$1.2
15	Indian River RNG[3]	In-Progress	2025	~$18M	—	$5.5
16	Brevard RNG[3]	In-Progress		~$6M		
17	Medley RNG[3]	In-Progress		~$22M		
18	Miami Inner Loop	Pending Approval	Q2-Q3 2025	~$72M	—	—
			Totals:	**$362M**	**$9.0**	**$27.9**

[1] Regulatory recovery through the Maryland General Rate Case so no margin impact in 2024. [2] Expected in-service in late December 2025 so no 2025 margin expected. [3] Approval received in July 2024 from the Florida PSC for these RNG transportation projects, which facilitate additional capacity from landfills through FCG's system.

CHESAPEAKE UTILITIES CORPORATION

Business Transformation: People, Processes, Systems & Structures

We are continually evaluating our operations and implementing improvements in order to ensure long-term success and growth in an ever-changing environment.

1CX
SIMPLIFY • ENGAGE • TRANSFORM

In August 2024, CPK successfully implemented an **SAP customer information system** to enhance our service platforms, streamline processes and improve efficiency across four key workstreams:

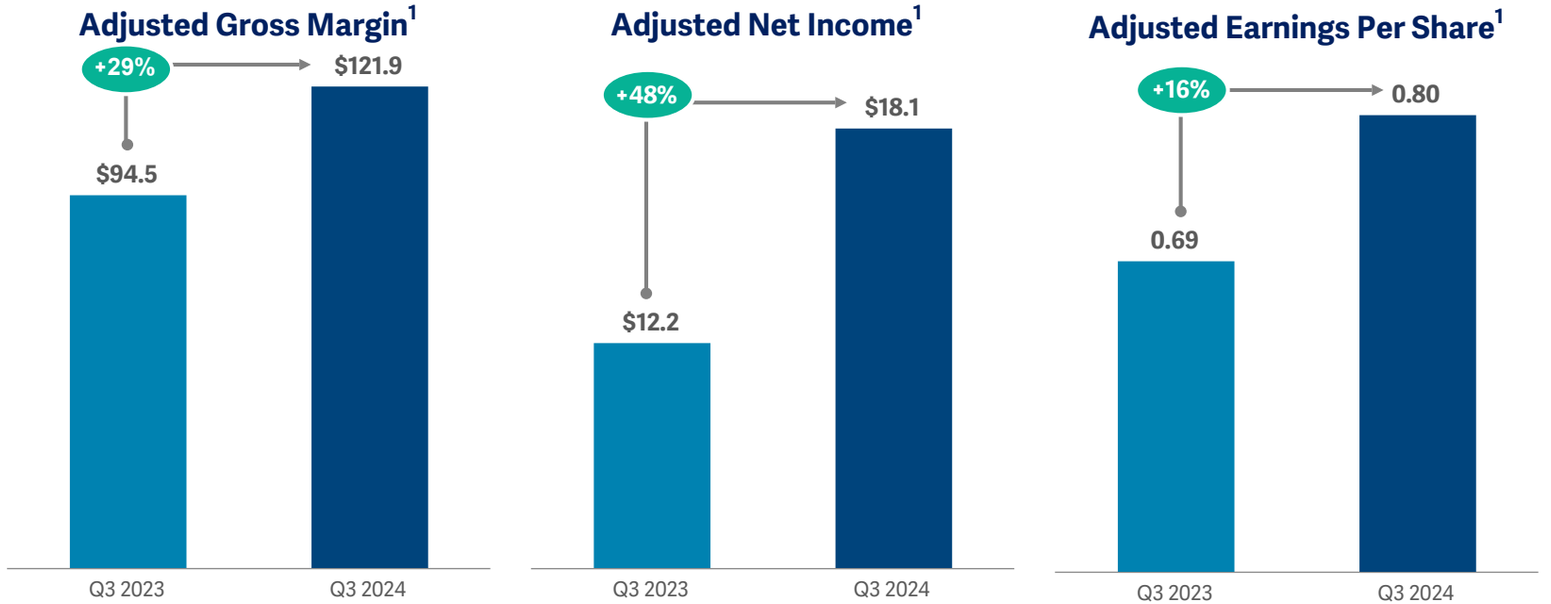
- Billing & Invoicing
- Customer Service
- Device and Work Management
- Finance and Contracting (FICA)

Upcoming Process & Technology Improvements & Investments:

- Implement 1CX for FCG
- Evaluate systems to upgrade financial and operational processes
- Strengthen existing IT infrastructure to enhance resiliency and cyber security
- Increased team development to strengthen capabilities

Increasing Adj. Gross Margin Driving Bottom-Line Growth

Gross margin growth doubled operating income and drove nearly 50% growth in bottom-line Adj. Net Income



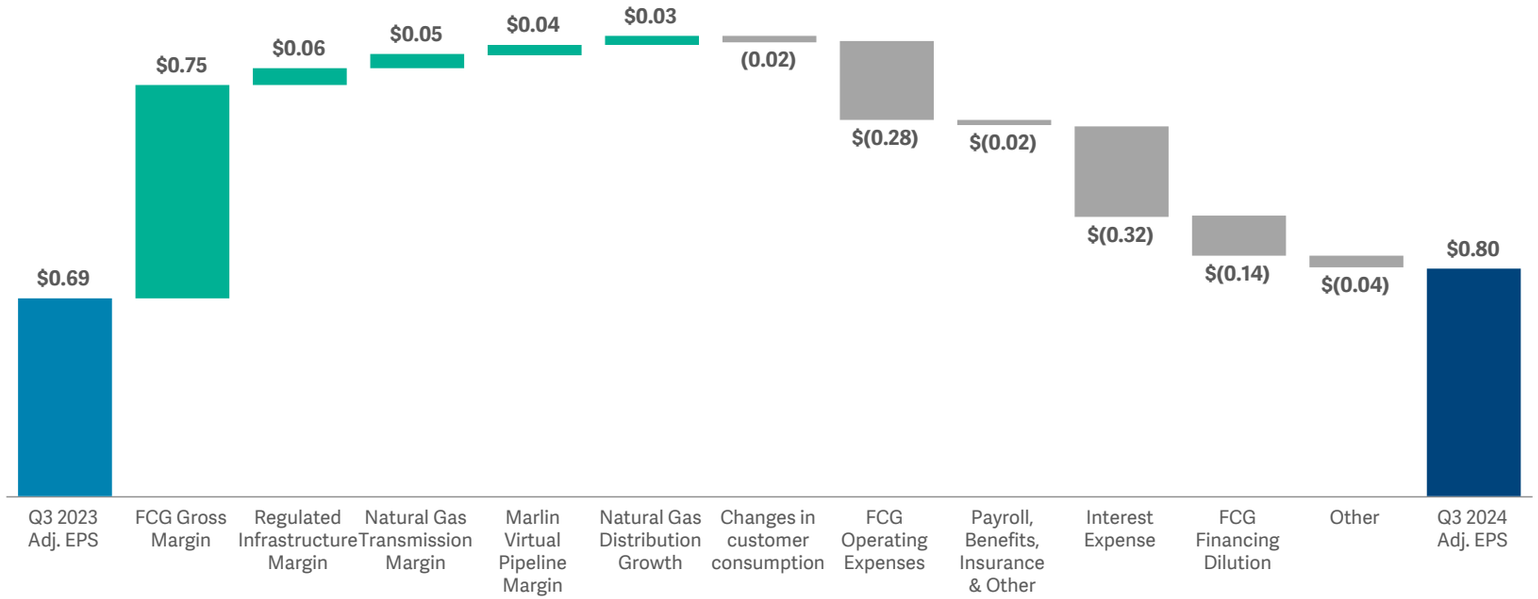
YTD:	$323.8	$413.1	$64.8	$84.2	$3.63	$3.76

[1] See appendix for a reconciliation of non-GAAP metrics. [2] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transaction costs, transition services, consulting, system integration, rebranding and legal fees.

Key Drivers of Performance – Three Months Ended September 30, 2024

Adjusted EPS for the third quarter benefited from our recent acquisition of Florida City Gas and increased margin from our from our legacy business, offset primarily by financing costs related to the FCG acquisition.

Adjusted Diluted Earnings Per Share[1]



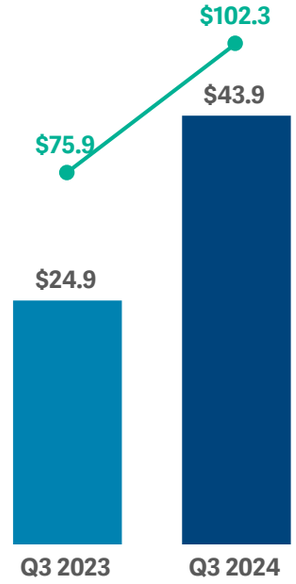
[1] *See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share.*

Strong Regulated Energy Operating Income Growth

Adj. Gross Margin[1] up **35%** & Operating income up **76%,** driven by:

- **$23.4M** from FCG operations & growth
- **$2.6M** from natural gas growth, conversions and service expansions
- **$1.8M** from regulated infrastructure programs

*Partially offset by **$7.5M** of FCG operating expenses*



Adjusted Gross Margin[1]	$	**75.9**	$	**102.3**
D&A + Property Taxes		18.9		19.9
Transaction + Transition Expense[2]		3.9		0.8
Other Operating Expenses		28.2		37.7
Operating Income[2]	$	**24.9**	$	**43.9**

Note: Dollars in millions. Table may not foot due to rounding.
[1] See appendix for a reconciliation of non-GAAP metrics. [2] Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transaction costs, transition services, consulting, system integration, rebranding and legal fees.

Improvement in Unregulated Energy Segment

Adjusted Gross Margin[1] up **6%**, primarily driven by:

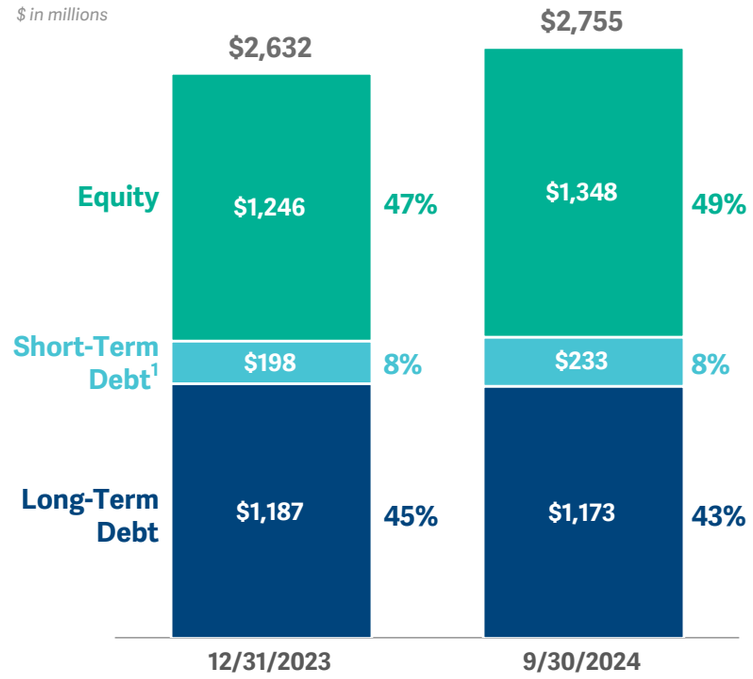
- **$1.1M** attributable to increased Marlin virtual pipeline services
- **$0.8M** of lower payroll, benefits and other employee-related expenses

	Q3 2023	Q3 2024
Adjusted Gross Margin[1]	$ 18.6	$ 19.7
D&A + Property Taxes	4.9	5.1
Other Operating Expenses	18.4	17.6
Operating Loss[2]	$ (4.7)	$ (3.1)

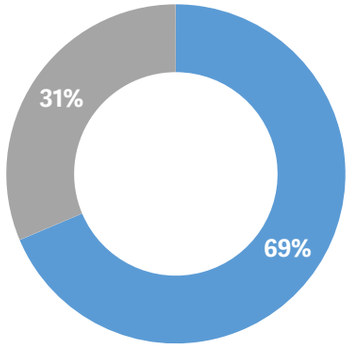
Note: Dollars in millions.
[1]See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin. [2] Operating Loss reflects typical seasonality of business.

Strong Balance Sheet Supports Growth Plan

Total Capitalization



Total Liquidity[2]



Total available liquidity of

$484M

out of Total Capacity of $705M

2024 Equity & Debt Issuances

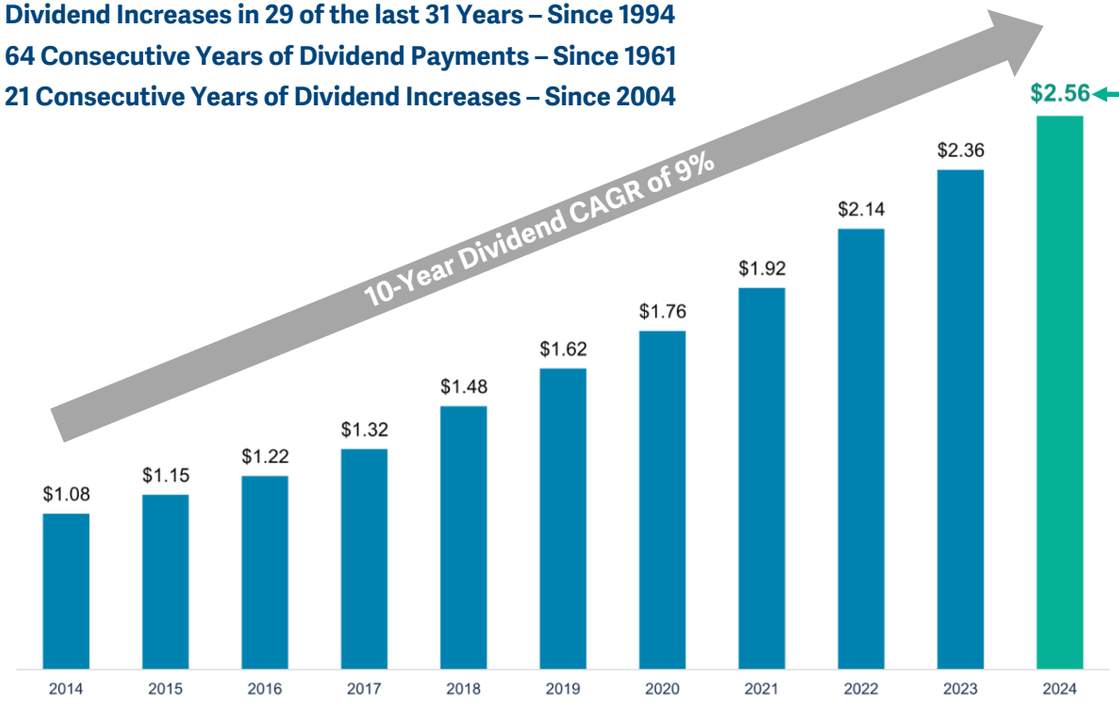
- **$63.8M** equity issued through various plans YTD Q3 2024, with **22.8M** shares outstanding as of **11/4/2024**
- **$100M** of **5-Yr 5.20% Senior Notes** issued in Nov. 2024

[1] *Short-term debt for both periods includes short-term borrowing as well as the current portion of long-term debt.*
[2] *Total liquidity includes the upsized $450M Revolver and $255M of Private Placement Shelves.*

Three Decades of Dividend Growth Drive Shareholder Return

Annualized Dividend per Share

Dividend Increases in 29 of the last 31 Years – Since 1994
64 Consecutive Years of Dividend Payments – Since 1961
21 Consecutive Years of Dividend Increases – Since 2004



Increase of 8.5%

12%+ Compounded Annual Shareholder Return over 10 years[1]

Low Dividend Payout Ratio

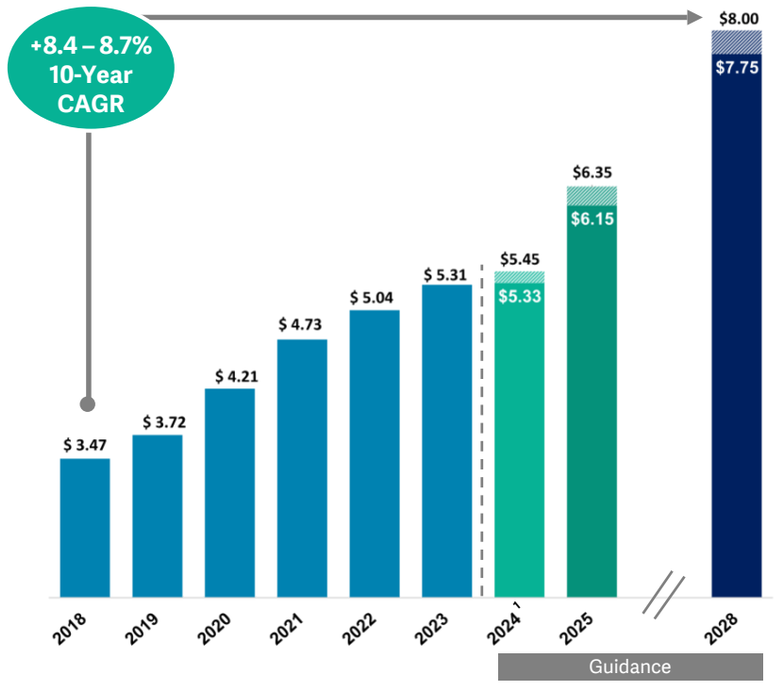
enables CPK to reinvest to support growth plan

CHESAPEAKE UTILITIES CORPORATION

[1] *Calculated through 12/31/2023.*

Driving Increased Shareholder Value; Reaffirming Earnings Guidance

Earnings Per Share - Diluted



Earnings Growth Driven by Capital Investment…

- **YTD 2024 Adjusted Earnings Per Share of $3.76[1]**
- 2024 Adj. EPS Guidance of $5.33 to $5.45
- 2025 Adj. EPS Guidance of $6.15 to $6.35
- 2028 Adj. EPS Guidance of $7.75 to $8.00

… Leading to Best in Class Shareholder Return

- Annual shareholder return >95th percentile among peer group[2] the past 5, 10, 15 & 20 year periods
- >300% increase in stock price over the past 15 years drives a $2.1B Increase in Market Cap

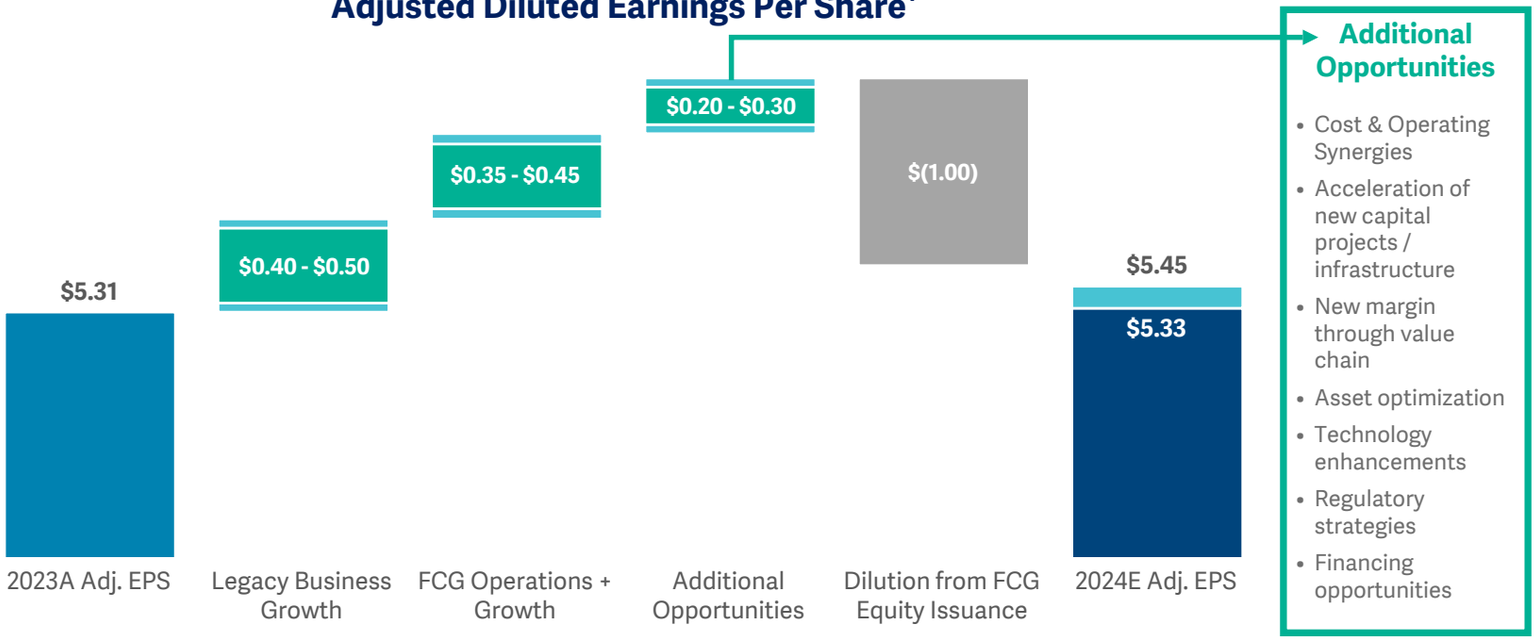
CHESAPEAKE UTILITIES CORPORATION

[1] *Adjusted EPS excludes transaction and transition-related expenses incurred attributable to the acquisition of FCG.*
[2] *Peer Group includes select group of 10 CPK peer companies. Details can be found in the Annual Report on Form 10-K.*

Pathway to 2024 EPS[1] Guidance

Our 2024 target is based on continued growth from our legacy businesses, a full year of contribution from FCG, and additional opportunities we have identified.

Adjusted Diluted Earnings Per Share[1]



[1] *See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share. 2023 excludes transaction-related costs associated with the FCG acquisition.*

Proactive Rate Case and Regulatory Agenda

Maryland LDCs

- Filed on January 30, 2024, proposing a $6.9M rate increase, an 11.5% ROE & consolidation of three MD LDCs into one legal & operating entity
- Reached a finalized settlement in the depreciation study, representing **savings of $1.2 million per year, retroactive to January 2023**
- Approval for a $2.6M revenue increase issued by ALJ in September 2024. Phase II proceeding to be filed November 2024

Docket #: 09722

Delaware LDC

- Filed on August 12, 2024, proposing a $12.1M rate increase & an 11.5% ROE
- Includes request for interim rate relief of $2.5M, which was approved with an effective date of Oct. 11, 2024
- Case includes an updated depreciation study; if approved, would be effective at time of base rate increase
- Hearing date set for May 2025; final order and rate increase expected in 1H 2025

Docket #: 24-0906

Florida Electric

- Filed on August 22, 2024, proposing a $12.6M rate increase & an 11.3% ROE
- Reflects recovery to true-up rates and current operational expenses
- Includes request for interim rate relief of $1.8M, which was approved with an effective date of Nov. 1, 2024
- Case filed as a Proposed Agency Action (PAA) which has a statutory timeline of 5 months
- Full result and rate increase expected 1H 2025

Docket #: 20240099

Other Filings

- **ESNG Worcester Resiliency Upgrade (WRU) Project**: filed with FERC in August 2023; overall favorable support from the community and elected officials; approval expected by December 2024
- **FCG expanded Safety, Access, and Facility Enhancement (SAFE)**: filed in April 2024; requested an additional $50M to expand the program to include the additional categories allowed in FPU's GUARD program; received approval in September 2024
- **FL Consolidation**: On August 1, FPU and FCG filed petitions to consolidate their Energy Conservation programs and Gas Cost recovery clauses
- **Miami Inner Loop**: In September, PPC petitioned the Florida PSC to approve its TSA with FCG to enhance the infrastructure in Miami; the expansion project involves pipeline projects to support FCG growth and is expected to represent a ~$72M capital investment overall

Full Circle Dairy Commissioning Completed

We are poised to execute on opportunities that enable us to leverage our expertise across the entire energy delivery value chain -- from production and virtual pipeline transportation to injection, transmission and distribution

Full Circle Dairy RNG Facility

- The company celebrated full operations at Full Circle Dairy (FCD) with a ribbon-cutting ceremony at the end of October 2024
- Since June 2024, nearly 21,000 dekatherms (Dth) of RNG have been captured and transported for use; FCD's full-year production is expected to average 100,000 Dth
- In November 2024, FCD received Qualified RIN Status (Q-RINS), allowing the site to generate highly-demanded D3 RINS in addition to generating / monetizing RINS for all RNG produced to date
- RNG from FCD is injected into Chesapeake Utilities' system in Yulee, Florida by CPK subsidiary Marlin Gas Service, via its virtual pipeline capabilities, demonstrating CPK's ability to provide expertise across the energy delivery value chain

Worcester Resiliency Upgrade Project Proceeding On Schedule

ESNG LNG Storage project designed to meet critical energy service to customers during the peak winter heating season.

- **$80 million planned LNG storage facility** in Bishopville, MD
- Project consists of **five low-profile horizontal storage tanks** allowing for up to 500K gallons of storage plus pipeline looping and additional upgrades
- Incremental storage capacity will help **protect against weather-related disruptions** and support affordable energy prices
- In September, members of the Operations Services Team traveled to South Korea to **visit the manufacturing facility** for the LNG tanks and were pleased with production progress, which remains on schedule
- **Expecting FERC approval by year-end 2024** for construction start Q1 2025

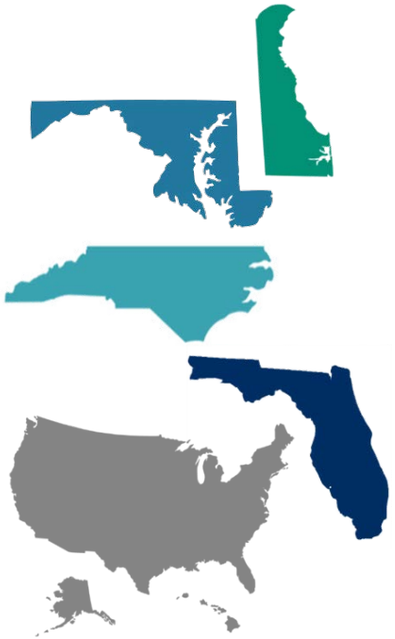
CPK teammates assess LNG Tank Production in South Korea

CHESAPEAKE UTILITIES CORPORATION

Note: FERC = Federal Energy Regulatory Commission.

Active Legislative Engagement & Election Updates

CPK remains focused on maintaining consistent dialogue and building strong relationships to ensure continued support for the company's operations and the natural gas industry overall



Delaware: New Democratic governor and new legislative leadership, maintaining Democratic majority

Maryland: State leadership unchanged; General Assembly expected to focus on energy policy during the upcoming legislative session

North Carolina: New Democratic governor

Florida: New legislative leadership, maintaining a Republican majority

All State Jurisdictions: Preparing for the upcoming state-level legislative sessions beginning in January

Federal: Preparing for the new 119th Congress and the Trump Administration, with an expected focus on energy and tax policy

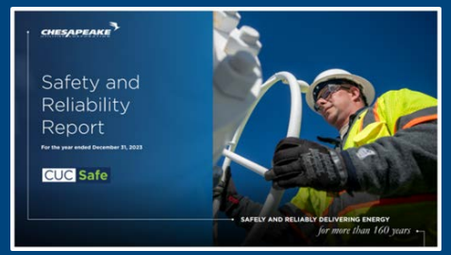
CHESAPEAKE UTILITIES CORPORATION

Working Toward Excellence on All Fronts

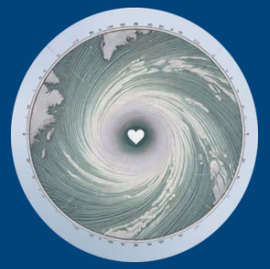
Sustainability Reporting

Micro-Sustainability Report on **Environmental Stewardship** issued in September 2024

Micro-Sustainability Report on **Safety & Reliability** issued in April 2024



Community Support & Engagement



In the aftermath of Hurricanes Helene and Milton, CPK has **donated $50,000** to support recovery efforts in affected communities

CPK Teammates & Tuskegee Airmen Celebrate **Special Renaming Ceremony** at Delaware State University

Why Chesapeake Utilities?

CPK's unique combination of operational expertise, growth potential and consistent delivery of long-term shareholder return connects our strong historical track record with our future success.

Growth since 2003:

- 10x Asset Growth
- 10x Adj. Net Income Growth
- 5x Customers Served

Expertise

Nimble, yet powerful, organization with an experienced management team that gets things done

Innovative & diligent team focused on operational execution & delivering results

Delmarva: Growing demand for natural gas distribution

Florida: Strong residential growth and favorable environment

Growth

Attractive & diversified geographical exposure, with multiple sources of organic & acquisitive growth

Expected to spend $1.5 - $1.8 billion in Capital Expenditures from 2024 - 2028

EPS 10-Year CAGR of **8+%**

Dividend 10-Year CAGR: **9%**

>95th Percentile for Peer TSR

Return

Focused on best-in-class shareholder return, balancing earnings growth and dividend growth

Strong dividend growth while significantly reinvesting earnings for long-term growth

CHESAPEAKE UTILITIES CORPORATION REPORTS THIRD QUARTER 2024 RESULTS

- **Net income and earnings per share ("EPS")* were $17.5 million and $0.78, respectively, for the third quarter of 2024, and $81.9 million and $3.66, respectively, for the nine months ended September 30, 2024**
- **Adjusted net income and Adjusted EPS**, which exclude transaction and transition-related expenses attributable to the acquisition and integration of Florida City Gas ("FCG"), were $18.1 million and $0.80, respectively, for the third quarter of 2024 and $84.2 million and $3.76, respectively, for the nine months ended September 30, 2024**
- **Adjusted gross margin** growth of $89.3 million during the first nine months of 2024 driven by contributions from FCG, regulatory initiatives and infrastructure programs, natural gas organic growth, continued pipeline expansion projects, and additional customer consumption**
- **Results continue to track in line with Management's expectations, and the Company continues to affirm 2024 EPS and capital guidance**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the three and nine months ended September 30, 2024.

Net income for the third quarter of 2024 was $17.5 million ($0.78 per share) compared to $9.4 million ($0.53 per share) in the third quarter of 2023. Excluding transaction and transition-related expenses associated with the fourth quarter 2023 acquisition of FCG, adjusted net income was $18.1 million ($0.80 per share) or approximately 16 percent higher per share compared to the prior-year period.

The higher results for the third quarter of 2024 were largely attributable to incremental contributions from FCG, additional margin from regulated infrastructure programs, continued pipeline expansion projects to support distribution growth, growth in the Company's natural gas distribution businesses and increased levels of virtual pipeline services. The financing impacts of the FCG acquisition, including increased interest expense related to debt issued and additional shares outstanding, partially offset the increases.

During the first nine months of 2024, net income was $81.9 million ($3.66 per share) compared to $61.9 million ($3.47 per share) in the prior-year period. Excluding the transaction and transition-related expenses, adjusted net income was $84.2 million ($3.76 per share) compared to $64.8 million ($3.63 per share) for the same period in 2023.

2-2-2-2

Year-to-date earnings for 2024 were primarily impacted by the factors discussed for the third quarter as well as additional adjusted gross margin from increased customer consumption experienced earlier in the year and contributions from the Company's unregulated businesses.

"Chesapeake Utilities delivered strong financial performance and sustained operational excellence in the third quarter as we continued to execute on the three pillars that drive long-term earnings growth and shareholder value: prudently deploying record levels of capital, proactively advancing our regulatory agenda and continually executing on business transformation," said Jeff Householder, chair, president and CEO. "In the third quarter alone, we invested nearly $100 million in capital expenditures, filed for rate increases in Delaware and in Florida for our electric operations and successfully implemented our new enterprise-wide customer billing system."

"In the third quarter of 2024, adjusted earnings per share was up 16 percent relative to the same period in 2023, attributable to adjusted gross margin growth of close to 30 percent and continued cost management driven by our business transformation efforts and focus on a "one company" approach. Some of the larger margin drivers include the addition of FCG, which we continue to effectively integrate, strong customer growth of approximately 4 percent in both Delmarva and Florida, incremental margin related to transmission expansions and increased virtual pipeline services and depreciation savings related to regulatory initiatives," continued Householder. "I'm proud of our teammates' consistent dedication to prioritizing service and safety to deliver performance in line with our expectations. This commitment enables us to affirm our full-year 2024 adjusted EPS and capital guidance."

Earnings and Capital Investment Guidance

The Company continues to affirm its 2024 EPS guidance of $5.33 to $5.45 in adjusted earnings per share given the incremental margin opportunities present across the Company's businesses, investment opportunities within and surrounding FCG, regulatory initiatives and operating synergies.

The Company also affirms its previously-announced 2024 capital expenditure guidance of $300 million to $360 million, as well as the capital expenditure guidance for the five-year period ended 2028 that will range from $1.5 billion to $1.8 billion. This investment forecast is projected to result in a 2025 EPS guidance range of $6.15 to $6.35, as well as a 2028 EPS guidance range of $7.75 to $8.00. This implies an EPS growth rate of approximately 8 percent from the 2025 EPS guidance range.

**Unless otherwise noted, EPS and Adjusted EPS information are presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

3-3-3-3

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Depreciation, amortization and property taxes	**24,998**	23,800	1,198	5.0 %
FCG transaction and transition-related expenses	**819**	3,899	(3,080)	(79.0)%
Other operating expenses	**55,202**	46,526	8,676	18.6 %
Operating income	**$ 40,918**	$ 20,228	$ 20,690	102.3 %

Operating income for the third quarter of 2024 was $40.9 million, an increase of $20.7 million compared to the same period in 2023. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $17.6 million or 73.0 percent compared to the prior-year period. An increase in adjusted gross margin in the third quarter of 2024 was driven by contributions from the acquisition of FCG, incremental margin from regulated infrastructure programs, continued pipeline expansion projects, increased demand for virtual pipeline services and natural gas organic growth. Higher operating expenses were driven largely by the operating expenses of FCG and increased payroll, benefits and other employee-related expenses compared to the prior-year period. Increases in depreciation, amortization and property taxes attributable to growth projects and FCG were partially offset by a $3.2 million reserve surplus amortization mechanism ("RSAM") adjustment from FCG and lower depreciation from our electric operations and Maryland natural gas division due to revised rates from approved depreciation studies.

7-7-7-7

Regulated Energy Segment

(in thousands)	Three Months Ended September 30, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 102,267**	$ 75,893	$ 26,374	34.8 %
Depreciation, amortization and property taxes	**19,853**	18,891	962	5.1 %
FCG transaction and transition-related expenses	**819**	3,899	(3,080)	(79.0)%
Other operating expenses	**37,660**	28,191	9,469	33.6 %
Operating income	**$ 43,935**	$ 24,912	$ 19,023	76.4 %

The key components of the increase in adjusted gross margin** are shown below:

(in thousands)	
Contribution from FCG	$ 23,399
Margin from regulated infrastructure programs	1,806
Natural gas transmission service expansions, including interim services	1,548
Natural gas growth including conversions (excluding service expansions)	1,013
Changes in customer consumption	(361)
Other variances	(1,031)
Quarter-over-quarter increase in adjusted gross margin**	**$ 26,374**

The major components of the increase in other operating expenses are as follows:

(in thousands)	
FCG operating expenses	$ 7,476
Payroll, benefits and other employee-related expenses	1,223
Insurance related costs	222
Other variances	548
Quarter-over-quarter increase in other operating expenses	**$ 9,469**

Unregulated Energy Segment

(in thousands)	Three Months Ended September 30, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 19,699**	$ 18,589	$ 1,110	6.0 %
Depreciation, amortization and property taxes	**5,144**	4,902	242	4.9 %
Other operating expenses	**17,616**	18,410	(794)	(4.3)%
Operating loss	**$ (3,061)**	$ (4,723)	$ 1,662	35.2 %

8-8-8-8

Operating results for the second and third quarters historically have been lower due to reduced customer demand during warmer periods of the year. The impact to operating income may not align with the seasonal variations in adjusted gross margin as many of the operating expenses are recognized ratably over the course of the year.

The major components of the increase in adjusted gross margin** are shown below:

(in thousands)	
Propane Operations	
Contributions from acquisition	$ 135
CNG/RNG/LNG Transportation and Infrastructure	
Increased level of virtual pipeline services	1,098
Other variances	(123)
Quarter-over-quarter increase in adjusted gross margin**	**$ 1,110**

The major components of the decrease in other operating expenses are as follows:

(in thousands)	
Payroll, benefits and other employee-related expenses	$ (515)
Other variances	(279)
Quarter-over-quarter decrease in other operating expenses	**$ (794)**

Operating Results for the Nine Months Ended September 30, 2024 and 2023

Consolidated Results

	Nine Months Ended September 30,			
(in thousands)	**2024**	**2023**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 413,096**	$ 323,791	$ 89,305	27.6 %
Depreciation, amortization and property taxes	**77,811**	70,918	6,893	9.7 %
FCG transaction and transition-related expenses	**3,114**	3,899	(785)	(20.1)%
Other operating expenses	**170,878**	145,486	25,392	17.5 %
Operating income	**$ 161,293**	$ 103,488	$ 57,805	55.9 %

Operating income for the first nine months of 2024 was $161.3 million, an increase of $57.8 million compared to the same period in 2023. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $57.0 million or 53.1 percent compared to the prior-year period. An increase in adjusted gross margin in the first nine months of 2024 was driven by contributions from the acquisition of FCG, incremental margin from regulatory initiatives, natural gas organic growth and continued pipeline expansion projects, higher customer consumption and increased margins from the Company's unregulated businesses. Higher operating expenses during the current period were driven largely by the operating expenses of FCG and increased insurance costs. These increases were partially offset by lower payroll, benefits and other employee-related expenses compared to the prior-year period. Increases in depreciation, amortization and property taxes attributable to growth

9-9-9-9

projects and FCG were partially offset by an $8.9 million RSAM adjustment from FCG and lower depreciation from our electric operations and Maryland natural gas division due to revised rates from approved depreciation studies.

Regulated Energy Segment

(in thousands)	Nine Months Ended September 30, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 324,022**	$ 240,130	$ 83,892	34.9 %
Depreciation, amortization and property taxes	**63,671**	56,415	7,256	12.9 %
FCG transaction and transition-related expenses	**3,114**	3,899	(785)	(20.1)%
Other operating expenses	**114,688**	87,988	26,700	30.3 %
Operating income	**$ 142,549**	$ 91,828	$ 50,721	55.2 %

The key components of the increase in adjusted gross margin** are shown below:

(in thousands)	
Contribution from FCG	$ 71,725
Margin from regulated infrastructure programs	4,424
Natural gas growth including conversions (excluding service expansions)	4,182
Natural gas transmission service expansions, including interim services	3,702
Rate changes associated with the Florida natural gas base rate proceeding [(1)]	1,630
Eastern Shore contracted rate adjustments	(238)
Other variances	(1,533)
Period-over-period increase in adjusted gross margin**	**$ 83,892**

[(1)] Includes adjusted gross margin contributions from permanent base rates that became effective in March 2023.

The major components of the increase in other operating expenses are as follows:

(in thousands)	
FCG operating expenses	$ 25,363
Facilities, maintenance costs and outside services	677
Insurance related costs	651
Other variances	9
Period-over-period increase in other operating expenses	**$ 26,700**

10-10-10-10

Unregulated Energy Segment

(in thousands)	Nine Months Ended September 30, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 89,161**	$ 83,818	$ 5,343	6.4 %

Forward-Looking Statements

Matters included in this release may include forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements. Please refer to the Safe Harbor for Forward-Looking Statements in the Company's 2023 Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the third quarter of 2024 for further information on the risks and uncertainties related to the Company's forward-looking statements.

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Friday, November 8, 2024 at 8:30 a.m. Eastern Time to discuss the Company's financial results for the three and nine months ended September 30, 2024. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com. For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.245.3074
International: 203.518.9765
Conference ID: CPKQ324

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas transmission and distribution, electricity generation and distribution, propane gas distribution, mobile compressed natural gas utility services and solutions, and other businesses.

Please note that Chesapeake Utilities Corporation is not affiliated with Chesapeake Energy, an oil and natural gas exploration company headquartered in Oklahoma City, Oklahoma.

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes all major projects and initiatives that are currently underway or recently completed. The Company's practice is to add incremental margin associated with new projects and initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, as compared to the Company's prior quarterly filings. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's third quarter 2024 Quarterly Report on Form 10-Q.

(4) Rate case application filed with the Florida PSC in August 2024. See additional information provided below.

Detailed Discussion of Major Projects and Initiatives

Pipeline Expansions

St. Cloud / Twin Lakes Expansion
In February 2024, Peninsula Pipeline filed a petition with the Florida Public Service Commission ("PSC") for approval of an amendment to its Transportation Service Agreement with FPU for an additional 10,000 Dts/day of firm service in the St. Cloud, Florida area. Peninsula Pipeline will construct pipeline expansions that will allow FPU to serve the future communities that are expected in that area. The Florida PSC approved the project in May 2024, and it is expected to be complete in the fourth quarter of 2025.

Newberry Expansion
In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dts/day of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of existing Company owned propane community gas systems in Newberry was made in November 2023. The Florida PSC approved it in April 2024, and conversions of the community gas systems began in the second quarter of 2024.

East Coast Reinforcement Projects
In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024. Construction is projected to be complete in the first and second quarters of 2025 for Boynton Beach and New Smyrna Beach, respectively.

Central Florida Reinforcement Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system around the Plant City and Lake Mattie areas of Florida with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024. Completion of the projects is projected for the fourth quarter of 2024 for Plant City and the fourth quarter of 2025 for Lake Mattie.

17-17-17-17

Warwick

In July 2024, the Company announced plans to extend Eastern Shore's transmission deliverability by constructing an additional 4.4 miles of six inch steel pipeline. The project will reinforce the supply and growth for our Delaware division distribution system and expand natural gas service further into Maryland for anticipated future growth. The project is estimated to be in service during the fourth quarter of 2024.

Pioneer Supply Header Pipeline Project

In March 2024, Peninsula Pipeline filed a petition with the Florida PSC for its approval of Firm Transportation Service Agreements with both FCG and FPU for a project that will support greater supply growth of natural gas service in southeast Florida. The project consists of the transfer of a pipeline asset from FCG to Peninsula Pipeline. Peninsula Pipeline will proceed to provide transportation service to both FCG and FPU using the pipeline asset, which supports continued customer growth and system reinforcement of these distribution systems. The Florida PSC approved the petition in July 2024.

Renewable Natural Gas Supply Projects

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of Transportation Service Agreements with FCG for projects that will support the transportation of additional renewable energy supply to FCG. The projects, located in Florida's Brevard, Indian River and Miami-Dade counties, will bring renewable natural gas produced from local landfills into FCG's natural gas distribution system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian River County, and Miami-Dade County. Benefits of these projects include increased gas supply to serve expected FCG growth, strengthened system reliability and additional system flexibility. The Florida PSC approved the petition at its July 2024 meeting with the projects estimated to be completed in the first half of 2025.

Regulatory Initiatives

Maryland Natural Gas Rate Case

In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, the Company is seeking approval of the following: (i) permanent rate relief of approximately $6.9 million with a return on equity ("ROE") of 11.5 percent; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses which is anticipated to be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with the Company's new technology systems. In August 2024, the Maryland natural gas distribution businesses, the Maryland Office of Peoples' Counsel ("OPC") and PSC Staff reached a settlement agreement which provided for, among other things, an increase in annual base rates of $2.6 million. In September 2024, the Maryland Public Utility Judge issued an order approving the settlement agreement in part. The $2.6 million increase in annual base rates was approved and the Company will file a Phase II filing to determine rate design across the Maryland natural gas distribution businesses, consolidation of the applicable tariffs and recovery of technology costs. The outcome of the application is subject to review and approval by the Maryland PSC.

Maryland Natural Gas Depreciation Study
In January 2024, the Company's Maryland natural gas distribution businesses filed a joint petition for approval of its proposed unified depreciation rates with the Maryland PSC. A settlement agreement between the Company, PSC staff and the Maryland OPC Counsel was reached and the final order approving the settlement agreement went into effect in July 2024, with new depreciation rates effective as of January 1, 2023. The approved depreciation rates will result in an annual reduction in depreciation expense of approximately $1.2 million.

FCG SAFE Program
In April 2024, FCG filed a petition with the Florida PSC to more closely align the SAFE Program with FPU's GUARD program. Specifically, the requested modifications will enable FCG to accelerate remediation related to problematic pipe and facilities consisting of obsolete and exposed pipe. These modifications will require an estimated additional $50.0 million in capital expenditures associated with the SAFE Program, which would increase the total projected capital expenditures to approximately $255.0 million over a 10-year period. The Florida PSC approved the modifications in September 2024.

Delaware Natural Gas Rate Case
In August 2024, the Company's Delaware natural gas division filed an application for a natural gas rate case with the Delaware PSC. In connection with the application, the Company is seeking approval of the following: (i) permanent rate relief of approximately $12.1 million with a ROE of 11.5 percent; (ii) proposed changes to depreciation rates which were part of a depreciation study also submitted with the filing; and (iii) authorization to make certain changes to the existing tariffs. In September 2024, interim rates were approved by the Delaware PSC in the amount of $2.5 million on an annualized basis effective in October 2024. The discovery process has commenced and hearing for the proceeding has been scheduled for May 2025. The outcome of the application is subject to review and approval by the Delaware PSC.

FPU Electric Rate Case
In August 2024, the Company's Florida Electric division filed a petition with the Florida PSC seeking a general base rate increase of $12.6 million with a ROE of 11.3 percent based on a 2025 projected test year. The outcome of the application will be subject to review and approval by the Florida PSC. In October 2024, annualized interim rates of approximately $1.8 million were approved with an effective date of November 1, 2024.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

Weather was not a significant factor to adjusted gross margin in the third quarter of 2024 compared to the same period in 2023.

For the nine months ended September 30, 2024, higher consumption which includes the effects of colder weather conditions compared to the prior-year period resulted in a $1.2 million increase in adjusted gross margin. While temperatures through September 30, 2024 were colder than the prior-year period, they were approximately 13.2 percent and 13.1 percent warmer, respectively, compared to normal temperatures in our Delmarva and Ohio service territories.

19-19-19-19

The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the three and nine months ended September 30, 2024 and 2023.

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2024	**2023**	**Variance**	**2024**	**2023**	**Variance**

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula increased by approximately 3.9 percent for the three and nine months ended September 30, 2024 while our legacy Florida Natural Gas distribution business increased by approximately 3.9 percent and 3.7 percent, respectively, during the same periods.

The details of the adjusted gross margin increase are provided in the following table:

	Adjusted Gross Margin**			
	Three Months Ended September 30, 2024		Nine Months Ended September 30, 2024	
(in thousands)	**Delmarva Peninsula**	**Florida**	**Delmarva Peninsula**	**Florida**
Customer growth:				
Residential	$ 276	$ 470	$ 1,118	$ 1,997
Commercial and industrial	172	95	452	615
Total customer growth [1]	**$ 448**	**$ 565**	**$ 1,570**	**$ 2,612**

[1] Customer growth amounts for the legacy Florida operations include the effects of revised rates associated with the Company's natural gas base rate proceeding, but exclude the effects of FCG.

20-20-20-20

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $256.8 million for the nine months ended September 30, 2024. The following table shows a range of the forecasted 2024 capital expenditures by segment and by business line:

	2024	
(in thousands)	**Low**	**High**
Regulated Energy:		
Natural gas distribution	$ 160,000	$ 190,000
Natural gas transmission	75,000	90,000
Electric distribution	30,000	38,000
Total Regulated Energy	265,000	318,000
Unregulated Energy:		
Propane distribution	13,000	15,000
Energy transmission	5,000	6,000
Other unregulated energy	13,000	15,000
Total Unregulated Energy	31,000	36,000
Other:		
Corporate and other businesses	4,000	6,000
Total 2024 Forecasted Capital Expenditures	**$ 300,000**	**$ 360,000**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 49 percent as of September 30, 2024.

Chesapeake Utilities Corporation (CPK) Q4 2024 Earnings Conference Call February 27, 2025 8:30 AM ET

Company Participants

Lucia Dempsey - Head, IR
Jeff Householder - Chair, President and CEO
Beth Cooper - EVP, CFO, Treasurer and Assistant Corporate Secretary
Jim Moriarty - EVP, General Counsel and Corporate Secretary and Chief Policy and Risk Officer

Conference Call Participants

Chris Ellinghaus - Siebert Williams Shank
Dylan Lipner - Ladenburg

Operator

Good morning, everyone, and welcome to Chesapeake Utilities Corporation's Fourth Quarter and Full Year 2024 Earnings Conference Call. [Operator Instructions]

I would now like to turn the call over to Ms. Lucia Dempsey, Head of Investor Relations. Please go ahead, ma'am.

Lucia Dempsey

Thank you, and good morning, everyone. Today's presentation can be accessed on our website under the Investors page and Events and Presentations subsection. After our prepared remarks, we will open up the call for questions.

On Slide 2, we show our typical disclaimers, while I remind you that matters discussed on this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results.

The safe harbor for forward-looking statements section of our 2024 annual report on Form 10-K provides further information on the factors that could cause such statements to differ from our actual results. Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share, and the information presented today includes the appropriate disclosures in accordance with the SEC's Regulation G. A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation in our earnings release and in our 2024 annual report on Form 10-K. Here at Chesapeake Utilities, safety is our first priority.

We start all meetings with a safety moment, and we'll do so here with a moment on heart health, as highlighted on Slide 3. February is not quite over, and so it's still a great time to celebrate American Heart Month by refocusing on our heart and cardiovascular health.

Heart disease affects more than 1.5 million Americans and millions more around the world. However, there is so much we can do to improve our heart health, so we encourage you to take a step today and every day to strengthen your heart. The only side effects will be improved physical and mental health overall. I'll now introduce our presenters today.

Jeff Householder, Chair of the Board, President and Chief Executive Officer, will provide an update on the many ways we delivered with purpose throughout 2024, including executing on our core growth strategy. Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary, will discuss our full year financial results, strong balance sheet and dividend and earnings growth trajectory. And Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer, will review our active regulatory agenda, key project updates and summarize our community engagement work in 2024.

With that, it is my pleasure to turn the call over to Jeff.

Jeff Householder

Thank you, Lucia. Good morning, and thanks to all of you for joining our call today.

2024 was a pivotal year for Chesapeake Utilities. We were persistent in our mission to deliver energy that makes life better for the communities we serve, and we successfully positioned the company to be a much larger, more scalable enterprise. Our theme for this year's annual report, delivering with purpose reaching new heights isn't just a marketing phrase. It's an embodiment of how we operate each and every day at all levels across the company. So let me start by telling you how we delivered in 2024.

Turning to Slide 6. Adjusted diluted earnings per share for the fourth quarter was $1.63, bringing our full year 2024 EPS to $5.39 at the midpoint of our guidance range. This is a significant accomplishment in light of our efforts to integrate the SCG acquisition, warmer-than-normal temperatures, our decision to accelerate the return to our target capital structure and a delay in the finalization of our Maryland rate case.

As I'll go into more detail shortly, we invested $356 million of capital in 2024, which is a record level of capital investment and at the upper end of our annual guidance range of $300 million to $360 million and well on the way toward our 5-year capital forecast of $1.5 billion to $1.8 billion through 2028.

As Jim will discuss in more detail, we were very active on the regulatory front, including filing three rate cases, two depreciation studies, receiving approval for 12 projects filed with the Florida Public Service Commission and completing additional regulatory filings related to consolidating and expanding our infrastructure reliability and energy conservation programs.

We also implemented OneCX, our company-wide SAP customer billing system, rolled out a new safety data management system and made a number of organizational and process improvements related to our customer care, construction services, technology and risk management areas. And finally, as Beth will discuss later, we accelerated the return to our target capital structure and completed several key financings.

Starting on Slide 7. At this time a year ago, the company was embarking on its next phase of transformation. We had just completed the acquisition of Florida City Gas, a transaction that grew our asset base by nearly 50%. What excited us about this transaction was the ability to leverage our capabilities to meet the growing demand in FCG's markets and the need for additional natural gas supply in Southern Florida. One year later, I'm pleased to report the significant progress we've made. Our FCG operations contributed nearly $89 million in 2024 adjusted gross margin.

We filed and received approval for nine growth capital projects related to the FCG service area, and our investment in reliability improvements under the SAFE program generated $3.8 million in full year adjusted gross margin. Most importantly, 93% of FCG teammates that transitioned to Chesapeake Utilities are still with the company today, which I hope indicates their satisfaction with the transition and integration efforts and a recognition of the commitment we made to continue to invest in the FCG system.

In many companies, integrating such a large acquisition would have been the only major priority for the year. At Chesapeake Utilities, this acquisition launched our strategic intentions for 2024, integrate FCG operationally as well as culturally and move forward as one company to sustain top quartile performance by advancing the three pillars of our core business strategy one, prudently allocate capital; two, proactively manage our regulatory strategy; and three, continually transform our business operations, as shown on Slide 8.

On Slide 9, let me start with the foundation that underlies our core business strategy, operational excellence in our high-growth service areas. You've likely heard us say that we are the beneficiaries of our geography. This is a privilege that we take very seriously as our customers rely on us to operate safely, fuel their homes and power their businesses every single day.

Throughout 2024, we continue to see rapid growth across our regulated businesses. In Delmarva, we added over 4,000 new customers, driving residential growth by 4% and commercial growth by 1.6% over 2023 levels. We continue to see population growth in Delaware and Maryland as new communities are developed to serve demand from retirees and families looking for additional space while remaining close to the metro areas of Philadelphia, Baltimore and Washington, D.C.

In Florida, the story is largely the same. Above-average customer growth and demand for natural gas enabled us to expand distribution service in our existing areas and invest in our newly acquired FCG service areas. Across the state, we added 6,700 new customers, driving residential and commercial growth of 3.9% and 1.2%, respectively. Florida continues to lead the nation in population growth. In 2024, Florida was number one for net in-migration and new resident net income growth, which drives demand for new communities across the state.

Throughout 2024, we saw growth in many areas of Florida served by our distribution system. We've also completed the next phase of expansion in Newbury and broke ground on projects in St. Cloud, Lake Wales, Lake [Mattie], Plant City, New Smyrna Beach and Boynton Beach.

This organic growth is the core driver of our record level of capital investment in 2024, as shown on Slide 10. As I mentioned earlier, we invested $356 million of capital throughout 2024. Approximately 90% of that was spent on our regulated businesses as we invested in our Florida and Delmarva transmission and distribution systems and upgraded technology across the enterprise.

Our regulated capital spend included $83 million of investment in the GUARD, SAFE and SPP infrastructure reliability programs to upgrade and strengthen our system, enabling us to maintain safe and consistent energy delivery. These programs operate under approved regulatory mechanisms that provide for immediate recovery for investments, driving a 2024 adjusted gross margin contribution of nearly $9 million. Our accelerated capital deployment throughout 2024 and continued customer and demand growth have set us up for an increased level of capital spend in 2025.

As shown on Slide 11, we are initiating 2025 capital expenditure guidance of $325 million to $375 million, driven primarily by investments in our natural gas transmission and distribution businesses.

As you can see on Slide 12, construction continues on a number of transportation infrastructure projects to serve new communities across our service areas. There are two project updates I'd like to highlight specifically. In January, we were pleased to receive FERC approval for our $80 million Worcester Resiliency upgrade LNG storage project. Later on this call, Jim will provide additional detail on our construction progress. And in February, we received approval from the Florida Public Service Commission for our Miami Interloop series of projects filed late last year.

Totaling approximately $40 million, these transportation projects will expand natural gas infrastructure and support future growth across FCG's distribution system in Miami. The investments underway will be a meaningful contributor to our 2025 performance, generating at least $22 million of incremental margin in 2025.

Given this increasing level of capital, we are reaffirming our 5-year capital investment plan of $1.5 billion to $1.8 billion, as shown on Slide 13. With the addition of the Miami Interloop projects, we have now identified at least $1.4 billion of this total. And of this amount, more than 70% requires no additional regulatory approval.

Before I turn the call over to Beth, I'd like to give an update on our business transformation efforts as shown on Slide 14. This third pillar in our growth strategy ensures that we are positioning the company to operate effectively as we rapidly scale. The acquisition of FCG and the implementation of our OneCX customer billing system in 2024 provided us an opportunity to assess our internal organizational structures and identify improvement opportunities to better operate under our One Company approach. This resulted in the consolidation, centralization and standardization of a number of functions, including customer care, construction services, enterprise health and safety and business information systems. However, this is just the beginning.

Looking ahead to 2025, we have a number of initiatives underway to continue this transformational work. We are preparing to transition our FCG operations to the new SAP customer billing system, which has also driven a number of related process standardization efforts. We're also in the early stages of assessing an enterprise resource planning or ERP implementation, which represents a multiyear overhaul of a number of cross-functional systems, including accounting, finance, procurement, asset management and human resources, among others.

We're also strengthening our technology systems and security through investments in operational programs, artificial intelligence and cybersecurity. We will continue empowering our teammates to identify and implement operational changes that improve the accuracy, efficiency and effectiveness of their work, ensuring seamless operations, whether we are a $3 billion or a $6 billion company.

With that, I'll now turn the call to Beth to discuss our financial results in more detail.

Beth Cooper

Thanks, Jeff, and good morning, everyone.

Our full year results, as shown on Slide 15, demonstrate exceptional operational and financial performance. 2024 adjusted gross margin was $567 million, up 25% from 2023, driven by the addition of Florida City Gas, infrastructure expansions and replacements, distribution growth and our unregulated business portfolio's performance.

This strong margin growth, coupled with operational efficiencies drove significant growth in adjusted net income, up 24% to approximately $122 million for full year 2024. With this performance, we were pleased to generate full year adjusted earnings per share of $5.39, up $0.08 over full year 2023 and in line with expectations.

As Jeff touched on, this is such a significant accomplishment. Undertaking the transaction in the midst of a higher interest rate environment and pressure on utility valuations and then delivering squarely in the middle of the guidance range despite the factors that Jeff mentioned is truly a testament to the conviction of our team to deliver.

I'll now turn to Slide 16 and highlight some of the key drivers of our full year 2024 adjusted diluted EPS. Florida City Gas generated a gross margin contribution of $2.88 per share with the first full year as a member of the Chesapeake family. Our regulated operations generated $0.61 of incremental EPS for the year, and our unregulated operations generated an additional $0.19 per share.

Increased operating expenses partially offset this margin growth by $1.52 per share. These expense increases were driven by the addition of Florida City Gas, higher insurance, facilities and vehicle expense, increased depreciation and amortization and the absence of a onetime state tax benefit recorded in 2023. We also incurred increased interest expense of $1.15 per share and $0.96 per share of dilution due to increased shares outstanding driven by the financing of the Florida City Gas acquisition and accelerating toward our target capital structure.

Moving to Slide 17, I'll provide additional detail on our regulated business performance. Adjusted gross margin for our Regulated Energy segment was approximately $439 million in 2024, up $106 million or 32% from full year 2023.

Excluding transaction and transition costs related to Florida City Gas, operating income also grew substantially, up 47% to $200 million. This growth included strong earnings contribution from Florida City Gas, incremental margin from reliability infrastructure investments, organic growth in our natural gas distribution operations, incremental margin from transmission service expansions and increases related to regulatory mechanisms and rate cases, including interim rates for Delaware and FPU Electric.

As shown on Slide 18, our Unregulated Energy segment also delivered exceptional growth relative to full year 2023 with adjusted gross margin up 6% to approximately $128 million and operating income up 30% to $32 million. Growing demand for our Marlin Virtual Pipeline services drove $4.5 million of higher adjusted gross margin, while our Sharp propane retail operations drove an additional $2.5 million also in terms of adjusted gross margin.

I'll now shift to Slide 19 to review our capital structure and financing plan. Throughout 2024, we maintained a strong balance sheet, adequate liquidity and access to competitively priced capital while accelerating our return to our capital structure and preparing the business for increasing levels of capital investment.

Our liquidity remains strong with total available liquidity of $505 million at the end of 2024, and we ended the year with an equity to total capitalization ratio of 48.4%, up from 47% at the end of 2023. Throughout the year, we issued over $81 million in equity, primarily via our existing equity programs, including the dividend reinvestment and direct stock purchase plan.

We also established a $100 million at-the-market equity issuance in the fourth quarter to provide cost-effective equity issuance optionality in 2025 and 2026. You will see us drive to 50% equity to total capitalization by the end of this year while reaffirming our 2025 EPS guidance range.

On the long-term debt side, we successfully consummated a $100 million long-term debt placement at a 5.2% coupon in the latter part of 2024. Finally, we have previously committed to pursue a credit rating, and we have made substantial progress, and we look forward to providing additional updates in the coming weeks. All of these efforts, along with our three pronged financing strategy to successfully finance our future growth and to ensure that we can capitalize on the capital investments inherent in our guidance.

Slide 20 shows our strong history of consistent dividend growth of approximately 9%. Our dividend is a key component of our balanced capital allocation strategy and our current target payout ratio is designed to return value to shareholders while also allowing for earnings reinvestment to fund future growth capital investment.

2024 is certainly indicative of this strategy. Annual dividend growth of 8.5% while reinvesting approximately 55% of our earnings back into the company. We are fortunate that our dividend strategy is not an either/or, but a both proposition. We can grow the dividend and also reinvest significant earnings back into the company, enabling our investors to benefit from both the long-term top quartile earnings and dividend growth.

Speaking of earnings growth, Slide 21 demonstrates our consistent earnings per share performance with our 2028 EPS guidance range, reflecting a 10-year CAGR of approximately 8.5%.

Our 2024 performance again was in line with expectations, and we are pleased to continue reaffirming our 2025 guidance of $6.15 to $6.35 per share indicating a 16% 1-year EPS growth rate based on the guidance midpoint. This is twice as high as the top growth rates currently reflected in the industry. We recognize this is a significant opportunity to demonstrate our ability to execute on our targets and advance our growth strategy.

With that, it's my pleasure to turn the call over to Jim.

Jim Moriarty

Thank you, Beth, and good morning, everyone.

As Jeff discussed earlier, a proactive regulatory agenda is our second fundamental growth driver, and I would like to share several updates in this area, as shown on Slide 22. For our Maryland jurisdiction, in September 2024, we received approval for a $2.6 million revenue increase.

In November of 2024, we filed a Phase 2 proceeding to determine a schedule for incorporating this increase into customer rates and a hearing will be held next month. Last August, we filed a rate case in our Delaware jurisdiction, proposing a $12.1 million rate increase and an ROE of 11.5%.

We subsequently received interim rate relief of $2.5 million, which was effective in October of last year. On Monday, February 24, we filed a second interim rate increase for $8.3 million, while we continue to work on resolving the rate proceeding. The hearing is currently scheduled for May. We also filed a rate case for our Florida electric operations last August proposing a $12.6 million rate increase and an 11.3% ROE. Interim rates of $1.8 million were approved and went into effect November 1, 2024.

Last week, we received an initial recommendation from the Florida PSC staff indicating a $9.9 million increase in rates, which is subject to PSC commission review and approval. And finally, earlier this week, we filed an updated depreciation study for Florida City Gas, requesting approval of revised annual depreciation rates as well as a reduction related to a reserve imbalance that would be amortized over a 2-year period. This filing reflects our transition to a typical strategy for depreciation expense.

Slide 23 provides an update on our Eastern Shore Worcester Resiliency upgrade, an $80 million liquefied natural gas storage project designed to support growth and resiliency at the southern end of our Delmarva system. As Jeff mentioned, we were pleased to receive FERC approval of the project in January of this year, enabling us to remain on track with our construction schedule.

The storage tanks are complete and are currently on their way for delivery to our service area. We continue to expect the project to be in service in the third quarter of 2025, just in time for next year's winter peak.

Turning now to Slide 24. I would like to provide a recap on our community engagement efforts throughout 2024. I am continually impressed with the dedication of our teammates who shared their time and talents across nearly 7,000 hours of volunteerism during the year.

As a company, we also provided $575,000 in charitable donations and community sponsorships to over 75 organizations within our four focus areas of giving safety and health, community development, education and environmental stewardship. Delivering excellence for all stakeholders is the foundation for long-term growth and success, enabling us to continue serving our customers and driving value for our stakeholders for years to come so that no one is left behind.

With that, I will turn the call to Jeff for concluding remarks.

Jeff Householder

Thanks, Jim. 2024 has been an exciting turning point for the company, and I believe we've successfully demonstrated our ability to integrate the meaningful acquisition of Florida City Gas, deliver on our 2024 EPS and capital guidance ranges and position the company to achieve the significant growth embedded in our 2025 EPS guidance and through significant capital investment, proactive regulatory initiatives and continued business transformation initiatives put us on the path to achieve our longer-term capital and EPS targets.

As I mentioned at the start of this call, our theme for the year is delivering with purpose, reaching new heights. We have an exciting year ahead of us, new goals to meet, including at least 14% adjusted EPS growth and new opportunities to explore. We'll be reaching new heights in 2025, and I look forward to updating you on our progress throughout the year and sharing our successes a year from now.

With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

Thank you. [Operator Instructions]. We'll go first this morning to Chris Ellinghaus at Siebert Williams Shank. Chris, please go ahead.

Chris Ellinghaus

Hi, good morning, everybody.

Beth Cooper

Good morning.

Chris Ellinghaus

Jeff, all the executive orders that have been coming out, particularly things like tariffs, and just energy policy in general, have you got any thoughts on what you've seen? And does it change anything in terms of your strategic thinking?

Jeff Householder

Good morning. It doesn't. We - as you might imagine, have been actively reviewing and trying to understand what those executive orders are doing. We're generally encouraged on one hand that we're going to be able to put projects into service, hopefully, a little quicker than we might have otherwise anticipated. We'll see if that actually happens.

It's certainly a little bit chaotic at this point, trying to think your way through what is occurring there. But we've got lots of people that are on top of that, including Jim Moriarty, who's been following all of those for us fairly closely. So Jim, you might want to jump in here.

Jim Moriarty

Yes, good morning, Chris. I think what I would say is that the tone and content of the executive orders are very favorable to the industry, energy generally, natural gas specifically. And so, we see a lot of opportunity there. I think there's an attempt to rebalance power between the executive branch, the legislative branch and the federal agencies. We've been able to work with everybody, and we take seriously our responsibilities, to each of those agencies and our elected members. So, we see it overall as positive.

Jeff Householder

Just to cap that off, I mean, our strategy has not changed. We're trying to deploy capital and pretty effectively doing that, frankly, see a lot of opportunities in the future to continue to do that. We have a very proactive regulatory agenda, as we mentioned earlier, and we've been very successful along those lines, and we continue to transform the company to make sure that our administrative capabilities keep pace with the growth.

And so, not to sound like a broken record, but it's kind of those three things that we're focused on. And at this point, nothing in the executive orders, or what we see coming down the road today, is going to keep us from doing any of those things.

Chris Ellinghaus

Okay. Jeff, you're a Florida expert. What - do you have any thoughts about the Florida Supreme Court oral argument from December?

Jeff Householder

On the RSAM issue?

Chris Ellinghaus

Yes.

Jeff Householder

Yes. Sure. I have all kinds of thoughts on that. I will tell you, though, that they I don't believe are going to be particularly instructive for us moving forward. The RSAM was an interesting mechanism. We filed a day or two ago a sort of a typical depreciation study for Florida City Gas, and asked for a little bit of an accelerated treatment on the excess depreciation, which would, in fact, deal with that additional $25 million, or $26 million that was left over when the first tranche of RSAM was completed.

And so RSAM for us, we completed the initial tranche of RSAM in 2024, the piece that City Gas had in place as part of the NextEra rate case that they did. And we've moved on to a more traditional depreciation study, which we find compelling for us in many ways. And I think the commission will find the same way. And so again, it accelerates what normally is kind of a 5-year depreciation of that excess depreciation amount to 2 years.

Which would be a great thing for us if we can get it, and we believe that we'll be successful there. So - I'm not to be flipping about the Supreme Court notion. And Jim, I don't you may want to weigh in on that as well.

Jim Moriarty

Yes. I mean I think the court is seriously looking at the statute, and what the agency did and the support that was in the four corners of the decision. So I think if the commission were - I'm sorry, the court were to remand it, it would probably be to allow the commission another opportunity to address the issue, which we've kind of done here going forward now.

Chris Ellinghaus

Okay. Jim, let me ask you another question. With the FERC decision on the LNG project, they had the error. And they - once you had filed for clarification, they corrected that very quickly. But it seemed like it took a long time for you to make that filing, which seemed kind of peculiar to me. Is there a reason for that?

Jim Moriarty

No. I think if you look at the calendar, we read the decision carefully when we got it, and then almost immediately filed for that clarification. We also were weighing the pending rehearing period, which, as you know, is 30 days from the decision, and we're gratified that no rehearings or protests were filed. So we're now in the next phase, but we're very thankful to the commission for issuing the decision.

Chris Ellinghaus

Okay. And one last thing. Beth, can you sort of give us some color on weather for the quarter, and how that influenced results?

Beth Cooper

In terms of coming up for the fourth quarter, and how that impacted results overall?

Chris Ellinghaus

Yes. I mean, I was particularly thinking about propane, because it was kind of a relatively mild quarter. So I just wanted to get your thoughts?

Beth Cooper

Sure. It was, Chris, as we started the quarter. I will tell you that as we ended up getting closer to the end of the year, there was a little bit more favorable weather, from a propane standpoint that positively impacted us. So not certainly as much as we've seen as we're coming into the first quarter here, but there was the last two weeks of December, we're favorable in that regard.

Chris Ellinghaus

Okay. Thank you, guys. Appreciate the color.

Beth Cooper

Thank you for your questions, Chris. Appreciate it.

Operator

Thank you. We'll go next now to Dylan Lipner of Ladenburg.

Beth Cooper

Good morning, Dylan.

Dylan Lipner

Hi, good morning. Congrats on a great quarter. All my questions were answered. I thought I hung up on it, but look forward to speaking to you guys soon.

Beth Cooper

Sounds great. Thank you, Dylan.

Jeff Householder

Thank you, Dylan.

Operator

Thank you. [Operator Instructions]. And ladies and gentlemen, I have no further questions coming in this morning. Mr. Householder, I'd like to turn the conference back to you, sir, for any closing comments.

Jeff Householder

Thank you, and thank all of you for joining our call this morning, and we certainly look forward to seeing many of you at our Investor Day that's coming up in a couple of weeks down in Cape Canaveral. We'll try to showcase, certainly things that are going on across the company, but there's a lot happening in Florida these days. And so, we'll be able to talk about that in more detail. Thanks again, and goodbye.

Operator

Thank you, Mr. Householder. Again, ladies and gentlemen, this does conclude Chesapeake Utilities Corporation's fourth quarter and full year 2024 earnings call. Again, thanks so much for joining us, everyone, and we wish you all a great day. Goodbye.

Fourth Quarter & Full-Year 2024

Earnings Call Presentation

CHESAPEAKE UTILITIES CORPORATION

February 27, 2025

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward-looking statements may be identified by the use of words, such as "project," "believe," "expect," "anticipate," "intend," "plan," "estimate," "continue," "potential," "forecast" or other similar words, or future or conditional verbs such as "may," "will," "should," "would" or "could." These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities Annual Report on Form 10-K for the year ended December 31, 2024 filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share ("EPS*"). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

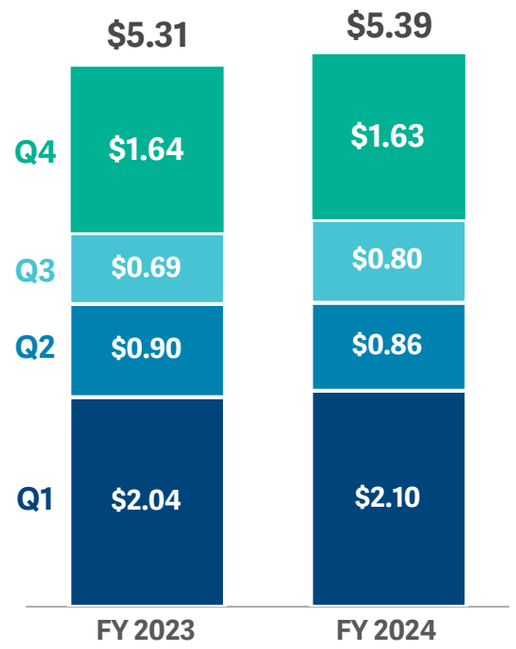
Strong Full-Year 2024 Financial Performance

Adjusted Diluted EPS[1]



Key Financial Highlights

FY 2024 Results

- Adjusted Gross Margin: $567.4M, up 25% from FY 2023
- Adjusted Net Income: $121.5M, up 24% from FY 2023
- Adjusted Diluted EPS: $5.39, up $0.08 from FY 2023

Q4 2024 Results

- Adjusted Gross Margin: $154.2M, up 18% from Q4 2023
- Adjusted Net Income: $37.3M, up 13% from Q4 2023
- Adjusted Diluted EPS: $1.63, in line with Q4 2023 results

- **Achieved the midpoint of our 2024 Adjusted EPS Guidance**
- **Invested at the high end of our 2024 CapEx Guidance**

[1] *Adjusted Diluted Earnings Per Share from Continuing Operations; 2024 excludes transaction / transition-related costs associated with the FCG acquisition.*

Delivering With Purpose in 2024

- Achieved **Adj. Diluted EPS of $5.39**, at the midpoint of our 2024 Adj. EPS Guidance
- Invested **$356M of capital**, at the top end of our 2024 capital guidance range
- Integrated the **Florida City Gas acquisition,** generating a meaningful contribution within the first year
- Added nearly **11,000 new customers**
- Filed and received approval for **13 new capital projects**
- Filed **8 substantial regulatory filings**, including three rate cases and two depreciation studies
- **Implemented 1CX**: SAP Customer Billing System to consolidate regulated operations onto one platform
- Accelerated the return to our **target capital structure** and strengthened our balance sheet

Jeff Householder greets teammates at the 1CX Celebration Event in DE

Florida City Gas: One Year Later

- December 2024 marked the 1-year anniversary of bringing Florida City Gas into the Chesapeake Utilities family
- FCG has made significant contributions to the Company and will continue to drive substantial growth
- FCG teammates consistently report feeling welcomed and valuable, and already see an increased level of engagement and investment

$88.6M 2024 FY Margin Contribution from FCG	**$3.8M** FY 2024 Adjusted Gross Margin from SAFE Program Investment	**$2.81 per share** 2024 FY FCG Adjusted Gross Margin[1]	**93%** 1-Year FCG Employee Retention
9 FCG / PPC Projects Filed & Approved since Acquisition	**$97M** 2024 FCG Capital Investment	**$37M** 2024 Infrastructure Investment in FCG's SAFE Program	**$50M** Approved increase in FCG's SAFE Program[1]

[1] *Reflects increase in approved capital investment for FCG's SAFE Program, from $205 million to $255 million over 10 years.*

- **Filed 13 projects for approval**
  - 11 approved in 2024
  - 2 approved in Q1 2025
- **Major projects drove incremental margin of $9.2 million**
- **5 projects with full-year margin contribution**
  - Southern Expansion
  - North Ocean City Connector
  - Beachside Expansion
  - St. Cloud / Twin Lakes
  - Lake Wales

Initiating 2025 Capital Expenditure Guidance of $325M - $375M

2025 Capital Investment Target Ranges

$ in millions

	Low	High
Natural Gas Distribution	$135	$155
Natural Gas Transmission	$135	$145
Electric Distribution	$35	$45
Propane Distribution	$12	$15
Energy Transmission	$5	$10
Other Unregulated	$2	$3
Corporate Capex	$1	$2
	$325	**$375**

2025 Capital Project Highlights

- **GUARD / SAFE / SPP / Capital Surcharge**
  Infrastructure Reliability Investment
  In-Service Dates throughout 2025
- **Worcester Resiliency Upgrade**
  LNG Storage in Maryland
  Target in Service: Q3 2025
- **Miami Inner Loop**
  System expansion in South Florida
  Target in Service: Q3-Q4 2025
- **Multiple PPC Projects**
  Expansion projects in Florida

Organic Growth Driving Delmarva & Florida Investments

Business Transformation: 2024 Successes and 2025 Opportunities

2024 Transformational Activity

Drivers of consolidation, centralization and standardization:

- "One Company" approach
- 1CX Implementation
- FCG integration
- Cross-functional reorganizations within Customer Care, Construction Services, Enterprise Health & Safety, and Business Information Systems

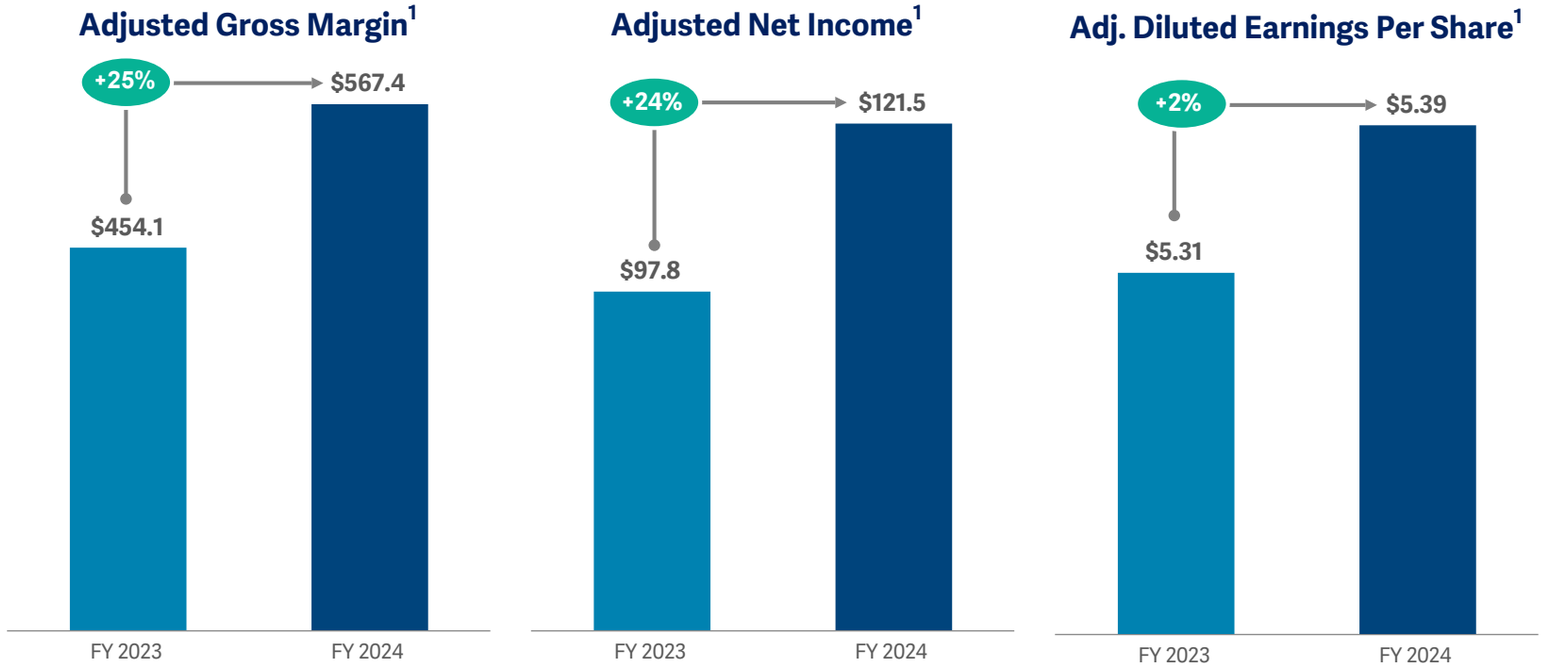
2025 Transformational Goals

- 1CX implementation for FCG
- Launching a multi-year ERP transformation
- Technology upgrades
  - Operational programs, artificial intelligence and cyber security

Delmarva-based teammates and their families gathered to support the Habitat for Humanity of Central Delaware "Framing Frenzy" event, demonstrating that teamwork, process improvement and collaboration deliver exceptional results.

Record Levels of Financial Performance Metrics

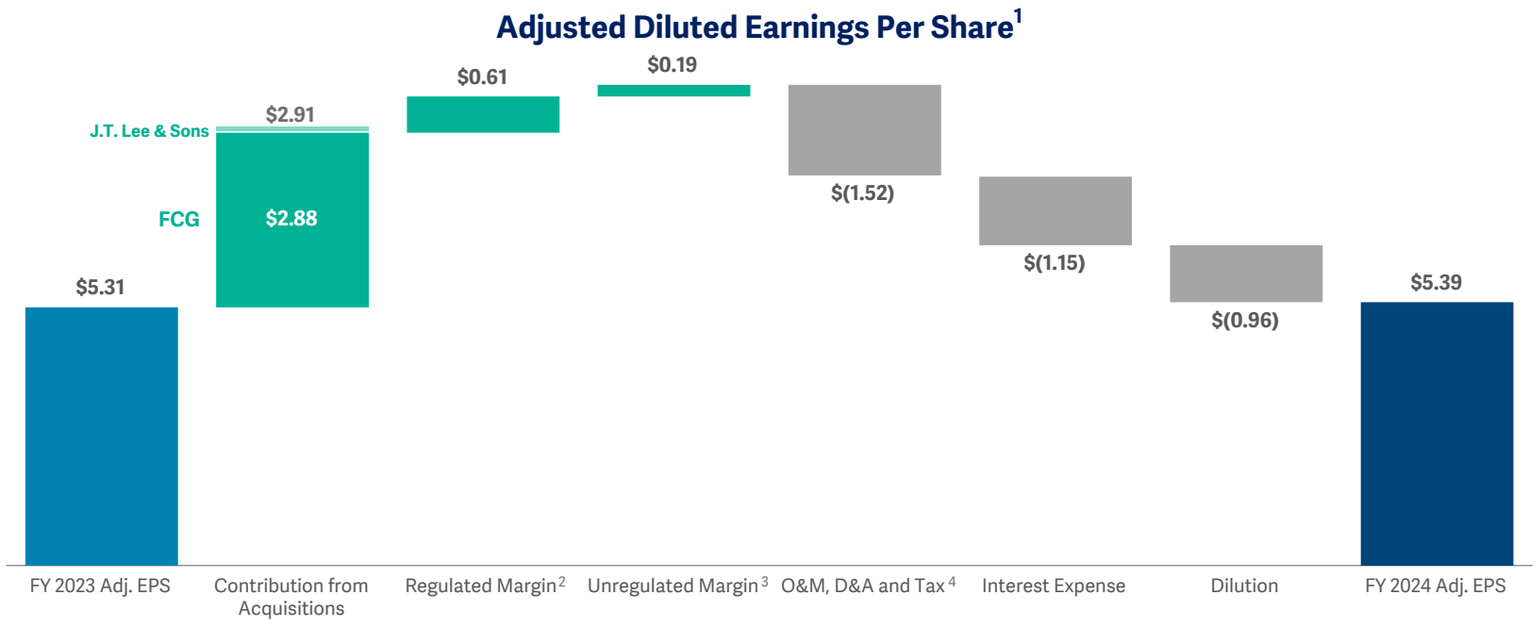
Strong gross margin growth and effective expense management drives $0.08 increase in 2024 Adj. Diluted EPS



[1] *See appendix for a reconciliation of non-GAAP metrics.* [2] *Transaction and transition-related expenses represent costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transaction costs, transition services, consulting, system integration, rebranding and legal fees.*

Key Drivers of Performance – 12 Months Ended December 31, 2024

Successful integration of FCG and contributions across all business units allowed for record performance.

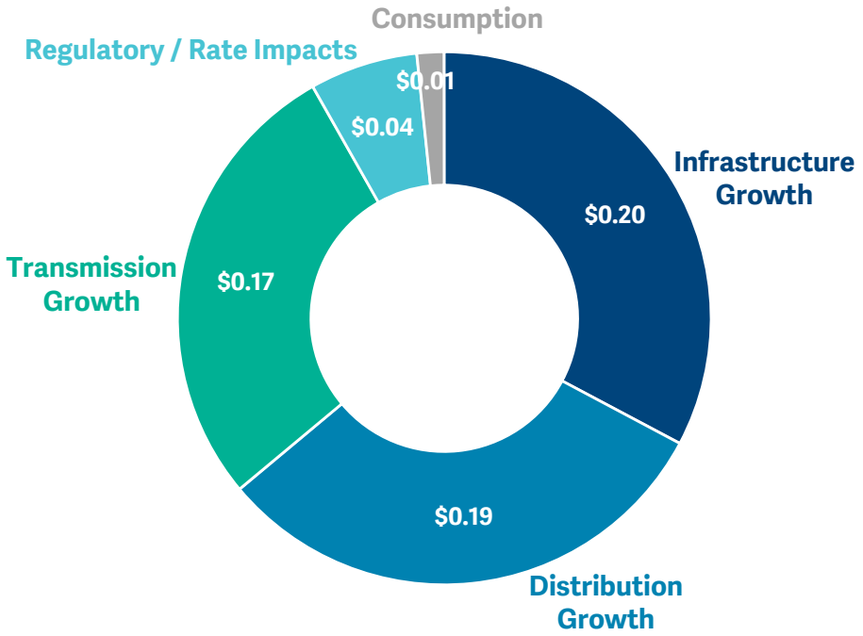


[1] *See appendix for GAAP to non-GAAP reconciliation for adjusted diluted earnings per share.*
[2] *Includes natural gas transmission, distribution and infrastructure growth and regulatory rate changes.*
[3] *Primarily includes increased demand for virtual pipeline services and improved Aspire performance.*
[4] *Includes the absence of 2023 tax rate benefits and increased insurance, facilities and vehicle expense, partially offset by lower payroll / benefits expense.*

32% Growth in Regulated Adjusted Gross Margin

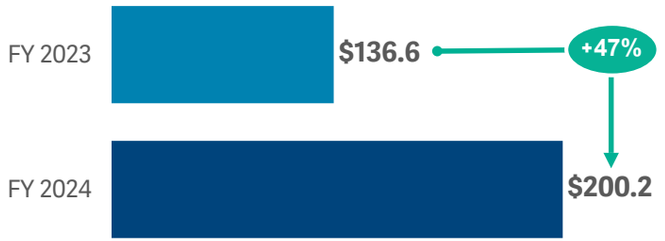
Capital deployment, regulatory agenda and business transformation drive 32% increase in Adj. Gross Margin

Drivers of Regulated Adj. EPS Growth



Adjusted Gross Margin[1]

Operating Income[2]



[1] Dollars in millions. See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin.
[2] Dollars in millions. Excludes transaction and transition related expenses.

Unregulated Operating Income Growth of 30%

Growth in Marlin Virtual Pipeline Services Drives $0.15 of Incremental Adjusted EPS

- **$4.5 million**: Increased demand for virtual pipeline services via our Marlin Gas Services subsidiary
- **$2.5 million:** Contribution from JT Lee and Sons acquisition and increased propane results

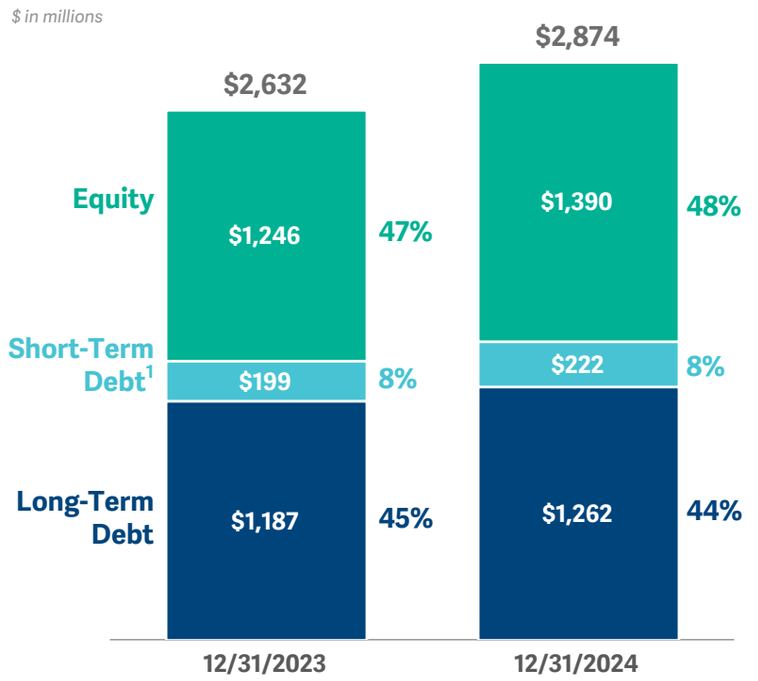
Adjusted Gross Margin[1]

Operating Income

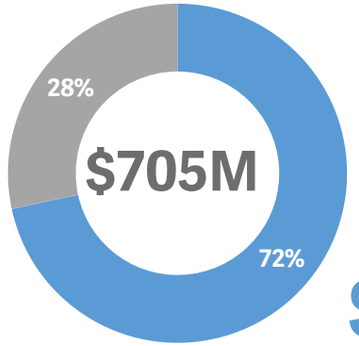
[1] *Dollars in millions. See appendix for GAAP to non-GAAP reconciliation of adjusted gross margin.*

Strong Balance Sheet Supports Growth Plan

Total Capitalization



Total Liquidity[2]



Total available liquidity of

$505M

2024 Equity & Debt Issuances

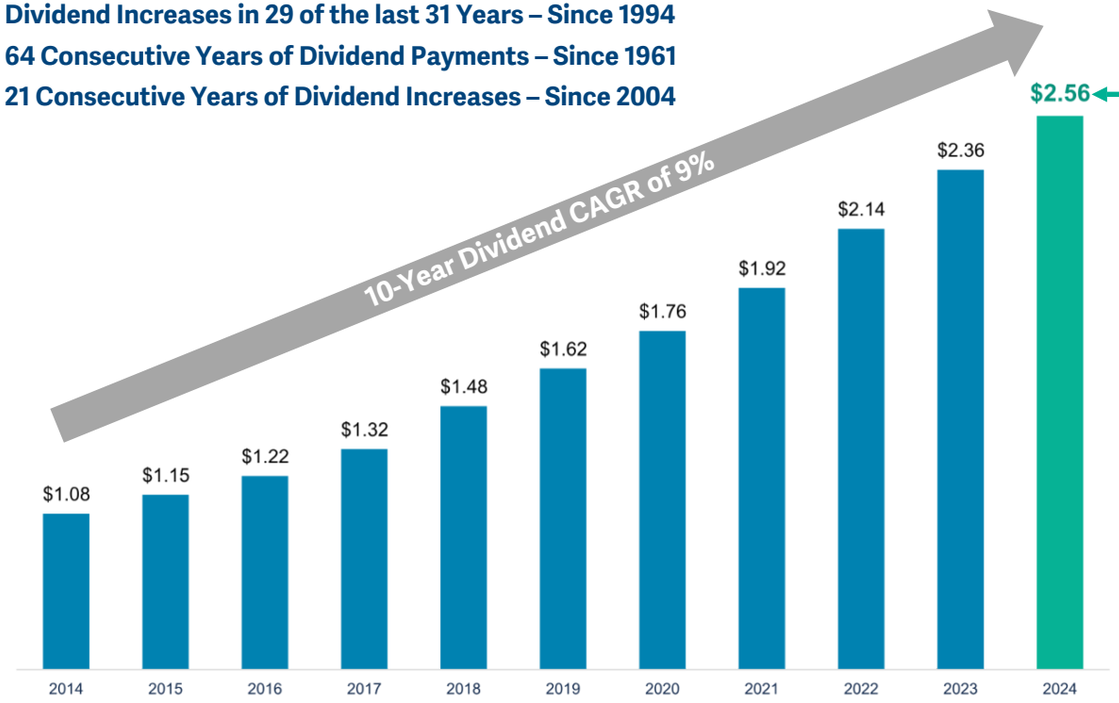
- **$81.4M** equity issued through various plans in 2024
- **22.9M** shares outstanding as of **2/24/2025**
- **$100M** of **5-Yr 5.20% Senior Notes** issued in November 2024

[1] *Short-term debt for both periods includes short-term borrowing as well as the current portion of long-term debt.*
[2] *Total liquidity includes the upsized $450M Revolver and $255M of Private Placement Shelf Agreements.*

Three Decades of Dividend Growth Drive Shareholder Return

Annualized Dividend per Share

Dividend Increases in 29 of the last 31 Years – Since 1994
64 Consecutive Years of Dividend Payments – Since 1961
21 Consecutive Years of Dividend Increases – Since 2004



Increase of 8.5%

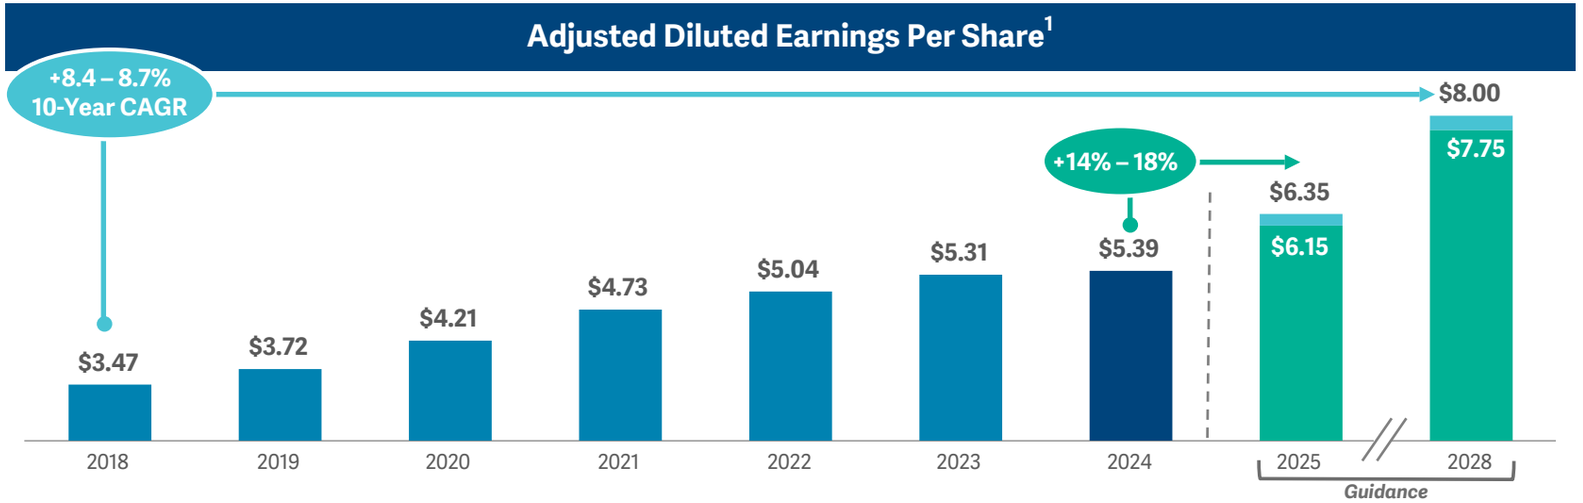
12%+ Compounded Annual Shareholder Return over 10 years[1]

Low Dividend Payout Ratio

enables CPK to reinvest to support growth plan

[1] *Calculated through 12/31/2024.*

Driving Increased Shareholder Value; Reaffirming Earnings Guidance



Earnings Growth Driven by Capital Investment...

- **2024 Adjusted Earnings Per Share of $5.39[1]**
- 2025 Adj. EPS Guidance of $6.15 to $6.35
- 2028 Adj. EPS Guidance of $7.75 to $8.00

... Leading to Best in Class Shareholder Return

- Annual shareholder return >75th percentile among peer group[2] the past 1, 10, 15 & 20 year periods
- >300% increase in stock price over the past 15 years

[1] *Adjusted EPS excludes transaction and transition-related expenses incurred attributable to the acquisition of FCG.*
[2] *Peer Group includes select group of 10 CPK peer companies. Details can be found in the Annual Report on Form 10-K.*

Advancing a Proactive Rate Case and Regulatory Agenda

Active Regulatory Filings	Docket #	Status

Why Chesapeake Utilities?

CPK's unique combination of operational expertise, growth potential and consistent delivery of long-term shareholder return connects our strong historical track record with our future success.

Expertise

Nimble, yet powerful, organization with an experienced management team that gets things done

→ Innovative & diligent team focused on operational execution, business transformation, & delivering results

Growth

Attractive & diversified geographical exposure, with multiple sources of organic & acquisitive growth

→ Expected to spend $1.5 - $1.8 billion in Capital Expenditures from 2024 - 2028 and deliver an 8% EPS CAGR and $7.75 - $8.00 per share in 2028

Return

Focused on best-in-class shareholder return, balancing earnings growth and dividend growth

→ Strong dividend growth while significantly reinvesting earnings for long-term growth

CHESAPEAKE UTILITIES CORPORATION REPORTS FISCAL YEAR 2024 RESULTS

- **Net income and earnings per share ("EPS")* were $118.6 million and $5.26, respectively, for the full year 2024, and $36.7 million and $1.60, respectively, for the fourth quarter of 2024**
- **Adjusted net income and Adjusted EPS**, which exclude transaction and transition-related expenses attributable to the acquisition of Florida City Gas ("FCG"), were $121.5 million and $5.39, respectively, for the full year 2024, and $37.3 million and $1.63, respectively, for the fourth quarter of 2024**
- **Adjusted gross margin** increased by $113.3 million during the year driven by contributions from FCG, regulatory initiatives and infrastructure programs, natural gas organic growth, continued pipeline expansion projects, and increased demand for virtual pipeline services**
- **Achieved earnings guidance while accelerating return to target capital structure range; equity to total capitalization reaches 48.4 percent at December 31, 2024**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the year and the fourth quarter ended December 31, 2024.

For 2024, net income was $118.6 million ($5.26 per share) compared to $87.2 million ($4.73 per share) in 2023. Excluding transaction and transition-related expenses related to the acquisition of FCG, adjusted net income** was $121.5 million ($5.39 per share) compared to $97.8 million ($5.31 per share) in 2023.

The increase in 2024 earnings was driven by incremental contributions from FCG, additional margin from regulatory initiatives and infrastructure programs, growth in the Company's natural gas distribution businesses, continued pipeline expansion projects to support distribution growth, and increased virtual pipeline services. The financing impacts of the FCG acquisition, including increased interest expense related to debt issued and additional shares outstanding, partially offset the increases.

In the fourth quarter of 2024, the Company's net income was $36.7 million ($1.60 per share) compared to $25.3 million ($1.26 per share) during the prior-year period. Excluding the transaction and transition-related expenses, adjusted net income was $37.3 million ($1.63 per share) compared to $33.0 million ($1.64 per share) reported in the fourth quarter of 2023.

Earnings for the fourth quarter of 2024 were primarily impacted by the factors discussed for the full year.

"2024 has been a transformational year for Chesapeake Utilities – we started the year focused on integrating Florida City Gas and ended the year with substantial progress toward capitalizing on this acquisition as well as expanding opportunities in our legacy operations. We've made significant progress this year, including investing in our new and existing service areas, collaborating with our regulators and ensuring continuous business improvement to meet the needs of our customers and our growing organization," said Jeff Householder, the Company's Chair of the Board, President and Chief Executive Officer.

"In spite of accelerating the return to our target capital structure range and weather that continued to be warmer than normal, we achieved our earnings and capital guidance ranges and generated a top quartile annual shareholder return of 17 percent in 2024; since initiating guidance in 2018, we have consistently met or beat our guidance ranges while significantly growing the Company. This is a testament to our team's persistent focus on delivering top-quartile performance and growth," continued Householder. "Given this performance, I cannot envision a better start to our next phase of growth as we continue to set high expectations for ourselves and remain focused on meeting our promises, delivering with purpose and reaching new heights."

Capital Investment and Earnings Guidance

The Company's performance for 2024 was in line with its previously announced EPS guidance range of $5.33 to $5.45 per share. Additionally, the Company's 2024 capital expenditures totaled $356 million, near the top end of the 2024 capital guidance range of $300 million to $360 million.

The Company continues to re-affirm its 2025 EPS guidance range of $6.15 to $6.35 per share, as well as the 2028 EPS guidance range of $7.75 to $8.00 per share. The 2028 guidance implies an annual EPS growth rate of approximately 8 percent from the 2025 EPS guidance, or since 2018, an 8.5 percent growth rate.

These earnings projections are based upon the Company's previously introduced capital expenditure guidance for the five-year period ended 2028 of $1.5 billion to $1.8 billion. The Company continues to re-affirm this five-year capital guidance and projects capital expenditures of $325 million to $375 million for 2025.

**Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit's and the overall Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

3-3-3-3

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Adjusted Gross Margin

	For the Year Ended December 31, 2024			
(in millions)	Regulated Energy	Unregulated Energy	Other and Eliminations	Total
Operating Revenues	**$ 583.4**	**$ 228.4**	**$ (24.6)**	**$ 787.2**
Cost of Sales:				
Natural gas, propane and electric costs	(144.2)	(100.2)	24.6	(219.8)
Depreciation & amortization	(48.8)	(16.9)	—	(65.7)

Operations & maintenance expenses [1]	(3.9)	(7.6)	—	(11.5)
Gross Margin (GAAP)	**80.6**	**24.8**	**—**	**105.4**
Operations & maintenance expense [1]	3.9	7.6	—	11.5
Depreciation & amortization	9.0	4.4	—	13.4
Adjusted Gross Margin (Non-GAAP)	**$ 93.5**	**$ 36.8**	**$ —**	**$ 130.3**

[1] Operations & maintenance expenses within the Consolidated Statements of Income are presented in accordance with regulatory requirements and to provide comparability within the industry. Operations & maintenance expenses which are deemed to be directly attributable to revenue producing activities have been separately presented above in order to calculate Gross Margin as defined under US GAAP.

5-5-5-5

Adjusted Net Income and Adjusted EPS

(dollars in millions, shares in thousands (except per share data))	Year Ended December 31, 2024	Year Ended December 31, 2023	Three Months Ended December 31, 2024	Three Months Ended December 31, 2023
Net Income (GAAP)	**$ 118.6**	$ 87.2	**$ 36.7**	$ 25.3
FCG transaction and transition-related expenses, net [1]	**2.9**	10.6	**0.6**	7.7
Adjusted Net Income (Non-GAAP)	**$ 121.5**	$ 97.8	**$ 37.3**	$ 33.0
Weighted average common shares outstanding - diluted [2]	**22,531**	18,435	**22,914**	20,178
Earnings Per Share - Diluted (GAAP)	**$ 5.26**	$ 4.73	**$ 1.60**	$ 1.26
FCG transaction and transition-related expenses, net [1]	**0.13**	0.58	**0.03**	0.38
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 5.39**	$ 5.31	**$ 1.63**	$ 1.64

[1] Transaction and transition-related expenses represent non-recurring costs attributable to the acquisition and integration of FCG including, but not limited to, transaction costs, transition services, consulting, system integration, rebranding, and legal fees.

[2] Weighted average shares reflect the impact of 4.4 million common shares issued in November 2023 in connection with the acquisition of FCG.

Operating Results for the Years Ended December 31, 2024 and 2023

Consolidated Results

(in millions)	Year Ended December 31, 2024	Year Ended December 31, 2023	Change	Percent Change
Adjusted gross margin**	**$ 567.4**	$ 454.1	$ 113.3	25.0 %
Depreciation, amortization and property taxes	**101.6**	91.2	10.4	11.4 %
FCG transaction and transition-related expenses	**4.0**	10.4	(6.4)	(61.5)%
Other operating expenses	**233.6**	201.7	31.9	15.8 %
Operating income	**$ 228.2**	$ 150.8	$ 77.4	51.3 %

Operating income during 2024 was $228.2 million, an increase of $77.4 million or 51.3 percent compared to the prior year. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $71.0 million or 44.0 percent compared to the prior year. The increase in adjusted gross margin during 2024 was driven by contributions from the acquisition of FCG, incremental margin from regulatory initiatives and infrastructure programs, natural gas organic growth and continued pipeline expansion projects, increased virtual pipeline services and increased margins from the Company's other unregulated businesses. Higher operating expenses during the year were driven largely by the operating expenses of FCG, increased insurance costs, higher facilities, maintenance and outside services costs, and increased vehicle expenses. Increases in depreciation, amortization and property taxes attributable to growth projects and the FCG acquisition were partially offset by a $15.5 million reserve surplus amortization mechanism ("RSAM") adjustment from FCG and lower depreciation rates that were approved as part of the rate filings for our Florida electric operations and Maryland natural gas utilities.

6-6-6-6

At December 31, 2024, the RSAM reserve had been completely utilized. In February 2025, FCG filed a depreciation study with the Florida PSC. The application is requesting approval of revised annual depreciation rates, as well as a reduction related to a reserve imbalance that would be amortized over a two-year period. The outcome of the application is subject to review and approval by the Florida PSC.

Regulated Energy Segment

(in millions)	Year Ended December 31, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 439.2**	$ 333.6	$ 105.6	31.7 %
Depreciation, amortization and property taxes	**82.5**	71.7	10.8	15.1 %
FCG transaction and transition-related expenses	**4.0**	10.4	(6.4)	(61.5)%
Other operating expenses	**156.5**	125.3	31.2	24.9 %
Operating income	**$ 196.2**	$ 126.2	$ 70.0	55.5 %

The key components of the increase in adjusted gross margin** are shown below:

(in millions)	
Contribution from FCG	$ 88.6
Margin from regulated infrastructure programs	6.2
Natural gas growth including conversions (excluding service expansions)	5.8
Natural gas transmission service expansions, including interim services	5.2
Rate changes associated with Florida natural gas base rate proceeding [(1)]	1.6
Interim rates from recent rate case activities	0.9
Expiration of regulatory recovery for pandemic-related costs	(1.2)
Other variances	(1.5)
Year-over-year increase in adjusted gross margin**	**$ 105.6**

[(1)] Includes adjusted gross margin contributions from permanent base rates that became effective in March 2023.

The major components of the increase in other operating expenses are as follows:

(in millions)	
FCG operating expenses	$ 30.6
Facilities expenses, maintenance costs and outside services	1.3
Insurance-related costs	1.0
Payroll, benefits and other employee-related expenses	(1.0)
Other variances	(0.7)
Year-over-year increase in other operating expenses	**$ 31.2**

7-7-7-7

Unregulated Energy Segment

(in millions)	Year Ended December 31, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 128.2**	$ 120.6	$ 7.6	6.3 %
Depreciation, amortization and property taxes	**19.1**	19.5	(0.4)	(2.1)%
Other operating expenses	**77.4**	76.7	0.7	0.9 %
Operating income	**$ 31.7**	$ 24.4	$ 7.3	29.9 %

The major components of the change in adjusted gross margin** are shown below:

(in millions)	
Propane Operations	
Increased propane customer consumption	$ 1.8
Contributions from acquisition	1.0
Decreased propane margins and service fees	(0.3)
CNG/RNG/LNG Transportation and Infrastructure	
Increased demand for virtual pipeline services	4.5
Aspire Energy	
Increased margins - rate changes and gathering fees	1.6
Changes in customer consumption	(1.4)
Other variances	0.4
Year-over-year increase in adjusted gross margin**	**$ 7.6**

The major components of the increase in other operating expenses are as follows:

(in millions)	
Vehicle expenses	$ 0.9
Insurance-related costs	0.6
Payroll, benefits and other employee-related expenses	(1.0)
Other variances	0.2
Year-over-year increase in other operating expenses	**$ 0.7**

8-8-8-8

Operating Results for the Quarters Ended December 31, 2024 and 2023

Consolidated Results

(in millions)	Three Months Ended December 31, 2024	2023	Change	Percent Change
Adjusted gross margin**	**$ 154.2**	$ 130.3	$ 23.9	18.3 %
Depreciation, amortization and property taxes	**23.8**	20.3	3.5	17.2 %
FCG transaction and transition-related expenses	**0.9**	6.5	(5.6)	(86.2)%
Other operating expenses	**62.6**	56.2	6.4	11.4 %
Operating income	**$ 66.9**	$ 47.3	$ 19.6	41.4 %

Operating income for the fourth quarter of 2024 was $66.9 million, an increase of $19.6 million or 41.4 percent compared to the same period in 2023. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $14.0 million or 26.0 percent compared to the same period in 2023. The increase in adjusted gross margin during the quarter was driven by contributions from the acquisition of FCG, increased virtual pipeline services, incremental margin from regulated infrastructure programs, continued pipeline expansion projects, and natural gas organic growth. Higher operating expenses were driven largely by the operating expenses of FCG, increased facilities, maintenance and outside services costs, and higher insurance expenses compared to the prior-year period. Increases in depreciation, amortization and property taxes attributable to growth projects and FCG were partially offset by a $6.6 million RSAM adjustment from FCG and lower depreciation rates that were approved as part of the rate filings for our Florida electric operations and Maryland natural gas utilities.

At December 31, 2024, the RSAM reserve had been completely utilized. In February 2025, FCG filed a depreciation study with the Florida PSC. The application is requesting approval of revised annual depreciation rates, as well as a reduction related to a reserve imbalance that would be amortized over a two-year period. The outcome of the application is subject to review and approval by the Florida PSC.

Forward-Looking Statements

Matters included in this release may include forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements. Please refer to the Safe Harbor for Forward-Looking Statements in the Company's 2024 Annual Report on Form 10-K for further information on the risks and uncertainties related to the Company's forward-looking statements.

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Thursday, February 27, 2025 at 8:30 a.m. Eastern Time to discuss the Company's financial results for the fourth quarter and year ended December 31, 2024. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com. For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.579.2543
International: 785.424.1789
Conference ID: CPKQ424

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas transmission and distribution, electricity generation and distribution, propane gas distribution, mobile compressed natural gas utility services and solutions, and other businesses.

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and regulatory initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes the major projects and initiatives that are currently underway or recently completed. The Company's practice is to add incremental margin associated with new projects and regulatory initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, as compared to the prior year. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's 2024 Annual Report on Form 10-K.

	Year Ended December 31,		Estimate for Calendar Year	
(in millions)	**2023**	**2024**	**2025**	**2026**
Pipeline Expansions:				
Southern Expansion	$ 0.6	**$ 2.3**	$ 2.3	$ 2.3
Beachside Pipeline Expansion	1.8	**2.4**	2.4	2.4

Total	$ 34.9	**$ 57.7**	$ 93.7	$ 118.4

16-16-16-16

(1) Includes adjusted gross margin during 2023 comprised of both interim rates and permanent base rates which became effective in March 2023.
(2) Rate case application and depreciation study filed with the Maryland PSC in January 2024. See additional information provided below.
(3) Includes adjusted gross margin attributable to interim rates during 2024. See additional information provided below.

Discussion of Major Projects and Initiatives

Pipeline Expansions

St. Cloud / Twin Lakes Expansion
In February 2024, Peninsula Pipeline filed a petition with the Florida Public Service Commission ("PSC") for approval of an amendment to its Transportation Service Agreement with Florida Public Utilities ("FPU") for an additional 10,000 Dts/day of firm service in the St. Cloud, Florida area. Peninsula Pipeline will construct pipeline expansions that will allow FPU to serve the future communities that are expected in that area. The Florida PSC approved the project in May 2024, and it is expected to be complete in the fourth quarter of 2025.

Newberry
In April 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreement with FPU for an additional 8,000 Dt/d of firm service in the Newberry, Florida area. The petition was approved by the Florida PSC in the third quarter of 2023. Peninsula Pipeline will construct a pipeline extension, which will be used by FPU to support the development of a natural gas distribution system to provide gas service to the City of Newberry. A filing to address the acquisition and conversion of propane community gas systems in Newberry was made in November 2023. The Florida PSC approved it in April 2024, and conversions of the community gas systems commenced in the second quarter of 2024.

Worcester Resiliency Upgrade
In August 2023, Eastern Shore filed an application with the Federal Energy Regulatory Commission ("FERC") requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, DE and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. In January 2025, the FERC approved the project, and construction is expected to be complete in the third quarter of 2025.

East Coast Reinforcement Projects (Boynton Beach and New Smyrna Beach)
In December 2023, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024. Construction is projected to be complete in the second and fourth quarters of 2025 for New Smyrna Beach and Boynton Beach, respectively.

Central Florida Reinforcement Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that have experienced an increase in population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Plant City and Lake Mattie with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024. The Plant City project was completed in the fourth

quarter of 2024, and the Lake Mattie project is projected to be completed during the fourth quarter of 2025.

Warwick
In July 2024, the Company announced plans to extend Eastern Shore's transmission deliverability by constructing an additional 4.4 miles of six inch steel pipeline. The project will reinforce the supply and growth for our Delaware division distribution system and expand natural gas service further into Maryland for anticipated future growth. The project was placed into service during the fourth quarter of 2024.

Pioneer Supply Header Pipeline Project
In March 2024, Peninsula Pipeline filed a petition with the Florida PSC for its approval of Firm Transportation Service Agreements with both FCG and FPU for a project that will support greater supply growth of natural gas service in southeast Florida. The project consists of the transfer of a pipeline asset from FCG to Peninsula Pipeline. Peninsula Pipeline will proceed to provide transportation service to both FCG and FPU using the pipeline asset, which supports continued customer growth and system reinforcement of these distribution systems. The Florida PSC approved the petition in July 2024 and the project was completed in September 2024.

Renewable Natural Gas Supply Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for its approval of its Transportation Service Agreements with FCG for projects that will support the transportation of additional renewable energy supply to FCG. The projects, located in Florida's Brevard, Indian River and Miami-Dade counties, will bring renewable natural gas produced from local landfills into FCG's natural gas distribution system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian River County, and Miami-Dade County. Benefits of these projects include increased gas supply to serve expected FCG growth, strengthened system reliability and additional system flexibility. The Florida PSC approved the petition in July 2024 with the projects estimated to be completed in the first half of 2025.

Regulatory Initiatives (with recent regulatory actions)
FCG SAFE Program
In April 2024, FCG filed a petition with the Florida PSC to more closely align the SAFE Program with FPU's GUARD program. Specifically, the requested modifications will enable FCG to accelerate remediation related to problematic pipe and facilities consisting of obsolete and exposed pipe. These efforts will serve to improve the safety and reliability of service to FCG's customers, and the modifications will result in an estimated additional $50.0 million in capital expenditures associated with the SAFE Program which would increase the total projected capital expenditures to approximately $255.0 million over a 10-year period. The Florida PSC approved the modifications in September 2024.

Maryland Natural Gas Rate Case
In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, "Maryland natural gas distribution businesses") filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, we sought approval of the following: (i) permanent rate relief of approximately $6.9 million with a ROE of 11.5 percent; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses under the new corporate entity which we anticipate will be called Chesapeake Utilities of Maryland, Inc.; and (iii) authorization to establish a rider for recovery of the costs associated with our new technology systems. In August 2024, the Maryland natural gas distribution businesses, the Maryland Office of Peoples' Counsel ("OPC") and PSC Staff reached a settlement agreement which provided for, among other things, an increase in annual base rates of $2.6 million. In September 2024, the Maryland Public Utility Judge issued an order approving the settlement agreement in part. The $2.6 million increase in annual base rates was approved and the Company filed the Phase II filing in November 2024 to determine rate design across the Maryland natural gas distribution businesses, consolidation of the applicable tariffs and recovery of technology

costs. The hearing has been scheduled for March 2025 and the outcome of the application is subject to review and approval by the Maryland PSC.

Maryland Natural Gas Depreciation Study
In January 2024, the Company's Maryland natural gas distribution businesses filed a joint petition for approval of their proposed unified depreciation rates with the Maryland PSC. A settlement agreement between the Company, PSC staff and the OPC was reached and the final order approving the settlement agreement went into effect in July 2024, with new depreciation rates effective as of January 1, 2023. The approved depreciation rates resulted in an annual reduction in depreciation expense of approximately $1.2 million.

Delaware Natural Gas Rate Case
In August 2024, the Company's Delaware natural gas division filed an application for a natural gas rate case with the Delaware PSC. In connection with the application, the Company is seeking approval of the following: (i) permanent rate relief of approximately $12.1 million with a ROE of 11.50 percent; (ii) proposed changes to depreciation rates which were part of a depreciation study also submitted with the filing; and (iii) authorization to make certain changes to tariffs. Annualized interim rates were approved by the Delaware PSC in the amount of $2.5 million and became effective in October 2024. The hearing for the proceeding has been scheduled for May 2025, and the outcome of the application is subject to review and approval by the Delaware PSC.

FPU Electric Rate Case
In August 2024, the Company's Florida Electric division filed a petition with the Florida PSC seeking a general base rate increase of $12.6 million with a ROE of 11.3 percent based on a 2025 projected test year. Annualized interim rates of approximately $1.8 million were approved with an effective date of November 1, 2024. The outcome of the application is subject to review and approval by the Florida PSC. The hearings for the approval of the revenue requirement and rates are scheduled to occur in March 2025.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption
In 2024, higher consumption which includes the effects of colder weather compared to the prior year resulted in a $0.3 million increase in adjusted gross margin. While temperatures in our Delmarva service territories were colder than the prior year, our Ohio service territories experienced warmer temperatures compared to 2023. In addition, temperatures in the Delmarva and Ohio service territories in 2024 were both approximately 10 percent warmer compared to normal temperatures. The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the year and quarter-to-date periods ended December 31, 2024 compared to the respective 2023 periods.

19-19-19-19

HDD and CDD Information

	Year Ended December 31,			Three Months Ended December 31,

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula and in our legacy Florida operations increased by approximately 4.0 percent and 3.9 percent, respectively, during 2024.

The details are provided in the following table:

	Adjusted Gross Margin Increase For the Year Ended December 31, 2024	
(in millions)	**Delmarva Peninsula**	**Florida [1]**
Customer growth:		
Residential	$ 1.6	$ 2.7
Commercial and industrial	0.5	1.0
Total customer growth	$ 2.1	$ 3.7

[1] Includes growth amounts for our legacy Florida operations, but excludes the effects of FCG.

20-20-20-20

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $355.8 million. The following table shows total capital expenditures for the year ended December 31, 2024 by segment and by business line:

(in millions)	For the Year Ended December 31, 2024
Regulated Energy:	
Natural gas distribution	$ 218.6
Natural gas transmission	68.8
Electric distribution	32.8
Total Regulated Energy	320.2
Unregulated Energy:	
Propane distribution	12.0
Energy transmission	5.3
Other unregulated energy	16.6
Total Unregulated Energy	33.9
Other:	
Corporate and other businesses	1.7
Total Other	1.7
Total 2024 Capital Expenditures	**$ 355.8**

The following table shows a range of the forecasted 2025 capital expenditures by segment and by business line:

	2025	
(in millions)	**Low**	**High**
Regulated Energy:		
Natural gas distribution	$ 135.0	$ 155.0
Natural gas transmission	135.0	145.0
Electric distribution	35.0	45.0
Total Regulated Energy	305.0	345.0
Unregulated Energy:		
Propane distribution	12.0	15.0
Energy transmission	5.0	10.0
Other unregulated energy	2.0	3.0
Total Unregulated Energy	19.0	28.0
Other:		
Corporate and other businesses	1.0	2.0
Total 2025 Forecasted Capital Expenditures	**$ 325.0**	**$ 375.0**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth and availability of capital. Historically, actual

21-21-21-21

capital expenditures have typically lagged behind the forecasted amounts. See “Capital Investment and Earnings Guidance” discussed above for additional information on our capital expenditure forecast.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 48.4 percent as of December 31, 2024.

Q1: 2025-05-07 Earnings Summary

EPS of $2.22 misses by $0.03 | Revenue of $298.70M (21.55% Y/Y) beats by $50.25M

Chesapeake Utilities Corporation (CPK) Q1 2025 Earnings Conference Call May 8, 2025 8:00 AM ET

Company Participants

Lucia Dempsey - Head of Investor Relations
Jeff Householder - Chair, President & Chief Executive Officer
Jim Moriarty - Executive Vice President, General Counsel & Corporate Secretary & Chief Policy & Risk Officer
Beth Cooper - Executive Vice President, Chief Financial Officer, Treasurer & Assistant Corporate Secretary

Conference Call Participants

Tate Sullivan - Maxim Group
Chris Ellinghaus - Siebert Williams Shank
Paul Fremont - Ladenburg
Nicholas Campanella - Barclays

Operator

Welcome to Chesapeake Utilities Corporation's First Quarter 2025 Earnings Conference Call. [Operator Instructions]

I would now like to turn the call over to Lucia Dempsey, Head of Investor Relations.

Lucia Dempsey

Thank you, and good morning, everyone. Today's presentation can be accessed on our website under the Investors page and Events and Presentations subsection. After our prepared remarks, we will open up the call for questions.

On Slide 2, we show our typical disclaimers, while I remind you that matters discussed on this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results.

The safe harbor for forward-looking statements section of our 2024 annual report on Form 10-K and on our first quarter Form 10-Q provides information on the factors that could cause such statements to differ from our actual results. Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share, and the information presented today includes the appropriate disclosures in accordance with the SEC's Regulation G. A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation our earnings release and our first quarter Form 10-Q.

Here at Chesapeake Utilities, safety is our first priority. We start all meetings with a safety moment, and we'll do so here with a moment on bicycle safety, as highlighted on Slide 3.

Increasingly warmer temperatures bring more cyclists on the road whether for commuting or for fun. Cycling is great for physical and mental health but we must increase our awareness to ensure safety for all on the road. Cyclists should always wear a helmet, remain highly visible during the day and at night and stay aware of traffic patterns. Drivers also need to remain alert and watch for cyclists, particularly at intersections and when turning or parking. Sharing the road will ensure we all get to our destination safely.

I'll now introduce our presenters. Jeff Householder, Chair of the Board, President and Chief Executive Officer, will provide an update on our quarterly performance, our growing service areas and our capital investment plan. Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer will review our active regulatory agenda, business transformation initiatives and stakeholder engagement efforts. And Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary will discuss our financial results, strong balance sheet and dividend and earnings growth trajectory.

With that it is my pleasure to turn the call over to Jeff.

Jeff Householder

Thank you, Lucia. Good morning, and thank you for joining our call today. I'll begin with Slide 5. Following our strong performance in 2024, we are pleased to announce continued growth in the first quarter of 2025 with adjusted earnings per share of $2.22, up 6% from the first quarter of 2024. This performance is in line with our expectations enabling us to reaffirm our full year 2025 adjusted earnings per share guidance of $6.15 to $6.35. And as I'll discuss in more detail shortly, our 2025 capital growth plan of $325 million to $375 million is off to an excellent start with $113 million already invested in the first three months of this year.

As shown on Slide 6, for the first quarter of 2025, we continue to see strong growth and increasing demand for natural gas across our service areas. We operate in some of the fastest-growing regions of the country and recorded another quarter of above-average customer growth.

Delmarva customer growth was up nearly 4% and Florida increased by 3% relative to the same period last year. This growth is driven by a number of factors including population in migration to our service areas, construction of new residential communities and system expansions to serve growing commercial and industrial demand. Customers continue to seek natural gas service to fuel their lives and businesses and we'll continue to provide them the safe, reliable and cost-effective service they expect.

The opportunity to serve increasing customer demand is the basis for our overall growth strategy, which in turn drives sustainable earnings. To deliver consistent returns we remain focused on the three pillars of our growth strategy as shown on Slide 7. First, we work hard to identify and prudently deploy capital for projects that meet our increasing customer demand. Second, we proactively manage our regulatory agenda to support cost recovery of our capital projects and growing operations. And third, we continually transform our business operations, which includes technology and organizational improvements that enable us to maintain operational excellence as we become a larger organization.

Slide 8 highlights our fortunate position of having multiple channels of capital investment to drive overall, long-term earnings growth. The first is reliability infrastructure, which includes upgrades and replacements to improve system resiliency and safety. These infrastructure growth investments are supported by regulatory programs such as the Florida GUARD and SAFE programs that provide effective and timely recovery of our capital investments.

Reliability infrastructure investments generated $5.8 million of gross margin in the first quarter of 2025 and are expected to generate a total of $27 million of gross margin throughout the full year.

The second category of significant growth is occurring in our gas transmission businesses in Delaware and Florida. Many of our major capital projects are designed to extend transmission service in support of distribution expansion that serves new customers.

In the first quarter of this year, these projects generated $2.5 million of gross margin and are expected to contribute $22 million of gross margin for the full year, primarily in the third and fourth quarters of 2025.

Slide 9 provides additional detail on these transmission projects. The Eastern Shore Natural Gas Wallrich Extension in Maryland and The Peninsula Pipeline Company Plant City Project in Florida were placed in service in the fourth quarter of 2024 and have driven over $3 million of gross margin in 2025.

In addition, our Peninsula Pipeline and Boynton Beach Project, was placed in service in the first quarter of this year, driving an additional $3 million of 2025 gross margin.

Construction continues for our remaining capital projects, many of which are expected to be in service in the second half of this year. The majority of our 2025 margins resulting from these projects will occur in the third and fourth quarters of 2025.

I'll now provide an update on our Worcester Resiliency Upgrade or WRU project, as shown on Slide 10. In January of this year, we received FERC approval for WRU, a liquefied natural gas storage facility, critical to support seasonal peaking services for interconnected gas distribution systems.

The LNG peaking service provides reliable and affordable system peaking capacity service that ensures that we can meet the growing demand for natural gas in our Delaware and Maryland distribution systems.

Following FERC approval, we received final updated general contractor bids for site-related construction work. The bids were significantly higher than the indicative pricing, and the timing of construction was longer than the indicative project timing we had received from contractors at the end of last year.

Two factors are principally contributing to the cost increases and the project timing. Reviews of the bids and discussions with the participating contractors indicated availability constraints for certain skilled and licensed labor, and the cost estimates were also being impacted by uncertainty around the current economic climate.

These factors have led to a $20 million increase in capital investment, resulting in a total expected project cost of approximately $100 million. We will be making the necessary filings to ensure rate recovery of this additional capital.

The expected in-service date of the project has shifted from October 2025, to the second quarter of 2026, which means that the WRU margin that was originally expected in the fourth quarter will begin in 2026.

This project remains critical to support increasing demand in this area and is still the lowest-cost project to address peak winter loads and protect against weather-related disruption. We're executing contracts this week and anticipate starting full site construction upon receiving the notice to proceed from FERC.

WRU is just one of many projects that support our five-year capital investment plan, as shown on Slide 11. We've made significant progress to-date, with $356 million invested in 2024 and $113 million already invested through the first quarter of 2025.

Cumulatively, we've also already identified and initiated at least $1.4 billion of our five-year capital investment plan of $1.5 billion to $1.8 billion, of which approximately 70% requires no additional regulatory approval or support.

With that, I'll turn to Jim, to discuss our regulatory strategy and business transformation initiatives.

Jim Moriarty

Thank you, Jeff, and good morning, everyone. As Jeff discussed earlier, a proactive regulatory agenda is the second pillar of our growth strategy. So, to start, I'll share several updates on our active rate cases, as shown on Slide 12.

For our Maryland jurisdiction, in March 2025, a base rate increase of $3.5 million was approved, which reflects a Phase 1 revenue increase of $2.6 million and a subsequent Phase 2 revenue increase of $0.9 million.

We then received a final order last month, with rates effective April 19, 2025. We are pleased to have come to a final resolution on this case and are excited that we will now serve all of our Maryland communities under one consolidated entity, Chesapeake Utilities of Maryland, Incorporated.

On to our Delaware rate case which was initially filed in August of 2024. In March of this year, we reached a settlement agreement in principle with an approved cumulative interim rate increase of $6.1 million, effective May 1, 2025.

We expect to reach a final order on the settlement agreement in the second quarter of this year. Our Florida rate case was also filed in August 2024. Following, an initial revenue increase voted on by commissioners in March of this year, we worked with interested parties and yesterday reached a settlement agreement for $8.6 million of a revenue requirement increase. We anticipate this agreement to be on the Florida PSC hearing agenda in June.

Slide 13, summarizes our other key active regulatory filing, an updated depreciation study for Florida City Gas. In February of this year, we requested a reduction in annual depreciation expense of approximately $1 million in the form of revised annual depreciation rates and a two-year amortization of an excess depreciation reserve of $27.3 million. This filing reflects a return to our standard way of recovering excess depreciation going forward.

The procedural schedule set by the Florida PSC projects a staff recommendation in August 2025 and an order in September 2025, leading to updated annual depreciation rates being implemented no earlier than the third or fourth quarter of this year, effective back to January 1, 2025.

I'll now turn to slide 14, which provides an update on our business transformation initiatives, which is the third pillar of our fundamental growth strategy. In April 2025, we fully completed the implementation of our 1CX project by transitioning our Florida City Gas operations to the SAP system that we rolled out to our Delmarva and FPU operations in August of last year.

The team capitalized on their experience with the initial system launch and refined the processes around training and implementation, which led to a highly successful rollout and seamless transition thus far. We are also in initial stages of launching a company-wide multiyear enterprise resource plan or ERP to coordinate and improve functions across the organization, including human resources, supply chain, asset management, and finance among others. These technology transformations alongside additional operational and security upgrades, within our technology road map will create a strong foundation to support our overall growth trajectory.

Turning to slide 15, I would like to highlight a couple of ways we've been highly engaged with our stakeholders, including our investors and our broader communities. In March, we published our 2024 annual report, which highlights many of our accomplishments throughout last year. This report alongside our 2025 Investor Day, held at Cape Canaveral in March, launched our theme for this year, delivering with purpose reaching new heights.

We were excited to host over 35 financial community members at our Investor Day, where we highlighted our growth opportunities across the enterprise. The key accomplishments and objectives related to our regulatory and business transformation pillars and the depth and breadth of leaders from across the company.

Yesterday, we were gratified that our investors supported all six proposals on the ballot this year at our annual meeting, including the declassification amendment and an increase in the authorized shares from $50 million to $75 million. We also continue to invest in our communities and support local organization based on our four focus areas of giving: safety and health, community development, education and environmental stewardship.

We understand that active engagement with all of our stakeholders is a core responsibility as we grow, and we look forward to publishing the third installment of our sustainability micro reports, which will focus on engagement with our employees, communities, and customers.

With that, I will turn the call to Beth for a more detailed discussion of our financial results.

Beth Cooper

Thanks, Jim, and good morning, everyone. Our financial results as shown on slide 16, demonstrate strong growth in the first quarter of 2025, with adjusted gross margin of approximately $182 million, up 11% from the first quarter of 2024 driven by higher consumption and margin growth from investments in transmission distribution and infrastructure.

Our margin growth coupled with operational efficiencies drove significant improvements in adjusted net income up 9% to approximately $51 million for the quarter. We also reported strong growth in adjusted earnings per share this quarter, up $0.12 to $2.22, a 6% increase over the first quarter of 2024.

We are proud of this continued growth, particularly as this quarter did not benefit from a $3.4 million depreciation expense that was recognized under the Florida City Gas RSAM mechanism in the first quarter of last year.

I'll now turn to slide 17, and highlight some of the key drivers of our first quarter 2025 adjusted EPS. Colder weather across our service areas contributed an $0.18 increase in adjusted EPS, particularly driven by increased consumption in Delaware and across our propane operations. Continued demand for natural gas drove $0.14 of incremental adjusted EPS, including $0.07 related to transmission capital projects and $0.07 of distribution growth across our service areas.

Our unregulated business generated an additional $0.12 of adjusted EPS this quarter driven by increased margins in our propane operations and incremental demand for our Marlin Virtual Pipeline services relative to the first quarter of last year. Regulatory initiatives also drove additional adjusted EPS growth this quarter.

Infrastructure reliability investments through our approved regulatory programs contributed $0.11 this quarter and interim rates related to our in-process rate cases added $0.05 in the first quarter of 2025. These gains were partially offset by a few factors including $0.17 per share of increased depreciation and amortization expense as this quarter had no RSAM depreciation expense reduction compared with an $0.11 benefit in the first quarter of last year.

We also incurred additional operations and maintenance expense of $0.20 per share this quarter as a combination of business growth and higher prices led to increases in expenses associated with employees, customers, facilities and insurance. Lastly, financing activity, including our debt issuance in November 2024 and additional equity issuances in the first quarter of 2025, reduced adjusted EPS by $0.11 per share.

Moving to slide 18. Adjusted gross margin for our Regulated segment was approximately $128 million this quarter, up 8% from the first quarter of last year. As just discussed, this improvement was driven by increased consumption due to colder weather, organic transmission and distribution growth in our natural gas distribution operations and growth in regulatory-related initiatives.

As shown on slide 19, our Unregulated Energy segment demonstrated substantial growth relative to the first quarter of last year with adjusted gross margin up 18% to approximately $54 million in the first quarter of 2025. Even amidst an elevated demand environment, which typically compresses margin due to higher cost propane purchases in the spot market, our propane operations and gas supply teams did a fantastic job managing supply, enabling us to avoid costly spot market purchases and sustain our margins during high demand periods in January and February of this year.

Our Marlin Gas Services business continued to grow as incremental demand for virtual pipeline deliveries drove $3.6 million of additional gross margin in the first quarter of 2025. In addition to RNG, we have seen increased CNG demand, particularly from manufacturing businesses in North Carolina and Ohio.

I'll now shift to slide 20 to review our capital structure and financing activities. Maintaining a strong balance sheet and implementing a strategic financing plan is becoming even more critical as we accelerate our growth strategy amidst a volatile market backdrop. In March, Fitch Ratings issued our inaugural investment-grade credit rating, including a long-term issuer default rating of BBB+, an A- instrument rating for our senior unsecured debt and a stable outlook.

We are proud of this assessment as it reflects our long-standing commitment to prudent investment and disciplined balance sheet management. And we'll continue to implement a strategy consistent with maintaining an investment-grade credit profile.

We ended the first quarter of 2025 with an equity to total capitalization ratio of 49%, up from 48% at the end of 2024 and on the cusp of our target equity to total capitalization ratio range of 50%.

We were able to take advantage of market performance during the last few months issuing approximately $22 million within the first quarter of 2025 via our ATM program and the waiver component of our direct stock purchase and dividend reinvestment plan and issuing nearly an additional 238,000 shares subsequent to the quarter, bringing our total shares outstanding to $23.3 million as of May 2, 2025. This puts us ahead of our equity issuance plan for the full year.

On the debt side, minimum maturities in 2025 reduce our interest rate exposure and provide optionality for any issuances this year. In addition, our liquidity remains strong with 68% of our revolving credit facility and private placement shelf facilities available at the end of March 2025. Alongside our equity and debt plans, our dividend policy continues to be a key component of our capital allocation strategy as we fund growth capital investments to drive earnings growth and overall shareholder return.

Yesterday, our Board of Directors approved an $0.18 increase in our annualized dividend, reflecting 7% growth. We're moving from $2.56 per share to $2.74 per share. As shown on Slide 21, we continue to maintain a 10-year dividend CAGR of 9%. Since the Florida City Gas acquisition, we have strived to align our dividend growth with our earnings growth. Both of these metrics are expected to generate a compounded annual growth rate just under 8% over the two-year period from 2023 to 2025.

This dividend strategy is not an either/or but a both and proposition. We support continued dividend growth while reinvesting significant earnings back into the company, enabling our investors to benefit from both long-term top quartile earnings and dividend growth.

Turning now to that earnings growth. Slide 22 demonstrates not only our consistent track record of earnings per share growth, but also our 2025 adjusted EPS guidance, which reflects an increase of 14% to 18% over full year 2024 or growth rates twice as high as the overall utility industry. Our first quarter 2025 performance is in line with our expectations, enabling us to reaffirm our full year 2025 adjusted EPS guidance of $6.15 to $6.35 per share even without WRU's margin this year.

Given the continuously evolving macroeconomic environment, we will continue to monitor any potential impacts to our investment plan and operations as we proceed through the year.

As shown on Slide 23, our first quarter EPS represents 35% to 36% of our 2025 EPS guidance. There are a couple of factors that will shift a higher-than-normal percentage of our 2025 incremental gross margin to the third and fourth quarters of the year, which alters the cadence we've typically seen over the last approximate five years.

The first factor is the timing of our interim and final revenue rate increases that Jim just highlighted, which primarily begin in the second quarter of this year. Second, as Jeff mentioned earlier, most of our major capital projects are expected to come into service in the third and fourth quarters of 2025, leading to back-end weighted incremental margin.

The third factor is depreciation expense as each quarter throughout 2024 benefited from an RSAM adjustment, while the full year results of the Florida City Gas depreciation study may not be recognized until the third and/or fourth quarters of 2025, based on the current procedural schedule for that filing.

Before we shift to Q&A, I'd like to highlight a couple of differentiators on Slide 24 that will enable us to drive shareholder value in 2025 and for years to come. As Jim mentioned earlier, our theme for this year is delivering with purpose, reaching new heights. This starts with our mission to deliver energy that makes life better for the people and communities we serve and is reinforced by our track record of delivering consistent financial results and top quartile return over the last 20 years or more.

We are uniquely positioned in two regions that benefit from above-average customer growth and infrastructure expansion opportunities, enabling us to implement a growth strategy supported by our three pillars: prudent capital deployment, proactive regulatory strategy and continuous business transformation. This growth plan is made possible through our relentless focus on financial discipline, balance sheet strength and our 3-pronged financing strategy.

We remain intent on maintaining an investment-grade profile and returning to our target capital structure so that we are well positioned to fund our long-term capital growth plan. All of these elements drive our ability to reach new heights, both in 2025 and beyond. We're not only targeting significantly above-average adjusted earnings per share growth this year, but reaching new heights with capital investment projects, regulatory activity and large-scale technological transformation, enabling us to become a much larger organization over the next few years.

Staying committed to our goals and excelling at these differentiators will enable us to continue to drive industry-leading growth, total shareholder return and long-term value for all our stakeholders.

With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

The floor is now open for questions. [Operator Instructions] Thank you. Our first question is coming from Tate Sullivan with Maxim Group. Please go ahead.

Q – Tate Sullivan

Hi. Thank you. And Jeff you held your most recent Analyst Day event in Cape Canaveral, Florida. Can you talk about the natural gas infrastructure there on the regulatory side first, for the space industry? Or has there been any regulatory developments since then, or upcoming in terms of regulatory natural gas infrastructure in that area?

Jeff Householder

Hi. Good morning, Tate. Nothing substantive to report in that particular area, although I think as we mentioned, we've had some good news in Virginia, thinking about moving down to the launch facility there on Wallops Island, with a $6.5 million grant that the State of Virginia has provided to look at infrastructure expansion there.

We continue to work with a number of parties on the Florida space launch effort. There are continuing meetings that indicate substantial interest both at the state level and at NASA, and the other launch companies that are active there. And I think that before this is over with, as I've said many times, there's certainly a need for liquefied natural gas to supplement the fuels that are used to launch those rockets, and we'll find a way to participate in that as that area is now in our service territory with the FCG acquisition. So we'll keep poking at that, and I think we'll find a way to serve those facilities at some point.

Q – Tate Sullivan

Thank you. And then the unregulated margin, another at least -- unregulated operating income rather, another good quarter there both from Marlin and it looks from propane as well. Is Marlin -- are you still expanding, Marlin? You commented a couple of years ago about building more trailers I believe and such. Or can you talk to Marlin's footprint and if you have disclosed any expansion ongoing expansion efforts at Marlin?

Jeff Householder

I don't believe that we've talked specifically about Marlin expansion. We continue to capitalize that business appropriately. And as we find additional opportunities for growth, we're looking at a couple of things out in Ohio, right now as a matter of fact, where we will need to position additional equipment. We've made the appropriate capital advances there. And as you indicate, mostly in cabs, and trailers, and mobile compressors and those sorts of things. And so, we'll continue to do that. There's no big announcement of the large capital expansion program there. This is kind of business as usual, as we continue to execute agreements for longer-term service contracts with entities across the Mid-Atlantic and the Southeast.

Q – Tate Sullivan

Great. Thank you very much. Have a great day.

Jeff Householder

Thanks.

Operator

We'll take our next question from Chris Ellinghaus with Siebert Williams Shank. Please go ahead.

Q – Chris Ellinghaus

Hey, everybody. Good morning. Jeff, have you got any thoughts on tariffs and how you think about how it might affect your business, or what you might be doing with supply chains?

Jeff Householder

Sure. We've been -- as has everyone else in this industry have been looking pretty hard at that. We have experienced very few issues, related to those tariffs at this point. Across our supply chain, we're in pretty good shape. We've been communicating expansively with the vendors and suppliers of various parts and pieces of our business. I just haven't seen anything, yet. There is a general view that the price of everything is going to continue to go up. We'll see if that holds true, as the federal government continues to try to negotiate its way through these tariff issues.

We saw and we reported here on the WRU project, that there is an impact, I think that's at least partially directed toward the uncertainty in the marketplace that the tariffs are creating. And so with the fixed price contracts, you can see and we did see with WRU, the indicative pricing we were getting before the tariffs went into effect, followed by the final pricing we've got after the tariffs went into effect and the vendors that were going to construct that facility began to think about what their pricing might look like. We're seeing at least in that particular project, an increase in the cost.

Some of that, I might add was also related to the fact, that it's pretty tricky to hire an electrical contractor in the state of Maryland. Maryland requires that every electrician on a job of that type, hold a Maryland electricians license. And many of those folks have gone looking for work. As the data centers have blossomed around the country, there is a lot of work for electrical contractors on the industrial side. So I think, we're seeing that kind of impact in the general marketplace.

If you look at our other projects, I can't think of any in the many, many, many, millions of dollars of projects that we have underway that are being impacted by those tariffs at this point.

Q – Chris Ellinghaus

Okay. that's helpful. Vis-à-vis the WRU given the delay there, what have you done to adjust to sort of make up for that margin late in the year for this year?

Jeff Householder

Sure. Yes. And as we indicated about a $3 million margin drop in this year that converts -- Beth could probably split this number out directly, but probably a little over $2 million I would imagine an operating income impact. We can certainly manage that. We have a large enough company at this point that we can maneuver some things, especially on the expense side.

I would remind you as I've reminded many of our folks that we've overcome many times greater impacts with simply weather adjustments that we've had over the last few years been able to move fairly effectively through those impacts. And so I think it's unfortunate that WRU is delayed, but we have the operational capabilities to certainly provide the peaking service on a temporary basis that we were contemplating for this coming winter out of WRU and we'll shift that into next year and the next winter.

So, I think operationally we're in good shape. I think that we will be able without too much difficulty to manage through the margin loss at WRU this year. Lots of projects underway. There's a lot going on in this company that are generating decent income for us. I would also mention that it's not particularly unusual for a FERC regulated company to request a rate adjustment based on cost increases in projects.

I mean it's just the way that FERC has typically worked. You end up before you finalize even the contractor selection going to FERC with an estimated cost those change over time. And I think it would not be surprising to FERC that we would come back in and request an adjustment on the margin.

So, what you'll end up with I believe is an increase in our capital program followed by our ability, I believe, to find full recovery on those costs. So, there is a delay. It does have an impact, but we'll be able to manage through that.

Q – Chris Ellinghaus

Okay, great. There's a lot of sort of trickle down related to the tariff regime and the economy -- economic outlook in general. Have you got any concerns for say foreign travel or foreign tourism or maybe housing starts in the second half of the year? Do you have any general thoughts on those things, because they could certainly affect Delmarva and Florida?

Jeff Householder

They certainly can. And we've actually been looking at a number of the projections offered by theme parks and others that restaurant associations and a variety of folks that kind of track that sort of projected data.

There probably are some impacts there. We haven't seen anything on the tourism side that specifically impacts our business at this point. We also continue to see homebuilders on the single-family residential side of the business continuing to develop very large communities. We have a fairly substantial backlog of contracted housing starts over the next three or four years.

So, I don't see anything there that's particularly concerning. The multifamily market, certainly in Florida, has undergone some issues with the building failures and a couple of other things insurance costs that are I think affecting and impacting that market. We don't serve a lot of those. So, again, it just hasn't moved down to us at this point at all.

Q – Chris Ellinghaus

Okay. One last question for Beth. Obviously with some of the capital and WRU delays things like that, there's going to be some movement in the seasonality. So, when you look at Slide 23 and that five-year average, do you think that say 2027 you revert more to that normal pattern because the next -- 2025 and 2026 will be some funky periods there. But do you sort of think you revert to that pattern?

Beth Cooper

That's a great question Chris. And I definitely think you move back towards that in that direction. What that doesn't contemplate though right is our steady stream of capital projects and how the implementation of future projects might weigh into that.

So, next year as you indicated in 2026, like this year, will look different. But really that seasonality in 2027 and really in any year is going to be driven by whatever regulatory activity and any large substantial incremental capital projects that come on that will come about in the future. But I think for now that's the best path to look at when you look at our longer-term plan.

Q – Chris Ellinghaus

That all makes sense. Thanks. Appreciate the details.

Beth Cooper

Thank you, Chris.

Jeff Householder

Thank you.

Operator

We'll take our next question from Paul Fremont with Ladenburg. Please go ahead.

Beth Cooper

Good morning.

Paul Fremont

Thanks. Congratulations on a good quarter.

Jeff Householder

Thanks, Paul.

Paul Fremont

I guess my first question is if you were to settle in the FGC gas depreciation case, what would be sort of the optimal time? Would it be after staff testimony? Or would it be after the staff issues its report?

Jeff Householder

It's likely to be the former. I mean I think this is probably going to run out into the late third quarter or early fourth quarter as kind of indicated by that schedule. One of the things that I think all of us are still looking toward it doesn't have a direct bearing per se on the depreciation study that we filed but everyone is still looking at that RSAM Supreme Court decision as at least an indicator of what the court's view might be of the original RSAM. This is not that, but I think it all plays in that general context. And so, I think it will probably be a summer where we work with staff and work with the Office of Public Counsel as we work through the data requests that have already started on the depreciation study likely heading toward the schedule that you referred to. And I would imagine we would get pretty close to that before we began significant settlement discussions.

Paul Fremont

Great. And then with Fitch initiating ratings, did they indicate a downgrade threshold for FFO to debt?

Beth Cooper

They have the FFO leverage calculation is the predominant calculation that they're looking at. And Paul from their perspective, they start to view a downgrade when you're thinking about a 4.8 is when there's consideration of a potential downgrade. And then similarly on the other side, an upgrade has been indicated around the 3.8.

Paul Fremont

And then do you have sort of your own target relative to their thresholds?

Beth Cooper

We do. Actually, great question. We have actually spent time with our Board and we have constructed a framework that actually looks at seven different metrics along the kind of the credit spectrum including that one and two others that they actually monitor as well, but to a lesser degree. But we have those -- we have the dashboard in place. We've established internal targets that our Board has reviewed and that we monitor and we'll be showing them on a quarterly basis. So that's pretty front and center and something that we're looking at on a regular basis.

Paul Fremont

Right. But are you -- do you plan on sort of sharing any of those metrics with investors? Or are those truly...

Beth Cooper

We are still looking at that. Mike, Noah, myself we're looking at that and evaluating whether or not we'll come out with that. So stay tuned. But right now, we haven't, but we feel comfortable with our forecast and what we've shown them. And certainly, we're looking to sustain the ratings that we have out there.

Paul Fremont

Great. Thank you so much.

Beth Cooper

Thank you.

Operator

[Operator Instructions] We'll go next to Nicholas Campanella with Barclays. Go ahead.

Nicholas Campanella

Do you think Chesapeake can hit the midpoint of guidance without the WRU project margin for 2025?

Jeff Householder

Well I think certainly, we intend to be in the guidance range. I mean I think that's what we've reaffirmed today. Where we fall within that range I think is yet to be seen. It's hard to predict the future in some ways in an economic climate like this. As I've indicated, we haven't seen other than WRU any substantive impacts to us or our business relative to what's going on in the economy at this point. And in fact we're pretty bullish on our capital program and you've seen that from I think a number of companies reporting here lately. There's a lot to do out there and there's a significant demand for gas. And the WRU margins are -- it's unfortunate to see them move and I hate to even say that it's only $3 million, $3 million is $3 million, but it's a number that we I think can manage pretty effectively. Now whether that takes us to the midpoint of the range or the end of the range or the beginning of the range, I think is something we'll continue to look at. Beth, have you got anything to add there?

Beth Cooper

Sure. [Technical Difficulty] and that we have a lot going on from a capital perspective. And I think we'll come back later in the year and revisit whether or not we need to consider any change in our capital guidance in the future. And then second off I would just add a lot of those dollars are being spent on projects as you can see in our major project table that will have more of a full year impact in 2026. That's number one.

The second thing is, I would say you've seen us also commit to getting back to that target capital structure. And so, our decision to do that can weigh into where you actually land within that EPS guidance range. So I think that's really -- those couple of things would just be the additional comments that I would have. So, I think, we're pleased as Jeff said when he started off the call and I ended it with the first quarter. I think it was a strong quarter. I think you saw that in our results across our businesses. And so again we're reaffirming for the year despite WRU. And so maybe Jeff, I'm not sure we have any more questions. So maybe we can turn it to you for some closing remarks.

Jeff Householder

Operator, are there any other questions?

Operator

We have no further questions at this time.

Jeff Householder

All right. Well, thank you guys very much for connecting with us this morning. We appreciate your continued interest in the business. We're pretty happy with the first quarter results. And as Beth and I indicated, I think WRU is not ultimately going to be a significant impact to us this year. We can manage through that. And we look forward to reporting on how that's going next quarter. And with that, goodbye.

Operator

Thank you. This concludes Chesapeake Utilities Corporation's First Quarter 2025 Earnings Conference Call. Please disconnect your line at this time and have a wonderful day.

Earnings Call Presentation

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward-looking statements may be identified by the use of words, such as "project," "believe," "expect," "anticipate," "intend," "plan," "estimate," "continue," "potential," "forecast" or other similar words, or future or conditional verbs such as "may," "will," "should," "would" or "could." These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities Annual Report on Form 10-K for the year ended December 31, 2024 and on Form 10-Q for the quarter ended March 31, 2025 filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share ("EPS*"). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Q1 2025 Safety Moment: Bicycle Safety

For Cyclists

- **Be highly visible**
  Wear light / bright colors.
  Wear reflective clothing and use flashing lights at night.
- **Wear a helmet**
  Adjust straps for a snug fit.
- **Follow traffic laws**
  Use hand signals to indicate route.
- **Remain alert**
  Do not use a mobile device while riding; watch for hazards.

For Drivers

- **Remain alert**
  Watch for cyclists and e-scooters, particularly when turning.
- **Make eye contact**
  Show riders you see them and are providing them right-of-way.
- **Employ "far hand reach"**
  Once parked, open your door with the further-away hand to force your head to turn and look for riders and pedestrians.

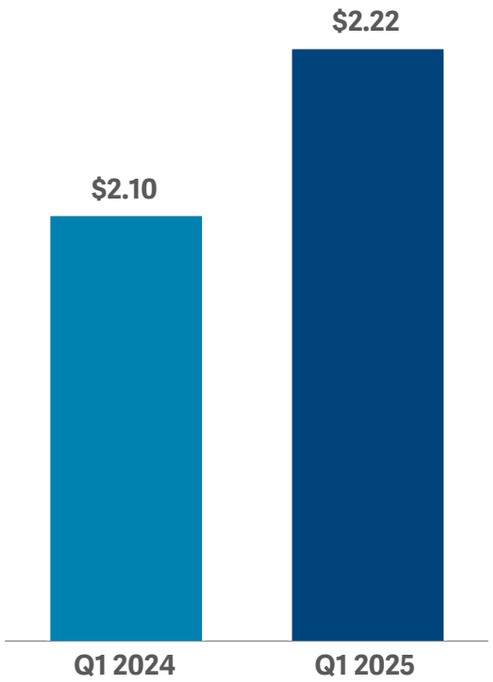
Strong Start with Q1 2025 Performance

Adjusted EPS[1]



Key Financial Highlights

Q1 2025 Results

- Adjusted Gross Margin[1]: **$182.4M**, up 11% from Q1 2024
- Adjusted Net Income[1]: **$51.1M**, up 9% from Q1 2024
- Adjusted EPS[1]: **$2.22**, up 6% from Q1 2024

Earnings Guidance Reaffirmed

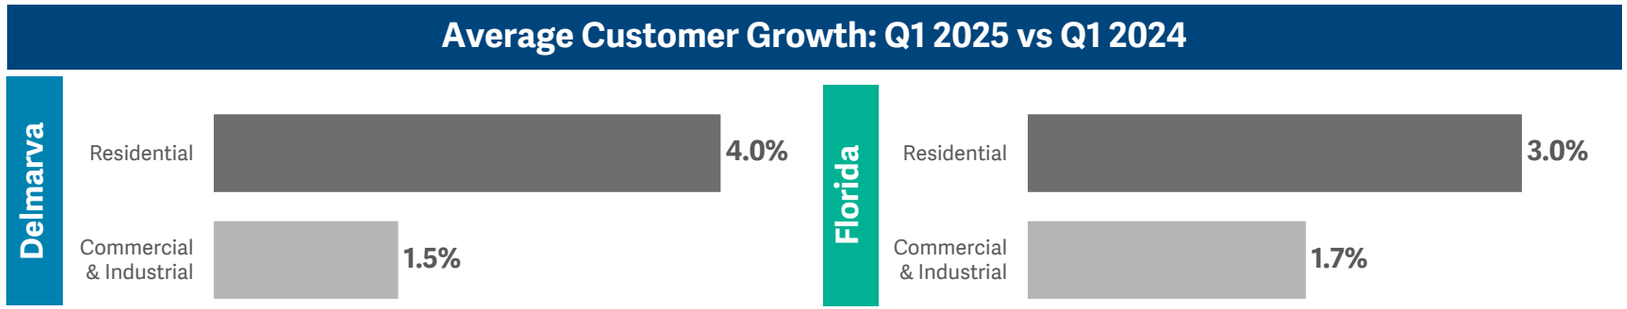
- FY 2025 Adjusted EPS of **$6.15 - $6.35** per share
- FY 2028 Adjusted EPS of **$7.75 - $8.00** per share

CapEx Guidance Reaffirmed

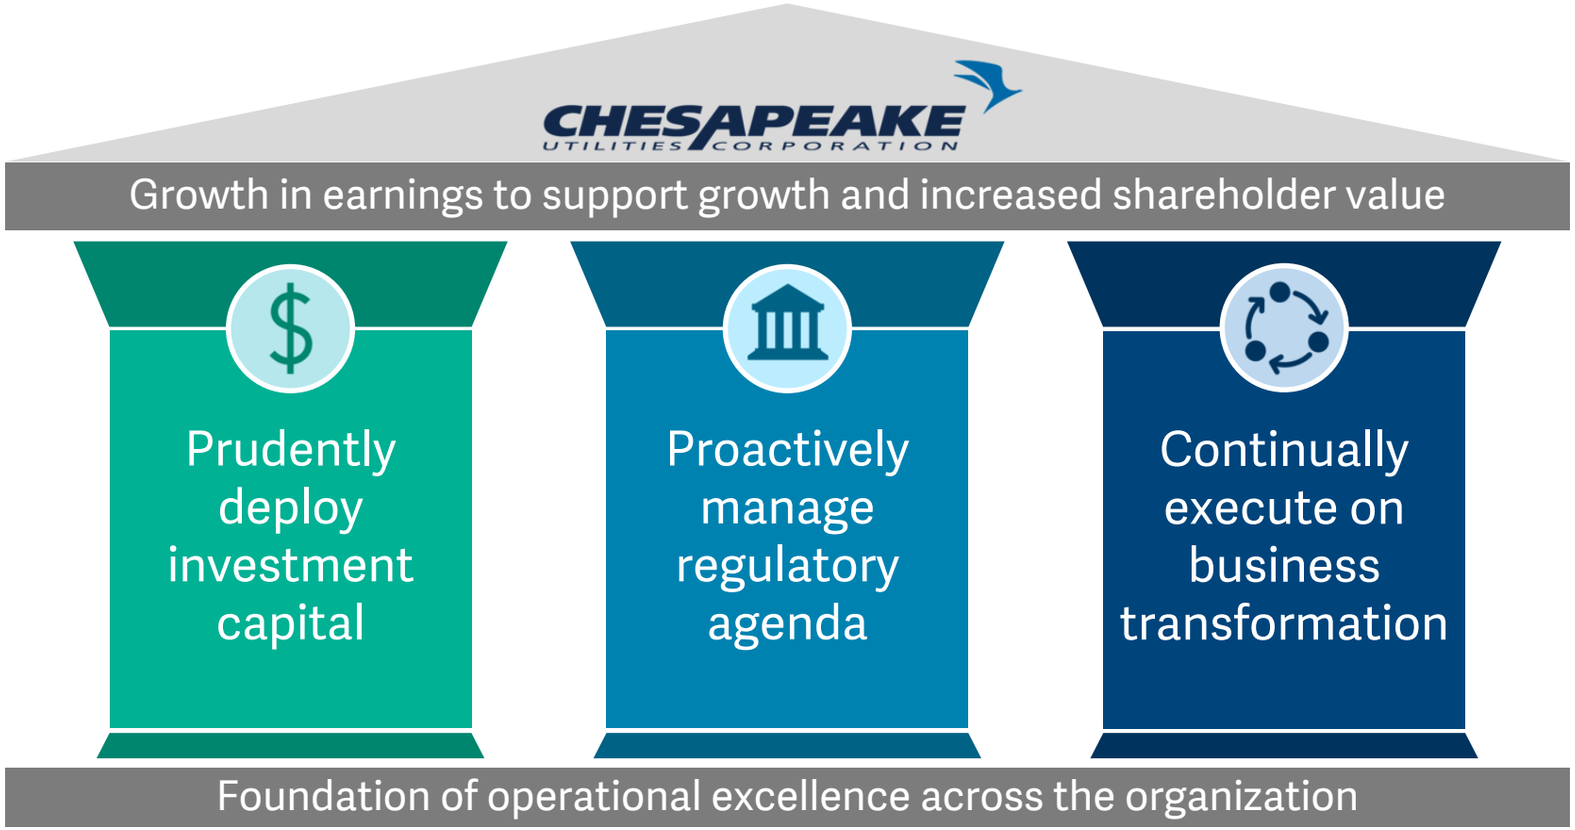
- YTD 2025 Capital Expenditures of **$113 million**
- 2025 Capital Expenditure Guidance: **$325 - $375 million**
- 2024 - 2028 5-Year CapEx Guidance: **$1.5 - $1.8 billion**

[1] *Adjusted Earnings Per Share excludes transaction and transition-related costs associated with the FCG acquisition. See appendix for a reconciliation of non-GAAP metrics.*

Natural Gas Demand Growth Continues



Executing on Our Long-Term Growth Plan



Multi-Faceted Growth Capital

Margin growth driven by multiple streams of capital investment opportunities

RELIABILITY INFRASTRUCTURE: system upgrades and replacements

Jurisdiction	Program	Capital Investment	Adjusted Gross Margin 2024A	2025E	2026E	Q1'24	Q1'25
FPU	GUARD	$205M[1]	$3.6	$6.9	$9.9	$0.6	$1.5
FCG	SAFE	$255M[1]	$3.8	$8.5	$12.0	$0.4	$1.7
ESNG	Capital Cost Surcharge	$50-75M[2]	$3.2	$5.7	$7.1	$0.8	$1.5

			Totals:	**$317M**	**$22.1**	**$42.3**

Worcester Resiliency Upgrade Project (WRU)

$100 million LNG storage facility in Bishopville, MD, consisting of five low-profile horizontal tanks with 500K gallons of storage

- WRU is a critical project to support affordable energy prices, **protect against weather-related disruptions and during peak loads** and prepare for incremental growth in southern Delaware, Maryland and beyond
- Following FERC project approval in January 2025, general contractor discussions and bids indicated availability constraints for licensed labor and cost estimates that were impacted by uncertainty around materials pricing
  - **Results in a $20 million increase** to expected capital investment for a total project cost of $100 million
  - **Shifts the expected in-service date** from October 2025 to Q2 2026, which moves the Q4 2025 expected margin contribution into 2026

Strong Progress on 5-Year CapEx Guidance

~$1.4 billion of identified capital projects support our 5-year CapEx guidance of $1.5 - $1.8 billion

Segment	5-Year Guidance
Regulated Distribution	$600 - $645M
Regulated Transmission	$435 - $590M
Regulated Infrastructure	$325 - $375M
Unregulated Businesses	$100 - $140M
Technology	$70 - $90M
Total	$1.5 - $1.8B

Identified CapEx	5-Year Spend
Natural Gas LDC Organic Growth	$625M
Worcester Resiliency Upgrade	$100M
Newberry, Wildlight Phase 2	$28M
Boynton Beach, New Smyrna	$36M
Lake Mattie, St. Cloud, Plant City	$42M
Miami Inner Loop Projects	$40M
Other Approved Pipeline Projects	$49M
GUARD / SAFE Programs	$230M
Eastern Shore Capital Surcharge	$75M
Florida Electric Storm Protection Plan	$50M
Unregulated Businesses	$20M
Technology Transformation	$90M
Total Identified & Ongoing Capital	~$1.4B

capital spend with existing regulatory approvals or recovery mechanisms

Significant Rate Case Progress

$ millions

Active Filings	2025 Margin	2026 Margin	Status
Maryland Rate Case *Docket #9722*	**$2.0**	**$3.5**	- **August 2024:** $2.6M rate increase approved - **November 2024:** Filed Phase II proceeding - **March 2025:** $3.5M final base rate increase approved, both Phase I & II - **April 2025:** Final Order issued, effective April 19, 2025
Delaware Rate Case *Docket #24-0906*	**$4.7**	**$6.1**	- **August 2024:** Filed a request for a $12.1M increase - **October 2024:** Interim rate relief of $2.5M - **March 2025:** Settlement Agreement in Principle; approved cumulative interim rate relief of $6.1M, effective May 1, 2025 ($2.5M initial + $3.6M incremental) - **Q2 2025:** Final Order expected for Settlement Agreement - **2H 2025:** Phase II final rate design
FPU Electric Rate Case *Docket #20240099*	**$7.1**	**$8.6**	- **August 2024:** Filed a request for a $12.6M increase - **November 2024:** Interim rate relief of $1.8M - **March 2025:** $9.8M revenue requirement approved, effective March 20, 2025 - **May 2025:** Revised settlement agreement reached for $8.6M revenue increase - **June 2025:** Expected hearing to review and approve settlement agreement

FCG Depreciation Study

Docket # 20250035

- Requested a reduction in depreciation expense of ~$1M in the form of revised annual depreciation rates and a 2-year amortization of the excess reserve of $27.3M
- Reflects a return to our standard way of recovering excess depreciation and replaces the Reserve Surplus Adjustment Mechanism (RSAM)

Current Procedural Schedule

February 2025	• Updated depreciation study filed; requested effective back to January 1, 2025
July 2025	• Staff Report expected
August 2025	• Staff Recommendation expected
September 2025	• Commission Conference (expected agenda item)
Late September 2025	• PAA Order expected
October 2025	• Protest period expires; Consummating Order (if no protest) expected by end of month

Business Transformation Supports Growth

Teammates from Business Information Systems, Customer Service and Operations gathered for the Florida City Gas 1CX go-live in April 2025 at the Doral office in Florida. The team drew lessons from the 1CX implementation in August 2024 to ensure a seamless FCG transition.

2025 Transformational Activities

- Implementing 1CX for FCG
- Launching a multi-year ERP transformation
- Implementing the Technology Roadmap
  - Operational programs, upgrades and cyber security
- Expanding the Safety Data Management System (SDMS) capabilities
  - Damage Prevention module
- Strengthening our emergency and incident response functionality

Engaging with All Stakeholders

Investor Engagement

- **March 2025:** Published the **2024 Annual Report**, highlighting accomplishments from the year and launching this year's theme: **Delivering with Purpose, Reaching New Heights**
- **March 12-14, 2025:** Hosted an **Investor Day**, the company's first since 2018, within FCG's service area at the **Kennedy Space Center in Cape Canaveral, Florida**
- **May 7, 2025:** Held our Annual Shareholder Meeting, which included **six ballot proposals that all passed**, including declassification of the board and an increase in the authorized shares from 50 to 75 million

Community Engagement

CPK continued FCG's long-standing support of the **Children's Hunger Project** in Brevard County, FL by supporting their Annual Gala in February 2025 and by hosting a volunteer event alongside a $5,000 donation as part of the the CPK Investor Day in March 2025.

Coming Soon: CPK's Micro-Sustainability Report on **Engagement with our Teammates, Customers & Communities**

Q1 2025 Demonstrates Continued Growth

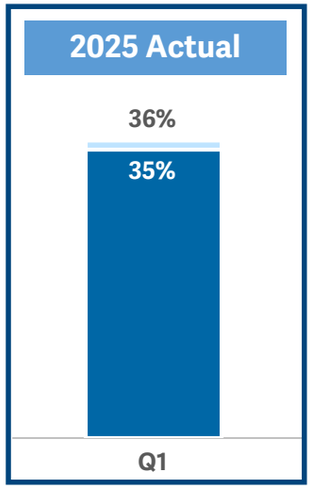
[2] *Peer Group includes select group of 10 CPK peer companies. Details can be found in the Annual Report on Form 10-K.*

Quarterly Earnings Cadence

There are several factors that shift the cadence of our quarterly earnings profile in 2025. As expected, Q1 2025 is ~35-36% of our full-year Adj. EPS guidance, which is below our 5-year average of 39%.



Shift in earnings cadence driven by:

- Timing of Rate Case Revenue Increases
- Timing of in-service dates for major capital projects, which is more heavily weighted in Q3 / Q4 2025
- Timing of RSAM Adjustments versus FCG Depreciation Study, which is likely to be resolved in Q3 / Q4 2025

Historical Actual EPS Quarterly Distribution

Year	Q1	Q2	Q3	Q4
2024	39%	16%	15%	30%
2023[1]	38%	17%	13%	31%
2022	41%	19%	11%	29%
2021	41%	16%	15%	27%
2020	42%	15%	13%	29%
5-Year Average	39%	17%	14%	31%

[1] *Beginning in the third quarter of 2023, the Company's earnings per share metric was adjusted to exclude transaction-related expenses attributable to the announced acquisition of FCG including, but not limited to, legal, consulting, audit and financing fees.*

CHESAPEAKE UTILITIES CORPORATION REPORTS FIRST QUARTER 2025 RESULTS

- **Net income and earnings per share ("EPS")* were $50.9 million and $2.21, respectively, for the first quarter of 2025 compared to $46.2 million and $2.07, respectively, for the first quarter of 2024**
- **Adjusted net income and Adjusted EPS**, which exclude transaction and transition-related expenses attributable to the acquisition and integration of Florida City Gas ("FCG"), were $51.1 million and $2.22, respectively, for the first quarter of 2025 compared to $46.8 million and $2.10, respectively for the first quarter of 2024**
- **Adjusted gross margin** growth of $17.9 million during the first quarter of 2025 driven by customer consumption, regulatory initiatives and infrastructure programs, increased demand for virtual pipeline services, natural gas organic growth and transmission expansion projects**
- **Significant regulatory activity to date that will help drive the Company's results for the remainder of the year**
- **The Company continues to affirm 2025 and 2028 EPS and capital expenditure guidance**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the three months ended March 31, 2025.

Net income for the first quarter of 2025 was $50.9 million ($2.21 per share) compared to $46.2 million ($2.07 per share) in the first quarter of 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, adjusted net income was $51.1 million, or $2.22 per share compared to $2.10 per share reported in the same prior-year period.

Adjusted earnings for the first quarter of 2025 were largely driven by increased customer consumption resulting from year-over-year colder temperatures experienced primarily in our Mid-Atlantic and Ohio service territories, contributions from regulatory initiatives and infrastructure programs, increased demand for virtual pipeline services, organic growth in the natural gas distribution businesses and pipeline expansion projects to support growth.

"Our results for the quarter are in line with our expectations and demonstrate approximately 11 percent growth in adjusted gross margin and approximately 6 percent growth in adjusted EPS relative to the first quarter of 2024. For the full year, we expect that the timing of our capital projects and regulatory initiatives, including the Florida City Gas depreciation study, will drive incremental earnings to be more heavily weighted toward the fourth quarter of 2025," said Jeff Householder, the Company's Chair of the Board, President and Chief Executive Officer. "We have already made significant progress driving value through our three growth pillars: prudently deploying capital, proactively managing our regulatory agenda and continuously driving business transformation. In the first quarter, we invested nearly $113 million in new transmission and reliability infrastructure projects, significantly advanced our three rate cases and finalized preparations for the implementation of 1CX at Florida City Gas, another phase within our consolidated technology roadmap. Our performance thus far positions us to meet our targets and reach new heights in 2025."

2-2-2-2

Earnings and Capital Investment Guidance

The Company continues to re-affirm its 2025 EPS guidance range of $6.15 to $6.35 per share, as well as the 2028 EPS guidance range of $7.75 to $8.00 per share. The 2028 guidance implies an annual EPS growth rate of approximately 8 percent from the 2025 EPS guidance, or since 2018, an 8.5 percent growth rate.

These earnings projections are based upon the Company's previously announced capital expenditure guidance for the five-year period ended 2028 of $1.5 billion to $1.8 billion. The Company continues to re-affirm this five-year capital guidance and projects capital expenditures of $325 million to $375 million for 2025.

**Unless otherwise noted, EPS and Adjusted EPS information are presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Adjusted Net Income and Adjusted EPS

(dollars in millions, shares in thousands (except per share data))	Three Months Ended March 31, 2025	2024
Net Income (GAAP)	**$ 50.9**	$ 46.2
FCG transaction and transition-related expenses, net [1]	**0.2**	0.6
Adjusted Net Income (Non-GAAP)	**$ 51.1**	$ 46.8
Weighted average common shares outstanding - diluted	**23,041**	22,306
Earnings Per Share - Diluted (GAAP)	**$ 2.21**	$ 2.07
FCG transaction and transition-related expenses, net [1]	**0.01**	0.03
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 2.22**	$ 2.10

[1] Transaction and transition-related expenses represent non-recurring costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transition services, consulting, system integration, rebranding, and legal fees.

Operating Results for the Quarters Ended March 31, 2025 and 2024

Consolidated Results

(in millions)	Three Months Ended March 31, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 182.4**	$ 164.5	$ 17.9	10.9 %
Depreciation, amortization and property taxes	**31.3**	26.1	5.2	19.9 %
Other operating expenses	**64.0**	57.9	6.1	10.5 %
FCG transaction and transition-related expenses	**0.3**	0.9	(0.6)	(66.7)%
Operating income	**$ 86.8**	$ 79.6	$ 7.2	9.0 %

Operating income for the first quarter of 2025 was $86.8 million, an increase of $7.2 million or 9.0 percent compared to the same period in 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $6.6 million or 8.2 percent compared to the prior-year period. The increase in adjusted gross margin in the first quarter of 2025 was driven by increased customer consumption resulting from year-over-year colder temperatures in our Mid-Atlantic and Ohio service territories, incremental margin from regulatory initiatives and infrastructure programs, increased demand for virtual pipeline services, natural gas organic growth and pipeline expansion projects. Higher operating expenses were driven largely by the absence of a reserve surplus amortization mechanism ("RSAM") adjustment from FCG, higher depreciation attributable to growth projects, and increased payroll, benefits and other employee-related expenses. Additional expenses associated with facilities, maintenance and outside services, and higher insurance costs also contributed to the increase compared to the prior-year period.

5-5-5-5

Regulated Energy Segment

(in millions)	Three Months Ended March 31, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 128.1**	$ 118.5	$ 9.6	8.1 %
Depreciation, amortization and property taxes	**25.9**	21.0	4.9	23.3 %
Other operating expenses	**41.4**	38.5	2.9	7.5 %
FCG transaction and transition-related expenses	**0.3**	0.9	(0.6)	(66.7)%
Operating income	**$ 60.5**	$ 58.1	$ 2.4	4.1 %

The key components of the increase in adjusted gross margin** are shown below:

(in millions)	
Margin from regulated infrastructure programs	$ 3.4
Natural gas growth including conversions (excluding service expansions)	2.2
Natural gas transmission service expansions, including interim services	2.2
Interim rates from recent rate case activities	1.5
Changes in customer consumption	0.7
Other variances	(0.4)
Quarter-over-quarter increase in adjusted gross margin**	**$ 9.6**

The major components of the increase in other operating expenses are as follows:

(in millions)	
Payroll, benefits and other employee-related expenses	$ 2.5
Insurance related costs	0.6
Credit, collections, and customer service related expenses	0.5
Facilities expenses, maintenance costs and outside services	(0.7)
Quarter-over-quarter increase in other operating expenses	**$ 2.9**

Unregulated Energy Segment

(in millions)	Three Months Ended March 31, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 54.5**	$ 46.0	$ 8.5	18.5 %
Depreciation, amortization and property taxes	**5.5**	5.2	0.3	5.8 %
Other operating expenses	**22.7**	19.4	3.3	17.0 %
Operating income	**$ 26.3**	$ 21.4	$ 4.9	22.9 %

6-6-6-6

The major components of the increase in adjusted gross margin** are shown below:

(in millions)		
Propane Operations		
Increased propane customer consumption	$	4.2
Increased propane margins and service fees		0.4
CNG/RNG/LNG Transportation and Infrastructure		
Increased level of virtual pipeline services		3.6
Aspire Energy		
Increased customer consumption		0.6
Other variances		(0.3)
Quarter-over-quarter increase in adjusted gross margin**	**$**	**8.5**

The major components of the increase in other operating expenses are as follows:

(in millions)		
Payroll, benefits and other employee-related expenses	$	2.0
Facilities expenses, maintenance costs and outside services		1.2
Other variances		0.1
Quarter-over-quarter increase in other operating expenses	**$**	**3.3**

Forward-Looking Statements

Matters included in this release may include forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements. Please refer to the Safe Harbor for Forward-Looking Statements in the Company's 2024 Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the first quarter of 2025 for further information on the risks and uncertainties related to the Company's forward-looking statements.

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Thursday, May 8, 2025, at 8:00 a.m. Eastern Time to discuss the Company's financial results for the three months ended March 31, 2025. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com/. For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.579.2543
International: 785.424.1789
Conference ID: CPKQ125

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and regulatory initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes all major projects and initiatives that are currently underway or recently completed. The Company's practice is to add incremental margin associated with new projects and regulatory initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, as compared to the Company's prior quarterly filings. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's first quarter 2025 Quarterly Report on Form 10-Q.

Detailed Discussion of Major Projects and Initiatives

Pipeline Expansions

Worcester Resiliency Upgrade
In August 2023, Eastern Shore filed an application with the Federal Energy Regulatory Commission ("FERC") requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, DE and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. In January 2025, the FERC approved the project, and construction is expected to be complete in the second quarter of 2026.

East Coast Reinforcement Projects (Boynton Beach and New Smyrna Beach)
In December 2023, Peninsula Pipeline filed a petition with the Florida Public Service Commission ("PSC") for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024. Construction is projected to be complete in the second and fourth quarters of 2025 for New Smyrna Beach and Boynton Beach, respectively.

Central Florida Reinforcement Projects (Plant City and Lake Mattie)
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system around the Plant City and Lake Mattie areas of Florida with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024. The Plant City project was completed in the fourth quarter of 2024, and the Lake Mattie project is projected to be completed during the fourth quarter of 2025.

Renewable Natural Gas Supply Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of Transportation Service Agreements with FCG for projects that will support the transportation of additional renewable energy supply to FCG. The projects, located in Florida's Brevard, Indian River and Miami-Dade counties, will bring renewable natural gas produced from local landfills into FCG's natural gas distribution system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian River County, and Miami-Dade County. Benefits of these projects include increased gas supply to serve expected FCG growth, strengthened system reliability and additional system flexibility. The Florida PSC approved the petition at its July 2024 meeting with the projects estimated to be completed throughout 2025.

Miami Inner Loop Pipeline Projects
In September 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of the Transportation Service Agreement with FCG for a series of projects that will enhance the infrastructure in Miami-Dade county. The proposed expansion consists of the development of several pipeline projects to support growth and support FCG's distribution system in the area and also enhance FCG's ability to obtain gas from various access points in the Miami-Dade county area. The expansion was approved in February 2025 and construction is expected to be complete in the second half of 2025.

11-11-11-11

Regulatory Initiatives

Maryland Natural Gas Rate Case
In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, the “Maryland natural gas distribution businesses”), filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, the Company sought approval of the following: (i) permanent rate relief of approximately $6.9 million with a return on equity of 11.5 percent; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses; and (iii) authorization to establish a rider for recovery of the costs associated with the Company's new technology systems. In August 2024, the Maryland natural gas distribution businesses, the Maryland Office of People's Counsel (the "Maryland OPC") and PSC staff reached a settlement which provided for, among other things, an increase in annual base rates of $2.6 million. In September 2024, the Maryland Public Utility Judge issued an order approving the related settlement agreement in part. The $2.6 million increase in annual base rates was approved and the Company filed a Phase II filing in November 2024 to determine rate design across the Maryland natural gas distribution businesses, consolidation of the applicable tariffs and recovery of technology costs. The hearing was held in March 2025, during which Phase II was approved, including an additional $0.9 million in revenue requirement, for a total cumulative increase of $3.5 million. A final order was issued in April 2025 and included approval of the consolidation of the operations of CUC-Maryland Division, Sandpiper Energy, and Elkton Gas into one entity which was renamed and will operate as Chesapeake Utilities of Maryland, Inc.

Maryland Natural Gas Depreciation Study
In January 2024, the Company's Maryland natural gas distribution businesses filed a joint petition for approval of its proposed unified depreciation rates with the Maryland PSC. A settlement among the Company, PSC staff and the Maryland OPC was reached and the final order approving the related settlement agreement went into effect in July 2024, with new depreciation rates effective as of January 1, 2023. The approved depreciation rates resulted in an annual reduction in depreciation expense of approximately $1.2 million.

Delaware Natural Gas Rate Case
In August 2024, the Company's Delaware natural gas division filed an application for a natural gas rate case with the Delaware PSC seeking approval of the following: (i) permanent rate relief of approximately $12.1 million with a return on equity of 11.5 percent; (ii) proposed changes to depreciation rates which were part of a depreciation study also submitted with the filing; and (iii) authorization to make certain changes to tariffs. Annualized interim rates were approved by the Delaware PSC in the amount of $2.5 million and became effective October 2024. A settlement among the Company, PSC staff and the Delaware Division of the Public Advocate was reached providing an annual revenue increase of $6.1 million, dividing the rate case into two phases and suspending the procedural schedule. The related, fully executed settlement agreement has been filed in the docket and awaits Delaware PSC approval, with a hearing scheduled in May 2025. Interim rates, set to recover the $6.1 million increase, went into effect in March 2025. A procedural schedule is pending in Phase II which will address tariff-related changes including rate design.

FPU Electric Rate Case
In August 2024, the Company's Florida Electric division filed a petition with the Florida PSC seeking a general base rate increase of $12.6 million with a ROE of 11.3 percent based on a 2025 projected test year. Annualized interim rates of approximately $1.8 million were approved with an effective date of November 1, 2024. In March 2025, the Florida PSC approved the permanent rate increase, but the order was subsequently protested. In May 2025, the Company reached a settlement agreement with the interested parties to resolve all outstanding issues in its current base rate case, which was filed as a joint motion for approval with the Florida PSC. This settlement allows for a total revenue increase of approximately $8.6 million on an annual basis. The Company anticipates this agreement to be on the Florida PSC hearing agenda for review and approval in June 2025.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

For the three months ended March 31, 2025, higher consumption which includes the effects of colder weather conditions, largely in our Ohio and Delmarva service areas, compared to the prior-year period resulted in a $5.5 million increase in adjusted gross margin.

The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the three months ended March 31, 2025 and 2024.

	Three Months Ended March 31,		
	2025	**2024**	**Variance**
Delmarva Peninsula			
Actual HDD	**2,210**	1,962	248
10-Year Average HDD ("Normal")	**2,146**	2,221	(75)
Variance from Normal	**64**	(259)	
Florida Natural Gas			
Actual HDD	**580**	470	110
10-Year Average HDD ("Normal")	**483**	470	13
Variance from Normal	**97**	—	
Florida City Gas			
Actual HDD	**300**	214	86
10-Year Average HDD ("Normal")	**221**	227	(6)
Variance from Normal	**79**	(13)	
Ohio

13-13-13-13

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula and within the Company's Florida natural gas distribution service territories, increased by approximately 4.0 percent and 3.0 percent, respectively, for the three months ended March 31, 2025.

The details of the adjusted gross margin increase are provided in the following table:

	Three Months Ended March 31, 2025	
(in millions)	**Delmarva Peninsula**	**Florida**
Customer Growth:		
Residential	$ 0.6	$ 1.1
Commercial and industrial	0.1	0.4
Total Customer Growth	**$ 0.7**	**$ 1.5**

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $112.9 million for the three months ended March 31, 2025. The following table shows a range of the forecasted 2025 capital expenditures by segment and by business line:

	2025	
(in millions)	**Low**	**High**
Regulated Energy:		
Natural gas distribution	$ 135.0	$ 155.0
Natural gas transmission	135.0	145.0
Electric distribution	35.0	45.0
Total Regulated Energy	305.0	345.0
Unregulated Energy:		
Propane distribution	12.0	15.0
Energy transmission	5.0	10.0
Other unregulated energy	2.0	3.0
Total Unregulated Energy	19.0	28.0
Other:		
Corporate and other businesses	1.0	2.0
Total 2025 Forecasted Capital Expenditures	**$ 325.0**	**$ 375.0**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 49 percent as of March 31, 2025.

Chesapeake Utilities Corporation (CPK) Q2 2025 Earnings Conference Call August 8, 2025 8:30 AM ET

Company Participants

Beth W. Cooper - Executive VP, CFO, Treasurer & Assistant Corporate Secretary
James F. Moriarty - Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer
Jeffry M. Householder - President, CEO & Chairman
Lucia Dempsey - Head of Investor Relations

Conference Call Participants

Michael Christopher Brown - Barclays Bank PLC, Research Division
Michael E. Gaugler - Janney Montgomery Scott LLC, Research Division
Paul Basch Michael Fremont - Ladenburg Thalmann & Co. Inc., Research Division

Operator

Welcome to Chesapeake Utilities Corporation's Second Quarter 2025 Earnings Conference Call. [Operator Instructions] I would now like to turn the call over to Lucia Dempsey, Head of Investor Relations.

Lucia Dempsey

Thank you, and good morning, everyone. Today's presentation can be accessed on our website under the Investors page and Events and Presentations subsection. After our prepared remarks, we will open up the call for questions. On Slide 2, we show our typical disclaimers, while I remind you that matters discussed on this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results.

The safe harbor for forward-looking statements section of our 2024 annual report on Form 10-K and on our second quarter Form 10-Q provide further information on the factors that could cause such statements to differ from our actual results. Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share, and the information today includes the appropriate disclosures in accordance with the SEC's Regulation G. A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation, our earnings release and our second quarter Form 10-Q.

Here at Chesapeake Utilities, safety is our first priority. We start all meetings with a safety moment, and we'll do so here with a moment on digging safely as highlighted on Slide 3. Monday, August 11, is National 811 Day when utilities across the nation remind customers to call before they dig to prevent dangerous and costly damage to underground infrastructure, including natural gas pipelines, electric distribution lines and water pipes, among others. Whether installing a small mailbox or excavating a large stump, dial 811 before breaking ground to request local utilities to mark all underground lines, ensuring you can safely dig and complete your project.

I'll now introduce our presenters today. Jeff Householder, Chair of the Board, President and Chief Executive Officer, will provide an update on our key accomplishments and highlights since our last earnings call, our quarterly and year-to-date performance, our full year guidance metrics and our capital growth program. Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer, will summarize our progress on multiple regulatory initiatives, our ongoing business transformation efforts and our stakeholder engagement. And Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary, will discuss our financial results, financing updates and investment highlights.

With that, it is my pleasure to turn the call over to Jeff.

Jeffry M. Householder

Thank you, Lucia. Good morning. We appreciate you joining our discussion today. The highlights on Slide 5 demonstrate how we've continued to deliver with purpose over the last few months. Our growth trajectory continues as we've expanded our capital investment program, achieved regulatory success and maintained a strong balance sheet while financing future growth. As shown on Slide 6, we reported adjusted earnings per share of $1.04 for the second quarter of 2025, up 21% from the second quarter of 2024. This marks the fourth consecutive quarterly increase in earnings relative to the prior year period following the Florida City Gas acquisition, driven by continued growth in our service areas, successful integration of FCG and consistent focus on operational excellence.

Our second quarter performance, coupled with a strong start to the year, is driving double-digit growth in adjusted gross margin, operating income and adjusted net income for the first half of 2025 relative to the same period last year. These results are in line with our expectations, so we continue to reaffirm our full year 2025 EPS guidance of $6.15 to $6.35 per share, as shown on Slide 7. This range does assume a successful outcome in 2025 on the Florida City Gas depreciation study, which was filed with the Florida Public Service Commission at the start of this year, and Jim will provide an update on this filing later on the call.

On the capital investment side, growing demand for natural gas from residential, commercial and industrial customers continues to drive our robust capital program with $213 million already invested in the first 6 months of this year. Given this pace of investment and our expectations for the second half of the year, we are increasing our 2025 full year capital expenditure guidance to $375 million

to $425 million, a $50 million increase over our prior range. A significant amount of our total capital spend this year will drive margin growth in 2026 and beyond, supporting our EPS guidance through 2028.

I'll now shift to Slide 8 to discuss the increasing demand for natural gas, as we strategically invest in some of the fastest-growing regions of the country. Both of our core service areas generated another quarter of above-average customer growth, leading to year- to-date residential customer growth of 4.2% in Delmarva and 3% in Florida compared with the first half of last year. We're seeing a number of multifamily developments opt to add natural gas instead of the typical all-electric build-outs and a number of business park developers in Delaware are leveraging state funding to install natural gas infrastructure, which attracts additional small business and manufacturing customers. We also continue to expand natural gas service to new developments across Florida. One recent example is Newfield in Palm City, a new farm-to-table community that combines housing, sustainable farming and a vibrant town center, where we're installing natural gas infrastructure to serve homes, schools, businesses and agricultural work.

The opportunities we have to serve increasing customer demand and improved system reliability are the basis for our overall growth strategy, which in turn drives sustainable earnings. We remain committed to increasing shareholder value by focusing on the 3 pillars of our growth strategy, as shown on Slide 9, which I'm certain you have memorized by now. In short, we are consistently focused on identifying and prudently deploying capital, proactively managing our regulatory agenda and continually transforming our business operations. We believe that successful execution of these 3 pillars will enable us to maintain top quartile growth and total shareholder return.

Slide 10 provides some highlights of our 2025 capital program. We were pleased to bring 6 major capital projects online within the first half of the year, supported in some cases by interim service from our Marlin Virtual Pipeline operations. Boynton Beach came online in the first quarter, and New Smyrna Beach, St. Cloud Expansion Project, and the 3 RNG transportation projects were brought online in the second quarter of this year. Altogether, projects placed in service thus far in the year generated $2.5 million in the second quarter and are expected to generate $9.8 million for full year 2025. All other construction projects remain on track and on budget.

We also have a number of incremental investments that are driving the $50 million increase in our full year capital expenditure guidance. We expect to spend approximately $20 million on additional infrastructure replacement and reliability projects through our GUARD and SAFE programs. About half or $10 million of the incremental capital investment for the Worcester Resiliency Upgrade, or WRU, will be spent this year as well as an additional $10 million to meet increased demand for our Marlin Virtual Pipeline services and $10 million as we build out infrastructure to support the rapid growth in our Port St. Lucie, Florida area.

We were particularly excited to announce our first data center-related project, Duncan Plains outside of Columbus, Ohio. We've entered into an agreement with American Electric Power to construct and operate an intrastate natural gas pipeline to power our new AEP fuel cell facility that will serve a data center. This $10 million capital project is expected to be online in the first half of 2027.

I'll now provide additional details on WRU, our LNG storage facility in Bishopville, Maryland, as shown on Slide 11. Last quarter, we shared that cost increases drove the total capital investment for the project to approximately $100 million and shifted the expected in- service date to the first half of 2026. We subsequently requested updated rates, and at the end of last month, received FERC approval to recover this incremental capital investment, which results in an additional $3.9 million of full year margin contribution upon project completion. In June, we took delivery of the storage tanks and are pleased to report that we now have all 5 tanks safely on site.

In July, we formally mobilized our contractor and received an initial notice to proceed from FERC, enabling us to begin site preparation and construction. This project remains the lowest cost project to support affordable energy and protect against weather- related disruptions for growing populations in Southern Delaware and Maryland. We look forward to having the project fully in service in the first half of 2026.

As shown in detail on Slide 12, all of our major capital projects are advancing as expected with more than half now in service. We forecast these projects to contribute approximately $23 million of gross margin in 2025 and $45 million in 2026.

As summarized on Slide 13, our regulated capital program benefits from multiple sources of investment, not just the new transmission projects, but also infrastructure projects that support reliability and resiliency. Our capital investment under our 4 regulated infrastructure programs are expected to generate gross margin of $27 million in 2025 and approximately $38 million in 2026.

Shifting to Slide 14. All of these projects support our 5-year capital investment plan of $1.5 billion to $1.8 billion, of which we've already identified and initiated at least $1.4 billion. Most importantly, approximately 70% of that investment requires no additional regulatory approval or support.

Not yet included in this forecast are a number of projects still under exploration and development, several of which are highlighted on Slide 15. We have a number of potential expansion opportunities ahead of us, including serving the space industries in Virginia

and Florida, expanding our systems in the southern part of Delmarva and Florida and meeting incremental demand for our Marlin Virtual Pipeline services to transport RNG, CNG and LNG. As we determine the likelihood, size and timing of these potential projects alongside our upcoming strategic planning process, we will evaluate updates to our 5-year capital expenditure guidance.

With that, I'll turn to Jim to discuss our regulatory strategy and business transformation initiatives.

James F. Moriarty

Thank you, Jeff, and glad to speak with everyone this morning. I'd like to start with an update on our rate cases, as shown on Slide 16. I'm pleased to report that we've now received final orders on all 3 rate cases that have been active over the last year. The final order for our Maryland rate case was effective in April and approved an annual revenue increase of $3.5 million. In June, we received a final order for our Delaware rate case, approving the previously settled $6.1 million annual revenue increase. And in early July, the Florida PSC issued a final order for our Florida electric rate case, approving the $8.6 million annual revenue increase that was previously settled. Following recovery of interim rates in the second quarter, permanent rates for each of these cases are now in place for the second half of the year. We are grateful for the constructive relationships we've maintained with our regulators across all 3 states that supported us achieving final conclusions for these filings.

Slide 17 provides additional detail on our traditional depreciation study filing for Florida City Gas, which included updated asset lives that reduced annualized depreciation expense by approximately $1 million and also included a 2-year amortization of an excess depreciation reserve. Through our normal discovery process, the excess depreciation amount was updated to $22.4 million. In April, the Office of Public Counsel filed a motion for reconsideration and subsequently filed a motion to dismiss the case. The Florida PSC staff is in agreement with the company and has recommended denial of the motion for reconsideration. A commission hearing on both motions is expected in September 2025, and a final order on this filing is still expected in the fourth quarter of this year. We continue to expect to reach a successful outcome on the depreciation study and will provide updates as available.

I'll now turn to Slide 18 to provide a few updates on our business transformation efforts that support our long-term growth. We are moving forward on the next steps of our multiyear enterprise resource plan, or ERP, which will build upon our SAP platform that consolidated our utility billing systems, further enabling us to operate as one company, enhance process efficiency and expand reporting and analytics across functions, including finance, procurement, human resources, customer care and field service management.

In June, we were excited to welcome Abhi Bhatwadekar to our team as our new Chief Information Officer. Abhi brings a wealth of industry experience and technology expertise, which will be valuable as we strengthen our innovation technology team and better align technology initiatives with our business objectives, strength and growth. And in July, we concluded the transition services agreement with NextEra Energy that had been in place since the Florida City Gas acquisition. This represents one of the last milestones in the FCG integration process as we bring all operations fully under the Chesapeake Utilities management.

Slide 19 provides a couple of updates on our engagement with stakeholders. In May, we published our third micro sustainability report, which highlights the ways we have invested in our employee, customer and community relationships throughout 2023 and 2024. These efforts have continued into 2025. Through June, we have contributed over $350,000 in charitable donations and corporate sponsorship for organizations and events across our service areas. In addition, more than 360 employees have volunteered over 1,000 hours throughout the first half of the year, supporting many organizations and causes near and dear to their hearts.

We were also honored to be named Best in the U.S. for Corporate Governance by World News Media in July of this year. This is our third year receiving this award. We are grateful for the recognition of our commitment to earning trust, upholding accountability and fostering a values-driven culture, which is central to our mission to deliver energy that makes life better for the people and communities we serve.

With that, I will turn the call to Beth for a more detailed discussion of our financial results.

Beth W. Cooper

Thanks, Jim, and good morning, everyone. Our financial results for the second quarter of 2025 continue to demonstrate steady growth and advancement toward our 2025 EPS guidance range as shown on Slide 20. Adjusted gross margin was approximately $143 million, up 13% from the second quarter of 2024. Margin growth from investments in transmission and distribution infrastructure, organic growth and regulatory initiatives, coupled with operational efficiencies led to adjusted net income of approximately $24 million, up 26% from the second quarter of 2024.

And even with a higher share count than a year ago, we reported double-digit growth in adjusted earnings per share, up $0.18 to $1.04, a 21% increase over the second quarter of 2024. This performance reflects our commitment to executing on our growth strategy as well as our focus on operational excellence, particularly as we achieved this growth without the benefit of $2.3 million of reduced depreciation expense that was recognized under the Florida City Gas RSAM mechanism in the second quarter of last year.

I'll now highlight some of the key drivers of our second quarter performance, as shown on the adjusted EPS bridge on Slide 21. Continued demand for natural gas drove $0.18 of incremental EPS, including $0.12 related to transmission capital projects and $0.06 of distribution growth across our service areas. Updated rates from our 3 rate cases contributed an additional $0.13 in adjusted EPS this quarter, and margin from our infrastructure program investments contributed $0.11 per share. Our unregulated businesses generated net incremental margin of $0.08, largely driven by increased Marlin Virtual Pipeline transportation services as well as margin from our Full Circle Dairy RNG production facility.

These gains were partially offset by a few factors, including $0.14 per share of increased depreciation and amortization expense, as this quarter had no RSAM related depreciation expense reduction compared with an $0.08 benefit in the second quarter of last year. We also incurred additional operating expenses of $0.09 per share this quarter as higher facilities, operations and maintenance expenses were only partially offset by lower payroll, benefits and employee expenses. Lastly, financing activity, including our debt issuance in November 2024, and additional equity issuances in the latter half of 2024 and the first half of 2025, reduced adjusted EPS by $0.08.

Shifting to Slide 22. Adjusted gross margin for our Regulated segment was approximately $118 million this quarter, up 14% from the second quarter of last year. As just discussed, this improvement was driven by organic transmission and distribution growth in our natural gas distribution operations and increased rates following the conclusion of our 3 rate cases. Our focus on cost management drove an even larger increase in regulated operating income, up 28% to approximately $52 million in the second quarter of 2025.

Our Unregulated Energy segment also demonstrated growth relative to the second quarter of last year, as shown on Slide 23. Adjusted gross margin was up 7% to approximately $25 million in the second quarter of 2025. Our Marlin Gas Services business continues to serve incremental demand for virtual pipeline transportation services, driving $3.5 million of additional gross margin when combined with the incremental contribution from Full Circle Dairy in the second quarter of 2025. This growth was partially offset by a $2.3 million reduction in propane margins, driven by lower consumption and higher commodity costs in this quarter.

I'll now move to Slide 24 to review our capital structure and financing activities. I'm excited to report that at the end of the quarter, we reached our equity capitalization target of 50%, as we've issued $66.2 million of equity throughout the first half of this year. With this level of equity, our total book capitalization has exceeded $3 billion for the first time, an important milestone as we continue our transformation to a mid-cap company. We've also made several advances to enhance our overall debt capacity to fund our capital investments.

In June, we amended and extended our long-term shelf agreement with MetLife, one of our key debt holders, allowing us to secure up to $200 million of new long-term debt through June 2030. At the end of July, we also took advantage of the favorable rate environment to commit to issue $200 million of new long-term unsecured senior notes in the private placement debt market. $150 million of this new debt was funded on August 1, 2025, with the remaining $50 million being funded in mid-September. We issued the debt at a blended 5.04% coupon, including $60 million of 4.88% 3-year notes, $50 million of 5.02% 5-year notes and $90 million of 5.16% 6-year notes.

Subsequent to locking in this financing, we met with Fitch and were subsequently notified that they had rated all of these new notes as an A- credit as we had initially targeted. Lastly, in early August, we also renewed our 364-day revolving credit facility for another year at the same terms and conditions. As you can see, we also continue to maintain strong liquidity and sufficient capacity to support growth with 64% of our revolving credit facility and private placement shelf facilities available at the end of June 2025. With the new long-term debt financings just executed in August and upcoming September, this availability will increase to 92%.

Alongside our equity and debt plans, our dividend policy continues to be a key component of our capital allocation strategy as we fund growth capital investment to drive earnings growth and overall shareholder return. As shown on Slide 25, our annualized dividend per share of $2.74 reflects a 7% annual increase from 2024 and supports a long-term dividend CAGR of 9%. We will continue to support long-term dividend growth while reinvesting significant earnings back into the company, enabling our investors to benefit from both long-term top quartile earnings and strong dividend growth.

As we have discussed many times, we are committed to our long-term earnings per share growth of 8% through 2028 to drive top quartile shareholder returns as shown on Slide 26. Our second quarter 2025 growth supports our trajectory toward our full year 2025

adjusted EPS guidance of $6.15 to $6.35 per share, inclusive of a successful outcome on the Florida City Gas depreciation study, as Jeff discussed earlier.

Before we shift to Q&A, I'd like to remind you of the unique differentiators shown on Slide 27 that enable us to drive shareholder value in 2025 and for years to come. We remain committed to delivering on our promises. We recognize that our consistent track record has driven expectations for continued strong growth, both in terms of performance and valuation. We will continue to execute on our 3 pillars of growth, enabled by continued infrastructure reliability improvements and growing demand for natural gas throughout our service areas and supported by our increased 2025 capital guidance range of $375 million to $425 million.

We will maintain our disciplined approach to financing, including ensuring balance sheet strength, upholding investment-grade credit metrics and sustaining our target capital structure, so that we remain well positioned to address market volatility as we fund our growth plan. That disciplined approach resulted in us achieving our target capital structure by the end of June and increasing our debt capacity meaningfully by our recent actions. All of these elements drive our ability to reach new heights, both in 2025 and beyond. We look forward to delivering with purpose and driving long-term value for all stakeholders and appreciate your continued interest, support and investment in our company. With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

[Operator Instructions] Our first question is coming from Nicholas Campanella with Barclays.

Michael Christopher Brown

This is Michael Brown for Nicholas Campanello. First question is, was the successful outcome in the FCG depreciation study assumed in the $6.25 midpoint guidance for 2025 when you originally gave it? And what are the levers you have to offset it if you do not achieve a successful outcome?

Beth W. Cooper

Michael, this is Beth. And yes, considered within the full guidance range was a successful outcome on the Florida City Gas depreciation study. So what we're trying to -- since there's been a lot of questions, we really tried to hone in, in this call and point out that, that full band reflects a successful outcome on that filing.

Michael Christopher Brown

Okay. Second question is, how do you plan to fund the additional CapEx for this year?

Beth W. Cooper

Sure. Great question. So we talked about quite a few things. Number one, where we sit on a year-to-date basis through at the end of June, we have reached our target capital structure, as we mentioned, at 50%. The long-term debt placements that we've done have opened up capacity on our revolver to the point that our revolver will probably be at the lowest level it's been in many, many years. Our goal is to continue to stay at our target capital structure, but the timing and construction of some of those projects that are longer term may result in us better aligning some of the equity with the in-service dates, but you're not going to see us vary significantly from our target capital structure, maybe a little bit like I mentioned, for those longer-term projects.

So we'll continue to pursue a capital structure that is around 50% plus equity to total capitalization. It may be slightly less than that at times because of bigger projects. And we have availability now with the revolver to have significant capacity. And again, we've accessed the long-term debt markets and expect to as we continue to move forward. So no different plan. Just certainly, we'll execute it in line with the timing of some of our projects from an equity perspective.

Michael Christopher Brown

My last question. When do you anticipate like a full refresh of your key guidance next year?

Beth W. Cooper

We have our guidance, as you know, Michael, out through 2028. And so we're still second year into that. As always, we have an update on our strategic plan. I think likely, you'll see us continue to evaluate and come out with our new capital guidance for 2026 in February of next year. I think as we continue to execute on our strategic plan, we will look at the appropriateness of that range and decide whether a refresh is needed in any part or an extension at some potential time. But right now, we're really only into year 2, and that's kind of typically how we've approached it. If you look back in the past, we get a couple of years well into our guidance range before we provide a refresh.

Operator

And we'll go next to Michael Gaugler with Janney Montgomery Scott.

Michael E. Gaugler

We've noticed a couple of gas companies in our coverage universe with Pennsylvania operations indicating this quarter, they're under NDAs for new projects for hyperscalers in the state. I know your exposure in Pennsylvania is limited. But with Eastern Shore and the Ohio assets, wondering if you're in discussions with anyone.

Beth W. Cooper

Well, Michael, I mean, as you know, I mean, Chesapeake, and I'll certainly turn it to Jeff for any additional commentary, but as you know, we're constantly -- our business development group is looking at projects across our different service territories. And at the point that any type of project like that might be finalized with us having executed an agreement, we would certainly disclose it. We're continuing -- you saw us actually introduce this new project in Ohio because that contract had been executed. So again, we are always looking at things, but we don't have anything at this point that we could disclose around any other particular projects. Jeff, I don't know if there's anything else you might want to add.

Jeffry M. Householder

No, I think that is exactly right. I mean we see the same things that you're seeing in Pennsylvania and certainly in other places. And we have a continued interest in those sorts of opportunities, much as we announced the pipeline to the fuel cell that AEP is developing for a data center in Ohio. So those things continue to be intriguing, and we continue to pursue them.

Michael E. Gaugler

Appreciate the color. And then just one other question. The recent PJM power auction, certainly interesting. I'm wondering if you're seeing greater incoming calls for natural gas service, given what looks like going to be higher electric prices for the next few years, probably out through 2031.

Jeffry M. Householder

I don't know that we have any direct relationship there that we're discerning in the market, although you can, as you just did, presume that people are thinking about options and one of the options clearly is direct natural gas service. And so we are certainly talking to a number of larger commercial and industrial customers across our service territory outside of PJM, frankly, into Florida as well that are looking for increasing their natural gas capabilities. And so we continue to find that. Again, an opportunity for us to grow the business, and we're seeing those things pop up all over the place.

Operator

And we'll go next to Paul Fremont with Ladenburg.

Paul Basch Michael Fremont

My question has to do with, I guess, the schedule in the depreciation case. My understanding is, and I think it's next week that staff is supposed to come out with or file a third-party consultant report in the cases. Is that correct? And I guess, do you have any expectations with respect to what they are going to file?

Beth W. Cooper

So I would just say -- go ahead. I was just actually going to ask Jim. Jim, would you like to take this?

James F. Moriarty

Yes. Thank you, Beth. Paul, as you probably know, the staff has been supportive of our approach here and in fact, has opposed an OPC motion to dismiss the proceeding. So we're expecting staff to make a recommendation in September and base that on their review of our filing, and we're confident that the filing will be received and be successful.

Paul Basch Michael Fremont

Great. And so what is it that -- is there anything on the schedule for them to do next week?

James F. Moriarty

No, not the commission, Paul.

Operator

It appears we have no further questions at this time. I will now turn the program back over to Jeff Householder for any additional or closing remarks.

Jeffry M. Householder

Thank you for joining us today. As always, we appreciate the continued interest in the company, and we look forward to updating you again next quarter. Goodbye.

Operator

Thank you. This concludes Chesapeake Utilities Corporation's Second Quarter 2025 Earnings Conference Call. Please disconnect your line at this time, and have a wonderful day.

Q2 2025

Earnings Call Presentation

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward-looking statements may be identified by the use of words, such as "project," "believe," "expect," "anticipate," "intend," "plan," "estimate," "continue," "potential," "forecast" or other similar words, or future or conditional verbs such as "may," "will," "should," "would" or "could." These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities' Annual Report on Form 10-K for the year ended December 31, 2024 and subsequent quarterly reports on Form 10-Q filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share ("EPS*"). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Q2 2025 Safety Moment: Call Before You Dig

August 11 is National "811" Day

- Reminder to always call "811" before digging for any construction or gardening projects to prevent striking pipelines, cables or other utility infrastructure
- Damaging utility infrastructure can lead to dangerous and/or costly consequences!
- Call 811 even for small projects - installing a mailbox or planting a bush

1. NOTIFY

Call 8-1-1 or make a request online two to three days before you start.

811

Know what's **below.**
Call before you dig.

2. WAIT

Wait two to three days for a response to your request. Affected utilities will send a locator to mark any underground utility lines.

3. CONFIRM

Confirm that all affected utilities have responded by comparing the markers to the list of utilities the 8-1-1 call center notified.

4. RESPECT

Respect the markers provided by the affected utilities. They are your guide for the duration of your project.

5. DIG CAREFULLY

If you can't avoid digging near the markers (within 18-24 inches on all sides, depending on state laws), consider moving your project.

Delivering With Purpose

ADJ. EPS[1]: $1.04, 21% GROWTH
Compared with Q2 2024 Adj. EPS[1] of $0.86

$50M HIGHER CAPEX GUIDANCE
2025 investment forecast now $375M - $425M

NEW OHIO PIPELINE PROJECT
to serve a fuel cell that will power a data center

FINAL ORDERS RECEIVED
For all three active rate cases: DE, MD, FL

ALL 5 WRU TANKS ON SITE
Successful transportation of WRU LNG storage tanks

ADD'L WRU MARGIN: $3.9M
With FERC approval of updated in-service rates

FCG TSA CONCLUDED[2]
All FCG operations now under CPK management

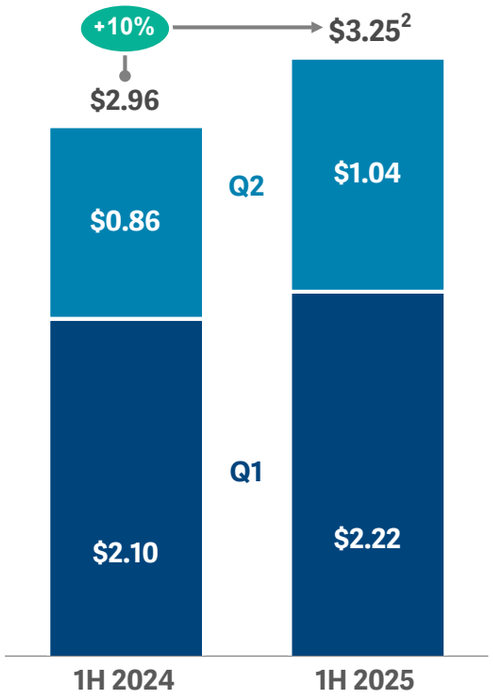
REACHED 50% EQUITY TARGET
Equity to total capitalization was 50% at June 30, 2025

EXPANDED DEBT CAPACITY
$150M Senior Notes Issued, Renewed Revolver & Extended Shelf Agreement

[1] See appendix for a reconciliation of non-GAAP metrics. [2] TSA refers to the Transition Services Agreement.

Growth Trajectory Continues in Q2 2025

YTD Adjusted Diluted EPS[1]



Q2 2025 Financial Highlights

- Adjusted Gross Margin[1]: **$142.8M**, up 13% from Q2 2024
- Adjusted Net Income[1]: **$24.3M**, up 26% from Q2 2024
- Adjusted EPS[1]: **$1.04**, up 21% from Q2 2024

YTD 2025 Financial Highlights

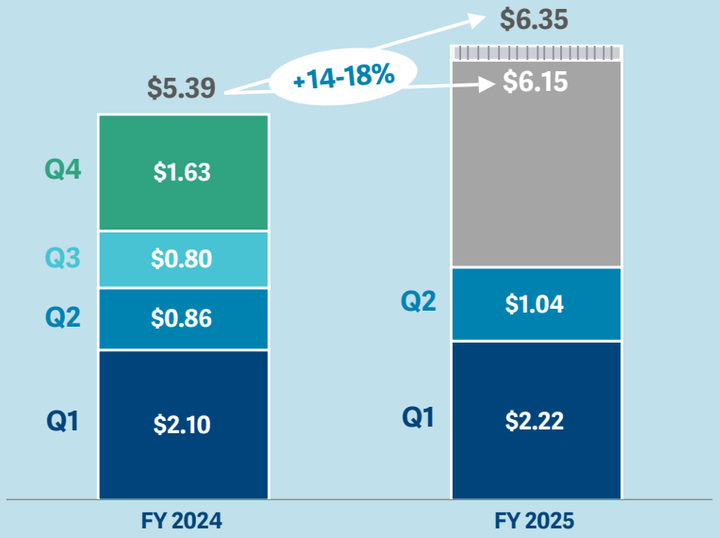
- Adjusted Gross Margin[1]: **$325.2M**, up 12% from YTD 2024
- Adjusted Net Income[1]: **$75.4M**, up 14% from YTD 2024
- Adjusted EPS[1]: **$3.25**, up 10% from YTD 2024

[1] *See appendix for a reconciliation of non-GAAP metrics.*
[2] *May not equal the sum of quarterly Adj. EPS due to differences between quarter-end and year-to-date weighted average share count.*

2025 Guidance: Reaffirming EPS, Increasing CapEx

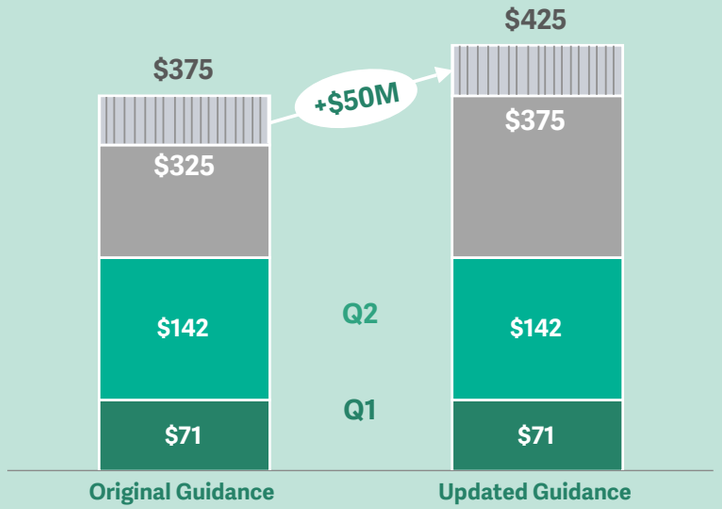
2025 Adj. EPS[1] Guidance

- Reaffirming 2025 Adj. EPS[1] range of **$6.15 - $6.35**
  - Assumes a successful outcome on the FCG Depreciation Study this year



2025 Capital Expenditure Guidance

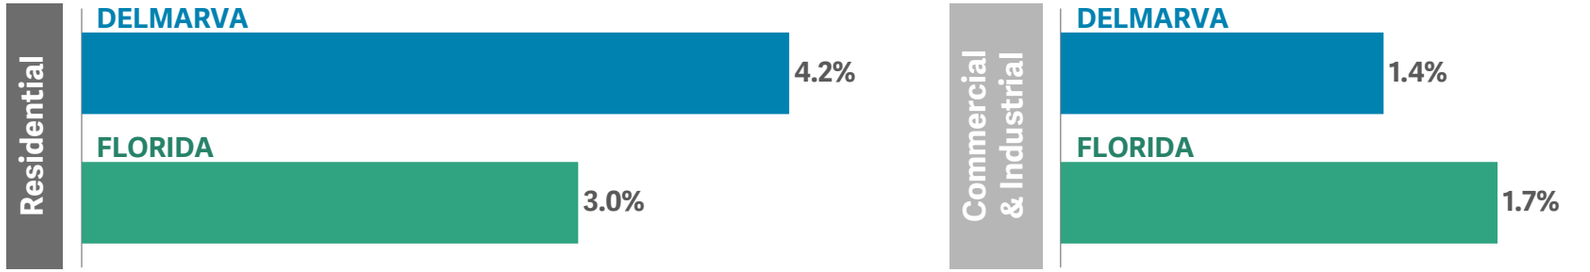
- YTD 2025 CapEx of **$213 million**
- New 2025 CapEx Guidance: **$375 - $425 million**
  - **$50 million** increase from prior range



[1] *See appendix for a reconciliation of non-GAAP metrics.*

Natural Gas Demand Growth Continues

YTD Average Customer Growth: 2025 vs 2024, Generating $4M of Incremental Gross Margin



In Middletown, DE we have added 10+ multifamily buildings, representing over 350 units in the last few years.

Newfield Farm-to-Table Community in Palm City, Florida

Executing on Our Long-Term Growth Plan

Recent Capital Deployment Highlights

Capital projects are on track and on budget, with 6 major projects and 250+ small-scale projects in-service in the first half of 2025…

YTD In-Service Capital Projects[1]

- Boynton Beach
- Brevard RNG
- Indian River RNG
- Medley RNG
- St. Cloud Expansion Project
- New Smyrna Beach
- 250+ Distribution-scale projects

Incremental Transmission Margin

Q2 2025	FY 2025	FY 2026
$2.5M	$9.8M	$9.9M

… plus new projects and incremental capital investment driving a ~$50M increase in full-year 2025 capital expenditures.

Incremental Investments in 2025

CapEx	Project
~$20M	New Infrastructure Projects
~$10M	Higher WRU Spend
~$10M	Increased Marlin Investment
~$10M	Port St. Lucie Facilities
~$50M	Overall Increase

CPK's First Project Serving Data Centers: Duncan Plains in Ohio

July 2025

ASPIRE ENERGY EXPRESS

Aspire Energy Express (AEX) entered into an agreement with American Electric Power (AEP) to construct and operate a **natural gas pipeline to serve a new fuel-cell facility that will power a data center** in Ohio.

Project reflects a capital investment of **$10 million** and is expected to be fully operational in **1H 2027**.

[1] *May reflect interim in-service status using Marlin Virtual Pipeline Services while construction is being completed.*

Worcester Resiliency Upgrade (WRU) Project

$100 million FERC-approved LNG storage facility in Bishopville, MD: 500K gallons of storage across five tanks to meet incremental natural gas demand in Southern Delaware, Maryland and beyond

RECENT PROJECT UPDATES:

- **May 2025:** Announced a $20 million increase to expected capital investment and shifted the expected in-service date to Q2 2026
- **June 2025:**
  - Tank transportation was completed successfully; **all five tanks now on-site** and ready for construction
  - Filed a request with FERC for updated rates to recover the incremental capital investment; approval received on July 28, 2025, resulting in **$3.9M of additional full-year margin**
- **July 2025:**
  - Formally mobilized construction contractor to begin site work
  - Received an **initial Notice to Proceed** from FERC to begin site preparation and construction

Transmission Projects Advance to Meet Demand

Unregulated Businesses	$20M
Technology Transformation	$90M
Total Identified & Ongoing Capital	~$1.4B

>70%

capital spend with existing regulatory approvals or recovery mechanisms

Potential Projects on the Horizon

- Natural gas transmission expansions to support **demand in Delaware and Cecil County, MD** along I-95 expansions to serve growth in retail warehouse and distribution centers
- Expansions in the southern end of the Delmarva system, including to **Virginia's Eastern Shore space and agricultural industries**
- Natural gas expansion for **Florida's Space Coast** to serve cruise, space and port industries
- Natural gas **expansion in South Florida** to add capacity and resiliency in the greater Miami area
- Additional **RNG and Marlin virtual pipeline transportation** opportunities across our service areas
- Additional natural gas transmission **expansions in Ohio to serve data centers** and serve population growth

Final Orders Reached on All Rate Cases

$ millions

Active Filings	2025 Margin	2026 Margin	Status
Maryland Rate Case *Docket #9722*	**$2.0**	**$3.5**	**April 2025:** Received Final Order approving annual revenue increase of $3.5M
Delaware Rate Case *Docket #24-0906*	**$4.0**	**$6.1**	**June 2025:** Received Final Order approving annual revenue increase of $6.1M[1]
FPU Electric Rate Case *Docket #20240099*	**$7.1**	**$8.6**	**July 2025:** Received Final Order approving annual revenue increase of $8.6M
Total	**$13.1**	**$18.2**	***39% growth in 2026 over FY 2025***

[1] *Phase II underway to finalize rate design; not expected to impact amount of rate increase.*

FCG Depreciation Study

Docket # 20250035

- **February 2025:** Requested a reduction in depreciation expense of ~$1M based on updated asset lives and a 2-year amortization of the remaining excess depreciation reserve of $27.3M
  - Reflects a return to our standard way of recovering excess depreciation
- **August 2025:** Excess reserve was revised to $22.4M to reflect updated useful lives for asset classes

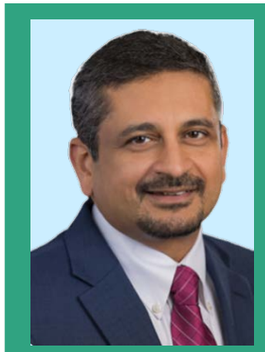
Current Procedural Schedule

February 2025	• Updated depreciation study filed; requested effective back to January 1, 2025
April 2025	• Office for Public Counsel (OPC) files Motion for Reconsideration
June 2025	• PSC Staff recommends denial of Motion for Reconsideration; OPC files Motion to Dismiss
August 2025	• Staff Recommendation on Motion to Dismiss expected
September 2025	• Commission Hearing expected for Motions for Reconsideration & Dismissal
Late September 2025	• PSC Staff Recommendation on Depreciation Study
Q4 2025	• Commission Agenda and Order

Business Transformation Supports Growth

Technology Supports our "One Company" Approach

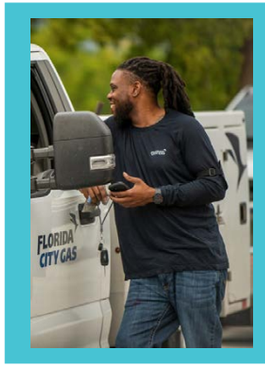
- **Implementing the Technology Roadmap**
  - Operational programs, upgrades and cyber security
- **1CX SAP System Implementation Complete**
  - Full company now integrated on a single regulated customer billing system, standardizing service and operations
- **Expanding the Safety Data Management System (SDMS) capabilities**
  - Damage Prevention module
  - Strengthening our emergency and incident response functionality
- **Initiating a multi-year, company-wide Enterprise Resource Plan**
  - Builds upon the SAP foundation established with the 1CX implementation; establishes a foundation for future growth
  - Enhances processes that drive efficiencies across the organization
  - Expands data reporting and analytics to guide business decisions



June 2025

Appointed Abhijit "Abhi" Bhatwadekar as VP, Chief Information Officer

With industry / technology expertise, Abhi will align technology initiatives with business objectives, focusing on strategy & operational excellence.



July 2025

Concluded the Florida City Gas Transition Services Agreement (TSA) with NextEra Energy

This marks the final step of formal systems integration and brings all FCG ongoing operations fully under CPK management.

Engaging with All Stakeholders

May 2025: Published 3rd Micro-Sustainability Report

July 2025: Received Corporate Governance Award

For the third time and the second year in a row, CPK was named Best in the U.S. for Corporate Governance by World News Media Ltd.'s publication World Finance. This recognizes our steadfast commitment to fostering a values-driven culture and upholding accountability.

YTD Community Investment

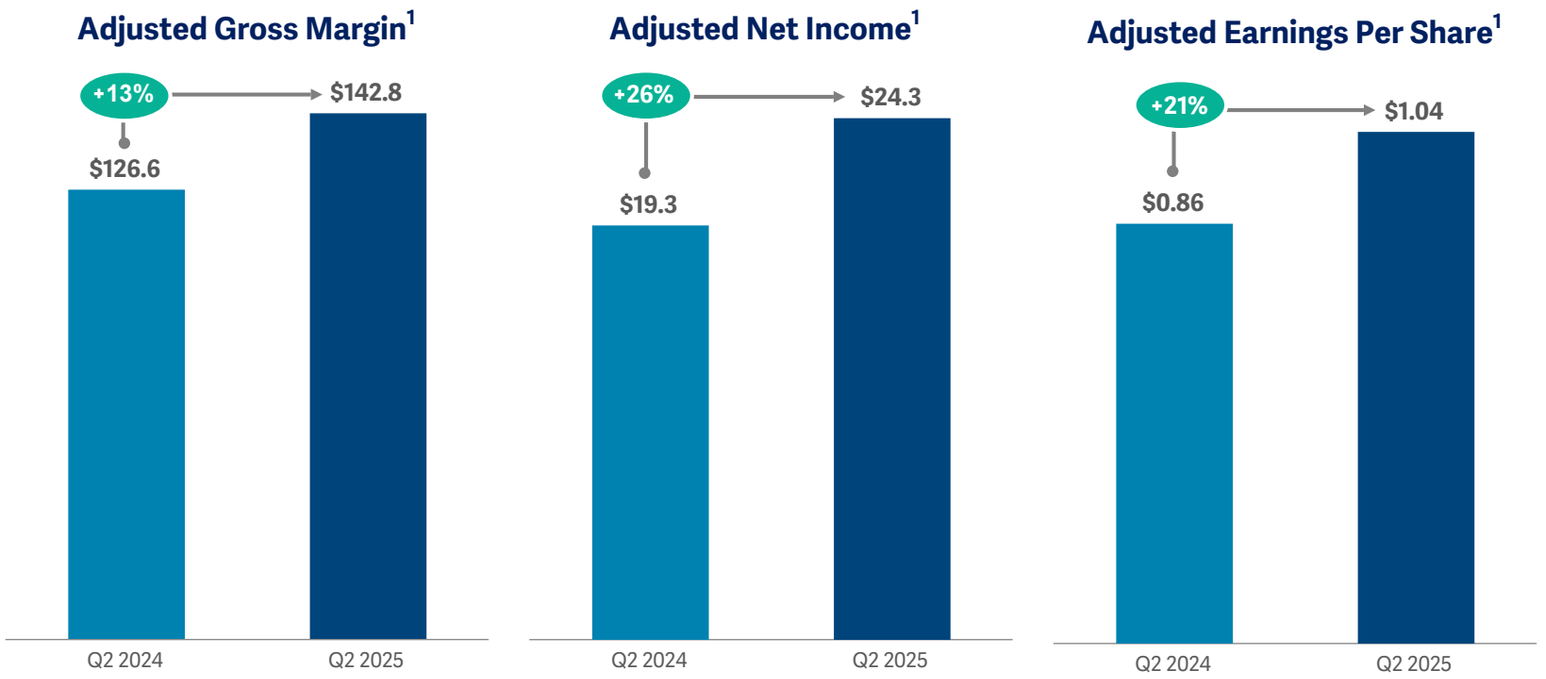
Q2 2025 Demonstrates Continued Growth

Incremental growth in Adjusted Gross Margin, Adjusted Net Income & Adjusted Earnings Per Share[1]

$ millions except per share amounts

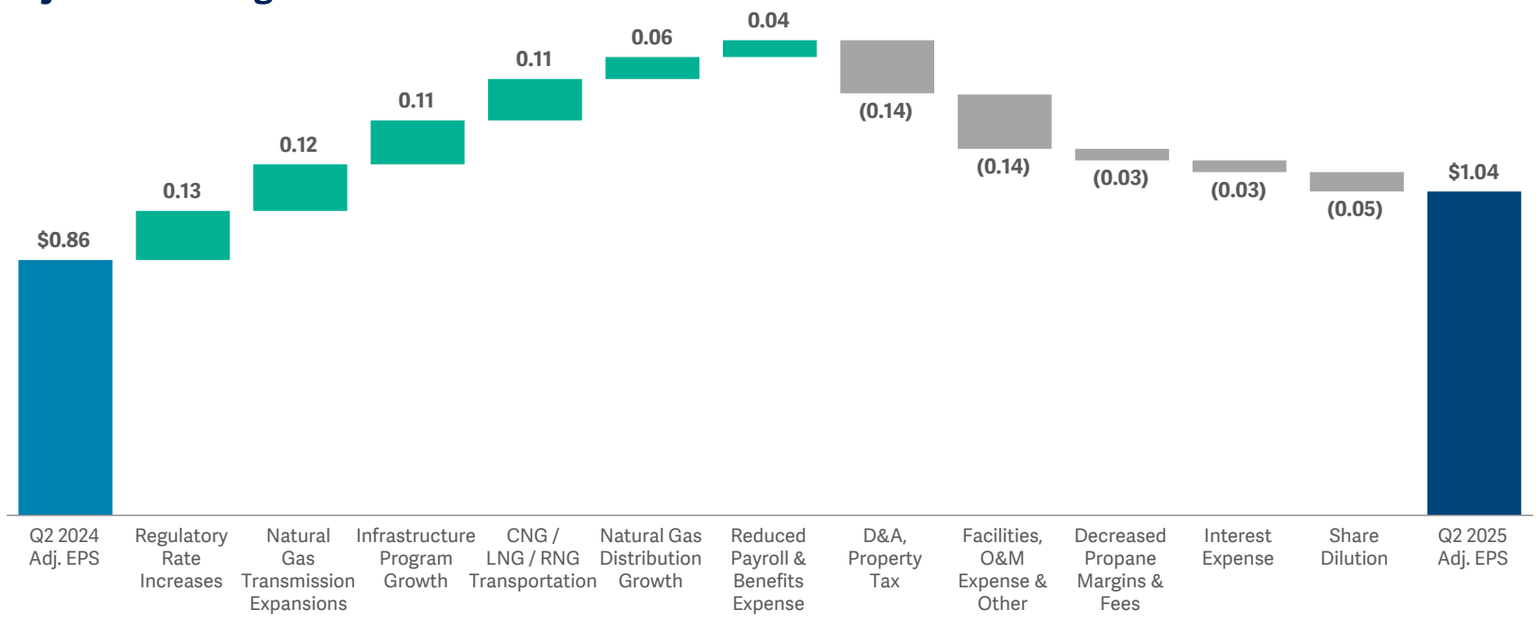


[1] *See appendix for a reconciliation of non-GAAP metrics.*

Q2 2025 Key Performance Drivers

Adjusted EPS for the second quarter benefited from rate increases, natural gas transmission, distribution and infrastructure growth and virtual transportation and RNG production

Adjusted Earnings Per Share[1]



[1] *See appendix for a reconciliation of non-GAAP metrics.*

Regulated Operations Margin Growth Continues

Investments in transmission, distribution & infrastructure drive double-digit Regulated Operations growth

Adjusted Gross Margin[1]

Operating Income

Note: Dollars in millions.
[1]See appendix for a reconciliation of non-GAAP metrics.

Unregulated Adj. Gross Margin Growth of 7%

$3.5M of Adj. Gross Margin Growth driven by Marlin Virtual Pipeline and Full Circle Dairy Operations

Adjusted Gross Margin[1]

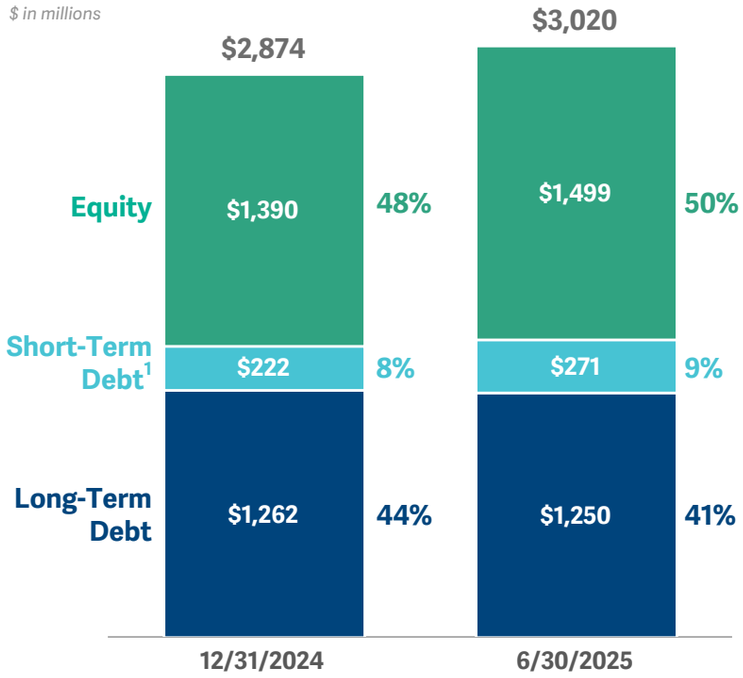
- **$3.5 million** of increased margin from:
  - Continued growth in our Marlin Virtual Pipeline Services
  - Incremental contribution from Full Circle Dairy operations
- Increased operating expenses, including higher depreciation and property taxes, led to an Operating Loss[2] of **$1.5 million**

Note: Dollars in millions. [1]See appendix for a reconciliation of non-GAAP metrics. [2] Operating results for the second and third quarters historically have been lower due to reduced customer demand during warmer periods of the year. The impact to operating income may not align with the seasonal variations in adjusted gross margin as many of the operating expenses are recognized ratably over the course of the year.

Executing on Our Financing Strategy

Exceeded $3B of total book capitalization for the first time

Total Capitalization



Equity Issuances & Shares Outstanding

- **Reached target equity-to-capital of 50%**
- **$66.2M** equity issued YTD through **6/30/2025**

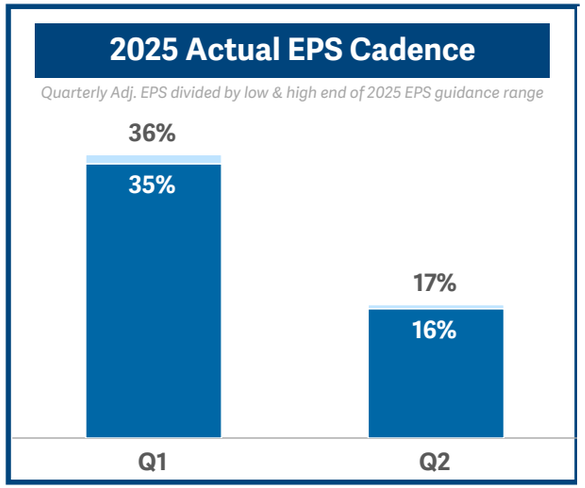
- Maintaining Our Financial Discipline
- Achieving EPS & Capital Guidance

Top-Quartile Growth & Total Shareholder Return

APPENDIX Additional Information

Quarterly Earnings Cadence

There are several factors that shift the cadence of our quarterly earnings profile in 2025.



Shift in earnings cadence driven by:

- Timing of in-service dates for major capital projects, which is more heavily weighted in Q3 / Q4 2025
- Timing of RSAM Adjustments versus timing and outcome of FCG Depreciation Study

Historical Actual EPS Quarterly Distribution

Year	Q1	Q2	Q3	Q4
2024[1]	39%	16%	15%	30%
2023[1]	38%	17%	13%	31%
2022	41%	19%	11%	29%
2021	41%	16%	15%	27%
2020	42%	15%	13%	29%
5-Year Average	39%	17%	14%	31%

[1]*Adjusted EPS starting in Q3 2023, which excludes transaction and transition-related expenses incurred attributable to the acquisition of FCG. See appendix for a reconciliation of non-GAAP metrics.*

FOR IMMEDIATE RELEASE
August 7, 2025
NYSE Symbol: CPK

CHESAPEAKE UTILITIES CORPORATION REPORTS SECOND QUARTER 2025 RESULTS

- **Net income and earnings per share ("EPS")* were $23.9 million and $1.02, respectively, for the second quarter of 2025 and $74.8 million and $3.22, respectively, for the six months ended June 30, 2025**
- **Adjusted net income and Adjusted EPS**, which exclude transaction and transition-related expenses attributable to the acquisition and integration of Florida City Gas ("FCG"), were $24.3 million and $1.04, respectively, for the second quarter of 2025 and $75.4 million and $3.25, respectively, for the six months ended June 30, 2025**
- **Adjusted gross margin** growth of $16.2 million and $34.1 million, respectively, for the three- and six-month periods ended June 30, 2025 driven by natural gas organic growth and transmission expansion projects, regulatory initiatives and infrastructure programs, increased compressed natural gas, renewable natural gas and liquified natural gas services, and increased customer consumption**
- **Continued to execute the Company's 2025 financing plan by issuing equity and increasing debt capacity, including a $200 million long-term debt agreement in August 2025**
- **Re-affirming 2025 Adjusted EPS guidance of $6.15 - $6.35, which assumes a successful outcome on the FCG Depreciation Study**
- **The Company is increasing its 2025 capital guidance range to $375-$425 million in light of advances on various capital projects**
- **The Company continues to affirm 2028 EPS and 2024-2028 capital expenditure guidance**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the three and six months ended June 30, 2025.

Net income for the second quarter of 2025 was $23.9 million ($1.02 per share) compared to $18.2 million ($0.82 per share) in the second quarter of 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, adjusted net income was $24.3 million, or $1.04 per share compared to $0.86 per share reported in the same prior-year period. This resulted in EPS and adjusted EPS growth of 24.4 percent and 20.9 percent, respectively, compared to the second quarter of 2024.

Adjusted earnings for the second quarter of 2025 were largely driven by contributions from regulatory initiatives and infrastructure programs, organic growth in the natural gas distribution businesses and pipeline expansion projects driven by natural gas demand and increased compressed natural gas (CNG), renewable natural gas (RNG) and liquified natural gas (LNG) services.

During the first half of 2025, net income was $74.8 million ($3.22 per share) compared to $64.4 million ($2.89 per share) in the prior-year period. Excluding the transaction and transition-related expenses, adjusted net income was $75.4 million ($3.25 per share) compared to $66.1 million ($2.96 per share) for the same period in 2024. This resulted in EPS and adjusted EPS growth of 11.4 percent and 9.8 percent, respectively, compared to the prior-year period.

Year-to-date adjusted earnings for 2025 were primarily impacted by the factors discussed for the second quarter as well as additional adjusted gross margin from increased customer consumption experienced earlier in the year.

“Our second quarter 2025 results demonstrate yet another outstanding quarter of growth and solid execution by the team. Adjusted Gross Margin increased by 13 percent, which, alongside operational efficiency improvements, resulted in Adjusted EPS up 21 percent relative to the second quarter of 2024. This performance reinforces our ability to operate our regulated and unregulated businesses safely and efficiently to meet the rising demand for natural gas across the communities we serve,” said Jeff Householder, the Company’s Chair of the Board, President and Chief Executive Officer.

“We also continued to make significant progress within each of the three pillars of our growth strategy, starting with year-to-date capital deployment of $213 million, which enabled us to raise our full-year 2025 capital expenditure guidance by $50 million to $375 - $425 million. Our regulatory successes included resolution of all three active rate cases as well as FERC issuing a notice to proceed with site preparation work and approving updated rates for the Worcester Resiliency Upgrade project which will drive an additional $3.9 million of margin once the facility is in service. And finally, we made further strides in transforming the business for our next stage of growth as we concluded the Transition Services Agreement for FCG, expanded our debt capacity on multiple fronts and reached our target equity capitalization of 50 percent.”

Earnings and Capital Investment Guidance

The Company continues to re-affirm its 2025 EPS guidance range of $6.15 to $6.35 per share, which includes approval of the pending FCG excess depreciation filing. The Company also continues to re-affirm the 2028 EPS guidance range of $7.75 to $8.00 per share.

The Company also continues to re-affirm its capital expenditure guidance range for the five-year period ended 2028 of $1.5 billion to $1.8 billion and has increased its projected guidance range for 2025 to $375 million to $425 million given its investments to date and expected level of spending in the second half of 2025.

**Unless otherwise noted, EPS and Adjusted EPS information are presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered*

3-3-3-3

together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Earnings Per Share - Diluted (GAAP)	**$ 1.02**	$ 0.82	**$ 3.22**	$ 2.89
FCG transaction and transition-related expenses, net (1)	**0.02**	0.04	**0.03**	0.07
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 1.04**	$ 0.86	**$ 3.25**	$ 2.96

(1) Transaction and transition-related expenses represent non-recurring costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transition services, consulting, system integration, rebranding, and legal fees.

Operating Results for the Quarters Ended June 30, 2025 and 2024

Consolidated Results

(in millions)	Three Months Ended June 30, 2025	Three Months Ended June 30, 2024	Change	Percent Change
Adjusted gross margin**	**$ 142.8**	$ 126.6	$ 16.2	12.8 %
Depreciation, amortization and property taxes	**31.2**	26.7	(4.5)	(16.9)%
Other operating expenses	**60.8**	57.7	(3.1)	(5.4)%
FCG transaction and transition-related expenses	**0.5**	1.4	0.9	NMF
Operating income	**$ 50.3**	$ 40.8	$ 9.5	23.3 %

Operating income for the second quarter of 2025 was $50.3 million, an increase of $9.5 million or 23.3 percent compared to the same period in 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $8.6 million or 20.4 percent compared to the prior-year period. The increase in adjusted gross margin in the second quarter of 2025 was driven by incremental margin from regulatory initiatives and infrastructure programs, pipeline expansion projects, increased CNG, RNG and LNG services and natural gas organic growth. Operating expenses were driven largely by the absence of a reserve surplus amortization mechanism ("RSAM") adjustment from FCG (representing $2.3 million in the second quarter of 2024), higher depreciation

6-6-6-6

attributable to growth projects and expenses associated with facilities, maintenance and outside services. These increases were partially offset by reduced payroll, benefits and other employee-related expenses compared to the prior-year period.

Regulated Energy Segment

	Three Months Ended June 30,			
(in millions)	**2025**	**2024**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 117.7**	$ 103.3	$ 14.4	13.9 %
Depreciation, amortization and property taxes	**25.5**	22.8	(2.7)	(11.8)%
Other operating expenses	**39.9**	38.6	(1.3)	(3.4)%
FCG transaction and transition-related expenses	**0.5**	1.4	0.9	NMF
Operating income	**$ 51.8**	$ 40.5	$ 11.3	27.9 %

The key components of the increase in adjusted gross margin** are shown below:

(in millions)	
Rate changes associated with recent rate case activities [(1)]	$ 4.1
Natural gas transmission service expansions, including interim services	3.9
Contributions from regulated infrastructure programs	3.7
Natural gas growth including conversions (excluding service expansions)	1.8
Changes in customer consumption	1.1
Other variances	(0.2)
Quarter-over-quarter increase in adjusted gross margin**	**$ 14.4**

[(1)] Includes adjusted gross margin contributions from both interim and permanent base rates. Refer to Major Projects discussion for additional information.

The major components of the increase in other operating expenses are as follows:

(in millions)	
Facilities expenses, maintenance costs and outside services	$ (3.1)
Payroll, benefits and other employee-related expenses	1.7
Other variances	0.1
Quarter-over-quarter increase in other operating expenses	**$ (1.3)**

7-7-7-7

Unregulated Energy Segment

(in millions)	Three Months Ended June 30, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 25.0**	$ 23.4	$ 1.6	6.8 %
Depreciation, amortization and property taxes	**5.5**	3.8	(1.7)	(44.7)%
Other operating expenses	**21.0**	19.2	(1.8)	(9.4)%
Operating income (loss)	**$ (1.5)**	$ 0.4	$ (1.9)	NMF

Operating results for the second and third quarters historically have been lower due to reduced customer demand during warmer periods of the year. The impact to operating income may not align with the seasonal variations in adjusted gross margin as many of the operating expenses are recognized ratably over the course of the year.

The major components of the increase in adjusted gross margin** are shown below:

(in millions)	
Propane Operations	
Decreased propane customer consumption	$ (1.3)
Decreased propane margins and service fees	(1.0)
CNG/RNG/LNG Transportation and Infrastructure	
Increased CNG/RNG/LNG services	3.5
Aspire Energy	
Increased customer consumption	0.4
Quarter-over-quarter increase in adjusted gross margin**	**$ 1.6**

The major components of the increase in other operating expenses are as follows:

(in millions)	
Facilities expenses, maintenance costs and outside services	$ (1.2)
Payroll, benefits and other employee-related expenses	(0.4)
Other variances	(0.2)
Quarter-over-quarter increase in other operating expenses	**$ (1.8)**

8-8-8-8

Operating Results for the Six Months Ended June 30, 2025 and 2024

Consolidated Results

(in millions)	Six Months Ended June 30, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 325.2**	$ 291.1	$ 34.1	11.7 %
Depreciation, amortization and property taxes	**62.5**	52.8	(9.7)	(18.4)%
Other operating expenses	**124.8**	115.6	(9.2)	(8.0)%
FCG transaction and transition-related expenses	**0.8**	2.3	1.5	NMF
Operating income	**$ 137.1**	$ 120.4	$ 16.7	13.9 %

Operating income for the six months ended June 30, 2025 was $137.1 million, an increase of $16.7 million compared to the same period in 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $15.2 million or 12.4 percent compared to the prior-year period. The increase in adjusted gross margin in the first half of 2025 was driven by incremental margin from regulatory initiatives and infrastructure programs, increased CNG, RNG and LNG services, pipeline expansion projects, increased customer consumption resulting from year-over-year colder temperatures in our Mid-Atlantic and Ohio service territories and natural gas organic growth. These increases were partially offset by a reduced volume of off system sales and service fees and lower margins per gallon and related fees in our propane distribution business. Higher operating expenses were driven largely by the absence of a RSAM adjustment from FCG (representing $5.7 million during the first half of 2024), higher depreciation attributable to growth projects, increased facilities, maintenance and outside services, and increased payroll, benefits and other employee-related expenses. Additional expenses associated with insurance related costs also contributed to the increase compared to the prior-year period.

Regulated Energy Segment

(in millions)	Six Months Ended June 30, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 245.8**	$ 221.8	$ 24.0	10.8 %
Depreciation, amortization and property taxes	**51.4**	43.8	(7.6)	(17.4)%
Other operating expenses	**81.3**	77.1	(4.2)	(5.4)%
FCG transaction and transition-related expenses	**0.8**	2.3	1.5	NMF
Operating income	**$ 112.3**	$ 98.6	$ 13.7	13.9 %

9-9-9-9

Forward-Looking Statements

Matters included in this release may include forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements. Please refer to the Safe Harbor for Forward-Looking Statements in the Company's 2024 Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the second quarter of 2025 for further information on the risks and uncertainties related to the Company's forward-looking statements.

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Friday, August 8, 2025, at 8:30 a.m. Eastern Time to discuss the Company's financial results for the three and six months ended June 30, 2025. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com. For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.579.2543
International: 785.424.1789
Conference ID: CPKQ225

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

11-11-11-11

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas transmission and distribution, electricity generation and distribution, propane gas distribution, mobile compressed natural gas utility services and solutions, and other businesses.

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and regulatory initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes all major projects and initiatives that are currently underway or recently completed. The Company's practice is to add incremental margin associated with new projects and regulatory initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, as compared to the Company's prior quarterly filings. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's second quarter 2025 Quarterly Report on Form 10-Q.

	Adjusted Gross Margin						
	Three Months Ended June 30,		Six Months ended June 30,		Year Ended December	Estimate for Fiscal

15-15-15-15

Detailed Discussion of Major Projects and Initiatives

Pipeline Expansions

Worcester Resiliency Upgrade

In August 2023, Eastern Shore filed an application with the Federal Energy Regulatory Commission ("FERC") requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, Delaware and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. In January 2025, the FERC approved the project, and construction is expected to be complete in the second quarter of 2026.

In June 2025, Eastern Shore filed a limited amended application with the FERC requesting that it issue an order authorizing revised initial transportation rates for the project. The revised rates were requested to address increased capital costs being incurred related to unanticipated changes in global markets and supply chains. Eastern Shore requested expedited action by the FERC in relation to this matter and an approved order was issued in July 2025. The project is expected to generate $10.2 million in adjusted gross margin in 2026 and $17.6 million in 2027 and thereafter.

East Coast Reinforcement Projects (Boynton Beach and New Smyrna Beach)

In December 2023, Peninsula Pipeline filed a petition with the Florida Public Service Commission ("PSC") for approval of its Transportation Service Agreements with Florida Public Utilities Company ("FPU") for projects that will support additional supply to communities on the East Coast of Florida. The projects are driven by the need for increased supply to coastal portions of the state that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024. New Smyrna Beach was placed into service during May 2025 and construction is projected to be complete for Boynton Beach in the fourth quarter of 2025.

Central Florida Reinforcement Projects (Plant City and Lake Mattie)

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida. The projects are driven by the need for increased supply to communities in central Florida that are experiencing significant population growth. Peninsula Pipeline will construct several pipeline extensions which will support FPU's distribution system around the Plant City and Lake Mattie areas of Florida with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024. The Plant City project was completed in the fourth quarter of 2024, and the Lake Mattie project went into service in July 2025.

Renewable Natural Gas Supply Projects

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of Transportation Service Agreements with FCG for projects that will support the transportation of additional renewable energy supply to FCG. The projects, located in Florida's Brevard, Indian River and Miami-Dade counties, will bring renewable natural gas produced from local landfills into FCG's natural gas distribution system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian River County, and Miami-Dade County. Benefits of these projects include increased gas supply to serve expected FCG growth, strengthened system reliability and additional system

flexibility. The Florida PSC approved the petition at its July 2024 meeting with the projects estimated to be completed in the first half of 2026.

Miami Inner Loop Pipeline Projects
In September 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of the Transportation Service Agreement with FCG for a series of projects that will enhance the infrastructure in Miami-Dade county. The proposed expansion consists of the development of several pipeline projects to support growth and support FCG's distribution system in the area and also enhance FCG's ability to obtain gas from various access points in the Miami-Dade county area. The expansion was approved in February 2025 and the projects are expected to be in service in the third quarter of 2025.

Duncan Plains Pipeline Project
In July 2025, Aspire Energy Express entered into an agreement with American Electric Power to construct and operate an intrastate natural gas pipeline in central Ohio to serve a new fuel-cell facility, which will provide on-site electric power to a data center. This new transmission infrastructure is expected to be in service in the first half of 2027.

Regulatory Initiatives

Maryland Natural Gas Rate Case
In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, the “Maryland natural gas distribution businesses”) filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, the Company sought approval of the following: (i) permanent rate relief of approximately $6.9 million with a return on equity ("ROE") of 11.5 percent; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses; and (iii) authorization to establish a rider for recovery of the costs associated with the Company's new technology systems. In August 2024, the Maryland natural gas distribution businesses, the Maryland Office of People's Counsel (the "Maryland OPC") and PSC staff reached a settlement which provided for, among other things, an increase in annual base rates of $2.6 million. In September 2024, the Maryland Public Utility Judge issued an order approving the related settlement agreement in part. The $2.6 million increase in annual base rates was approved and the Company filed a Phase II filing in November 2024 to determine rate design across the Maryland natural gas distribution businesses, consolidation of the applicable tariffs and recovery of technology costs. The hearing was held in March 2025, during which Phase II was approved, including an additional $0.9 million in revenue requirement, for a total cumulative increase of $3.5 million. A final order was issued in April 2025 and included approval of the consolidation of the operations and the assets of CUC-Maryland Division, Sandpiper Energy, and Elkton Gas into one entity which was renamed and will operate as Chesapeake Utilities of Maryland, Inc.

Maryland Natural Gas Depreciation Study
In January 2024, the Company's natural gas distribution businesses in Maryland filed a joint petition for approval of its proposed unified depreciation rates with the Maryland PSC. A settlement among the Company, PSC staff and the Maryland OPC was reached and the final order approving the related settlement agreement went into effect in July 2024, with new depreciation rates effective as of January 1, 2023. The approved depreciation rates resulted in an annual reduction in depreciation expense of approximately $1.2 million.

17-17-17-17

Delaware Natural Gas Rate Case

In August 2024, the Company's Delaware natural gas division filed an application for a natural gas rate case with the Delaware PSC seeking approval of the following: (i) permanent rate relief of approximately $12.1 million with a ROE of 11.5 percent; (ii) proposed changes to depreciation rates which were part of a depreciation study also submitted with the filing; and (iii) authorization to make certain changes to tariffs. Annualized interim rates were approved by the Delaware PSC in the amount of $2.5 million and became effective in October 2024. A settlement among the Company, PSC staff and the Delaware Division of the Public Advocate was reached and approved by the Delaware PSC in June 2025 providing an annual revenue increase of $6.1 million, as well as dividing the rate case into two phases. Rates set to recover the approved components of the increase were effective in March 2025. Phase II of the rate case which will address tariff-related changes including rate design began in July 2025.

FPU Electric Rate Case

In August 2024, the Company's Florida Electric division filed a petition with the Florida PSC seeking a general base rate increase of $12.6 million with a ROE of 11.3 percent based on a 2025 projected test year. Annualized interim rates of approximately $1.8 million were approved with an effective date of November 1, 2024. In March 2025, the Florida PSC approved the permanent rate increase, but the order was subsequently protested. In May 2025, the Company reached a settlement agreement with the interested parties to resolve all outstanding issues in its current base rate case, which was filed as a joint motion for approval with the Florida PSC. This settlement which was approved by the Florida PSC in July 2025, provides for a total revenue increase of approximately $8.6 million on an annual basis, with $1.0 million of the increase deferred from the first year's base rate increase and recovered over three years. A step up rate increase was also approved for up to $0.7 million, upon completion of the purchase and refurbishment of certain substations, which is expected in December 2026.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

Weather was not a significant factor to adjusted gross margin in the second quarter of 2025 compared to the same period in 2024.

For the six months ended June 30, 2025, increased customer consumption, which includes the effects of colder weather conditions, largely in our Ohio and Delmarva service areas, compared to the prior-year period resulted in a $5.7 million increase in adjusted gross margin.

The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the three and six months ended June 30, 2025 and 2024.

18-18-18-18

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula increased by approximately 4.4 percent and 4.2 percent, for the three and six months ended June 30, 2025, respectively, while the Company's Florida natural gas distribution service territories increased by approximately 2.9 percent and 3.0 percent, for the three and six months ended June 30, 2025, respectively.

The details of the adjusted gross margin increase are provided in the following table:

	Three Months Ended June 30, 2025		Six Months Ended June 30, 2025	
(in millions)	**Delmarva Peninsula**	**Florida**	**Delmarva Peninsula**	**Florida**
Customer Growth:				
Residential	$ 0.3	$ 0.7	$ 0.9	$ 1.8
Commercial and industrial	0.1	0.7	0.2	1.1
Total Customer Growth	**$ 0.4**	**$ 1.4**	**$ 1.1**	**$ 2.9**

19-19-19-19

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $212.8 million for the six months ended June 30, 2025. The following table shows a range of the forecasted 2025 capital expenditures by segment and by business line:

	2025	
(in millions)	**Low**	**High**
Regulated Energy:		
Natural gas distribution	$ 145.0	$ 155.0
Natural gas transmission	155.0	175.0
Electric distribution	35.0	45.0
Total Regulated Energy	335.0	375.0
Unregulated Energy:		
Propane distribution	10.0	15.0
Energy transmission	10.0	12.0
Other unregulated energy	13.0	15.0
Total Unregulated Energy	33.0	42.0
Other:		
Corporate and other businesses	7.0	8.0
Total 2025 Forecasted Capital Expenditures	**$ 375.0**	**$ 425.0**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing political and economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital. During the second quarter of 2025, the Company increased its projected guidance range for 2025 and now expects a range of between $375.0 million to $425.0 million given its investments to date and expected level of spending in the second half of 2025.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 50 percent as of June 30, 2025.

Tate Sullivan - Maxim Group LLC, Research Division
Paul Fremont - Ladenburg Thalmann & Co. Inc., Research Division
Alexis Kania - BTIG, LLC, Research Division

Presentation

Operator

Welcome to Chesapeake Utilities Corporation's Third Quarter 2025 Earnings Conference Call. [Operator Instructions]

I would now like to turn the call over to Lucia Dempsey, Head of Investor Relations.

Lucia Dempsey
Head of Investor Relations

Thank you, and good morning, everyone. Today's presentation can be accessed on our website under the Investors page and Events and Presentations subsection. After our prepared remarks, we will open up the call for questions.

On Slide 2, we show our typical disclaimers, while I remind you that matters discussed on this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results. The safe harbor for forward-looking statements section of our 2024 annual report on Form 10-K and in our third quarter Form 10-Q provide further information on the factors that could cause such statements to differ from our actual results.

Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share, and the information presented today includes the appropriate disclosures in accordance with the SEC's Regulation G. A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation, our earnings release and our third quarter Form 10-Q.

Here at Chesapeake Utilities, safety is our first priority. We start all meetings with a safety moment, and we'll do so here with a moment on kitchen and fire safety as highlighted on Slide 3. The holidays are coming up, which often means more time gathering together and cooking with friends and family.

This makes it a great time to remember safe kitchen practices, particularly as Thanksgiving is the leading day for home cooking fires. Be extra vigilant and aware to keep kids, pets and flammable materials away from heat and open flames, ensure any burned food or materials are completely saturated with water before throwing away and remember to use a metal lid, sheet pan, baking soda, salt or a fire blanket to extinguish grease fires.

I'll now introduce our presenters today. Jeff Householder, Chair of the Board, President and Chief Executive Officer, will provide an update on this quarter's key accomplishments and highlights, our full year guidance metrics and our capital growth program. Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer, will provide updates on our regulatory activity, our ongoing business transformation efforts and our stakeholder engagement.

And Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary, will discuss our financial results, financing updates and investment highlights.

With that, it's my pleasure to turn the call over to Jeff.

Jeffrey Householder
President, CEO & Chairman

Thank you, Lucia, and good morning. We appreciate you joining our discussion today. The highlights on Slide 5 demonstrate how we've continued to deliver with purpose over the last few months. Our growth trajectory continues, and we've expanded our capital investment program.

A number of our 2025 projects are already in service and producing significant margin. We've finalized multiple positive regulatory filings and strengthened our balance sheet in support of future growth. As shown on Slide 6, we reported adjusted earnings per share of $0.82 for the third quarter of 2025 and $4.06 year-to-date, an 8% increase over the same period last year.

As you know, the third quarter always contributes the smallest percentage of our full year earnings, so my remarks will focus on our performance in the first 9 months of 2025. Year-to-date, we've achieved double-digit growth in adjusted gross margin, operating income and adjusted net income relative to the same period in 2024. That performance is a testament to our focus on driving growth, effectively working with our regulators and operating efficiently to meet our customers' needs.

Our results continue to align with our expectations. So we are reaffirming our full year 2025 EPS guidance of $6.15 to $6.35 per share, as shown on Slide 7. As we've previously indicated, this EPS range does assume we reach a successful outcome for 2025 in the FCG depreciation study proceeding, which Jim will discuss further on today's call. On the capital investment side, we continue to invest capital at a run rate of over $1 million a day with $336 million already invested in the first 9 months of this year, including $123 million invested in the third quarter.

Given this pace, we are again increasing our 2025 full year capital expenditure guidance to $425 million to $450 million, a $25 million increase over the top end of our prior range. I'll now shift to Slide 8 to discuss the increase in customer demand for natural gas that's driving our strategic investment in some of the fastest-growing regions of the country.

Both of our core service areas generated another quarter of above-average residential customer growth, 4.3% in Delmarva, 3.9% for Florida Public Utilities and 2.1% for Florida City Gas. I'll mention just a couple of examples to illustrate the demand for natural gas across our service areas. We're in the early stages of building out natural gas distribution for an underserved area in Southern Delaware that includes 2,000 new homes in Ellendale, Delaware.

We also recently became the natural gas provider for a new community development in Port St. Lucie, Florida, which has begun to construct the first of 6 phases of what will ultimately be a community with hundreds of new homes. Last month, we also expanded propane distribution to a fleet of Greensboro school district buses, which confirms our broader propane growth strategy in North Carolina.

We also see additional growth opportunities in Ohio, which has become fifth in the nation for data center potential as ranked by Ohio's Economic Development Corporation. The Ohio opportunity is supported by significant natural gas production in the state and constructive governmental and regulatory frameworks. The opportunities we have to serve increasing customer demand, improve system reliability and operate efficiently are the basis for our overall growth strategy, which in turn drives sustainable earnings.

We remain committed to increasing shareholder value by focusing on the 3 pillars of our growth strategy, as shown on Slide 9, prudently deploying capital, proactively managing our regulatory agenda and continually transforming our business operations to enhance safety and customer service and support future growth.

Successful execution of these 3 pillars will enable us to maintain top quartile growth and total shareholder return. Slide 10 provides some highlights of our 2025 capital program. Construction projects overall remain on track and on budget and more than 400 gas distribution projects have been placed in service through the first 9 months of this year.

Most importantly, this capital investment is generating significant gross margin, $14 million in the third quarter, nearly $34 million in the first 9 months of this year and $50 million expected for full year 2025. Given our pace of investment thus far and our additional opportunities ahead, we are again increasing our full year 2025 capital expenditure guidance, adding $25 million to the top end of our prior range for an updated range of $425 million to $450 million.

Approximately $15 million of the increase is related to initial spending on our multiyear enterprise resource planning process and about $10 million is related to recently approved Eastern Shore natural gas system improvements. This updated range reflects capital investment of approximately $800 million between last year and this year, a significant increase that reflects the many growth opportunities across all our businesses.

I'll now provide an update on WRU, our LNG storage facility in Bishopville, Maryland, as shown on Slide 11. Construction is well underway. Tanks are in place. We've been pouring a lot of concrete. The system control building has been erected and the majority of the equipment needed to complete the facility is now on site. Last month, we also successfully completed our first PHMSA inspection.

This project remains the lowest cost infrastructure option to deliver affordable energy and protect against weather-related disruptions in the southernmost portion of our Delmarva service area. We continue to target bringing the project online in mid-2026, dependent on construction completion and final FERC approval. As shown in detail on Slide 12, all of our major transmission capital projects are advancing as expected with more than half now in service.

We forecast these projects to contribute approximately $23 million of gross margin in 2025 and double that amount or $46 million in 2026. Shifting to Slide 13. The capital projects included on this slide support our 5-year capital investment plan of $1.5 billion to $1.8 billion through 2028. At this point, we've identified at least $1.4 billion of the capital plan with a number of projects already in service or under construction.

Most importantly, approximately 70% of that investment requires no additional regulatory approval or support. Not yet included in this forecast is the investment in our full ERP project as well as a number of projects that are still under exploration and development, as shown on Slide 14.

We continue to explore a number of additional potential expansion opportunities, including serving the space industries in Virginia and Florida, expanding our systems in the southern part of Delmarva and Florida and meeting incremental demand for our Marlin virtual pipeline services to transport RNG, CNG and LNG.

In just the last 2 weeks, I met with Florida Governor DeSantis and members of our leadership and external affairs teams have met with the Maryland and Delaware governors and their teams. We continue to partner with local state and federal electric representatives to advance the design and construction of much needed energy infrastructure in those states.

Maintaining strong relationships with all stakeholders and actively participating in energy coalitions advocating for a resilient and affordable energy future is key to driving these expansion projects forward to meet growing energy demand for years to come.

With that, I'll turn to Jim to discuss our regulatory strategy and business transformation initiatives.

James Moriarty
Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer

Thank you, Jeff, and good to be with you all this morning. I'll start with Slide 15 as I provide some updates on our regulatory activity. After a great deal of effort, we now have permanent rates in effect for our Delaware, Maryland and Florida electric jurisdictions following successful conclusion of the 3 rate cases that we filed last year.

Last month, we also reached settlement on the rate design and tariff-related elements of the Delaware rate case. And on October 15, the Delaware Commission approved that settlement. Altogether, updated rates are driving $13.1 million of margin this year and $18.2 million of margin in 2026, a testament to our proactive strategy, constructive relationships with regulators and our highly diligent and dedicated internal regulatory team.

Slide 16 provides an update on the one remaining regulatory filing still outstanding, our traditional depreciation study filing for Florida City Gas. Following unexpected regulatory delays, we agreed to amend the filing from a proposed agency action or PAA proceeding to a standard hearing process. This transition provides for a more structured and traditional process for consideration of the filing and an updated schedule.

Under the new schedule, the company submitted testimony in early October, restating our request for a 2-year amortization of the excess depreciation reserve retroactive to January 1, 2025. Per the filing we made earlier this week alongside updated testimony, the excess reserve is now $19 million, primarily reflecting updates to expected useful lives for certain asset classes.

On Wednesday, the State of Florida Office of Public Counsel filed testimony objecting to the company's proposal and recommending that the existing depreciation rates remain in effect until the company files a new depreciation study as part of a rate case at a future date. The company will be filing rebuttal testimony later this month to address these arguments. Staff testimony will follow next week, and the hearing is scheduled for December 11.

The process is expected to conclude no later than February 2026, but could be completed earlier if all parties are able to reach a settlement. We are focused on securing successful recovery of the excess depreciation to support our 2025 full year results and will provide future updates as available. I'll now turn to Slide 17 to provide an update on our business transformation efforts, which is the third pillar in our growth strategy for a reason.

Transformation is the engine that enables technology, systems and processes to evolve in order to maintain our track record of growth as we become a much larger organization. In the last few months, we've continued to make strides with upskilling our team, including attracting additional talent in finance, strategic planning, information technology, change management and human resources.

We are completing the final preparation stages of our enterprise resource critical project that will have significant transformational impacts across the organization as we implement improvements in asset management, supply chain, human resources, accounting and finance. We expect to invest approximately $15 million in this project this year, and we'll provide total capital spend for this multiyear project on our next call.

Slide 18 provides a couple of updates on our engagement with stakeholders. In September, we were pleased to welcome Lisa Eden as our newest member of the Board of Directors. Lisa brings extensive experience in finance, strategic planning, talent management and information technology, having recently retired as Senior Vice President and Chief Financial Officer at TXNM Energy, Inc.

We look forward to Lisa's valuable insights and contributions in the years to come. We were also honored to receive several recognitions in the last few months. First, our Delmarva natural gas distribution business and our Sharp Energy propane distribution business were recognized as Stars of Delaware as voted by the Delaware Daily State News readers.

Second, Chesapeake Utilities was also named a 2025 Champion of Board Diversity for the third consecutive year by the Forum of Executive Women. And finally, we were named Employer Champion of the Year for Kent County by the Delaware Department of Labor State Rehabilitation Council. These awards reflect our unbroken commitment to excellence and inclusion of all members of our communities as we provide reliable and affordable energy solutions that enable families, businesses and the communities we serve the opportunity to flourish.

Our colleagues also continue to support the communities in which they live and work through the contribution of their time and resources. Through September, our teammates have volunteered over 1,500 hours and have contributed over $488,000 in charitable donations and corporate sponsorships, supporting organizations that align with our 4 focus areas of giving: safety and health, community development, education and environmental stewardship.

With that, I will turn the call to Beth for a more detailed discussion of our financial results.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Thanks, Jim, and good morning, everyone. As shown on Slide 19, our financial results for the third quarter of 2025 continue to demonstrate steady growth that supports our full year growth targets. Adjusted gross margin was approximately $137 million, up 12% and adjusted net income was approximately $20 million, up 8% from the third quarter of 2024.

We also sustained growth in adjusted earnings per share of $0.82, a 3% increase over the third quarter of last year, which includes an increase of 1 million more shares outstanding compared with a year ago. I'll now provide some additional detail on the key drivers of our third quarter performance as shown on the adjusted EPS bridge on Slide 20. Continued demand for natural gas drove $0.22 of incremental adjusted EPS, including $0.17 related to transmission capital projects and $0.05 of distribution growth across our service areas.

Margin from our infrastructure program investments contributed an additional $0.12 per share this quarter and permanent rates from our 3 rate cases added $0.11 in third quarter 2025 adjusted EPS. Our unregulated businesses generated net incremental earnings of $0.09 per share, largely driven by continued growth in our Marlin Virtual Pipeline transportation business.

These gains were partially offset by a few factors, including $0.14 per share of increased depreciation and amortization expense, driven by growth in total assets as we actively deploy capital and $0.10 again from the absence of an RSAM benefit recorded in the third quarter of 2024. We also incurred additional operating expenses of $0.12 per share this quarter, driven by incremental facilities, maintenance, insurance and employee-related expenses.

However, we continue to drive operational efficiencies, leading to operational expenses at only 34% of adjusted gross margin in the third quarter of 2025 relative to 37% in the same period last year. Our results were also impacted by 15% fewer cooling degree days this quarter relative to the third quarter a year ago, which drove slightly lower consumption in our Florida electric business.

Financing activity, including our debt and equity issuances over the last 12 months, reduced adjusted EPS by $0.07 per share. And finally, some changes in our billing accruals also impacted the third quarter of this year from a timing perspective, but will not impact full year results. Shifting to Slide 21. Adjusted gross margin for our Regulated segment was approximately $115 million this quarter, up 12% from the third quarter of last year.

This growth continues to be driven by strength in our core business operations, organic natural gas transmission expansions, which are a direct result of distribution growth as well as increased rates following the conclusion of our 3 rate cases. Our focus on cost management enabled similar growth in our regulated operating income, up 11% to approximately $49 million in the third quarter of 2025.

Our unregulated Energy segment also demonstrated strong growth relative to the third quarter of last year, as shown on Slide 22, with adjusted gross margin up 13% to approximately $22.5 million. Our Marlin Gas Services business continues to meet the rapid growth in demand for virtual pipeline transportation, driving $3.1 million of additional gross margin when combined with the incremental contribution from Full Circle Dairy in the third quarter of this year.

This growth was supported by increased performance from Aspire Energy, but tempered by changes in margins and service fees within our propane operations for the third quarter, leading to an overall gross margin increase of $2.6 million. While higher than the same period a year ago, margins did not fully cover the normal operating costs in the quarter as is typical during the least weather-sensitive quarter of the year.

I'll now move to Slide 23 to review our capital structure and financing activities. At September 30, our equity capitalization was 49% with $83.1 million of equity issued through the first 9 months of the year. In the third quarter alone, we issued approximately 126,000 shares with an additional 105,000 shares issued in October 2025.

We also completed the previously announced $200 million issuance of new long-term unsecured senior notes in the private placement debt market with $150 million funded in August and $50 million funded in September of this year at a blended 5.04% coupon. These capital raises support our overall financing strategy, which ensures we are committed to superior balance sheet strength.

We also continue to maintain strong liquidity and sufficient capacity to support growth with availability of 87% of our total capacity of $755 million between our revolving credit facility and private placement shelf facilities at the end of September 2025. Moving to Slide 24. Alongside our equity and debt plans, our dividend policy continues to be a key component of our capital allocation strategy as we fund growth capital investment to drive earnings growth and overall total shareholder return.

Our Board has approved a dividend payout target range of 45% to 50%, allowing us to retain 50% to 55% of earnings, which has been a meaningful part of our financing plan. We also remain committed to consistent dividend growth. Our annualized dividend per share of $2.74 reflects a 7% annual increase from 2024 and supports a long-term dividend CAGR of 9% while still facilitating significant earnings reinvestment.

We will continue to support long-term dividend growth while reinvesting significant earnings back into the company, enabling our investors to benefit from both long-term top quartile earnings and strong dividend growth. As we've discussed many times, we are committed to a long-term earnings per share compounded annual growth rate of 8% through 2028 to drive top quartile shareholder returns, as shown on Slide 25.

Our third quarter results align with our full year 2025 adjusted EPS guidance range of $6.15 to $6.35 per share, inclusive of a successful outcome on the Florida City Gas depreciation study as both Jeff and Jim have previously discussed. This range represents an EPS growth rate of 14% to 16% over 2024 or on average, approximately 8% to 10% annually over the last 2 years.

Before we shift to Q&A, let's review the unique differentiators as shown on Slide 26, that enable us to drive significant shareholder value in 2025 and for years to come. We remain committed to delivering on our promises. We recognize that our consistent track record has driven expectations for continued strong growth, both in terms of performance and valuation.

We will continue to execute on our 3 pillars of growth, enabled by continued infrastructure reliability improvements and growing demand for natural gas throughout our service areas and supported by our increased 2025 capital guidance range of $425 million to $450 million. Our disciplined approach to financing, including ensuring balance sheet strength, upholding investment-grade credit metrics and sustaining our target capital structure keep us well positioned to address market volatility as we fund our growth plan.

All of these elements drive our ability to reach new heights, both in 2025 and beyond. We look forward to delivering with purpose and driving long-term value for all stakeholders. We sincerely appreciate your continued interest, support and investment in the company. Thank you for joining our call today.

With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

[Operator Instructions] We'll take our first question from Barclays.

Nicholas Campanella
Barclays Bank PLC, Research Division

This is Nick Campanella. So I wanted to ask on the depreciation study. Just you kind of show in slides that the decision could be anywhere from December to February. I think you're very clear that this is included in guidance.

Just ability to kind of overcome that if you do get a decision, let's say, in January or February? Are you still able to kind of hit the range? Or is it fully predicated on that outcome? And then how would you kind of quantify what's in fiscal '25?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

So we have -- Nick, as we've talked about previously, achieving the guidance range would assume that we do get a successful outcome from that rate -- from that proceeding. And where we actually fall within the range will ultimately be based on where that outcome is, meaning when you look at -- we have filed for a 2-year amortization period.

The standard is 5 years. So that will come into play. But as long as there is an outcome from the proceeding from the hearing in December, and we get a final order in time to be able to record it for 2025, that will determine ultimately the timing of the period as well as the amount that would enable us to achieve the guidance range.

Nicholas Campanella
Barclays Bank PLC, Research Division

And if it doesn't, is it just that you're at the lower end? Or I was just trying to parse through what you were saying there. And just to be completely clear, it's the $19 million that's kind of shown in slides, and I would just take half of that.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Yes, that is correct. And so achievement of that would enable us to be within the range and enable -- so there's some other factors certainly that we have to -- the reason why we're not saying exactly where it will depend on, again, the period of time, the ultimate conclusion of what gets approved in terms of amount.

And then certainly, there's other factors that could impact our results, but that is the clear differentiator to us being within the range or not being within the range. And I would add if for some reason, right, it's much lower than expected, we would anticipate that we're going to be filing a rate case next year anyway.

So we see dollars there that need to be part of the final outcome. We're very confident in the numbers that we've filed as being the excess reserve. And so we believe we're well positioned, whether it's through a depreciation study or ultimately, if we have to come back in some form of rate proceeding as well next year.

Nicholas Campanella
Barclays Bank PLC, Research Division

That's great. Really appreciate that clarity. And then I know Jim just kind of talked about the process overall in the prepared remarks and just brought up the prospects of settlement.

But just as you've seen kind of testimonies roll in, just how would you kind of frame the prospects to -- for parties to kind of come to a settlement before December? And are you really trying to achieve an all-party settlement? Or could this be more partial?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Yes, Jim, please go ahead.

James Moriarty
Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer

Nick, this is Jim. As you know, it's very difficult to predict the process trying to land a case like this or if the parties will even entertain a potential settlement. We're working very hard if there were to be one. Our preference, of course, would be that it'd be unanimous. So I really can't say more than that, Nick, other than our historical approach would be try and resolve something, if at all possible.

Operator

Our next question comes from Tate Sullivan with Maxim Group.

Tate Sullivan
Maxim Group LLC, Research Division

First to follow up on a comment from earlier in the call. Jeff, did you say that you had 400 new distribution projects in service in the last 9 months? Or did I mishear that? And if I did not, what does that -- what qualifies as an individual project, please?

Jeffrey Householder
President, CEO & Chairman

Yes, that's sure. Those are of a variety of different sizes. It is 400, just to give you some idea of the significant number of projects that we are moving forward on. Those range from distribution level subdivision projects up into some of the transmission work that we do.

So it really is just a compilation of the construction activity that's going on throughout the company. And it's a substantial increase over what we would typically see. And so some of that's reflective of the fact that we now have Florida City Gas in the fold and are doing construction activity on that system. And some of it continues to reflect the very substantial growth, especially in residential projects that we see both in Delmarva and in Florida. So yes, I didn't mean to -- that's not all $1 billion transmission projects, but it's a lot of things that add up to a significant amount of work and a substantial amount of customer growth.

Tate Sullivan
Maxim Group LLC, Research Division

Yes. I mean the scale of organizing all that. I mean, the previous year's period of 9 months, I mean, I imagine what, roughly 200 to 300 projects. Would that be fair? I mean just...

Jeffrey Householder
President, CEO & Chairman

Yes, maybe even less. Yes, it's a significant amount of work, and our guys have done a really great job. We've spent a fair amount of time over the last couple of years in that particular area, trying to consolidate our construction teams, trying to make sure that we had different tools and systems that would allow us to track those projects in a better way, improving some of the supply chain issues.

I mean all of that has kind of come together intentionally to allow us to be able to actually move through that level of project.

Tate Sullivan
Maxim Group LLC, Research Division

And separately, you called out the Ohio data center growth in one of the slides. And just to refresh on the business, your Ohio business is an unregulated business -- energy segment, I believe.

And -- can you talk about the type of infrastructure? Is it pipelines to backup generators, pipelines to isolated power plants? Or can you talk about that opportunity?

Jeffrey Householder
President, CEO & Chairman

On the data center side?

Tate Sullivan
Maxim Group LLC, Research Division

Yes.

Jeffrey Householder
President, CEO & Chairman

Yes. What we actually have one announced project with AEP in Ohio right now to build a pipeline to serve a data center that AEP is building the project itself. We have a number of other possibilities out there that we're looking at. And I mean, we're in the same boat, I think, with a lot of people across the country.

As you well know, there are a lot of data center possibilities out there. Everybody is trying to understand where these things might actually land. We've seen, as we mentioned in the remarks, significant activity in Ohio. It seems to be one of those places where folks like the political regulatory climate.

They like the fact that there are in-state gas supplies that are possible and there are transmission opportunities there that can bring that gas to the projects as well as some large electric utilities that seem to be eager to pursue them. So we hope to continue to do business in Ohio with the possibility of adding additional transmission assets there.

Tate Sullivan
Maxim Group LLC, Research Division

And that's all of Ohio has been unregulated. Is that correct?

Jeffrey Householder
President, CEO & Chairman

That's correct. I guess we have -- I should probably clarify that -- we have a small transmission pipeline that's sort of quasi-regulated in Ohio. But we don't have regulated distribution assets there in the sense that we do on Delmarva, Florida.

Tate Sullivan
Maxim Group LLC, Research Division

Okay. I asked this question because I saw an acquisition in Ohio territory as well recently in the industry and thank you for all the comments.

Operator

Our next question comes from Paul Fremont with Ladenburg.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

I guess my first question, Beth, just to clarify, is the cutoff date for a Retroactive treatment of the amortization of the depreciation reserve, is that December 31? Or is that -- is it a different date?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

So basically, Paul, as long as we would have an order that would be in the first week or 2 in February, we would be able -- because it would be a subsequent event and the magnitude of that subsequent event, it could be factored into our 2025 earnings.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

Great. So it could be as late as the second week of February?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

It could be as late as that. When it gets beyond that, it would be very challenging for us at that point. So yes, as long as an order is received, we can go back and we have worked through and evaluated that on the accounting side.

Mike Galtman and his team have researched that. We've talked to experts around that. And so yes, it could go back and be included because of the magnitude of that event.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

Great. And then my second question is, can you help us split between the 22 that you had initially filed for and the 19 amended request?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Yes. So the process, Paul, as we started, and it actually -- it happens for all the parties. When you file that -- when you're filing that initial filing, you are certainly filing that with the thought that it is comprehensive. But as you continue to go through and look at the data, and we're scrubbing the data as we're moving through the process, ultimately, there are positive adjustments or things that you may find and sometimes there are updates that can be downward.

And in this particular case, the net effect of the adjustments that we found among the various different asset categories or classes ultimately resulted in a decline. We have had our work papers reviewed by some of the experts that we utilize -- but it happens. And so as we continue to scrub the data within our systems, we feel very good about that $19 million. But it is us just constantly going through and validating the data.

Operator

[Operator Instructions] We'll go next to Alex Kania with BTIG.

Alexis Kania
BTIG, LLC, Research Division

Maybe just a question just thinking about the -- maybe the year-end earnings call. Has there been just any kind of change in thinking about what the roll forward, what updates you may end up giving on the CapEx plan?

I know there's some discussion just about rolling in some of the projects that were talked a little bit about earlier on the call as well as the, I guess, the ERP or business transformation investments. But do you still consider planning on just keeping kind of the '28 long-term target? Or is there a sense maybe you want to do a more kind of full roll forward?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Thank you. Great question, Alex. So number one, I think right now, we happen to be in the process where we're working on and finalizing our 2026 budget. And that certainly, that is inclusive of our capital projects. And as we start the year, we have a really good sense and even years prior to that as we're moving through looking at the 5 years, it's a constant updating of CapEx guidance as we're looking at it.

So as I think about February, what you will definitely see is you will see us come out with our projection of our capital spend for the year that will be reflective of an updated estimate for our ERP process and plan. And so I think that will be something new that we will include. Our expectation right now is that we will continue to hold to the $1.5 billion to $1.8 billion through 2028.

And there is some likelihood in February of 2027 that we will revisit that and decide whether there's just an update or whether there's an extension of guidance from there. But most likely, we don't think it will be next year, but it will likely be the following year.

Alexis Kania
BTIG, LLC, Research Division

Great. And then just a follow-up on kind of the underlying growth of the businesses. It's just very notable that the Delmarva growth is even trending ahead of Florida. year-to-date. Do you -- what's kind of the view about how long that maybe could persist? I mean it's obviously a good thing to see. I'm just kind of curious about what the kind of current views are just in terms of trajectory of, let's say, in the Mid-Atlantic versus the Florida franchises.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Well, thank you. Great question. I happen to be -- and I'm certainly not saying this statistic is in true. I can't confirm it or deny it, but I happened to be in an event not long ago where the speaker at this particular setting was talking about Sussex County, which is really the county in Delaware where we're seeing the most growth because it's at our resort and beach areas.

And they were talking about some of the statistics they had seen, right, show that, that county is one of the fastest-growing counties in the entire country. And I think we're continuing to see that. That's reflected in our numbers. There's a substantial build-out that's occurring that for right now, we continue to see occurring into the foreseeable future.

You had Jeff talk about on the call today, actually what I would call more of a bedroom community to the beach areas. We're seeing growth actually start up in some of these small communities that I, as a lifetime resident of the state would not have expected some of these areas to be kind of natural extensions necessarily of the beach area, but the quality of life in the area that's around here, I think, is continuing to bring more people in.

So I think for right now, Alex, we're continuing to expect strong growth in that area. I don't think that takes away at all from the strong growth, though that we're also seeing in Florida. And one of the things that you saw us do in this particular release, and we're trying to make sure it stands out is that the areas that our Florida legacy business actually serves have tremendous growth that's also significantly above the industry average.

And we're seeing growth with even in Florida City Gas also pick up as well. So we're excited about the growth prospects and continue to be. And hopefully, those, as always, will continue to also result in some additional pipeline -- upstream pipeline capacity needs as well.

Operator

This does conclude today's question-and-answer session. I would now like to turn the program back over to Jeff Householder for any additional or closing remarks.

Jeffrey Householder
President, CEO & Chairman

Well, thank you for joining our call this morning. We, as always, appreciate your continued interest in Chesapeake Utilities. I have to say that I like where we are this year, less than 2 years from the transformational FCG acquisition, double-digit growth in earnings.

We've more than doubled our pre-FCG capital investment, positive results in 3 rate cases, significant progress in our modernization business transformation efforts and really excellent outlooks for 2026. So we look forward to seeing many of you at the EEI Financial Forum in Florida in a couple of days and safe travels if you're headed to Florida. Goodbye.

Operator

Thank you. This concludes Chesapeake Utilities Corporation's Third Quarter 2025 Earnings Conference Call. Please disconnect your line at this time, and have a wonderful day.

Q3 2025

Earnings Call Presentation

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward-looking statements may be identified by the use of words, such as "project," "believe," "expect," "anticipate," "intend," "plan," "estimate," "continue," "potential," "forecast" or other similar words, or future or conditional verbs such as "may," "will," "should," "would" or "could." These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities' Annual Report on Form 10-K for the year ended December 31, 2024 and subsequent quarterly reports on Form 10-Q filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share ("EPS*"). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Q3 2025 Safety Moment: Kitchen & Fire Safety

KITCHEN FIRE SAFETY TIPS:

- NEVER LEAVE COOKING UNATTENDED
- KEEP PETS AND CHILDREN AWAY THE STOVE
- AVOID WEARING LOOSE CLOTHING WHEN COOKING
- TURN OFF FRYER IF SMOKE OR A BOIL STARTS
- KEEP A LID OR SHEET PAN NEARBY IN CASE OF A FIRE

THANKSGIVING IS THE LEADING DAY FOR HOME COOKING FIRES.

- Enact a system to ensure **kids and pets remain away** from hot surfaces, open flames, knives
- Keep things a**way from the edges of counters**, including dangling cords, pots and anything that can tip / spill / break
- Know how to **manage flames and fire**: keep a fire extinguisher and/or fire blanket in or near the kitchen
- Keep **floors & walkways free of spills**, cords and trash to prevent slips, trips and falls

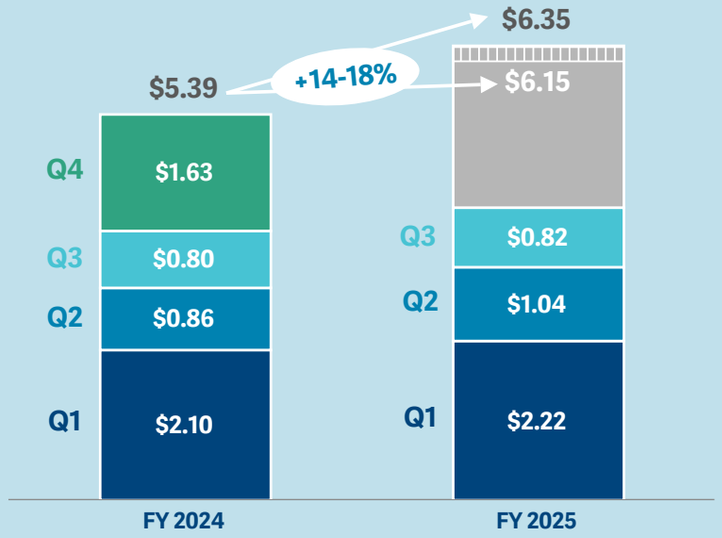
2025 Guidance: Reaffirming EPS, Increasing CapEx

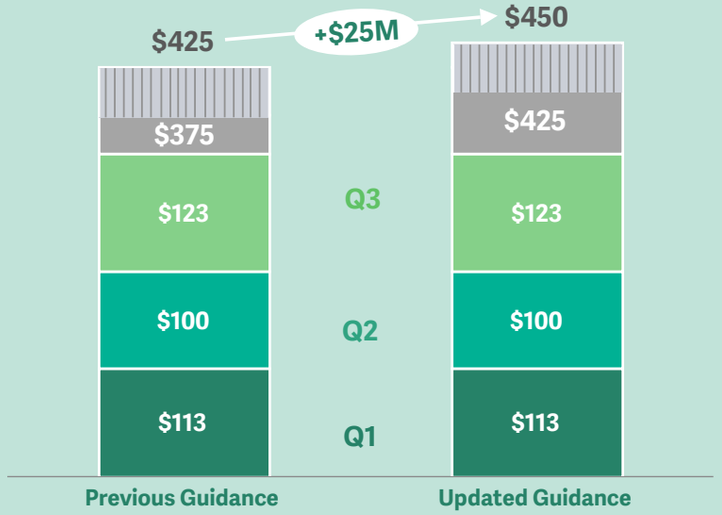
2025 Adj. EPS[1] Guidance

- Reaffirming 2025 Adj. EPS[1] range of **$6.15 - $6.35**
  - Assumes a successful outcome on the FCG Depreciation Study this year



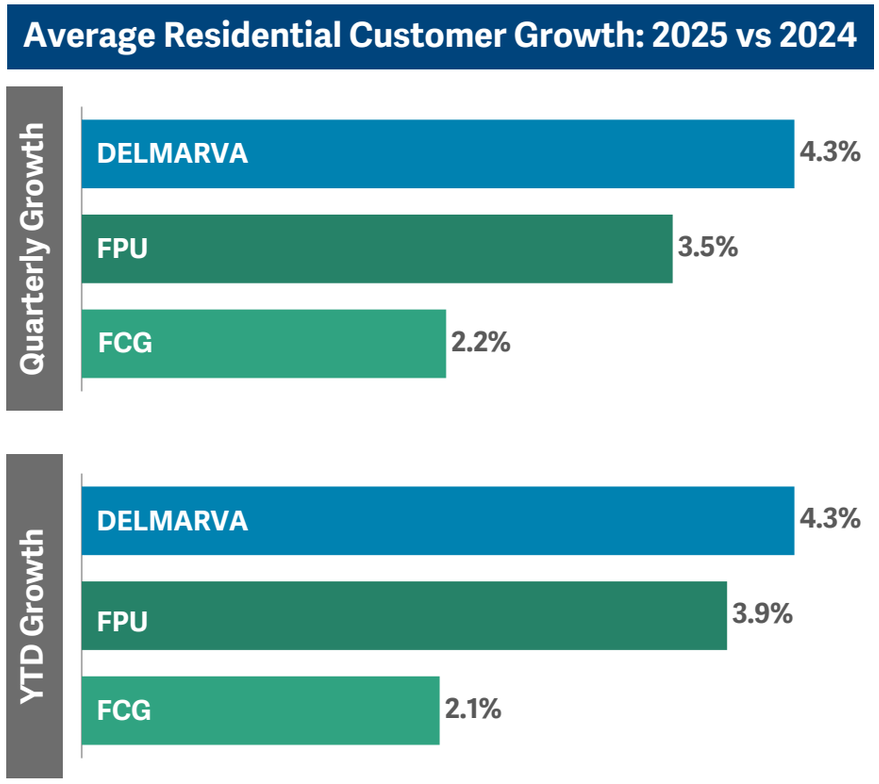
2025 Capital Expenditure Guidance

- YTD 2025 CapEx of **$336 million**
- New 2025 CapEx Guidance: **$425 - $450 million**
  - **$25 million** increase from top end of prior range



[1] *See appendix for a reconciliation of non-GAAP metrics.*

Natural Gas Demand Growth Remains Strong



Executing on Our Long-Term Growth Plan

Capital Deployment Highlights

Major capital projects are on track and on budget and 400+ small-scale projects completed YTD 2025…

	Capital Expenditures		Total Margin				
	Q3 2025	YTD 2025	Q3 2025	YTD 2025	FY 2024	FY 2025	FY 2026
Transmission	$108.1M	$295.7M	$6.9M	$13.8M	$4.0M	$22.8M	$46.1M
Infrastructure			$7.4M	$20.0M	$13.8M	$27.0M	$37.8M
Total	$108.1M	$295.7M	$14.3M	$33.8M	$17.8M	$49.8M	$83.9M

… plus new projects and incremental capital investment driving an additional ~$25M increase in full-year 2025 capital expenditures.

Incremental Investments in 2025

CapEx	Project
~$15M	Initial ERP Kickoff Investment
~$10M	ESNG System Improvements
~$25M	Overall Guidance Increase

Diggers at work on an Eastern Shore Natural Gas reliability project in Salisbury, MD

Worcester Resiliency Upgrade (WRU) Project

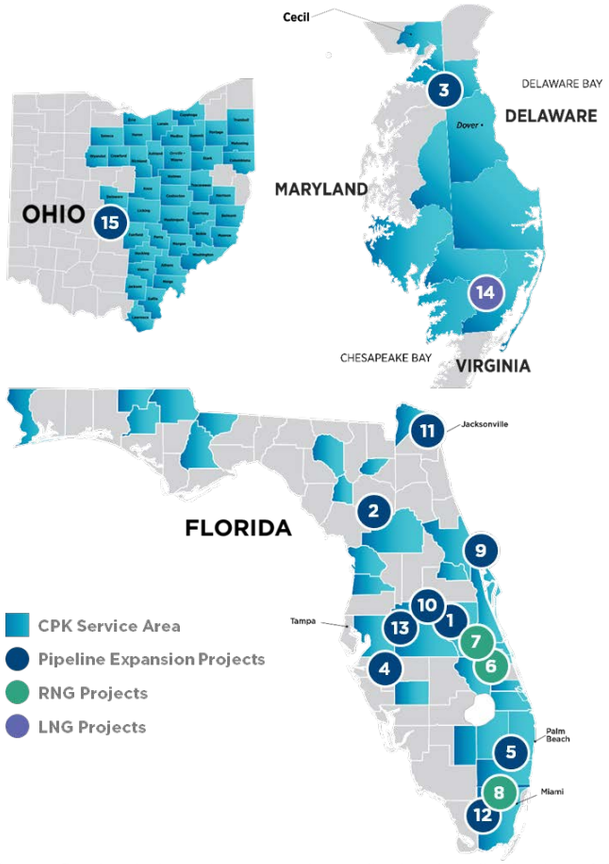
$100 million FERC-approved LNG storage facility in Bishopville, MD: 500K gallons of storage across five tanks to meet incremental natural gas demand in Southern Delaware, Maryland and beyond

CPK's Regulatory Team visits the WRU Construction Site.

RECENT PROJECT UPDATES:

- **June 2025:**
  - Tank transportation was completed successfully; **all five tanks now on-site** and ready for construction
- **July 2025:**
  - Formally mobilized construction contractor to begin site work
  - Received an **initial Notice to Proceed** from FERC to begin site preparation and construction and received approval of updated rates, resulting in **$3.9M of additional full-year margin**
- **August 2025:**
  - Received full FERC Notice to Proceed and began full project construction, including civil foundation work
- **October 2025:**
  - Successfully completed **first PHMSA inspection**
  - Majority of equipment on site and control building erected

Transmission Projects Advance to Meet Demand



#	Project Name	Status[1]	In-Service	Total CapEx	Adj. Gross Margin ($M)	
					2025E	2026E
1	St. Cloud / Twin Lakes	In-Service	Q3 2023	~$4M	$0.6	$0.6
2	Newberry Expansion	In-Service	Q2 2024	~$15M	$2.6	$2.6
3	Warwick Extension	In-Service	Q4 2024	~$9M	$1.9	$1.9

Strong Progress on 5-Year CapEx Guidance

~$1.4 billion of identified capital projects support our 5-year CapEx guidance of $1.5 - $1.8 billion

Segment	5-Year Guidance
Regulated Distribution	$600 - $645M
Regulated Transmission	$435 - $590M
Regulated Infrastructure	$325 - $375M
Unregulated Businesses	$100 - $140M
Technology	$70 - $90M
Total	$1.5 - $1.8B

Identified CapEx	5-Year Spend
Natural Gas LDC Organic Growth	$625M
Worcester Resiliency Upgrade	$100M
Newberry, Wildlight Phase 2	$28M
Boynton Beach, New Smyrna	$36M
Lake Mattie, St. Cloud, Plant City	$42M
Miami Inner Loop Projects	$40M
Other Approved Pipeline Projects	$49M
GUARD / SAFE Programs	$230M
Eastern Shore Capital Surcharge	$75M
Florida Electric Storm Protection Plan	$50M
Unregulated Businesses	$20M
Technology Transformation	$90M
Total Identified & Ongoing Capital	~$1.4B

>70%

capital spend with existing regulatory approvals or recovery mechanisms

Potential Projects on the Horizon

- Natural gas transmission expansions to support **demand in Delaware and Cecil County, MD** along I-95 expansions to serve growth in retail warehouse and distribution centers
- Expansions in the southern end of the Delmarva system, including to **Virginia's Eastern Shore space and agricultural industries**
- Natural gas expansion for **Florida's Space Coast** to serve cruise, space and port industries
- Natural gas **expansion in South Florida** to add capacity and resiliency in the greater Miami area
- Additional **RNG and Marlin virtual pipeline transportation** opportunities across our service areas
- Additional natural gas transmission **expansions in Ohio to serve data centers** and serve population growth

Final Orders Reached on All Rate Cases

$ millions

Active Filings	2025 Margin	2026 Margin	Status
Maryland Rate Case *Docket #9722*	**$1.5**	**$3.5**	**April 2025:** Received Final Order approving annual revenue increase of $3.5M
Delaware Rate Case *Docket #24-0906*	**$4.5**	**$6.1**	**June 2025:** Received Final Order approving annual revenue increase of $6.1M **October 2025:** Reached final approved settlement on issues related to rate design and tariffs
FPU Electric Rate Case *Docket #20240099*	**$7.1**	**$8.6**	**July 2025:** Received Final Order approving annual revenue increase of $8.6M
Total	**$13.1**	**$18.2**	***39% growth in 2026 over FY 2025***

Recovery of Excess Depreciation

Docket # 20250035

- **February 2025:** Requested a reduction in depreciation expense of ~$1M based on updated asset lives and a 2-year amortization of the remaining excess depreciation reserve
- **September 2025:** Filing updated from a Proposed Agency Action (PAA) to a Hearing, generating a revised schedule that allows for completion of the process by February 2026

Updated Procedural Schedule

February 2025	• Updated depreciation study filed; requested effective back to January 1, 2025
September 2025	• Commission Hearing Dismisses OPC Motions for Reconsideration & Dismissal
September 2025	• Filing was amended from a Proposed Agency Action (PAA) to a Hearing
Oct. / Nov. 2025	• CPK files Testimony re-requesting 2-year amortization of $19.2M excess reserve
November 2025	• Intervener and Staff Testimony submitted
December 2025	• Commission Prehearing and Hearing
Dec 2025 - Feb 2026	• Expected final resolution of filing

Business Transformation Supports Growth

Strategic Themes for Transformation

CUSTOMER EXPERIENCE: Improve billing process, streamline service requests, modernize customer interactions through automation and digital platforms.

OPERATIONAL EXCELLENCE: Enhance operations, asset management and field service efficiency using SAP, GIS and AI-enabled tools.

DIGITAL AGILITY: Strengthen cybersecurity, modernize IT infrastructure and automate workflows with AI to boost productivity and resilience.

EMPLOYEE EXPERIENCE: Elevate engagement, talent planning and training while improving internal service delivery and change management.

FINANCIAL MODERNIZATION: Automate key processes, optimize supply chain operations and modernize analytics.

Engaging with All Stakeholders

We were pleased to welcome Lisa Eden to our Board of Directors in September.

Following her 20-year tenure at TXNM Energy, Inc., Lisa brings a wealth of knowledge and experience in finance, strategic planning, talent management and information technology.

Delaware team members accept the Stars of Delaware award at a ceremony hosted by the Daily State News.

YTD Community Investment

~$488,000
of charitable donations & sponsorships

>1,500 hours
volunteered by ~670 team members (54% of the company)

FPU and FCG team members support a lighthouse cleanup in Jupiter, Florida.

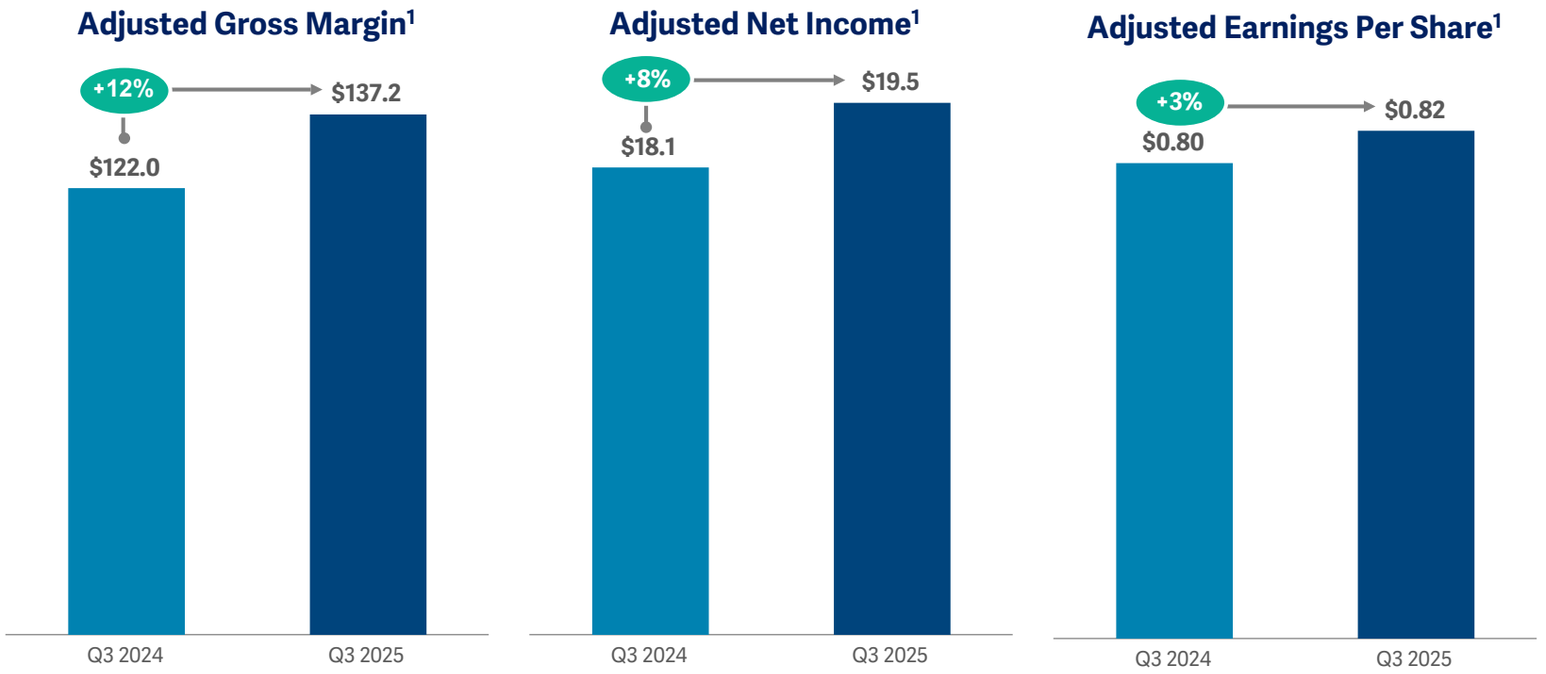
CPK's FOUR FOCUS AREAS OF GIVING

- SAFETY AND HEALTH
- COMMUNITY DEVELOPMENT
- EDUCATION
- ENVIRONMENTAL STEWARDSHIP

Consistent Growth in Q3 2025

Incremental growth in Adjusted Gross Margin, Adjusted Net Income & Adjusted Earnings Per Share[1]

$ millions except per share amounts

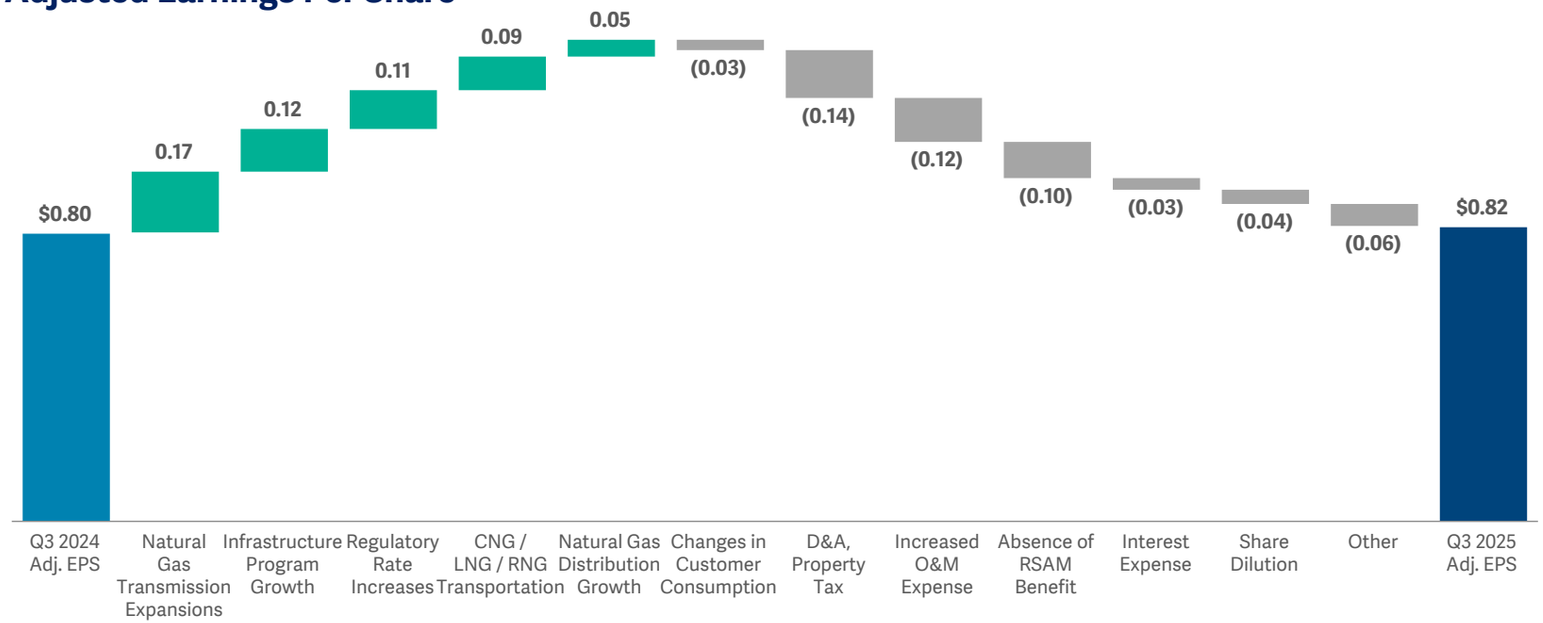


[1] *See appendix for a reconciliation of non-GAAP metrics.*

Q3 2025 Key Performance Drivers

Adjusted EPS for the third quarter benefited from natural gas transmission, distribution and infrastructure growth, approved rate cases and virtual pipeline transportation

Adjusted Earnings Per Share[1]



[1] *See appendix for a reconciliation of non-GAAP metrics.*

Regulated Operations Margin Growth Continues

Investments in transmission, distribution & infrastructure drive double-digit Regulated Operations growth

Adjusted Gross Margin[1]

Operating Income

Note: Dollars in millions.
[1]See appendix for a reconciliation of non-GAAP metrics.

Unregulated Adj. Gross Margin Growth of 13%

$2.6M of Adj. Gross Margin Growth driven by Marlin Virtual Pipeline and Full Circle Dairy Operations

Adjusted Gross Margin[1]

- **$2.6 million** of increased margin from:
  - Continued growth in our Marlin Virtual Pipeline Services
  - Incremental contribution from Full Circle Dairy operations
  - Increased performance from Aspire Energy
  - Partially offset by propane margins and service fees
- Q3 2025 Operating Loss[2] of **$3.9 million** driven by typical seasonality patterns

Note: Dollars in millions. [1]See appendix for a reconciliation of non-GAAP metrics. [2] Operating results for the second and third quarters historically have been lower due to reduced customer demand during warmer periods of the year. The impact to operating income may not align with the seasonal variations in adjusted gross margin as many of the operating expenses are recognized ratably over the course of the year.

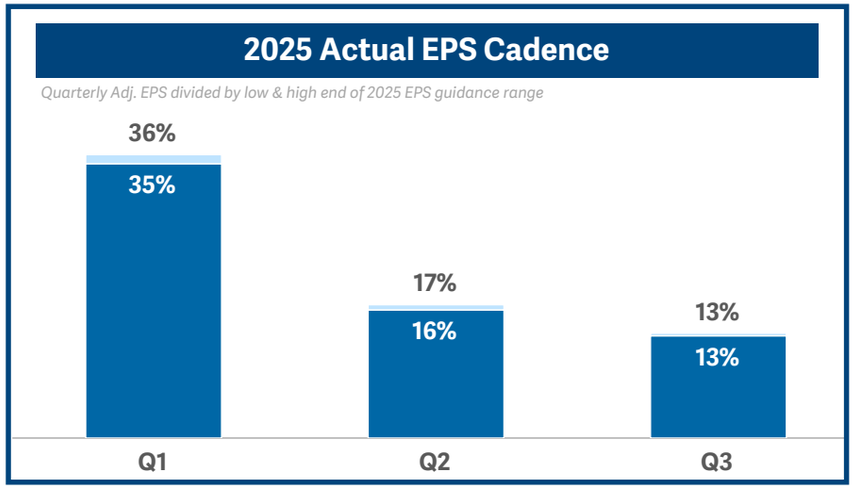
Reliability Infrastructure Adj. Gross Margin Total			**$13.8**	**$27.0**	**$37.8**	**$3.5**	**$7.4**

[1] *Reflects PSC-approved 10-year capital investment.* [2] *Reflects 5-year capital investment range.*

Quarterly Earnings Cadence

There are several factors that shift the cadence of our quarterly earnings profile in 2025.



Shift in earnings cadence driven by:

- **Timing of in-service dates for major capital projects, which is more heavily weighted in Q4 2025**
- **Timing of RSAM Adjustments versus timing and outcome of FCG Depreciation Study**

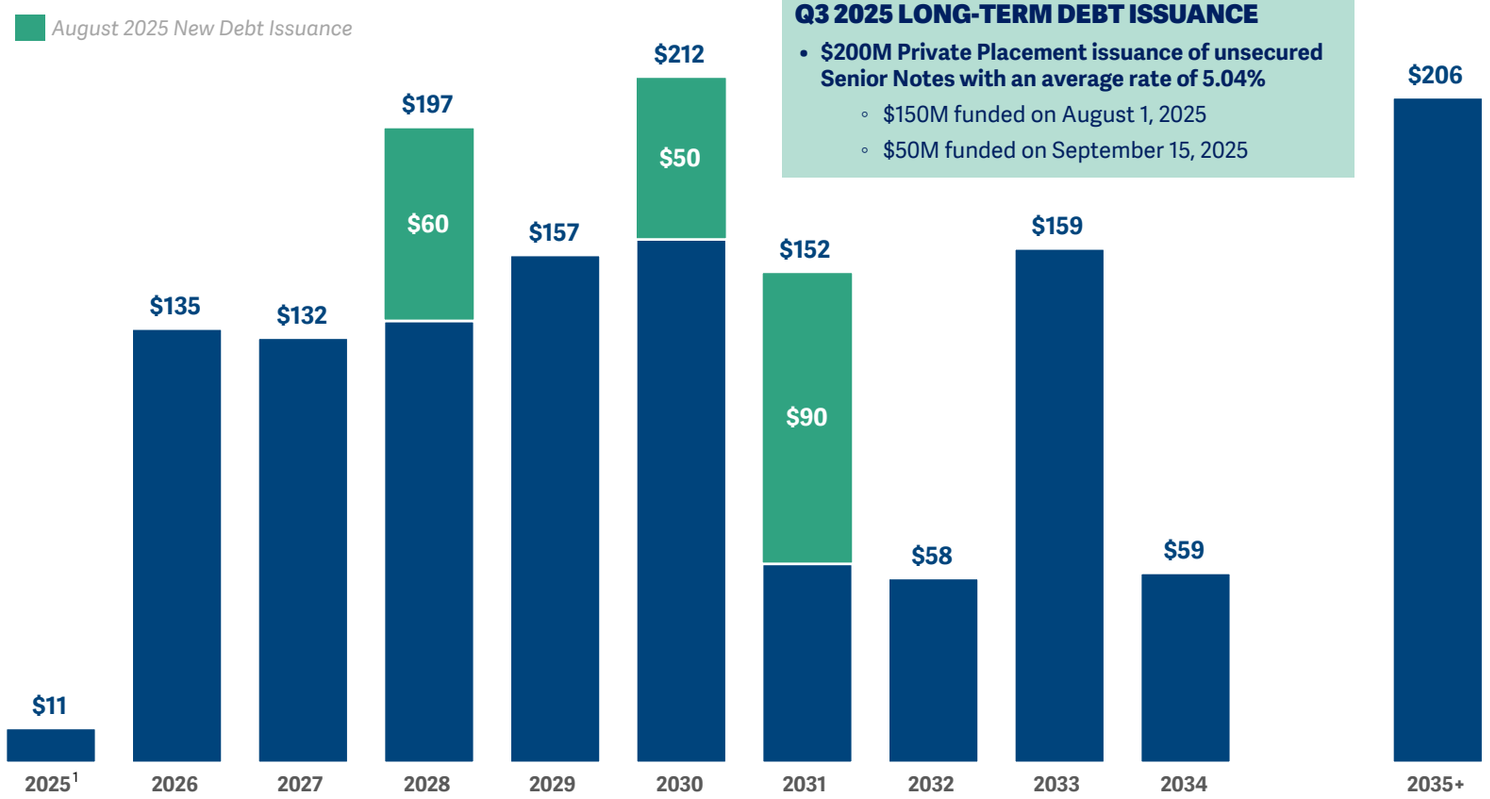
Historical Actual EPS Quarterly Distribution

Year	Q1	Q2	Q3	Q4
2024[1]	39%	16%	15%	30%
2023[1]	38%	17%	13%	31%
2022	41%	19%	11%	29%
2021	41%	16%	15%	27%
2020	42%	15%	13%	29%
5-Year Average	41%	16%	13%	29%

[1]Adjusted EPS starting in Q3 2023, which excludes transaction and transition-related expenses incurred attributable to the acquisition of FCG. See appendix for a reconciliation of non-GAAP metrics.

Long-Term Debt Maturity Profile

$ in millions



Q3 2025 LONG-TERM DEBT ISSUANCE

- **$200M Private Placement issuance of unsecured Senior Notes with an average rate of 5.04%**
  - $150M funded on August 1, 2025
  - $50M funded on September 15, 2025

[1] *Reflects long-term debt balance as of September 30, 2025.*

CHESAPEAKE UTILITIES CORPORATION REPORTS THIRD QUARTER 2025 RESULTS

- **Net income and earnings per share ("EPS")* were $19.4 million and $0.82, respectively, for the third quarter of 2025 and $94.2 million and $4.03, respectively, for the nine months ended September 30, 2025**
- **Adjusted net income and Adjusted EPS**, which exclude transaction and transition-related expenses attributable to the acquisition and integration of Florida City Gas ("FCG"), were $19.5 million and $0.82, respectively, for the third quarter of 2025 and $94.9 million and $4.06, respectively, for the nine months ended September 30, 2025**
- **Adjusted gross margin** growth of $15.2 million and $49.3 million, respectively, for the three- and nine-month periods ended September 30, 2025 driven primarily by natural gas organic growth and transmission expansion projects, regulatory initiatives and infrastructure programs, and increased compressed natural gas, renewable natural gas and liquified natural gas services**
- **2025 Adjusted EPS guidance of $6.15 - $6.35 re-affirmed, assuming a successful outcome on the FCG Depreciation Study**
- **The Company is increasing its 2025 capital guidance range to $425-$450 million**
- **The Company continues to affirm 2028 EPS and 2024-2028 capital expenditure guidance**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the three and nine months ended September 30, 2025.

Net income for the third quarter of 2025 was $19.4 million ($0.82 per share) compared to $17.5 million ($0.78 per share) in the third quarter of 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, adjusted net income was $19.5 million ($0.82 per share) compared to $18.1 million ($0.80 per share) in the prior-year period. The adjusted EPS growth reflects a $0.04 per share impact from $92.0 million of equity issued over the last twelve months to restore the Company's equity to total capitalization ratio closer to the target ratio.

Adjusted earnings for the third quarter of 2025 were largely driven by contributions from regulatory initiatives and infrastructure programs, organic growth in the natural gas distribution businesses and pipeline expansion projects driven by natural gas demand, and increased compressed natural gas (CNG), renewable natural gas (RNG) and liquified natural gas (LNG) services.

During the first nine months of 2025, net income was $94.2 million ($4.03 per share) compared to $81.9 million ($3.66 per share) in the prior-year period. Excluding the transaction and transition-related expenses, adjusted net income was $94.9 million ($4.06 per share) compared to $84.2 million ($3.76 per share) in the prior-year period. This resulted in EPS and adjusted EPS growth of 10.1 percent and 8.0 percent, respectively, compared to the prior-year period.

Year-to-date adjusted earnings for 2025 were primarily impacted by the factors discussed for the third quarter as well as additional adjusted gross margin from increased customer consumption experienced earlier in the year.

“Our performance in the third quarter of 2025 demonstrated continued operational excellence across our businesses to serve our customers and communities. In both the quarter and the year-to-date periods, we delivered double-digit growth in Adjusted Gross Margin and Operating Income relative to the prior year and we continued to strengthen our balance sheet with incremental long-term debt and equity issuances during the quarter,” said Jeff Householder, the Company’s Chair of the Board, President and Chief Executive Officer.

“These results demonstrate that we continue to deliver on our three growth pillars. Within the third quarter, we invested $123 million of capital and generated over $20 million of gross margin from transmission, infrastructure, and transportation projects. We also reached final completion of our Delaware rate case, with a settlement on tariff-related changes, including rate design. And finally, we took the next pivotal step in our continuous business transformation efforts, including officially kicking off our multi-year Enterprise Resource Plan (ERP) process, which was a primary driver in the increase and extension of our 2025 capital guidance to $425-$450 million. We remain focused on achieving our earnings and increased capital guidance in 2025, demonstrating record performance and reaching new heights of growth for the Company.”

Earnings and Capital Investment Guidance

The Company continues to re-affirm its 2025 EPS guidance range of $6.15 to $6.35 per share, pending a successful outcome of the FCG excess depreciation filing. Given the Company’s progress on a multitude of capital projects, the Company is further increasing and refining its 2025 capital guidance range to $425 million to $450 million.

Looking to the future, the Company also continues to re-affirm its 2028 EPS guidance range of $7.75 to $8.00 per share, as well as its capital expenditure guidance range for the five-year period ending 2028 of $1.5 billion to $1.8 billion.

**Unless otherwise noted, EPS and Adjusted EPS information are presented on a diluted basis.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. The Company's management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs

3-3-3-3

presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to the Company's non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Adjusted Gross Margin

	For the Three Months Ended September 30, 2025			
(in millions)	**Regulated Energy**	**Unregulated Energy**	**Other Businesses and Eliminations**	**Total**
Operating Revenues	**$ 146.4**	**$ 40.7**	**$ (7.5)**	**$ 179.6**
Cost of Sales:

Adjusted Gross Margin (Non-GAAP)	**$ 324.0**	**$ 89.2**	**$ (0.1)**	**$ 413.1**

5-5-5-5

(1) Operations & maintenance expenses within the condensed consolidated statements of income are presented in accordance with regulatory requirements and to provide comparability within the industry. Operations & maintenance expenses which are deemed to be directly attributable to revenue producing activities have been separately presented above in order to calculate Gross Margin as defined under GAAP.

Adjusted Net Income and Adjusted EPS

(dollars in millions, shares in thousands (except per share data))	Three Months Ended September 30, 2025	Three Months Ended September 30, 2024	Nine Months Ended September 30, 2025	Nine Months Ended September 30, 2024
Net Income (GAAP)	**$ 19.4**	$ 17.5	**$ 94.2**	$ 81.9
FCG transaction and transition-related expenses, net (1)	**0.1**	0.6	**0.7**	2.3
Adjusted Net Income (Non-GAAP)	**$ 19.5**	$ 18.1	**$ 94.9**	$ 84.2
Weighted average common shares outstanding - diluted	**23,629**	22,564	**23,360**	22,402
Earnings Per Share - Diluted (GAAP)	**$ 0.82**	$ 0.78	**$ 4.03**	$ 3.66
FCG transaction and transition-related expenses, net (1)	**—**	0.02	**0.03**	0.10
Adjusted Earnings Per Share - Diluted (Non-GAAP)	**$ 0.82**	$ 0.80	**$ 4.06**	$ 3.76

(1) Transaction and transition-related expenses represent non-recurring costs incurred attributable to the acquisition and integration of FCG including, but not limited to, transition services, consulting, system integration, rebranding, and legal fees.

Operating Results for the Quarters Ended September 30, 2025 and 2024

Consolidated Results

(in millions)	Three Months Ended September 30, 2025	Three Months Ended September 30, 2024	Change	Percent Change
Adjusted gross margin**	**$ 137.2**	$ 122.0	$ 15.2	12.5 %
Depreciation, amortization and property taxes (1)	**32.7**	25.0	(7.7)	(30.8)%
Other operating expenses	**59.3**	55.3	(4.0)	(7.2)%
FCG transaction and transition-related expenses	**0.2**	0.8	0.6	NMF
Operating income	**$ 45.0**	$ 40.9	$ 4.1	10.0 %

(1) Includes the absence of an RSAM adjustment from FCG which represented a $3.2 million benefit in the third quarter of 2024.

Operating income for the third quarter of 2025 was $45.0 million, an increase of $4.1 million or 10.0 percent compared to the same period in 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $3.5 million or 8.4 percent compared to the prior-year period. The increase in adjusted gross margin in the third quarter of 2025 was driven by incremental margin from regulatory initiatives and infrastructure programs, pipeline expansion projects, increased CNG, RNG and LNG services and natural gas organic growth. The increase in operating

6-6-6-6

expenses was driven largely by higher depreciation attributable to growth projects and the absence of a reserve surplus amortization mechanism ("RSAM") adjustment from FCG (which represented a $3.2 million benefit in the third quarter of 2024). Higher expenses associated with facilities, maintenance and outside services compared to the prior-year period also contributed to the increase.

Regulated Energy Segment

(in millions)	Three Months Ended September 30, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 114.7**	$ 102.2	$ 12.5	12.2 %
Depreciation, amortization and property taxes [1]	**26.9**	19.8	(7.1)	(35.9)%
Other operating expenses	**38.7**	37.6	(1.1)	(2.9)%
FCG transaction and transition-related expenses	**0.2**	0.8	0.6	NMF
Operating income	**$ 48.9**	$ 44.0	$ 4.9	11.1 %

[1] Includes the absence of an RSAM adjustment from FCG which represented a $3.2 million benefit in the third quarter of 2024.

The key components of the increase in adjusted gross margin** are shown below:

(in millions)	
Natural gas transmission service expansions, including interim services	$ 5.6
Contributions from regulated infrastructure programs	3.9
Rate changes associated with recent rate case activities [1]	3.6
Natural gas growth including conversions (excluding service expansions)	1.5
Changes in customer consumption	(0.9)
Other variances	(1.2)
Quarter-over-quarter increase in adjusted gross margin**	**$ 12.5**

[1] Includes adjusted gross margin contributions from both interim and permanent base rates. Refer to Major Projects and Initiatives discussion for additional information.

The major components of the increase in other operating expenses are as follows:

(in millions)	
Facilities expenses, maintenance costs and outside services	$ (2.1)
Payroll, benefits and other employee-related expenses	0.9
Other variances	0.1
Quarter-over-quarter increase in other operating expenses	**$ (1.1)**

7-7-7-7

Unregulated Energy Segment

(in millions)	Three Months Ended September 30, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 22.4**	$ 19.8	$ 2.6	13.1 %
Depreciation, amortization and property taxes	**5.8**	5.1	(0.7)	(13.7)%
Other operating expenses	**20.5**	17.8	(2.7)	(15.2)%
Operating income (loss)	**$ (3.9)**	$ (3.1)	$ (0.8)	25.8 %

Operating results for the second and third quarters historically have been lower due to reduced customer demand during warmer periods of the year. The impact to operating income may not align with the seasonal variations in adjusted gross margin as many of the operating expenses are recognized ratably over the course of the year.

The major components of the increase in adjusted gross margin** are shown below:

(in millions)	
Propane Operations	
Change in propane margins and service fees	$ (0.7)
CNG/RNG/LNG Transportation and Infrastructure	
Increased CNG/RNG/LNG services	3.1
Aspire Energy	
Increased performance from Aspire Energy	0.4
Other variances	(0.2)
Quarter-over-quarter increase in adjusted gross margin**	**$ 2.6**

The major components of the increase in other operating expenses are as follows:

(in millions)	
Payroll, benefits and other employee-related expenses	$ (1.5)
Facilities expenses, maintenance costs and outside services	(1.3)
Other variances	0.1
Quarter-over-quarter increase in other operating expenses	**$ (2.7)**

8-8-8-8

Operating Results for the Nine Months Ended September 30, 2025 and 2024

Consolidated Results

(in millions)	Nine Months Ended September 30, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 462.4**	$ 413.1	$ 49.3	11.9 %
Depreciation, amortization and property taxes [1]	**95.2**	77.8	(17.4)	(22.4)%
Other operating expenses	**184.1**	170.9	(13.2)	(7.7)%
FCG transaction and transition-related expenses	**1.0**	3.1	2.1	NMF
Operating income	**$ 182.1**	$ 161.3	$ 20.8	12.9 %

[1] Includes the absence of an RSAM adjustment from FCG which represented an $8.9 million benefit during the nine months ended September 30, 2024.

Operating income for the nine months ended September 30, 2025 was $182.1 million, an increase of $20.8 million or 12.9 percent compared to the same period in 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $18.7 million or 11.4 percent compared to the prior-year period. The increase in adjusted gross margin in the first nine months of 2025 was driven by incremental margin from regulatory initiatives and infrastructure programs, increased CNG, RNG and LNG services, pipeline expansion projects and natural gas organic growth, and increased customer consumption resulting from year-over-year colder temperatures in the Company's Mid-Atlantic and Ohio service territories. These increases were partially offset by lower margins per gallon and related fees in the Company's propane distribution business and a reduced volume of off-system sales and service fees in its natural gas business. Higher operating expenses were driven largely by the absence of an RSAM adjustment from FCG (which represented an $8.9 million benefit during the nine months ended September 30, 2024) and higher depreciation attributable to growth projects. Higher facilities, maintenance and outside services, insurance, and payroll, benefits and other employee-related expenses compared to the prior-year period also contributed to the increase.

Regulated Energy Segment

(in millions)	Nine Months Ended September 30, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 360.5**	$ 324.0	$ 36.5	11.3 %
Depreciation, amortization and property taxes [1]	**78.3**	63.6	(14.7)	(23.1)%
Other operating expenses	**120.0**	114.7	(5.3)	(4.6)%
FCG transaction and transition-related expenses	**1.0**	3.1	2.1	NMF
Operating income	**$ 161.2**	$ 142.6	$ 18.6	13.0 %

[1] Includes the absence of an RSAM adjustment from FCG which represented an $8.9 million benefit during the nine months ended September 30, 2024.

9-9-9-9

The key components of the increase in adjusted gross margin** are shown below:

(in millions)		
Natural gas transmission service expansions, including interim services	$	11.7
Contributions from regulated infrastructure programs		11.0
Rate changes associated with recent rate case activities [(1)]		9.2

Forward-Looking Statements

Matters included in this release may include forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements. Please refer to the Safe Harbor for Forward-Looking Statements in the Company's 2024 Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the third quarter of 2025 for further information on the risks and uncertainties related to the Company's forward-looking statements.

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Friday, November 7, 2025, at 8:30 a.m. Eastern Time to discuss the Company's financial results for the three and nine months ended September 30, 2025. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com. For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.579.2543
International: 785.424.1789
Conference ID: CPKQ325

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas transmission and distribution, electricity generation and distribution, propane gas distribution, mobile compressed natural gas utility services and solutions, and other businesses.

13-13-13-13

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and regulatory initiatives to serve existing and new customers, further grow its businesses and earnings, and increase shareholder value. The following table includes all major projects and initiatives that are currently underway or recently completed. The Company's practice is to add incremental margin associated with new projects and regulatory initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, as compared to the Company's prior quarterly filings. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's third quarter 2025 Quarterly Report on Form 10-Q.

	Adjusted Gross Margin						
	Three Months Ended September 30,		Nine Months Ended September 30,		Year Ended December	Estimate for Fiscal	
(in millions)	2025	2024	2025	2024	2024	2025	2026
Pipeline Expansions:							
St. Cloud / Twin Lakes Expansion	**$ 1.0**	$ 0.1	**$ 1.9**	$ 0.4	$ 0.6	$ 2.8	$ 3.8
Wildlight	**0.5**	0.6	**1.5**	1.0	1.5	3.0	4.3
Newberry	**0.6**	0.6	**1.8**	0.7	1.4	2.6	2.6
Worcester Resiliency Upgrade	**—**	—	**—**	—	—	—	10.2

Detailed Discussion of Major Projects and Initiatives

Pipeline Expansions

Worcester Resiliency Upgrade

In August 2023, Eastern Shore filed an application with the Federal Energy Regulatory Commission ("FERC") requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, Delaware and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. In January 2025, the FERC approved the project. Construction has commenced and the project is expected to be placed into service in mid-2026 dependent on final FERC approval.

In June 2025, Eastern Shore filed a limited amended application with the FERC requesting revised initial transportation rates for the project. The revised rates reflected increased capital costs associated with unanticipated changes in global markets and supply chains, including the availability of skilled laborers with the requisite certifications to work on this project. Eastern Shore requested expedited action by the FERC in relation to this matter and an approved order was issued in July 2025. The project is expected to generate $10.2 million in adjusted gross margin in 2026 and $17.6 million in 2027 and thereafter.

East Coast Reinforcement Projects (Boynton Beach and New Smyrna Beach)

In December 2023, Peninsula Pipeline filed a petition with the Florida Public Service Commission ("PSC") for approval of its Transportation Service Agreements with Florida Public Utilities Company ("FPU") for projects that will provide additional supply to coastal communities on the East Coast of Florida, which are experiencing significant population growth. Peninsula Pipeline proposed several pipeline extensions to support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024. New Smyrna Beach was placed into service during May 2025 and construction is projected to be complete for Boynton Beach in the fourth quarter of 2025.

Central Florida Reinforcement Projects (Plant City and Lake Mattie)

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida which are also experiencing significant population growth. Peninsula Pipeline proposed to construct several pipeline extensions which will support FPU's distribution system around the Plant City and Lake Mattie areas of Florida with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024. The Plant City project was completed in the fourth quarter of 2024, and the Lake Mattie project went into service in July 2025.

Renewable Natural Gas Supply Projects

In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of Transportation Service Agreements with FCG for projects that will support the transportation of additional renewable energy supply to FCG. The projects, located in Florida's Brevard, Indian River and Miami-Dade counties, will bring renewable natural gas produced from local landfills into FCG's natural gas distribution system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian River County, and Miami-Dade County. Benefits of these projects include increased gas supply to serve expected FCG growth, strengthened system reliability and additional system flexibility. The Florida PSC approved the petition at its July 2024 meeting with the projects estimated to be

completed in the first half of 2026. In October 2025, the Florida PSC approved amendments to the Transportation Service Agreements that were filed to include Peninsula Pipeline as a party to the related interconnection agreements.

Miami Inner Loop Pipeline Projects
In September 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of the Transportation Service Agreement with FCG for a series of projects that will enhance the infrastructure in Miami-Dade County. The proposed expansion consists of the development of several pipeline projects to support growth and FCG's distribution system in the area, as well as enhance FCG's access to obtain gas from various points in the Miami-Dade County area. The expansion was approved in February 2025 and interim services began in August 2025 with permanent facilities expected to be in service by the second quarter of 2026.

Duncan Plains Pipeline Project
In July 2025, Aspire Energy Express entered into an agreement with American Electric Power to construct and operate an intrastate natural gas pipeline in central Ohio to serve a new fuel-cell facility, which will provide on-site electric power to a data center. This new transmission infrastructure is expected to be in service in the first half of 2027.

Regulatory Initiatives

Maryland Natural Gas Rate Case
In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, the “Maryland natural gas distribution businesses”) filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, the Company sought approval of the following: (i) permanent rate relief of approximately $6.9 million with a return on equity ("ROE") of 11.5 percent; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses; and (iii) authorization to establish a rider for recovery of the costs associated with the Company's new technology systems. In August 2024, the Maryland natural gas distribution businesses, the Maryland Office of People's Counsel (the "Maryland OPC") and PSC staff reached a settlement which provided for, among other things, an increase in annual base rates of $2.6 million. In September 2024, the Maryland Public Utility Judge issued an order approving the related settlement agreement in part. The $2.6 million increase in annual base rates was approved and the Company filed a Phase II filing in November 2024 to determine rate design across the Maryland natural gas distribution businesses, consolidation of the applicable tariffs and recovery of technology costs. The hearing was held in March 2025, during which Phase II was approved, including an additional $0.9 million in revenue requirement, for a total cumulative increase of $3.5 million. A final order was issued in April 2025 and included approval of the consolidation of the operations and the assets of CUC-Maryland Division, Sandpiper Energy, and Elkton Gas into one entity which was renamed and will operate as Chesapeake Utilities of Maryland, Inc.

Maryland Natural Gas Depreciation Study
In January 2024, the Company's natural gas distribution businesses in Maryland filed a joint petition for approval of its proposed unified depreciation rates with the Maryland PSC. A settlement among the Company, PSC staff and the Maryland OPC was reached and the final order approving the related settlement agreement went into effect in July 2024, with new depreciation rates effective as of January 1, 2023. The approved depreciation rates resulted in an annual reduction in depreciation expense of approximately $1.2 million.

Delaware Natural Gas Rate Case

In August 2024, the Company's Delaware natural gas division filed an application for a natural gas rate case with the Delaware PSC seeking approval of the following: (i) permanent rate relief of approximately $12.1 million with a ROE of 11.5 percent; (ii) proposed changes to depreciation rates which were part of a depreciation study also submitted with the filing; and (iii) authorization to make certain changes to tariffs. Annualized interim rates were approved by the Delaware PSC in the amount of $2.5 million and became effective in October 2024. A settlement among the Company, PSC staff and the Delaware Division of the Public Advocate was reached and approved by the Delaware PSC in June 2025 providing an annual revenue increase of $6.1 million, as well as dividing the rate case into two phases. Rates set to recover the approved components of the increase were effective in March 2025. In October 2025, a settlement among the Company, PSC staff and the Delaware Division of the Public Advocate was reached for Phase II of the rate case addressing tariff-related changes including rate design and approved by the Delaware Public Service Commission with rates effective as of October 15, 2025.

FPU Electric Rate Case

In August 2024, the Company's Florida Electric division filed a petition with the Florida PSC seeking a general base rate increase of $12.6 million with a ROE of 11.3 percent based on a 2025 projected test year. Annualized interim rates of approximately $1.8 million were approved with an effective date of November 1, 2024. In March 2025, the Florida PSC approved the permanent rate increase, but the order was subsequently protested. In May 2025, the Company reached a settlement agreement with the interested parties to resolve all outstanding issues in its current base rate case, which was filed as a joint motion for approval with the Florida PSC. This settlement which was approved by the Florida PSC in July 2025, provides for a total revenue increase of approximately $8.6 million on an annual basis, with $1.0 million of the increase deferred from the first year's base rate increase and recovered over three years. A step-up rate increase was also approved for up to $0.7 million, upon completion of the purchase and refurbishment of certain substations, which is expected in December 2026.

FCG Depreciation Study

In February 2025, FCG filed a depreciation study with the Florida PSC. The application is requesting approval of revised annual depreciation rates, as well as a reduction related to a reserve imbalance that would be amortized over a two-year period. The outcome of the application is subject to review and approval by the Florida PSC. The Florida OPC filed a motion to hold this filing in abeyance, which was denied in April 2025. The OPC has since filed motions to reconsider and dismiss the docket, which were denied by the Florida PSC in September 2025. At this time, the docket is set for hearing in December 2025.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption

For the nine months ended September 30, 2025, increased customer consumption, which includes the effects of colder weather conditions, largely in the Company's Ohio and Delmarva service areas, compared to the prior-year period resulted in a $4.8 million increase in adjusted gross margin.

The following table summarizes heating degree-day (HDD) and cooling degree-day (CDD) variances from the 10-year average HDD/CDD ("Normal") for the three and nine months ended September 30, 2025 and 2024.

17-17-17-17

Natural Gas Distribution Growth

The average number of residential customers served on the Delmarva Peninsula increased by approximately 4.3 percent for both the three and nine months ended September 30, 2025. The average number of residential customers served by Florida Public Utilities Company increased by approximately 3.5 percent and 3.9 percent for the three and nine months ended September 30, 2025, respectively, while the average number of residential customers served by Florida City Gas increased by approximately 2.2 percent and 2.1 percent for the three and nine months ended September 30, 2025, respectively.

The details of the adjusted gross margin increase are provided in the following table:

	Three Months Ended September 30, 2025		Nine Months Ended September 30, 2025	
(in millions)	**Delmarva Peninsula**	**Florida**	**Delmarva Peninsula**	**Florida**
Customer Growth:				
Residential	$ 0.3	$ 0.6	$ 1.2	$ 2.4
Commercial and industrial	—	0.6	0.2	1.7
Total Customer Growth	**$ 0.3**	**$ 1.2**	**$ 1.4**	**$ 4.1**

18-18-18-18

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $335.6 million for the nine months ended September 30, 2025. The following table shows a range of the forecasted 2025 capital expenditures by segment and by business line:

	2025	
(in millions)	**Low**	**High**
Regulated Energy:		
Natural gas distribution	$ 170.0	$ 175.0
Natural gas transmission	170.0	175.0
Electric distribution	35.0	40.0
Total Regulated Energy	375.0	390.0
Unregulated Energy:		
Propane distribution	12.0	15.0
Energy transmission	8.0	10.0
Other unregulated energy	12.0	15.0
Total Unregulated Energy	32.0	40.0
Other:		
Corporate and other businesses	18.0	20.0
Total 2025 Forecasted Capital Expenditures	**$ 425.0**	**$ 450.0**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing political and economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth or acquisition opportunities and availability of capital. At September 30, 2025, the Company further increased and refined its 2025 capital guidance range to $425 million to $450 million given progress on its capital projects.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 49 percent as of September 30, 2025, as the Company continues to remain focused on moving back closer to this target ratio. In the last twelve months, the Company has issued $92.0 million of new equity via its DRIP and ATM program, representing 729 thousand incremental shares.

Chesapeake Utilities Corporation (CPK) Q4 2025 Earnings Call February 26, 2026 8:30 AM EST

Company Participants

Lucia Dempsey - Head of Investor Relations
Jeffrey Householder - President, CEO & Chairman
James Moriarty - Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer
Beth Cooper - Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Conference Call Participants

Michael Brown - Barclays Bank PLC, Research Division
Christopher Ellinghaus - Siebert Williams Shank & Co., L.L.C., Research Division
Paul Fremont - Ladenburg Thalmann & Co. Inc., Research Division
Alexis Kania - BTIG, LLC, Research Division

Presentation

Operator

Welcome to Chesapeake Utilities Corporation's Fourth Quarter and Full Year 2025 Earnings Conference Call. [Operator Instructions]

I would now like to turn the call over to Lucia Dempsey, Head of Investor Relations.

Lucia Dempsey
Head of Investor Relations

Thank you, and good morning, everyone. Today's presentation can be accessed on our website under the Investors page and Events and Presentations subsection. After our prepared remarks, we will open the call up for questions.

On Slide 2, we show our typical disclaimers, while I remind you that matters discussed on this conference call may include forward-looking statements that involve risks and uncertainties. Forward-looking statements and projections could differ materially from our actual results. The safe harbor for forward-looking statements section of our 2025 annual report on Form 10-K provides further information on the factors that could cause such statements to differ from our actual results.

Additionally, the company evaluates its performance based on certain non-GAAP measures, including adjusted gross margin, adjusted net income and adjusted earnings per share. And the information presented today includes the appropriate disclosures in accordance with the SEC's Regulation G.

A reconciliation of these non-GAAP measures to the related GAAP measures has been provided in the appendix of this presentation, our earnings release and our 2025 annual report on Form 10-K.

Here at Chesapeake Utilities, safety is our first priority. We start all meetings with a safety moment, and we'll do so here with a moment on Women's Heart Health as highlighted on Slide 3. As February is American Heart Month, it's a good time to take care of ourselves and our loved ones by making small changes that can have a big impact on our heart health.

Cardiovascular disease is the #1 killer for women in particular. So it's important to understand the unique risk factors women face across various stages of life, including pregnancy and menopause. We are proud to be a long-standing supporter of the American Heart Association, which has in-depth resources for managing heart health risks and implementing changes that support long-term cardiovascular health.

It's now my pleasure to introduce our presenters today. Jeff Householder, Chair of the Board, President and Chief Executive Officer, will summarize the highlights and accomplishments of 2025 and introduce our theme for 2026. Jim Moriarty, Executive Vice President, General Counsel, Corporate Secretary and Chief Policy and Risk Officer, will provide updates on our regulatory strategy, business transformation efforts and stakeholder engagement. And Beth Cooper, Executive Vice President, Chief Financial Officer, Treasurer and Assistant Corporate Secretary, will discuss our full year financial results, financing updates and investment highlights.

I'll now turn the call over to Jeff.

Jeffrey Householder
President, CEO & Chairman

Thank you, Lucia. Good morning. It's great to speak with you today. As shown on Slide 5, 2025 was a year of outstanding performance and growth. I'm proud of everything our team has done in the last year to deliver with purpose. We have once again reached significant new heights across our entire enterprise.

2025 was our 19th consecutive year of earnings growth. We generated adjusted earnings of $6.01 per share, reflecting industry-leading growth of 12% relative to full year 2024. Above-average residential growth of 3% across our service areas continues to serve as the primary driver for our capital program. We invested $470 million through 2025, a 32% increase over our 2024 capital spend and $20 million above our 2025 guidance range, a record of non-acquisition capital.

2025 was also a record year for incremental adjusted gross margin growth up $71 million. Included in that was transmission project margin of $19 million and incremental infrastructure margin of $14 million. Our proactive regulatory approach also contributed to our full year results with completed rate cases in our Maryland, Delaware and Florida electric jurisdictions, driving an additional $13 million of gross margin in 2025.

And lastly, we are pleased to end the year back at our target equity capitalization of 50%, exactly in line with the goal we laid out at the start of 2025 and ahead of the schedule we established at the time of the FCG acquisition.

Slide 6 provides additional detail on our record levels of earnings growth. For the fourth quarter and full year 2025, we generated double-digit growth in adjusted gross margin, adjusted net income and adjusted earnings per share. These results demonstrate our commitment to providing high-quality, safe and reliable service for all customers and driving value for all stakeholders.

I'll now shift to Slide 7, which highlights our above-average customer growth. We operate in some of the fastest-growing regions of the country. In 2025, we added nearly 11,000 residential, commercial and industrial customers across our natural gas and electric distribution service areas. In Delmarva, residential customer growth was 4.1%. Florida Public Utilities was up 3.6%, and Florida City Gas recorded a 2.2% increase. Residential community expansion drives corresponding commercial infrastructure growth. Our customer additions led to an incremental $7.4 million of adjusted gross margin in 2025.

We also see additional growth opportunities in Ohio, which has quickly become a top spot for data center build-outs. In addition to starting construction this year on the Duncan Plains pipeline to support AEP's data center fuel cell, we've been providing temporary virtual pipeline service through Marlin for a data center construction project north of Columbus, Ohio. We continue to explore a number of gas transportation projects and look forward to further expansion in the Ohio market.

Before I discuss our strategy and goals for the next year, I'd like to reflect on the significant progress we've made in just the first 2 years following our acquisition of Florida City Gas in late 2023, as detailed on Slide 8. FCG has proved to be a strong strategic and cultural fit and immediately provided a wide range of investment, expansion and improvement opportunities. We quickly got to work and have already invested approximately $250 million of CapEx, which is 50% of our 5-year FCG-related investment goal. These projects are expanding and reinforcing FCG's ability to provide reliable and affordable energy to meet customer demand.

We've also fully integrated the FCG team into the Chesapeake family and aligned a number of functions and processes with our legacy operations under our One Company approach. FCG is now active on our 1CX SAP customer billing platform, and we've consolidated all regulated customer service operations into one coordinated team. These integration and investment accomplishments are important for several reasons. One, we've done what we said we would do. We've also strengthened our track record of above-average growth, and we're demonstrating our ability to finance, integrate and capitalize on transformational opportunities that support consistent long-term growth.

I'd now like to talk about our outlook, strategy and goals for 2026 and beyond. Core to that discussion and to our record-breaking performance and growth over the last year are the 3 pillars of our growth strategy shown on Slide 9. We remain committed to prudently deploying capital, proactively managing our regulatory agenda and continually transforming our business operations as we believe consistent and successful execution will continue to drive top quartile growth and total shareholder return.

I'll now move to Slide 10 to introduce our theme for this year, Transforming for Growth, Powered by People, which particularly resonates with where we are today. We're building on a well-established blueprint for top quartile performance. We're transforming the business to prepare for a new level of scale and growth, and we're powered by strong relationships across all stakeholders, teammates, customers, regulators, investors and our communities.

In this year of transformation, there are a few specific deliverables that we're focused on for 2026. We're focused on investing $450 million to $500 million of CapEx, including successful completion of a number of projects and initiating construction on a new set of opportunities that are presently under development. We're focused on reaching a successful outcome on our general rate case for Florida City Gas, which Jim will discuss shortly in more detail. As part of a whole host of business transformation initiatives across our organization, we're undertaking the largest technology system implementation in our history with our multiyear enterprise resource plan or ERP.

I know I've said it before when we were embarking on the 1CX project, but this ERP implementation, which we're calling 1CORE is going to be bigger and even more transformational than anything we've done thus far, and Jim will discuss more on that shortly. And finally, we're focused on maintaining a strong balance sheet and investment-grade credit ratings as we fund our significant capital investment program and continue to drive strong earnings and dividend growth in support of top quartile shareholder return.

I'll now turn to Slide 11, which provides a detailed look into our 2026 capital plan. Following a record-breaking $470 million of capital invested in 2025, we're initiating full year 2026 capital expenditure guidance of $450 million to $500 million. This plan assumes levels of transmission, distribution and infrastructure investment similar to last year alongside an increase in technology CapEx for the ERP. I will note that approximately 20% to 30% of this capital will drive margin growth in 2027 or later, given regulatory recovery time lines and expected project completion dates.

Slide 12 provides an update on our major capital projects. Nearly all are generating margin through interim or full service, driving $22.8 million of adjusted gross margin in full year 2025. We forecast these projects to contribute approximately $47 million of gross margin in 2026 and an additional $9 million in 2027.

Turning to Slide 13. I'd like to highlight 2 projects for Eastern Shore natural gas that could further support the significant demand growth in our northern service areas.

The first is the Delmarva Regional Enhancement project, which I am pleased to be announcing today. This investment includes over 20 miles of 16- and 24-inch pipeline and looping to add firm capacity and improve reliability, driven by increased shipper demand identified during our latest open season. We currently estimate capital investment of approximately $75 million and an in-service date around the end of 2028.

Second project was announced a few weeks ago when we were awarded a $6.5 million grant by the Accomack County Board of Supervisors to begin to assess feasibility, design and engineering of new infrastructure that would bring natural gas to Virginia's Eastern Shore. We're working with local stakeholders and potential customers to ascertain the size, route and cost for this potential system, which could extend natural gas from Princess Anne, Maryland to Temperanceville, Virginia, serving homes and major employees, including the NASA Wallops Flight facility, Wallops Island operations and other regional commercial and industrial customers. While still in very early stages, we are excited about the opportunity to extend our system into Virginia to deliver safe, reliable natural gas to the Accomack County community.

I'll now shift to Slide 14 to discuss our 5-year capital investment guidance of $1.5 billion to $1.8 billion through 2028. Given our 2024 and 2025 capital spend, combined with our identified and ongoing capital investments, we've invested and identified a total of $1.6 billion toward our 5-year range. As we've discussed, we intend to provide a more significant update to this range a year from now in order to incorporate outcomes of our strategic planning session this summer and make additional headway on multiple potential investment projects under evaluation and development.

With that, I'll turn to Jim to discuss our second and third pillars, regulatory strategy and business transformation initiatives.

James Moriarty
Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer

Thank you, Jeff. It is great to be with you all again today. I'll start with Slide 15, which includes updates on our regulatory agenda. As Jeff mentioned at the start of the call, successful rate cases in our Delaware, Maryland and Florida electric jurisdictions drove over $12 million of incremental gross margin in 2025 and are expected to generate over $18 million in 2026, the first full year of revised rates.

Our Florida City Gas depreciation study also concluded last week. The Florida Public Service Commission denied our request for a 2-year amortization of the $19 million excess depreciation reserve and adopted its staff recommendation of only $6.8 million of excess depreciation recovered over the life of the assets. This results in annual depreciation savings of approximately $500,000.

Given the timing of the order, we opted to not reopen the books for 2025 and instead will apply 2 years' worth of reduced depreciation expense or close to $1 million in 2026. And as you'll recall, achieving our 2025 earnings guidance included appropriate cost recovery and return on equity at FCG, which did not happen. We had hoped to avoid filing a general rate case and utilize depreciation expense savings from the excess reserve to delay a customer rate adjustment for as long as possible.

Given the outcome of the depreciation study, however, we immediately submitted notice of intent, indicating our plan to file a general rate case for FCG in mid-April of 2026. This rate request will ensure appropriate cost recovery and an improved allowed ROE. We expect interim rates to be effective by early July 2026 and look forward to FCG returning to its earnings contribution levels in 2027 and beyond.

I'd now like to turn to the 2 core elements of our theme for 2026, which Jeff introduced earlier. Starting with transformation for growth. Slide 16 provides an update on our business transformation efforts, which is a particular focus this year as we implement significant transformations within technology, systems and processes to drive continued operational excellence as a much larger organization. We've identified 5 key transformation themes: customer experience, operational excellence, digital agility, employee experience and financial modernization, each of which will be addressed through one or more projects in 2026.

In January of this year, we held an official kickoff event for our ERP project, which we're calling 1CORE. We brought together 130 teammates and external partners to align around our objectives and goals as we implement SAP solutions for our finance, supply chain, asset management and human resource functions. We expect to invest approximately $75 million in 2026 and are targeting a system go-live date in Q2 of 2027.

We are also implementing employee training and wellness programs, new software tools and organizational structure updates across the company to strengthen our people, simplify processes and leverage new technologies. These initiatives will deliver better service for our customers and facilitate continued long-term growth of the organization.

The second element of our 2026 theme is powered by people, which recognizes the important role all our stakeholder groups play to drive our long-term success. Slide 17 provides highlights on the work underway to actively engage with our key stakeholder groups, teammates, customers, regulators, legislators, partners, investors and our communities overall. We're focused on attracting and retaining change-focused teammates and have rolled out multiple programs on training, development, organizational change management and wellness.

We are committed to placing our more than 440,000 customers at the center of everything we do as we continue to prioritize safe, reliable and affordable service. We're grateful to maintain strong constructive relationships with regulators, legislators, business partners and investors. Whether seeking project approval or capital financing, we rely on these trusted partners to enable sustainable positive growth for all stakeholders.

And finally, we are thankful for the communities in which we work and live. We support local organizations. We communicate with our neighbors. We improve our environments, all of which is core to our mission and reflected in the work we do each and every day.

With that, I'll turn the call over to Beth for a more detailed discussion of our financial results.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Thanks, Jim, and good morning, everyone. Slide 18 shows our record-breaking financial results for full year 2025. We generated approximately $639 million of adjusted gross margin, $141 million of adjusted net income and $6.01 of adjusted earnings per share in 2025, all representing double-digit increases over full year 2024.

Adjusted net income was up 16%, which translated into a 12% increase in adjusted EPS after we purposely advanced our equity to total capitalization ratio back to 50% to support our CapEx program at a faster pace than our forecasted financial models post FCG. This reflects Chesapeake's highest level of annual earnings and our 19th year of consecutive earnings growth, as I will discuss in more detail shortly.

Our results were driven by consistent growth across our entire business as detailed on Slide 19. For full year 2025, our key margin drivers added $2.41 per share, only partially offset by increased expenses and financing costs of $1.79 per share. Record levels of capital investment drove $0.58 of incremental adjusted EPS from transmission expansion projects and $0.43 from infrastructure projects to improve reliability and resiliency across our regulated businesses.

Growth in our service areas and increasing demand for natural gas drove $0.51 of incremental adjusted EPS, including $0.28 of higher customer consumption and $0.23 of distribution system customer growth. Permanent rates from the 3 rate cases we completed in 2025 added $0.39 of adjusted EPS and our unregulated businesses generated $0.29 of net incremental earnings per share, largely driven by substantial growth in our Marlin Virtual Pipeline transportation business and supported by strong performance in our Propane and Aspire Energy operations.

As I just mentioned, these positive margin gains were partially offset by a few factors, most notably $0.51 from the absence of the RSAM benefit we recorded in 2024 and we were unable to repeat given the outcome of the Florida City Gas depreciation study. We also incurred $0.31 per share of increased depreciation and amortization expense related to our significant levels of capital investment and $0.41 per share of additional operating expenses directly attributable to our sustained growth.

However, we continue to drive operational efficiencies, leading to operational expenses at only approximately 45% of adjusted gross margin for full year 2025. Lastly, financing activity, including our debt and equity issuances over the last 12 months to fund our capital expenditures and return to our target capital structure, reduced adjusted EPS by $0.35 per share, particularly as we accelerated our equity capitalization back to 50%.

Shifting to Slide 20. Adjusted gross margin for our Regulated segment was $494 million in 2025, a 12% increase over full year 2024. This growth continues to be driven by strength in our core business operations with high levels of capital investment to support rapidly growing service areas and improved regulatory recovery following our 3 rate cases. Our focus on cost management enabled similar growth in our regulated operating income, up 13% to approximately $222 million for full year 2025 despite again, the absence of the $15.5 million RSAM benefit recorded in 2024.

Moving to Slide 21. We continue to see outstanding performance from our unregulated segment with full year 2025 adjusted gross margin of $145 million, up 13% relative to the prior year. Our Marlin Gas Services business continues to meet the rapid growth in demand for virtual pipeline transportation, driving $11 million of additional gross margin with our Propane and Aspire Energy businesses contributing an additional $5.7 million of gross margin in 2025.

I'll now move to Slide 22 to highlight our financing and capital accomplishments this past year. I'm proud to report that we ended 2025 at an equity capitalization of 50%, meeting the goal we set at the start of the year, 3 years ahead of the target we actually established for ourselves following the acquisition of Florida City Gas. We issued $123 million of equity or 961,000 shares, ending the year with nearly 24 million shares outstanding. Our equity capitalization was also boosted by $76 million of retained earnings.

We also made meaningful moves to further strengthen our balance sheet and access to capital. At the start of the year, we secured our inaugural credit rating with Fitch earning investment-grade issuer and instrument ratings. Then in June, we amended and extended one of our long-term shelf agreements, followed by a $200 million debt issuance in August and September. And just last week, we extended and amended our second private placement shelf facility, providing us additional debt capacity.

We ended the year maintaining strong liquidity with 78% of our total capacity of $755 million available between our revolving credit facility and our private placement shelf facilities. As we look to 2026, we are excited to refinance the first tranche of debt that we issued in conjunction with the Florida City Gas acquisition and plan to finance our robust capital program with a mix of earnings retained in the business, equity and debt, generally maintaining our 50/50 capital structure overall.

Slide 23 demonstrates how our dividend policy remains a key component of our capital allocation strategy. We also remain committed to consistent dividend growth. Our annualized dividend per share of $2.74 reflects a 7% annual increase from 2024 and is reflected in the long-term dividend CAGR of 9%. Our policy also facilitates significant earnings reinvestment as our Board-approved dividend payout target range of 45% to 50% allowed us to retain 54% of earnings in 2025 to support our capital investment plan, a higher percentage than most of our peers.

We will continue to support long-term dividend growth while reinvesting significant earnings back into the company, enabling our investors to benefit from both long-term top quartile earnings and strong dividend growth.

As shown on Slide 24, our 2025 adjusted EPS result was remarkable for a number of reasons.

First, we generated 12% growth relative to 2024, which is significantly above the industry average. It is particularly meaningful that we achieved this growth rate despite receiving no recovery and amortization of the excess depreciation reserve and also while successfully driving our equity capitalization back to 50%.

Second, 2025 marks our 19th year of consecutive earnings growth. Since 2007, we've grown year-over-year earnings, demonstrating our unwavering track record of higher earnings performance and commitment to increasing shareholder value.

Third, our 2025 EPS represents a 9.1% CAGR over this 19-year time period, which highlights our ability to drive consistent above-average returns now and into the future. And speaking of the future, we are reaffirming our 2028 adjusted EPS range of $7.75 to $8 per share as we remain on track to meet our long-term adjusted EPS growth target of 8%.

Before we open the call for Q&A, I'd like to highlight some of the reasons that Chesapeake Utilities remains a uniquely valuable investment for years to come, as shown on Slide 25. As I just discussed, we take financial discipline and execution very seriously and are highly focused on building on our track record of performance and growth with many financial records being set in 2025.

We will continue to execute on our 3 pillars of growth, enabled by continued growing demand for natural gas throughout our service areas and the need for continued reliability, capacity and expansion. Our disciplined approach to financing, including ensuring balance sheet strength and upholding investment-grade credit metrics keep us well positioned to address market volatility and achieve successful regulatory outcomes as we fund our growth plan. All of these elements set the stage for growth in 2026 and beyond.

As we transform the company for growth, we are continually reminded that we are powered by people and that strengthening relationships and creating value for all stakeholders will continue to differentiate us now and into the future. We sincerely appreciate your continued interest, support and investment in our company, and thank you for joining us today.

With that, we'll take your questions. Operator?

Question-and-Answer Session

Operator

[Operator Instructions] Our first question is coming from Nicholas Campanella with Barclays.

Michael Brown
Barclays Bank PLC, Research Division

This is Michael Brown on for Nicholas Campanella. My first question is, you reaffirmed your full year '28 EPS target. Can you walk us through the growth rate for full year '25 through full year '27 to reach a full year '28?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Michael, I'm sorry. This is Beth. Can you restate your question? Would you mind?

Michael Brown
Barclays Bank PLC, Research Division

You reaffirmed your full year '28 EPS target. Can you walk us through the growth rate from full year '25 through full year '27 to get to full year '28?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

We have -- at the present time, as we -- as I talked about on the call, we have reaffirmed our 2028 EPS guidance. And Michael, you may recall this, but I will just remind you, as a company, we've historically provided long-term EPS guidance given some of the capital expenditures that we incur and how the timing of getting some of those capital expenditures underway and completed.

And so what we've done is actually put out there our long-term EPS CAGR of 8% and again, reaffirmed our 2028 EPS guidance. Also in conjunction with that, we have put out our annual capital guidance this year and some of the projects that are underway that will hopefully, both with that information and also the information that we include in our major projects table, enable you to provide a forecast as we move through that period to 2028.

Operator

We'll take our next question from Chris Ellinghaus with Siebert.

Christopher Ellinghaus
Siebert Williams Shank & Co., L.L.C., Research Division

Can you talk about the first quarter thus far? It seems like we've had some pretty cold snaps. And I'm just kind of curious what you're thinking about tailwind from weather in the first quarter.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Sure. Great question. Certainly, weather has been top of mind for us like many across the country with the weather that we've experienced. As you may recall, in our northern service territories on the Maryland side, we have weather normalization, right? So that's going to somewhat stabilize the impact of the weather for our Maryland operations.

In Delaware, there will certainly be an impact, and we've begun to quantify the first part of that for January, but the numbers certainly are preliminary, and we're not in a position to really talk about that just yet. Similarly, on the propane side, there will be some benefit that comes from the weather in Florida. You also may recall with cooler -- the colder weather there -- also in weather, we have a greater portion of our bill that is more of a fixed than a variable component. So again, more weather normalized when you get to Florida.

So yes, coming out of the gate, there will be some impact in January and as we're seeing into February. What we're also, Chris, being very mindful of is the impact on our customers and wanting to work with them, certainly from a payment standpoint, working with them to hopefully put those that may need it in touch with some of the social service agencies.

And then finally, from an operations standpoint, I can't say enough about from our standpoint, how our team operated during this challenging time, how our facilities were maintained, a no disruption of service across our systems. And again, we look forward to providing more information when we jump on our first quarter call.

Christopher Ellinghaus
Siebert Williams Shank & Co., L.L.C., Research Division

Okay. I'm not quite sure if you have insights into this, but I'm guessing over your wide-ranging Florida service areas that the temperatures were fairly unusually cool. Is that fair?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

In certain parts of our areas in Florida, absolutely. I can tell you, I've just been down in Florida. And when I landed, it wasn't the normal temperatures. I'm traditionally accustomed to. So yes, there would be.

But again, with our rate design over the last several years, we have limited that a little bit more than as we've moved over the last couple of years. But certainly, there will be some, and there will also be some, to your point, that may come from certainly the propane side as well down there.

Christopher Ellinghaus
Siebert Williams Shank & Co., L.L.C., Research Division

Okay. The growth in the FCG customers for the year, you do have this wide-ranging FCG service area. Does that suggest versus maybe the more Miami proper area that there are some portions of the service area that are growing in the 3% to 4% range?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

There are portions of Florida that certainly have higher growth than others. I think it's -- and I would say it's probably closer to the 3-ish-percent in some of those areas. What I would also say, though, is despite what individuals may think about growth, let's say, in more of a metropolitan area like Miami, what you are seeing, we saw this last year on one of the trips down there when we took a ride in the service area and with our team looked at some of what's going on, there is a lot of redevelopment that's going on there.

So opportunities to particularly have increased margin that comes from commercial infrastructure that's being constructed when particular buildings are being torn down and multi-unit dwellings are being constructed, again, there may be more opportunities as well. So yes, higher in certain markets, but there are opportunities from a commercial side and a residential side, even in some of those lower growing markets.

The other thing, Chris, that I would point out, and I think your point to some degree, I would just highlight, we try to make it very clear in our earnings release. In Florida, in particular, the amount of commercial infrastructure that is supporting the residential growth that is going on down there is pretty phenomenal. It's also happening on the Peninsula, but to a much lesser degree, more driven there by residential. So we're continuing to see the levels of growth that we had thought we would experience over the last several years since Florida City Gas. So that's been exciting that it's been on track.

Jeffrey Householder
President, CEO & Chairman

Chris, I'll just add -- this is Jeff. I'll just add a little detail to that specific to your question. If you look at the city gas service territories, where we're seeing significant residential growth followed by, as Beth indicated, a substantial amount of commercial service growth is in the Port St. Lucie area around Vero Beach and then up in the Brevard County area, especially to the West of the county out in the Viera communities. And so those are significantly higher growth areas than what we're experiencing currently in the Miami portion of that service territory.

Christopher Ellinghaus
Siebert Williams Shank & Co., L.L.C., Research Division

That's kind of what I was thinking. Can you talk about the ERP and what you see as the benefits where you might see cost savings or sort of synergistic value creation? Can you quantify any of that?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Sure. I can talk a -- go ahead, Jeff. Go ahead, please.

Jeffrey Householder
President, CEO & Chairman

No, no, go ahead, please.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

I was just going to start off, one of the ways that we've been talking about it internally, Chris, and we've been working on establishing some metrics would be as we think about and talk about from time to time, our O&M expenses as a percentage of gross margin. So as this project starts to be underway on the back end, certainly of this project and many other technology improvements that we're making, you'll see us referring to that, in particular, as we talk about that benchmark O&M as a percentage of gross margin. And you may recall, Chris, we've been talking about that pretty much since Jeff became our CEO coming out of the gate and talking about that each year. And if you look at our history, we've been on a declining path as we've continued to grow.

So I would say that out of the gate -- Jeff, maybe I'll turn it to you, and you can touch on just some of the things that we're thinking about from the technology standpoint.

Jeffrey Householder
President, CEO & Chairman

Sure. I think this is a drive to accumulate data in a more proactive way that allows us to actually utilize that data and making better decisions about the company. I mean that's fundamentally what this is. To specifically talk about a handful of areas that we believe we'll see efficiencies and ultimately some cost savings.

I think there are opportunities on the customer service side, certainly, with respect to electronic billing, moving customers into a portal relationship with the company, reducing the number of calls to our call centers, automatic meter reading. All of those things, I think, are on the horizon for us that will provide significant efficiencies. There are a variety of supply chain issues here that we believe that kind of march down this One Company approach that we've been looking at to standardize things across all of our operating areas over the last few years.

We've just sort of scratched the surface, I think, on the way we buy materials and supplies and services in the company. And so I think there are significant opportunities there. A number of field services operations activities, especially in the way we schedule work and control kind of the flow of orders back and forth from a computer system out into the field and back without having to physically touch those. There are a variety of accounting and finance improvements that I think we'll see just how we process accounts payable. I mean and on and on and on. I mean, it's the sort of classic ERP opportunity here.

And so, linking that into our recently installed what we call 1CX, the SAP Customer Service Billing and Field Services Management Systems that we have in place across the company now, I think will continue to drive some of the cost savings that Beth was trying to support and to quantify.

We haven't gotten to a number. I mean, I walk around with one in my head, but I'm certainly not ready to begin to publicly describe that. But I think it is significant. And I think we will see that we will realize those cost savings, and they will flow through ultimately to keep customers' bills down to allow us to redeploy some of those dollars in support of some of the capital operations that we're pursuing and to make the company more efficient and less costly.

Christopher Ellinghaus
Siebert Williams Shank & Co., L.L.C., Research Division

Okay. Maybe one last question for Jim. Jim, how surprised were you by the Florida decision? And was that somewhat of a tacit invitation to file a rate case?

James Moriarty
Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer

Well, thank you, Chris. I mean that's a very good question. Our purpose all along was to kind of simplify what was the RSAM to a more traditional approach to depreciation. I think in some ways, we got caught up in the continuing tendency of the Supreme Court review and action. And while that was still pending, I think the OPC took a certain stand against what we were trying to do. And then that just fed into taking a lot longer than we or really anyone anticipated to land with a decision.

We were -- our approach was to avoid as long as possible a general rate increase filing. But with this decision now, we made the decision to go forward, and that's what we're doing. So I guess we were surprised in some way that a relatively simple straightforward application of traditional approaches got caught up in this vortex for the past year. But we're accepting it, and we're moving on, and we'll be filing here very shortly.

Christopher Ellinghaus
Siebert Williams Shank & Co., L.L.C., Research Division

So there seem to be some sympathy at the Supreme Court when they did the oral argument. What happens from now if some constructive order comes out of the Supreme Court?

James Moriarty
Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer

Well, I think ultimately, that's helpful for us. It really will address an issue that we're no longer going to deal with, and that is the validity of the RSAM. But I think in supporting that approach, I think it helps all of us in Florida that are filing rate cases.

Did I lose you, Chris?

Operator

We'll take our next question from Mike Brown with Barclays.

Michael Brown
Barclays Bank PLC, Research Division

Are you planning on giving guidance this year for full year '26?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

We -- again, what we are doing is basically reaffirming our 2028 guidance at this time. We don't -- historically, other than the year post Florida City Gas, we gave guidance on an annual basis in 2024 coming out of the acquisition because we knew that year with the transaction just occurring at the end of the year, we knew we could be accretive, but it was much less than what our historical run rate had been. So we provided annual guidance.

But we have a long term -- our long-term track record going back to 2018 when we initiated guidance is we follow a long-term view of the CAGR that we can achieve over a period of time. And so the short answer after I gave you the long-winded answer, Mike, is that we will not be, at this time, giving annual guidance for 2026.

Michael Brown
Barclays Bank PLC, Research Division

Can you provide an update on the Florida pipeline project that starts in the Indiantown gas hub and kind of where that stands at this point and when it will make it into the plan?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

So we are -- Jeff, do you want to start this one off?

Jeffrey Householder
President, CEO & Chairman

No. No, no. Go, Beth. Go sorry.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

No. I'm going to defer to you, Jeff, and let you kick this one off.

Jeffrey Householder
President, CEO & Chairman

Okay. All right. Fairly simple explanation. We are continuing the engineering design on that project and are working through -- in fact, I'm looking across the hall at the group of engineering folks that are working on that project as we speak. I think we're in pretty good shape to get an engineering design cost estimate here over the next 30 to 60 days on at least the first significant segments of that to get down toward our distribution system in Miami.

I believe that we will be on time with our estimated project start date, which I will probably hold back a little bit on describing when that is, but certainly sometime this year. It looks like we will be able to find the pipe and get the right of ways that we need to identify completed. So I'm pretty comfortable that we're on the right track with that project at this point.

Operator

We'll take our next question from Paul Fremont with Ladenburg.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

And hopefully, you have less snow down there than we have up here, Beth. I guess, for my first question, I'd like to maybe draw your attention to Page 43 PDF of your 10-K. I think you're basically saying that the adjusted gross margin from Full Circle Dairy and Noble was $10.9 million in 2025, and you're projecting '26 to be $28.5 million and '27 to be $29.7 million, I guess. Can you walk us through the delta between '25 and '26?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

So Paul, the line that you're looking at is actually a compilation of Marlin, Full Circle Dairy and our Noble RNG project that is in Ohio. It is not just Full Circle Dairy. And so some of the growth -- a big part of the growth that year-over-year, we've been experiencing, particularly if you look in the major project table, is actually coming more from Marlin because as you can imagine, with the facilities being in place for both Full Circle Dairy and our Ohio operations, there's not a steady -- they've both been in operation now for a year.

And so the opportunities for Full Circle Dairy for us, and certainly, we're going to have a follow-up with you and our other analysts would be around the production tax credit side. I know you've been talking to me about that. I think we've talked previously on the phone before around the investment tax credit that, that's really something for us that gets amortized over the life of the project. It is not a won and done. So the big part of the growth that you're seeing in any margin there is really going to be related to what Marlin is doing and less about those 2 facilities that are operating as planned.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

And if I look at that uplift, I mean, wouldn't that essentially offset the absence of RSAM for 2026, based on the?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Well, that would be great. Well, that would be great if we stopped there at the margin line. But as you know, there's operating expenses that are associated with that growth. And so with Marlin and it continuing to serve increasing amounts of -- an increasing projects, there's certainly costs associated with the labor side and other incremental expenses that are variable. And so you can't just unfortunately look at that line.

I like to look at that line too, but then I have to remind myself that there's variable costs. So a significant chunk of that would be offset in payroll-related costs. If we have to buy additional equipment to support that demand that's associated with depreciation and certainly property taxes associated with that, that all gets factored into it. So we can certainly walk through some of that as we get together, but that would need to be factored into your calculations.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

And then can you just quantify specifically the amount of PTC benefit that you're expecting to book in '26?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

We have some preliminary estimates on that. We are continuing to refine those, and I would certainly love for us to set up some time and walk through that. We're not quite there. We're still noodling with that a little bit, but we can certainly walk through where we are in our assumptions behind that.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

Great. And then can you also maybe -- I guess this would be more, Jim. Can you walk us through what -- how interim rates are set in Florida and what we should expect in terms of when interim rates come into play in July?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Do you want me to start that, Jim? Or do you -- Jeff? I don't know, Jim, do you?

Jeffrey Householder
President, CEO & Chairman

Well, I can take a pass at that. Yes, Jim is having some trouble.

James Moriarty
Executive VP, General Counsel, Corporate Secretary and Chief Policy & Risk Officer

Yes, please go ahead. Yes.

Jeffrey Householder
President, CEO & Chairman

Okay. The interim rate filing in Florida typically comes about 60 days after the actual filing date. So we're looking for those, as you well know, sometime in probably July, early-July. The traditional methodology for determining interim rates is to look at kind of existing rate base, could be some adjustments in there, look at the bottom end of the ROE range and to do a relatively straightforward calculation of any deficiency that exists there and to apply it to calculating the interim rates. So we're assuming that we would see interim rates in effect for the last half of this year or until certainly the permanent rates actually go into effect. And so we'll see what the timing looks like on that.

I don't think at this point, we're quite ready to describe what we believe that interim rate calculation will result in. There are some things that we are and will, I'm sure, debate with the Public Service Commission as we file for interim rate. One of those, as you may recall, is that the current return on equity for City Gas is about 100 basis points lower than what we would traditionally see at other gas utilities in Florida. That was set because of the RSAM.

And so the rate-making deal that was established by NextEra before we acquired the company reduced ROEs from the more traditional levels down about 100 basis points. And so we'll argue that, that's no longer applicable. And there are a couple of other things that will roll around in there. What I will tell you, though, Paul, is that you were -- I think the path you were down a second ago is one that I continue to go down between the weather impacts between the other associated opportunities that we have within the company and the interim rates, I believe that we will not see significant impacts resulting from missing out on the depreciation study result that we had anticipated for this year.

And in fact, as you may know, what would be traditionally done by the Florida Public Service Commission is if that depreciation study result had occurred the way we filed it in '26, that would have been a reduction most likely to the interim rates. And so I think there is a -- it's disappointing that we didn't get that depreciation result. But in the great scheme of things, I think we'll be able to overcome that with the several things that are going right for us this year.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

Great. And then last question for me. It looks as if there are 3 sort of additional RNG projects that maybe came online in '25. Are those -- can you describe -- are those dairy or otherwise in terms of their nature?

Jeffrey Householder
President, CEO & Chairman

Those are basically -- go ahead, Beth. Sorry.

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

No, go ahead, Jeff.

Jeffrey Householder
President, CEO & Chairman

Those are essentially RNG transport projects from landfills.

Paul Fremont
Ladenburg Thalmann & Co. Inc., Research Division

That's just the pipeline.

Jeffrey Householder
President, CEO & Chairman

Yes, that's the pipeline or the Marlin service that begins before the pipeline shows up. And so that's what you're seeing there. We don't have the production facility investment.

Operator

We'll take our next question from Alex Kania with BTIG.

Alexis Kania
BTIG, LLC, Research Division

Just thoughts on just the overall customer growth. I mean, again, just Delmarva continues to be really strong. I'm just kind of wondering if you see that as kind of sustainable or kind of any reason why that number can't continue in the near future?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Sure. So being based here on the Delmarva Peninsula, I can tell you in talking with our team, we continue to actually see strong growth in Delaware. It is not slowing down. In fact, you've heard -- in fact, Alex, on a couple of calls ago, Jeff actually, we talked about a small town by the name of Ellendale, which for someone who's from Delaware. Again, it would not have been an area that I would have thought would be close to the resort areas, but it's about a half hour to 45 minutes in. That is one of the new areas that we have begun to provide natural gas distribution service to, and it continues.

There is a lot of planned also infrastructure growth, particularly in the Southern County of Delaware that is being anticipated given it's a growing population. There's a lot of retirement activity that's happening in terms of new developments. So the infrastructure that's coming along like medical facilities, other types of things to support that growth are also continuing to stay at pretty high levels. So we continue to be excited.

And what I would add to that, which is, again, even more exciting when you layer this on top, right, is as that growth continues, it also supports the need for additional pipeline capacity to bring more gas into the southern part of the Delmarva Peninsula. And so we've got projects. Jeff just talked about it -- the newest one today. I think you're going to see, Alex, continued upstream pipeline demands that necessitate increased expansion there. So all continues. Nothing has changed from -- in terms of our view at this time.

Alexis Kania
BTIG, LLC, Research Division

Great. And then just maybe a follow-up on your comments a little bit earlier just on a little opportunity on the financing of the FCG acquisition debt. Could you just talk a little bit about kind of what that opportunity might be in terms of kind of a help on interest expense and if you see some additional ongoing opportunities down that path in the next couple of years?

Beth Cooper
Executive VP, CFO, Treasurer & Assistant Corporate Secretary

Absolutely. Great question, an area that I absolutely love. So you're spot on this morning. Yes, I mean, when we did the Florida City Gas financing, we unfortunately had to place debt that had a sixth handle to it -- a 6-plus handle to it. And so we have steady retirements that are going to happen over the next several years. So there's going to be a robust refinancing plan that has to take place.

You're going to see us, Alex, take a similar approach to what we did last year, which means we'll be looking at blending a portfolio of different tenors to accomplish a rate that's much more in line with what we would be expecting and based upon our history in terms of our long-term debt portfolio. So I don't think it's unreasonable to think that the opportunity exists for us to shave anywhere from 50 bps to 100 bps off of the coupon rate as long as things stay where they are. And so that's what you should expect to see from us this year.

Operator

And that does conclude the Q&A portion of today's call. I would now like to hand it back to Jeff Householder for any closing remarks.

Jeffrey Householder
President, CEO & Chairman

Thank you, and thank all of you for joining us this morning. We'll continue to provide significant information on our capital deployment, our project status and our margin production throughout the year.

We look forward to continuing our long track record of strong growth and top quartile financial success. And we look forward to seeing many of you at the AGA Financial Forum out in Scottsdale here in the next couple of months. So thanks again. We'll talk to you soon. Goodbye.

Operator

Thank you. This concludes Chesapeake Utilities Corporation's Fourth Quarter and Full Year Quarter 2025 Earnings Conference Call. Please disconnect your line at this time, and have a wonderful day.

Q4 & Full-Year 2025

Earnings Call Presentation

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward-looking statements may be identified by the use of words, such as "project," "believe," "expect," "anticipate," "intend," "plan," "estimate," "continue," "potential," "forecast" or other similar words, or future or conditional verbs such as "may," "will," "should," "would" or "could." These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities' Annual Report on Form 10-K for the year ended December 31, 2025 and subsequent quarterly reports on Form 10-Q filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share ("EPS*"). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Q4 2025 Safety Moment: Women's Heart Health

Cardiovascular disease is the #1 killer of women

- Nearly 45% of women aged 20+ are living with some form of cardiovascular disease
- <50% of women in the U.S. entering pregnancy have optimal cardiovascular health
- Women face unique risks for high blood pressure, a leading cause of heart disease and stroke

Never too late to improve heart health for you and your loved ones!

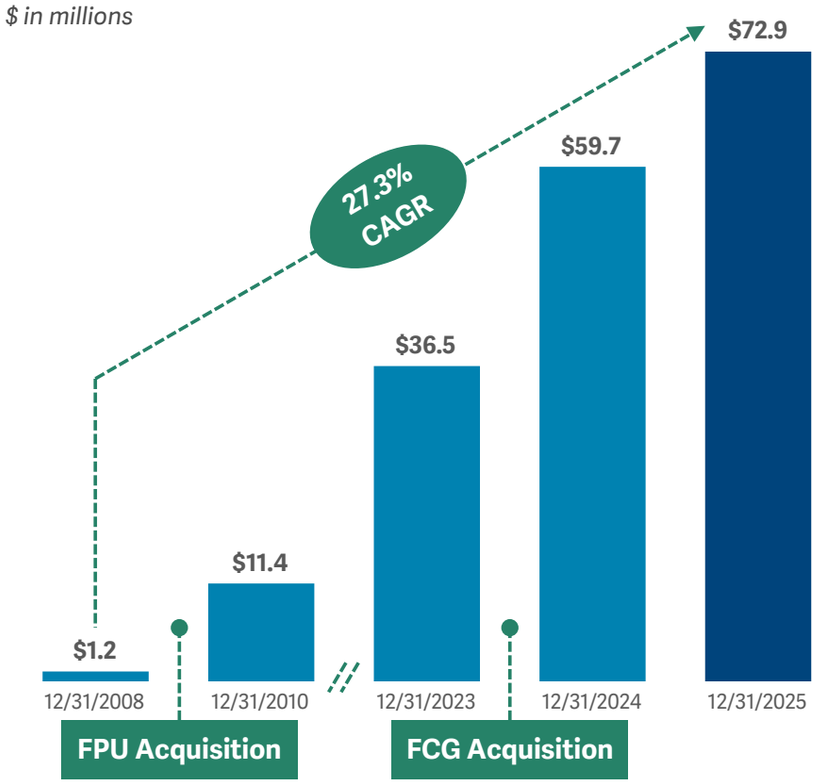
Building on A History of Growth

Significant Net Income Growth in Florida



Key Post-FCG Accomplishments

Substantial progress on goals identified upon acquiring FCG in Q4 2023

- Capital Investments of **~$250M related to FCG** (50% of initial 5-Year $500M goal)
- **$12.1M of gross margin** generated in 2024 and 2025 from capital investments under the **SAFE Program**
- **~$40M Miami Inner Loop** infrastructure enhancement project
- FCG **Transition Services Agreement** (TSA) concluded on-schedule
- FCG Operations integrated with the **1CX SAP Customer Billing System** Upgrade
- Operations and customer service integrated under the "One Company" approach

Executing on our Long-Term Growth Plan

Transforming for Growth, Powered by People

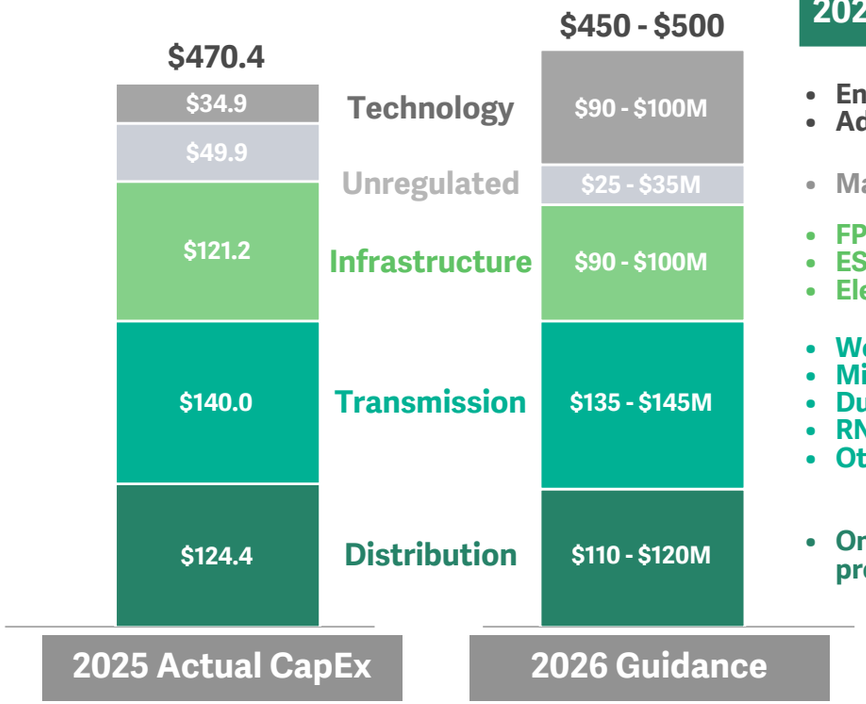
Key Deliverables for 2026

CAPITAL DEPLOYMENT	• **Invest $450 - $500 million of capital** • Bring current projects online • Finalizing new projects under development
REGULATORY AGENDA	• **Successful outcome on FCG GRC** • Secure regulatory approval for other current & future growth projects
BUSINESS TRANSFORMATION	• **Exceed all milestones for ERP project** • Implement additional technology, process and structural enhancements
FINANCING STRATEGY	• **Fund capital plan efficiently and effectively** • Maintain investment grade credit rating • Drive continued earnings & dividend growth

2025 CapEx Exceeds Full-Year Guidance Range

Initiating 2026 CapEx Guidance of $450M - $500M

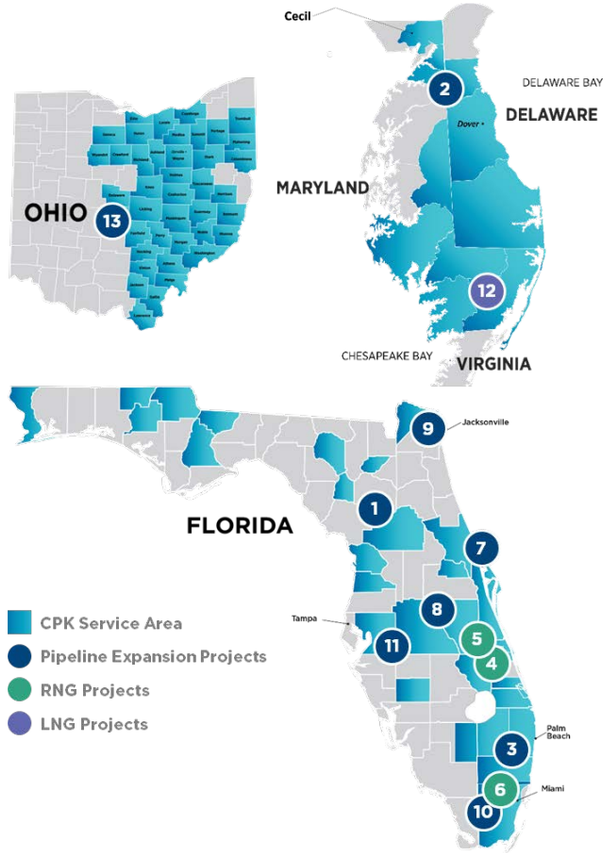
$ in millions



2026 Guidance Includes:

- Enterprise Resource Plan (ERP)
- Additional technology, cybersecurity investments
- Marlin Virtual Pipeline, Propane, Aspire Energy
- FPU's GUARD & FCG's SAFE Programs
- ESNG Capital Cost Surcharge Program
- Electric Storm Protection Plan
- Worcester Resiliency Upgrade
- Miami Inner Loop
- Duncan Plains Data Center Pipeline
- RNG Transportation Projects
- Other Transmission Expansion Projects
- Ongoing distribution system expansion and reliability projects across our Delmarva & Florida service areas

Transmission Projects Advance to Meet Demand



#	Project Name	Status[1]	In-Service	Total CapEx	Adj. Gross Margin ($M)

New ESNG Projects to Serve Growing Demand

Delmarva Regional Enhancement (DRE)

ESNG transmission expansion project to add firm capacity and improve system reliability in response to shipper demand identified through an open season

- ~9 miles of 16-inch steel pipeline
- ~12 miles of 24-inch steel pipeline looping
- Estimated Capital Investment: ~$75 million
- **Q4 2026:** File for FERC Approval
- **Q4 2027:** Begin Construction
- **Q4 2028:** In-Service

Accomack County Exploration Project

- CPK awarded a bid to determine feasibility, design and engineering to develop a **potential new natural gas system** supported by a **$6.5 million county grant**
- A future system could bring natural gas to **Virginia's Eastern Shore** to enhance energy reliability

Strong Progress Toward 5-Year CapEx Guidance

~$1.6 billion of identified capital projects support our 5-year CapEx guidance of $1.5 - $1.8 billion

Identified CapEx	5-Year Spend
Natural Gas LDC Organic Growth	$625M
Worcester Resiliency Upgrade	$100M
Additional Transmission Projects	$227M
GUARD / SAFE Programs	$230M
Eastern Shore Capital Surcharge	$75M
Florida Electric Storm Protection Plan	$50M
Unregulated Businesses	$114M
Technology Transformation	$130M
Total Invested, Identified & Ongoing Capital	$1.6B

$1.5B - $1.8B
2024 - 2028

Proactive Regulatory Strategy Continues

margin in millions

FILINGS	2025	2026	STATUS
MD, DE, & FL Electric Rate Cases	**$13.5**	**$18.2**	• All three cases successfully completed in 2025
Florida City Gas (FCG) Depreciation Study	--	--	• **February 17, 2026:** Final Order approving $6.8M of excess depreciation amortized over the life of the assets • Results in reduced annual depreciation expense of ~$500K per year, effective January 1, 2025 • 2025 depreciation expense savings will be recorded in 2026 given the timing and magnitude of the final order
FCG Rate Case	**TBD**	**TBD**	• **February 18, 2026:** Filed an "Intent to File a Rate Increase Request" with the Florida PSC • Intend to file General Rate Case in mid-April, with interim rates potentially effective by early July

Nov. 2025: *Teammates gather for a Corporate Cares event that fosters belonging and recognizes successes*

CUSTOMERS

~440,000+
natural gas, electric and propane customers

Affordability
prioritizing high-quality service while maintaining reasonable pricing

Dec. 2025: *Energy Lane Safety Town hosts a training & education event for students in Dover, Delaware*

PARTNERS

Building relationships
with regulators, legislators, business partners and investors

Fostering support
for approvals, permitting, collaboration & financing

Feb. 2025: *FPU celebrates the opening of the DeBary Safety Town with the Florida Fire Chiefs Association.*

COMMUNITIES

~$902,500
of charitable donations & sponsorships in 2025

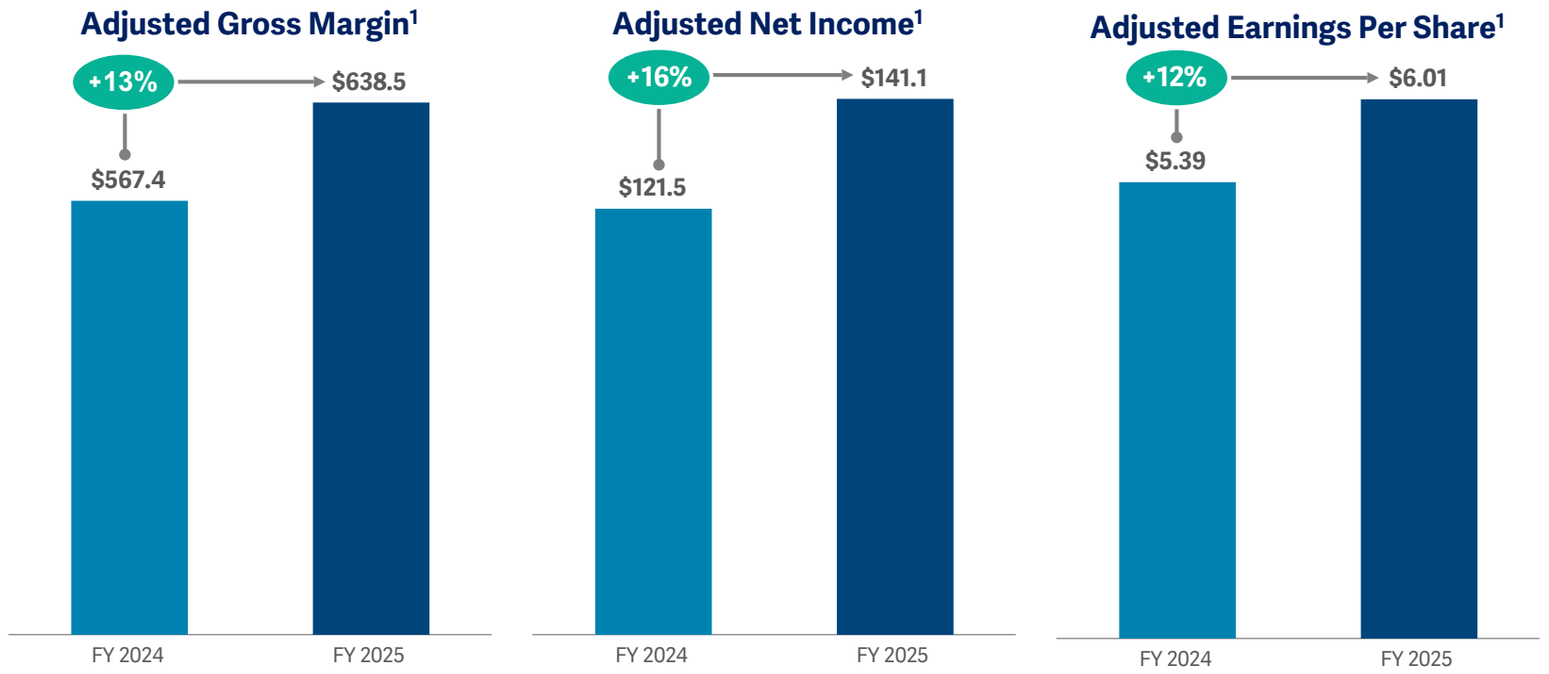
75% of teammates
donated time and resources to 400+ local organizations

Oct. 2025: *Teammates participate in the Habitat for Humanity "Framing Frenzy" Construction Volunteer Event*

Record Performance & Growth in 2025

Industry-leading growth in Adjusted Gross Margin, Adjusted Net Income & Adjusted Earnings Per Share[1]

$ millions except per share amounts

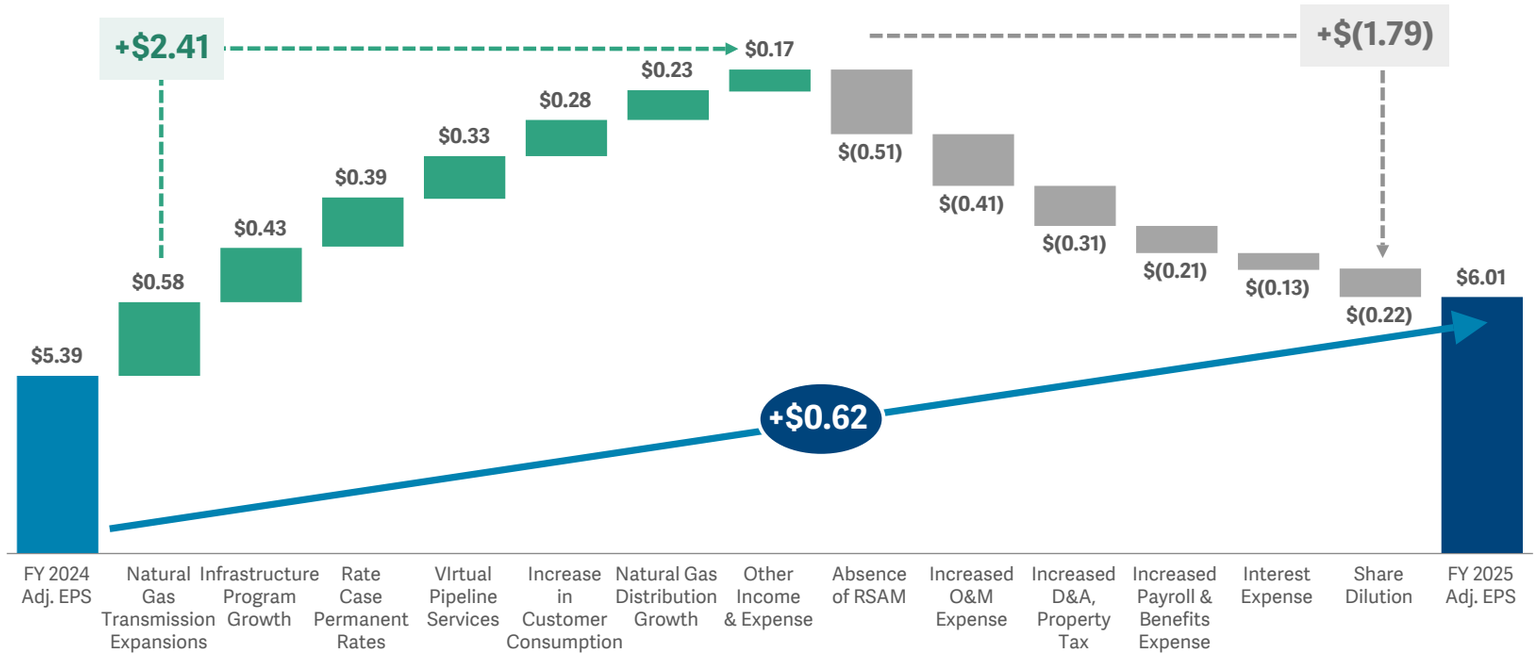


[1] *See appendix for a reconciliation of non-GAAP metrics.*

Full-Year 2025 Key Performance Drivers

2025 Adjusted EPS growth was driven by incremental margin from natural gas transmission, distribution and infrastructure growth, approved rate cases and virtual pipeline transportation

Adjusted Earnings Per Share[1]



[1] *See appendix for a reconciliation of non-GAAP metrics.*

Strong Regulated Operations Margin Growth

Investments in transmission, distribution & infrastructure drive double-digit Regulated Operations growth

Adjusted Gross Margin[1]

Operating Income

Note: Dollars in millions.
[1]See appendix for a reconciliation of non-GAAP metrics.

Unregulated Adj. Gross Margin Growth of 13%

Double-Digit Growth in Unregulated Adj. Gross Margin driven by Marlin, Propane & Aspire Energy

Adjusted Gross Margin[1]

$16.4 million of increased margin from:

- Continued growth in our Marlin Virtual Pipeline Services
- Increased propane customer consumption
- Increased Aspire Energy consumption

Note: Dollars in millions. [1]See appendix for a reconciliation of non-GAAP metrics. [2] Operating results for the second and third quarters historically have been lower due to reduced customer demand during warmer periods of the year. The impact to operating income may not align with the seasonal variations in adjusted gross margin as many of the operating expenses are recognized ratably over the course of the year.

FOR IMMEDIATE RELEASE
February 25, 2026
NYSE Symbol: CPK

CHESAPEAKE UTILITIES CORPORATION REPORTS FISCAL YEAR 2025 RESULTS

- **Earnings per share ("EPS")* was $5.97 for the full year 2025 and $1.93 for the fourth quarter of 2025**
- **Adjusted EPS**, which excludes transaction and transition-related expenses attributable to the acquisition of Florida City Gas ("FCG") in late 2023, was $6.01 for the full year 2025 and $1.94 for the fourth quarter of 2025, representing annual growth of 11.5 percent compared to the prior year**
- **Adjusted gross margin** increased by $71.1 million during the year driven primarily by regulatory initiatives and infrastructure programs, natural gas organic growth, transmission expansion projects, and increased demand for Marlin's services**
- **Record capital spending for 2025 of $470.4 million which included more than $100 million that will contribute to earnings beginning in 2026 and beyond**
- **Equity to total capitalization ratio approximated 50 percent at December 31, 2025; returning to the Company's target capital structure ahead of its projections at the time of the FCG acquisition and despite increased capital spending**
- **The Company is initiating 2026 capital expenditure guidance of $450-$500 million and continues to affirm its 2024-2028 capital expenditure guidance of $1.5 - $1.8 billion and 2028 EPS guidance of $7.75 - $8.00**

Dover, Delaware — Chesapeake Utilities Corporation (NYSE: CPK) ("Chesapeake Utilities" or the "Company") today announced financial results for the year and the fourth quarter ended December 31, 2025.

Net income was $140.3 million ($5.97 per share) in 2025 compared to $118.6 million ($5.26 per share) in 2024. Excluding transaction and transition-related expenses related to the acquisition of FCG, adjusted net income** was $141.1 million ($6.01 per share) compared with $121.5 million ($5.39 per share) in 2024.

In the fourth quarter of 2025, the Company's net income was $46.1 million ($1.93 per share) compared with $36.7 million ($1.60 per share) during the prior-year period. Excluding the transaction and transition-related expenses, adjusted net income was $46.2 million ($1.94 per share) compared with $37.3 million ($1.63 per share) during the fourth quarter of 2024.

2025 Highlights Driving Strong Growth and Performance:**

- Strong year-over-year residential customer growth of 4.1 percent in Delmarva and 2.8 percent in Florida
- 10 transmission capital projects brought online throughout 2024 and 2025, driving $18.8 million of incremental adjusted gross margin or $0.58 of incremental EPS

2-2-2-2

- $121.2 million of infrastructure capital investments, driving $13.8 million of incremental adjusted gross margin or $0.43 of incremental EPS
- Increased demand for CNG/LNG/RNG services driving $10.7 million of incremental adjusted gross margin or $0.33 of incremental EPS
- Completion of three rate cases in DE, MD and Florida Electric, driving $12.6 million of incremental adjusted gross margin or $0.39 of incremental EPS
- Higher customer consumption that added $9.5 million of incremental adjusted gross margin or $0.28 of incremental EPS
- Implemented the 1CX SAP Customer Billing Platform for FCG

“We started the year with a simple mission: deliver with purpose and reach new heights, so I’m proud that our full-year performance and results demonstrate exactly that: we provided safe and reliable energy to over 450 thousand customers, were active members of our communities, invested a record-breaking $470 million of capital and achieved nearly 12 percent year-over-year Adjusted EPS growth,” said Jeff Householder, the Company’s Chair of the Board, President and Chief Executive Officer. “These achievements demonstrate our ongoing commitment to the goals we set upon acquiring FCG two years ago and are a testament to our dedicated teammates who consistently strive to provide high-quality service for our valued customers."

"Looking forward to 2026, I am excited about the opportunities ahead as we build on the blueprint we’ve established and leverage the capabilities of our team to continually transform the Company for future growth. As we tackle larger-scale capital projects, improve FCG’s return profile and implement significant technology upgrades across our enterprise, we are positioning the Company for a new level of service, efficiency and growth, which will drive sustained value for all our stakeholders for years to come.”

Capital Investment and Earnings Guidance

The Company’s 2025 capital expenditures totaled $470.4 million which exceeded the top end of the 2025 capital guidance range by approximately $20 million.

The Company continues to re-affirm its five-year (2024-2028) capital guidance range of $1.5 billion to $1.8 billion and projects capital expenditures of $450 million to $500 million for 2026. Additionally, the Company continues to re-affirm its 2028 EPS guidance range of $7.75 to $8.00 per share.

** Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.*
*** See "Non-GAAP Financial Measures" below for additional information and reconciliations.*

Non-GAAP Financial Measures

***This press release including the tables herein, include references to both Generally Accepted Accounting Principles ("GAAP") and non-GAAP financial measures, including Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS. A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.*

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues.

3-3-3-3

The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions, and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit's and the overall Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

The following tables reconcile Gross Margin, Net Income, and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income and Adjusted EPS for each of the periods presented.

Operating Results for the Years Ended December 31, 2025 and 2024

Consolidated Results

(in millions)	Year Ended December 31, 2025	Year Ended December 31, 2024	Change	Percent Change
Adjusted gross margin**	**$ 638.5**	$ 567.4	$ 71.1	12.5 %
Depreciation, amortization and property taxes [1]	**127.9**	101.6	(26.3)	(25.9)%
Other operating expenses	**253.5**	233.6	(19.9)	(8.5)%
FCG transaction and transition-related expenses	**1.2**	4.0	2.8	NMF
Operating income	**$ 255.9**	$ 228.2	$ 27.7	12.1 %

[1] Includes the absence of a reserve surplus amortization mechanism ("RSAM") adjustment from FCG which represented a $15.5 million benefit during the year ended December 31, 2024.

Operating income during 2025 was $255.9 million, an increase of $27.7 million compared to the prior year. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $24.9 million or 10.7 percent compared to the prior year. The increase in adjusted gross margin during 2025 was driven by incremental margin from regulatory initiatives and infrastructure programs, pipeline expansion projects and natural gas organic growth, increased Marlin CNG, RNG and LNG services, and increased customer consumption resulting from the year-over-year colder temperatures in the Company's Ohio, Delmarva and Florida service territories. Higher operating expenses were driven largely by increased depreciation expense attributable to growth projects and the absence of an RSAM adjustment from FCG (which represented a $15.5 million benefit during 2024). Increased facilities, maintenance and outside services costs; payroll, benefits and other employee-related expenses; insurance-related costs; and credit, collections and customer service costs also contributed to the increase in operating expenses compared to 2024.

FCG transaction and transition-related expenses	**1.2**	4.0	2.8	NMF
Operating income	**$ 222.0**	$ 196.2	$ 25.8	13.1 %

[1] Includes the absence of an RSAM adjustment from FCG which represented a $15.5 million benefit during the year ended December 31, 2024.

The key components of the increase in adjusted gross margin** are shown below:

(in millions)	
Natural gas transmission service expansions, including interim services	$ 18.8
Contributions from regulated infrastructure programs	13.8
Rate changes associated with recent rate case activities [1]	12.6
Natural gas growth including conversions (excluding service expansions)	7.4
Increased customer consumption	2.4
Other variances	(0.2)
Year-over-year increase in adjusted gross margin**	**$ 54.8**

[1] Includes adjusted gross margin contributions from both interim and permanent base rates. Refer to Major Projects and Initiatives discussion for additional information.

The key components of the increase in other operating expenses are as follows:

(in millions)	
Facilities expenses, maintenance costs and outside services	$ (4.7)
Insurance-related costs	(1.7)
Credit, collections and customer service costs	(1.3)
Payroll, benefits and other employee-related expenses	(1.2)
Other variances	(0.7)
Year-over-year increase in other operating expenses	**$ (9.6)**

Unregulated Energy Segment

(in millions)	Year Ended December 31, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 144.6**	$ 128.2	$ 16.4	12.8 %
Depreciation, amortization and property taxes	**23.1**	19.1	(4.0)	(20.9)%
Other operating expenses	**87.9**	77.4	(10.5)	(13.6)%
Operating income	**$ 33.6**	$ 31.7	$ 1.9	6.0 %

7-7-7-7

The key components of the increase in adjusted gross margin** are shown below:

(in millions)		
Propane Operations		
Increased propane customer consumption	$	4.5
Change in propane margins and service fees		(1.4)
CNG/RNG/LNG Transportation and Infrastructure		
Increased demand for CNG/RNG/LNG services		10.7
Aspire Energy		
Increased customer consumption		2.6
Year-over-year increase in adjusted gross margin**	**$**	**16.4**

The major components of the increase in other operating expenses are as follows:

(in millions)		
Payroll, benefits and other employee-related expenses	$	(5.5)
Facilities, maintenance costs, and outside services		(4.5)
Other variances		(0.5)
Year-over-year increase in other operating expenses	**$**	**(10.5)**

Operating Results for the Quarters Ended December 31, 2025 and 2024

Consolidated Results

	Three Months Ended December 31,			
(in millions)	**2025**	**2024**	**Change**	**Percent Change**
Adjusted gross margin**	**$ 176.1**	$ 154.2	$ 21.9	14.2 %
Depreciation, amortization and property taxes [(1)]	**32.7**	23.8	(8.9)	(37.4)%
Other operating expenses	**69.4**	62.6	(6.8)	(10.9)%
FCG transaction and transition-related expenses	**0.2**	0.9	0.7	NMF
Operating income	**$ 73.8**	$ 66.9	$ 6.9	10.3 %

[(1)] Includes the absence of an RSAM adjustment from FCG which represented a $6.6 million benefit during the quarter ended December 31, 2024.

Operating income for the fourth quarter of 2025 was $73.8 million, an increase of $6.9 million compared to the same period in 2024. Excluding transaction and transition-related expenses associated with the acquisition and integration of FCG, operating income increased $6.2 million or 9.1 percent compared to the same period in 2024. The increase in adjusted gross margin during the quarter was driven largely by pipeline expansion projects and organic growth, incremental margin from regulatory initiatives and infrastructure programs, increased customer consumption resulting from the period-over-period colder temperatures in the Company's Ohio, Delmarva and Florida service territories and increased Marlin CNG, RNG and LNG services. Higher operating expenses were driven largely by increased depreciation expense attributable to growth projects and the absence of an RSAM adjustment from FCG (which represented a $6.6 million benefit during the fourth quarter of 2024). Higher payroll, benefits and other employee-related expenses, credit, collections and customer service costs, and facilities, maintenance and outside services costs also contributed to the increase in operating expenses.

8-8-8-8

Regulated Energy Segment

(in millions)	Three Months Ended December 31, 2025	2024	Change	Percent Change
Adjusted gross margin**	**$ 133.5**	$ 115.1	$ 18.4	16.0 %

Forward-Looking Statements

Matters included in this release may include forward-looking statements that involve risks and uncertainties. Actual results may differ materially from those in the forward-looking statements. Please refer to the Safe Harbor for Forward-Looking Statements in the Company's 2025 Annual Report on Form 10-K for further information on the risks and uncertainties related to the Company's forward-looking statements.

Conference Call

Chesapeake Utilities (NYSE: CPK) will host a conference call on Thursday, February 26, 2026 at 8:30 a.m. Eastern Time to discuss the Company's financial results for the fourth quarter and year ended December 31, 2025. To listen to the Company's conference call via live webcast, please visit the Events & Presentations section of the Investors page on www.chpk.com. For investors and analysts that wish to participate by phone for the question and answer portion of the call, please use the following dial-in information:

Toll-free: 800.245.3047
International: 203.518.9765
Conference ID: CPKQ425

A replay of the presentation will be made available on the previously noted website following the conclusion of the call.

About Chesapeake Utilities Corporation

Chesapeake Utilities Corporation is a diversified energy delivery company, listed on the New York Stock Exchange. Chesapeake Utilities Corporation offers sustainable energy solutions through its natural gas transmission and distribution, electricity generation and distribution, propane gas distribution, mobile compressed natural gas utility services and solutions, and other businesses.

Recently Completed and Ongoing Major Projects and Initiatives

The Company continuously pursues and develops additional projects and consummates regulatory initiatives that support service to existing and new customers, grow its businesses and earnings, and drive shareholder value. The following table includes the major projects and initiatives that are currently underway or recently completed. The Company's practice is to add incremental margin associated with new projects and regulatory initiatives to this table once negotiations or details are substantially final and/or the associated earnings can be estimated. Major projects and initiatives that have generated consistent year-over-year adjusted gross margin contributions are removed from the table at the beginning of the next calendar year.

The related descriptions of projects and initiatives that accompany the table include only new items and/or items where there have been significant developments, as compared to the prior year. A comprehensive discussion of all projects and initiatives reflected in the table below can be found in the Company's 2025 Annual Report on Form 10-K.

	Year Ended December 31,		Estimate for Calendar Year	
(in millions)	**2024**	**2025**	**2026**	**2027**

[1] Includes adjusted gross margin attributable to interim rates during 2024 and 2025. See additional information provided below.

Discussion of Major Projects and Initiatives

Pipeline Expansions

Worcester Resiliency Upgrade
In August 2023, Eastern Shore filed an application with the Federal Energy Regulatory Commission ("FERC") requesting authorization to construct the Worcester Resiliency Upgrade, which consists of a mixture of storage and transmission facilities in Sussex County, Delaware and Wicomico, Worcester, and Somerset Counties in Maryland. The project will provide long-term incremental supply necessary to support the growing demand of the participating shippers. In January 2025, the FERC approved the project.

In June 2025, Eastern Shore filed a limited amended application with the FERC requesting revised initial transportation rates for the project. The revised rates reflected increased capital costs associated with unanticipated changes in global markets and supply chains, including the availability of skilled laborers with the requisite certifications to work on this project. Eastern Shore requested expedited action by the FERC in relation to this matter and an approved order was issued in July 2025. Construction is underway and the project is expected to be placed into service in mid-2026.

East Coast Reinforcement Projects (Boynton Beach and New Smyrna Beach)
In December 2023, Peninsula Pipeline filed a petition with the Florida Public Service Commission ("PSC") for approval of its Transportation Service Agreements with Florida Public Utilities Company ("FPU") for projects that will provide additional supply to coastal communities on the East Coast of Florida, which are experiencing significant population growth. Peninsula Pipeline proposed several pipeline extensions to support FPU's distribution system in the areas of Boynton Beach and New Smyrna Beach with an additional 15,000 Dts/day and 3,400 Dts/day, respectively. The Florida PSC approved the projects in March 2024. New Smyrna Beach was placed into service during May 2025, and construction is projected to be complete for Boynton Beach in the second quarter of 2026.

Central Florida Reinforcement Projects (Plant City and Lake Mattie)
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of its Transportation Service Agreements with FPU for projects that will support additional supply to communities located in Central Florida which are also experiencing significant population growth. Peninsula Pipeline's extensions support FPU's distribution system around the Plant City and Lake Mattie areas of Florida with an additional 5,000 Dts/day and 8,700 Dts/day, respectively. The Florida PSC approved the projects in May 2024. The Plant City project was completed in the fourth quarter of 2024, and the Lake Mattie project went into service in July 2025.

Renewable Natural Gas Supply Projects
In February 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of Transportation Service Agreements with FCG for projects that will support the transportation of additional renewable energy supply to FCG. The projects, located in Florida's Brevard, Indian River and Miami-Dade counties, will bring renewable natural gas produced from local landfills into FCG's natural gas distribution system. Peninsula Pipeline will construct several pipeline extensions which will support FCG's distribution system in Brevard County, Indian River County, and Miami-Dade County. Benefits of these projects include increased gas supply to serve expected FCG growth, strengthened system reliability and additional system flexibility. The Florida PSC approved the petition at its July 2024 meeting. In October 2025, the Florida PSC approved amendments to the Transportation Service Agreements that were filed to include Peninsula Pipeline as a party to the related interconnection agreements. The projects are underway and are estimated to be completed in the second half of 2026.

Miami Inner Loop Pipeline Projects
In September 2024, Peninsula Pipeline filed a petition with the Florida PSC for approval of the Transportation Service Agreement with FCG for a series of projects that will enhance gas infrastructure in Miami-Dade County. The proposed expansion consists of the development of several pipeline projects to

15-15-15-15

support growth and FCG's distribution system, as well as enhance FCG's access to obtain gas from various points in the Miami-Dade County area. The expansion was approved in February 2025 and interim services began in August 2025 with permanent facilities expected to be in service by the second quarter of 2026.

Duncan Plains Pipeline Project
In July 2025, Aspire Energy Express entered into an agreement with American Electric Power to construct and operate an intrastate natural gas pipeline in central Ohio to serve a new fuel-cell facility, which will provide on-site electric power to a data center. This new transmission infrastructure is expected to be in service in the first half of 2027.

Regulatory Initiatives

Maryland Natural Gas Rate Case
In January 2024, the Company's natural gas distribution businesses in Maryland, CUC-Maryland Division, Sandpiper Energy, Inc., and Elkton Gas Company (collectively, the “Maryland natural gas distribution businesses”) filed a joint application for a natural gas rate case with the Maryland PSC. In connection with the application, the Company sought approval of the following: (i) permanent rate relief of approximately $6.9 million with a return on equity ("ROE") of 11.5 percent; (ii) authorization to make certain changes to tariffs to include a unified rate structure and to consolidate the Maryland natural gas distribution businesses; and (iii) authorization to establish a rider for recovery of the costs associated with the Company's new technology systems. In August 2024, the Maryland natural gas distribution businesses, the Maryland Office of People's Counsel (the "Maryland OPC") and PSC staff reached a settlement which provided for, among other things, an increase in annual base rates of $2.6 million. In September 2024, the Maryland Public Utility Judge issued an order approving the related settlement agreement in part. The $2.6 million increase in annual base rates was approved and the Company filed a Phase II filing in November 2024 to determine rate design across the Maryland natural gas distribution businesses, consolidation of the applicable tariffs and recovery of technology costs. The hearing was held in March 2025, during which Phase II was approved, including an additional $0.9 million in revenue requirement, for a total cumulative increase of $3.5 million. A final order was issued in April 2025 and included approval of the consolidation of the operations and the assets of CUC-Maryland Division, Sandpiper Energy, and Elkton Gas into one entity which was renamed and will operate as Chesapeake Utilities of Maryland, Inc.

Maryland Natural Gas Depreciation Study
In January 2024, the Company's Maryland natural gas distribution businesses filed a joint petition for approval of their proposed unified depreciation rates with the Maryland PSC. A settlement agreement between the Company, PSC staff and the OPC was reached and the final order approving the settlement agreement went into effect in July 2024, with new depreciation rates effective as of January 1, 2023. The approved depreciation rates resulted in an annual reduction in depreciation expense of approximately $1.2 million.

Delaware Natural Gas Rate Case
In August 2024, the Company's Delaware natural gas division filed an application for a natural gas rate case with the Delaware PSC seeking approval of the following: (i) permanent rate relief of approximately $12.1 million with a ROE of 11.5 percent; (ii) proposed changes to depreciation rates which were part of a depreciation study also submitted with the filing; and (iii) authorization to make certain changes to tariffs. Annualized interim rates were approved by the Delaware PSC in the amount of $2.5 million and became effective in October 2024. A settlement among the Company, PSC staff and the Delaware Division of the Public Advocate was reached and approved by the Delaware PSC in June 2025 providing an annual revenue increase of $6.1 million, as well as dividing the rate case into two phases. Rates set to recover the approved components of the increase were effective in March 2025. In October 2025, a settlement was reached for Phase II of the rate case addressing tariff-related changes including rate design and approved by the Delaware Public Service Commission with rates effective as of October 15, 2025.

FPU Electric Rate Case
In August 2024, the Company's Florida Electric division filed a petition with the Florida PSC seeking a general base rate increase of $12.6 million with a ROE of 11.3 percent based on a 2025 projected test year. Annualized interim rates of approximately $1.8 million were approved with an effective date of November 1, 2024. In March 2025, the Florida PSC approved the permanent rate increase, but the order was subsequently protested. In May 2025, the Company reached a settlement agreement with the interested parties to resolve all outstanding issues. This settlement, which was approved by the Florida PSC in July 2025, provides for a total base rate increase of approximately $8.6 million on an annual basis, with $1.0 million of the increase deferred from the first year's base rate increase and recovered over three years. A step-up rate increase was also approved for up to $0.7 million, upon completion of the purchase and refurbishment of certain substations, which is expected to be completed in December 2026.

Florida Mandatory Relocates
In October 2025, FPU and FCG filed a joint petition for approval to establish a recovery surcharge for actual, estimated and projected relocation costs pursuant to the Florida Administrative Code which enables companies to recover the costs associated with relocating or reconstructing facilities that have been required by governmental entities. The projected revenue requirement for 2026 is $0.5 million for FPU and $1.0 million for FCG. The Florida PSC approved the petition in February 2026, with the surcharge effective in March 2026.

Florida City Gas Rate Case
In February 2026, FCG provided notice to the Florida PSC of its intent to file a petition seeking a general rate base increase based on a 2027 projected test year. The rate case filing is expected to be submitted in April 2026 and the outcome of the application will be subject to review and approval by the Florida PSC.

FCG Depreciation Study
In February 2025, FCG filed a depreciation study with the Florida PSC. The application requested approval of revised annual depreciation rates, as well as a reduction related to a reserve imbalance that would be amortized over a two-year period. The outcome of the application was subject to review and approval by the Florida PSC. In February 2026, the Florida PSC approved a $6.8 million reserve imbalance to be amortized over the remaining life of the assets, with the revised depreciation rates effective as of January 1, 2025.

Other Major Factors Influencing Adjusted Gross Margin

Weather and Consumption
In 2025, increased customer consumption, which includes the effects of colder weather compared to the prior year, largely in the Company's Ohio, Delmarva and Florida service areas resulted in a $9.5 million increase in adjusted gross margin. The following table summarizes HDD and CDD variances from the 10-year average HDD/CDD ("Normal") for the year and quarter-to-date periods ended December 31, 2025 compared to the respective 2024 periods.

17-17-17-17

	Year Ended December 31,			Three Months Ended December 31,		
	2025	**2024**	**Variance**	**2025**	**2024**	**Variance**

Natural Gas Distribution Growth

The average number of residential customers served by the Company on the Delmarva Peninsula, by FPU and by FCG increased by approximately 4.1 percent, 3.6 percent and 2.2 percent, respectively, during 2025.

The increase in adjusted gross margin resulting from customer growth is provided in the following table:

	Adjusted Gross Margin Increase For the Year Ended December 31, 2025	
(in millions)	**Delmarva Peninsula**	**Florida**
Customer growth:		
Residential	$ 1.5	$ 3.1
Commercial and industrial	0.3	2.5
Total customer growth	$ 1.8	$ 5.6

18-18-18-18

Capital Investment Growth and Capital Structure Updates

The Company's capital expenditures were $470.4 million for the year ended December 31, 2025 and are provided by type in the following table:

(in millions)	For the Year Ended December 31, 2025
Regulated distribution	$ 124.4
Regulated transmission	140.0
Regulated infrastructure	121.2
Unregulated businesses	49.9
Technology	34.9
Total 2025 Capital Expenditures	**$ 470.4**

The following table shows a range of the forecasted 2026 capital expenditures by type:

	2026	
(in millions)	**Low**	**High**
Regulated distribution	$ 110.0	$ 120.0
Regulated transmission	135.0	145.0
Regulated infrastructure	90.0	100.0
Unregulated businesses	25.0	35.0
Technology	90.0	100.0
Total 2026 Forecasted Capital Expenditures	**$ 450.0**	**$ 500.0**

The capital expenditure projection is subject to continuous review and modification. Actual capital requirements may vary from the above estimates due to a number of factors, including changing economic conditions, supply chain disruptions, capital delays that are greater than currently anticipated, customer growth in existing areas, regulation, new growth and availability of capital. See “Capital Investment and Earnings Guidance” discussed above for additional information on our capital expenditure forecast.

The Company's target ratio of equity to total capitalization, including short-term borrowings, is between 50 and 60 percent. The Company's equity to total capitalization ratio, including short-term borrowings, was approximately 50 percent as of December 31, 2025. The Company may, from time to time, allow its capital structure to fall below the target range to align the completion of large capital projects with the respective permanent financing.

Forward Looking Statements and Other Statements

Safe Harbor Statement

This presentation contains forward-looking statements within the meaning of Section 27A of the Securities Act, Section 21E of the Exchange Act and the Private Securities Litigation Reform Act of 1995. One can typically identify forward-looking statements by the use of forward-looking words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These include statements regarding our financing plans, the expected timing of the closing of the proposed acquisition and the size, use of proceeds and potential completion of the offering, among others. These statements are based on our current intentions, plans, expectations, assumptions and beliefs. Forward-looking statements speak only as of the date they are made or as of the date indicated. These statements are subject to many risks and uncertainties, including, but not limited to: the occurrence of any event, change or other circumstance that could give rise to the right of either or both parties to terminate the acquisition agreement; the risk that the acquisition may not close in the anticipated timeframe or at all due to one or more of the remaining closing conditions to the transaction not being satisfied or waived; the risk that there may be unexpected costs, charges or expenses resulting from the proposed acquisition; risks related to the ability of the Company to successfully integrate the business and achieve the expected operating efficiencies within the expected timeframes or at all and the possibility that such integration may be more difficult, time consuming or costly than expected; risks that the proposed transaction disrupts the Company’s current plans and operations; risks related to disruption of each company’s management’s time and attention from ongoing business operations due to the proposed transaction; continued availability of capital and financing; the risk that any announcements relating to the proposed transaction could have adverse effects on the market price of the Company’s common stock; the risk that the proposed transaction and its announcement could have an adverse effect on the ability of the Company and FCG to continue to hire, train and retain appropriately qualified personnel, to retain customers and to maintain relationships with each of their respective business partners, suppliers and customers; risks related to unpredictable and severe or catastrophic events or their impact on each company’s business, financial condition and results of operations; and other business effects, including the effects of industry, market, economic, political or regulatory conditions. Additional risk factors that may cause actual results or events to differ materially from those expressed in the forward-looking statements are described under “Safe Harbor for Forward-Looking Statements” and Item 1A, “Risk Factors” in our Annual Report on Form 10-K and the preliminary prospectus supplement for the offering and in other reports that we have or may file with the Securities and Exchange Commission.

In light of these risks, uncertainties, and assumptions, the events described in the forward-looking statements might not occur or might occur to a different extent or at a different time than we have described. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise. You are cautioned not to place undue reliance on any forward-looking statements.

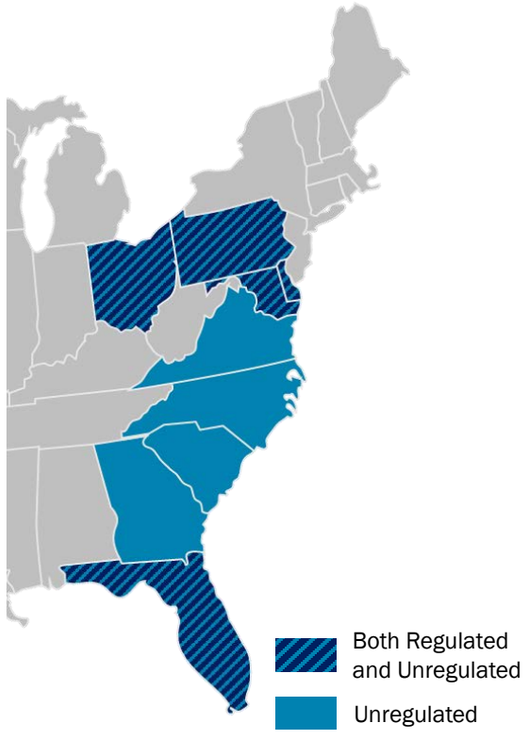
Non-GAAP Financial Information

This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share (“EPS*”). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Diversified Portfolio of Energy Delivery Solutions



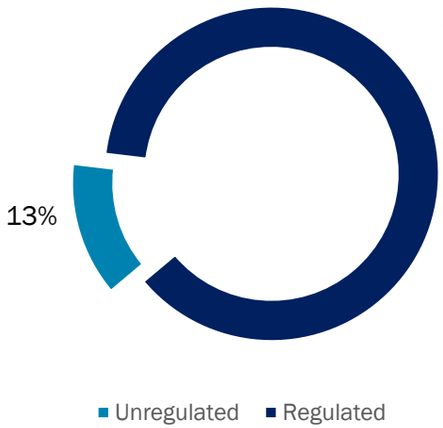
High growth, high performing energy delivery business focused on regulated utility and pipeline operations in premium service territories and constructive regulatory jurisdictions

Business Line	States Served
Regulated Energy Segment	
Natural Gas Transmission	DE, FL, MD, PA, OH
Natural Gas Distribution	DE, MD, FL
Electric Distribution	FL
Unregulated Energy Segment	
Propane Distribution	PA, DE, MD, VA, NC, SC, FL
Natural Gas Pipeline System	OH
CNG Services	Multiple – Including CNG Fueling Station in GA
CHP Generation	FL
RNG Opportunities	Multiple – Including projects and acquisitions in OH, MD, FL

CHESAPEAKE UTILITIES CORPORATION

Focus on Regulated Gas Distribution & Transmission

Chesapeake Utilities Investments
Post-Florida City Gas (FCG) Acquisition*



Regulated Business Summary:

- Natural Gas Distribution Customers: ~315,000
- Electric Distribution Customers: ~33,000
- Miles of Gas Distribution Infrastructure: ~8,900 miles
- Miles of Gas Transmission Infrastructure: ~750 miles
- Contracted Gas Transmission Capacity: ~1,200,000 Dts/d

*Pro forma for the acquisition of Florida City Gas, which was completed on Dec 1, 2023

Committed to Superior Performance

Our Foundation for Growth is Strong

We continually increase shareholder value through our:

TRACK RECORD

Over and over, we have proven we get it done; we have a long history of top-tier earnings growth

- Consistently beating expectations, recording 16 years of consecutive earnings per share growth and 19 consecutive years of increasing the dividend*

ENERGIZED TEAM

We have the expertise to balance project development and execution

- Our team prioritizes our people, our customers, our assets and our communities while striving to deliver growth and value for our stakeholders

FINANCIAL DISCIPLINE

Consistent, disciplined approach to business planning, cost management and financing

- While maintaining a strong balance sheet, we have been able to make significant capital investments, achieve a 9.7% average annual EPS growth rate over the last 10 years, and provide an 8.6% average dividend growth rate for our shareholders over the last 10 years

PLATFORMS FOR GROWTH

We identify and execute steady, return-oriented capital investments across each of our five platforms for growth

- Cap ex guidance of $1.5 billion to $1.8 billion through 2028, driven by our legacy businesses and growth opportunities identified with the Florida City Gas acquisition

CHESAPEAKE UTILITIES CORPORATION

* As of 2022; earnings per share growth excludes TCJA impact in 2017

Acquisition of Florida City Gas

Compelling Strategic Rationale

EXPANDS PLATFORM IN FLORIDA
High growth utility jurisdiction; gas system expansion opportunities

- More than doubles CPK's presence in Florida - a high growth service area
  - Florida is premier state for utility operations with a fast-growing population and economy, as well as a constructive and supportive regulatory environment
  - Natural gas continues to be a preferred energy source with growing market demand
  - Historically, Florida Public Utilities (FPU) has achieved a 4%+ annual residential customer growth rate over the last 4 years
- Enhanced platform for growth: combination of natural gas systems and incremental capital investment opportunities across five growth platforms expected to drive growth and benefit all stakeholders

ENHANCES SCALE AND EFFICIENCY
CPK has extensive operational and regulatory expertise

- Scale benefits from expected increases in regulated utility customers and net plant by 50% and 30%, respectively
- Efficiencies expected due to complementary operations
- CPK has core expertise across all facets of natural gas operations and strong relationships with regulators, legislators, communities and customers

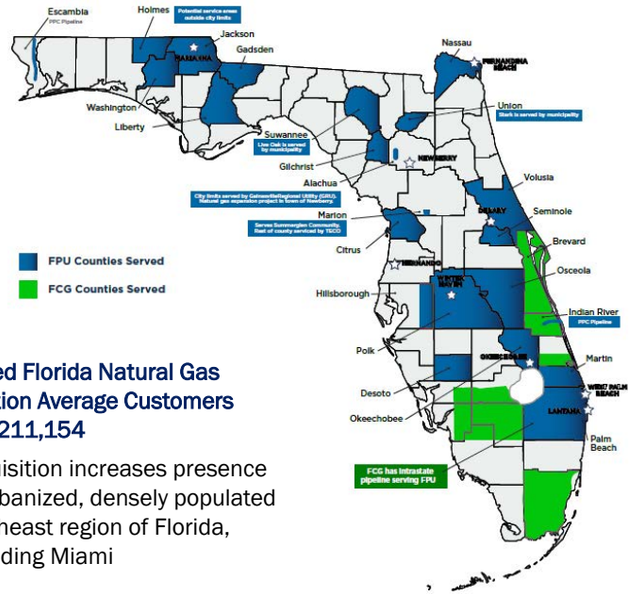
FINANCIAL BENEFITS
Builds on CPK's track record of successful M&A

- Provides approximately $500 million of capex opportunities associated with FCG over the next five years
- Supports long-term earnings and dividend growth
- Balanced financing plan to ensure continued balance sheet strength

CHESAPEAKE UTILITIES CORPORATION

Florida City Gas: Attractive Rate Base in High Growth Market

Acquisition of FCG is Complementary to CPK's Natural Gas Portfolio and Creates Attractive Combined Business in FL



Combined Florida Natural Gas Distribution Average Customers (2022): 211,154

- Acquisition increases presence in urbanized, densely populated southeast region of Florida, including Miami

Additional Growth Opportunities in Florida Beyond Existing CPK Footprint

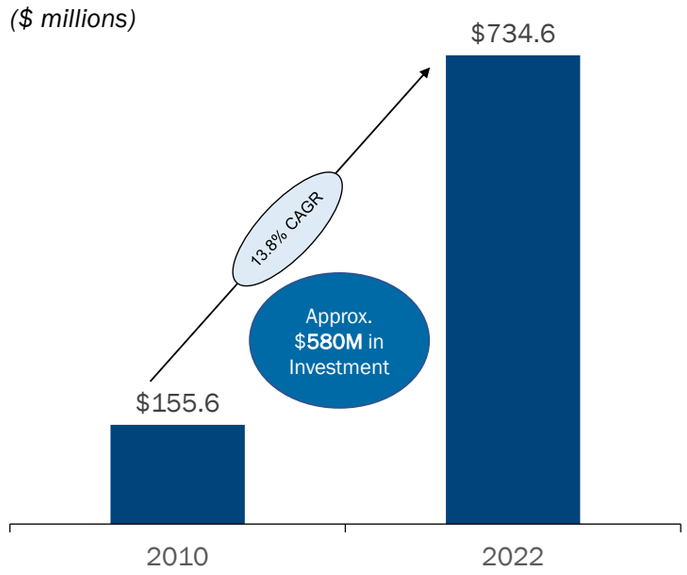
- Provides opportunities into unserved and underserved communities throughout a widened service territory.
- Builds on success of CPK-FPU merger (2009), which paved the way for natural gas distribution expansion and related new business operations in Florida
- Florida consolidated operations following the acquisition are expected to contribute approximately 60% of CPK's:
  - ✓ Operating income;
  - ✓ Utility net plant; and
  - ✓ Future capital investment plan (five years)
- Both FPU and FCG recently completed rate cases, with 2024 as first full year permanent rates will be in effect
  - Combined rate increase of $40.5 million, with FPU rate increase representing $17.2 million

CHESAPEAKE UTILITIES CORPORATION

CPK's Proven Track Record of Growth in Florida

From a $125 million investment in 2009, the CPK-FPU merger paved the way for not only natural gas distribution expansion, but also for related new business operations in Florida

Florida Investment – 2022 compared to 2010



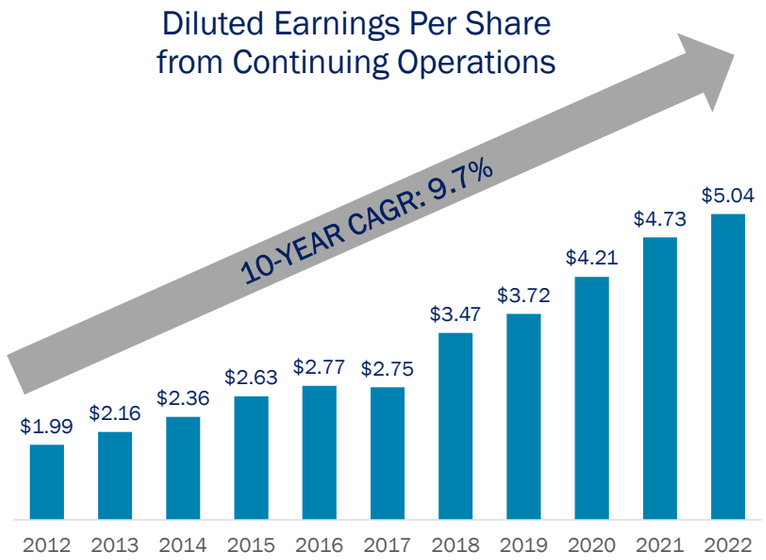
Investment Type	Commentary	Change in Investment (2010-2022)
Gas Distribution	Expansion into new areas such as Nassau County as well as reliability and infrastructure investments	+ $279 million
Gas Transmission	Peninsula Pipeline Company links interstate pipelines to local distribution systems, industrial customers and power generation facilities	+ $114 million
Electric Distribution	Electric distribution operations in the northeast and northwest of Florida	+ $109 million
Virtual Pipeline Solutions	Capturing opportunities for mobile fuel and virtual pipeline solutions throughout North America	+ $44 million
CHP	CPK's flagship CHP, Eight Flags, was built to address a customer's need, and today benefits multiple parts of our business	+ $30 million
Propane	Smaller acquisitions; expanding to new areas through community gas systems; Autogas expansion	+ $3 million
Sustainable Investments	Waste-to-energy production facilities and associated infrastructure	Construction underway*

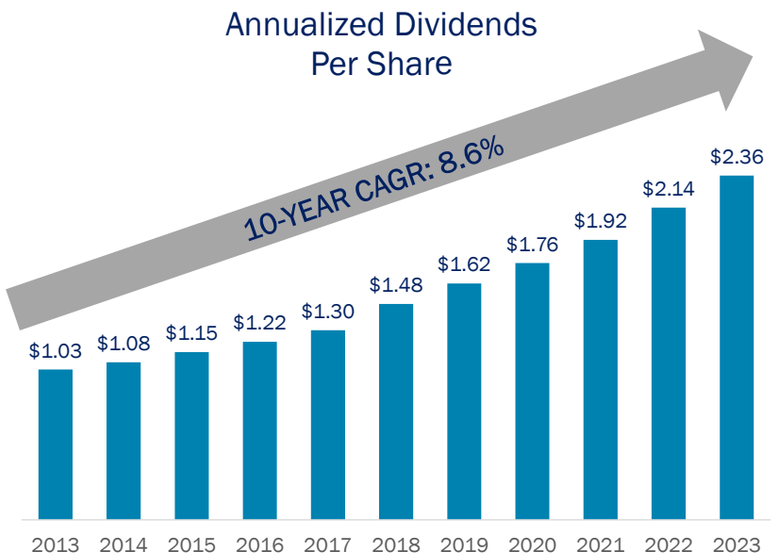
CHESAPEAKE UTILITIES CORPORATION

* CPK's first dairy manure RNG facility at Full Circle Dairy in Florida's Madison County is currently under construction.

Track Record of Strong Financial Performance

Long History of Industry Leading Earnings and Dividend Growth





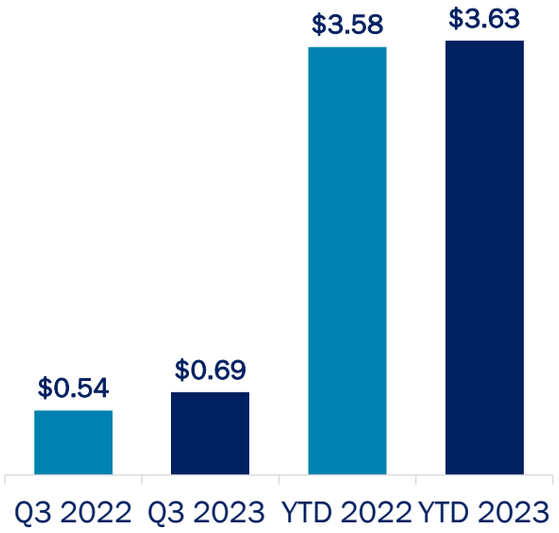
18 Consecutive Years with Return on Equity Above 11%*

CHESAPEAKE UTILITIES CORPORATION

(1) 2017 is the year of the TCJA, providing a one-time benefit. Adjusted/pro forma figures are used to provide guidance in this year
(2) Based on most recent quarterly dividend of $0.59

Year-to-Date 2023 Financial Performance and Drivers

Adjusted Diluted Earnings Per Share



Key Year-to-Date Earnings Adjusted Gross Margin Drivers

$13.2M Regulated Infrastructure Programs and Recovery Mechanisms	$7.7M Pipeline Expansions and Natural Gas Organic Growth	$6.4M Higher Propane Margins per gallon and fees
$1.3M Margins Related To Demand For Virtual Pipeline Services	$0.7M Adjusted Gross Margin From Off-System Natural Gas Capacity Sales	-$9.8M Lower Customer Consumption Related to Warmer Weather

Amounts shown are for the quarter and YTD period ended September 30, 2023

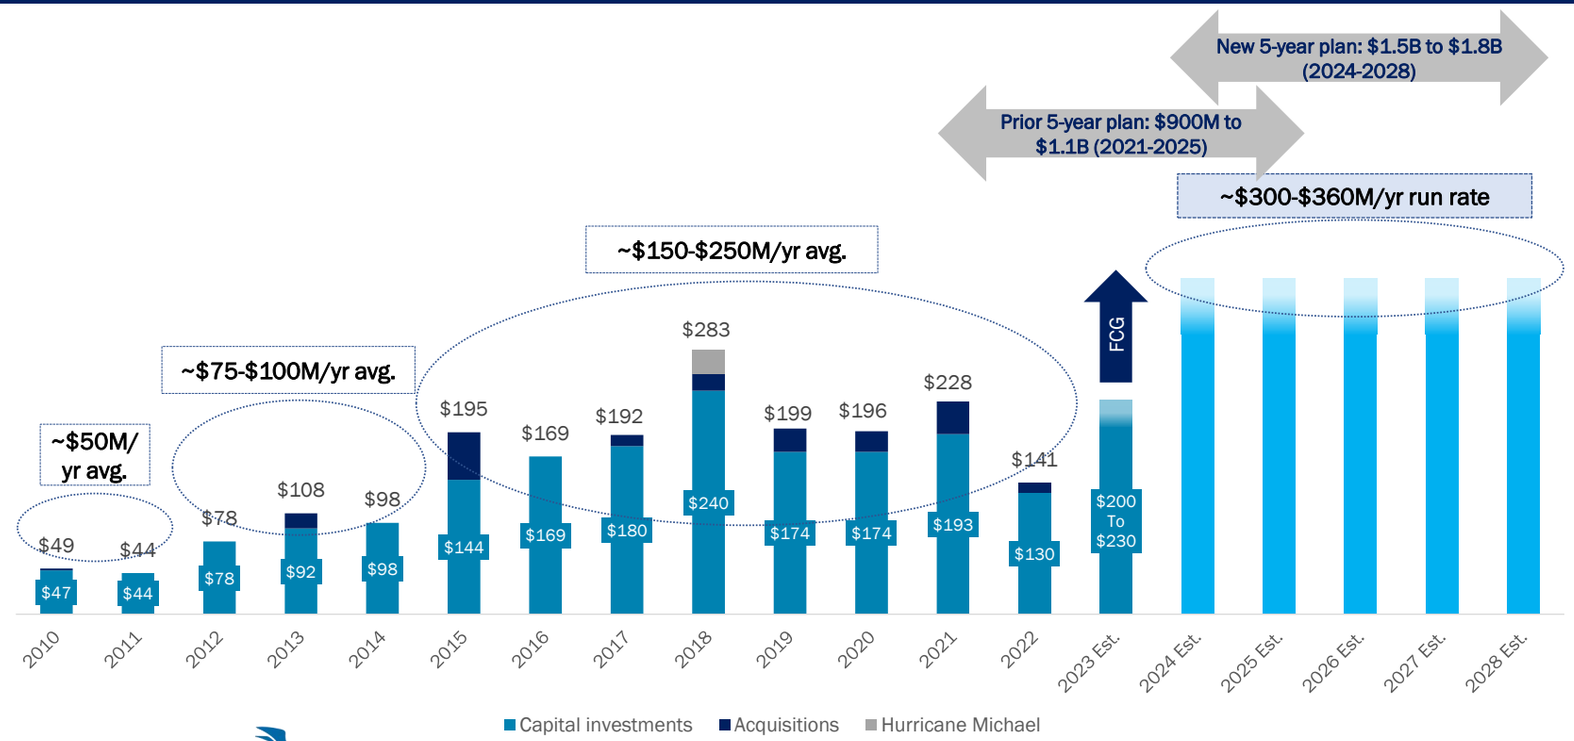
*Adjustments consist of $0.16 of transaction-related expenses attributable to the acquisition of FCG in the 2023 periods. See the Reconciliation of GAAP to Non-GAAP Measures in the Appendix.

Key Drivers of Growth

Organic Growth:	• Natural gas continues to be the preferred energy source for our customers • FCG continued organic utility growth, with contracted residential projects representing more than 12,000 homes, plus approved cost recovery mechanisms • FPU GUARD and FCG SAFE infrastructure replacement programs
Gas Transmission:	• Pipeline expansions continue to advance at the Wildlight Community in Yulee, Florida and other locations throughout our service territories • Received Florida PSC approval for additional 8,000 Dt/d of firm service in the Newberry, Florida area • Announced plans to build fully contracted LNG gas storage facility in Bishopville, MD, with up to 0.5 million gallons of capacity • New projects being evaluated and pursued in Delmarva, Florida and Ohio
Propane Distribution:	• Ongoing advancement of our community gas system strategy • Integrating Sharp's programs and practices within recent acquisitions • Potential opportunities for community gas systems in currently unserved communities where natural gas is not available in Florida (permanent or temporary solution)
Marlin Gas Services:	• Continued demand for CNG services on a year-to-date basis • Opportunities to provide interim services during expansion construction or during maintenance in Florida
Sustainable Investments:	• Construction underway on first RNG facility at Full Circle Dairy • Project partner in the Mid-Atlantic Clean Hydrogen Hub (MACH2™) team representing the Delaware, Philadelphia and Southern New Jersey region

CPK's Strong Track Record of Growing Investment

Long Track Record of Successfully Growing Capital Investment Plan



Amounts in chart reflected in millions.

Balance Sheet Strength Has Always Been a Priority

CPK Capital Structure as of September 30, 2023

($ thousands)

	9/30/2023
Stockholders' equity	$ 866,677
Long-term debt, net of current maturities	643,801
Total permanent capitalization	$ 1,510,478
Current portion of long-term debt	20,000
Short-term debt	118,570
Total Capitalization and short-term financing	$ 1,649,048
Equity to Permanent Capital	57.4%
Equity to Total Capitalization	52.6%

Financing for the FCG Acquisition*

- Financing plan consistent with investment grade ratings profile
- Concurrent with signing of the purchase agreement CPK obtained committed financing from Barclays to the fund the purchase price
- The Bridge facility was syndicated with all invited lenders participating
- On 10/31/2023, CPK priced a $550 million debt private placement with a weighted coupon rate of 6.54%
- In November 2023, completed equity offering, with proceeds, after deducting underwriting discounts and commissions and before estimated offering expenses, of approximately $367.2 million

CPK's Investment Proposition

High-growth energy delivery business focused on regulated utility and pipeline operations in premium jurisdictions

FCG transaction is a strong strategic fit; consistent with CPK's historical M&A approach and demonstrated track record

FCG acquisition more than doubles CPK's operations in Florida, a premier utility jurisdiction; supports and extends CPK's long track record of top quartile EPS and dividend growth

Disciplined capital investment and cost management, with peer-leading Return on Equity

CPK's new 5-year $1.5 billion - $1.8 billion capex investment plan is ~65% larger than the previous 5-year plan

Safe Harbor for Forward-Looking Statements

Safe Harbor Statement

Some of the statements in this presentation are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and other applicable law. Such forward--looking statements may be identified by the use of words, such as “project,” “believe,” “expect,” “anticipate,” “intend,” “plan,” “estimate,” “continue,” “potential,” “forecast” or other similar words, or future or conditional verbs such as “may,” “will,” “should,” “would” or “could.” These statements represent our intentions, plans, expectations, assumptions and beliefs about our future financial performance, business strategy, projected plans and objectives. These statements are subject to many risks and uncertainties and actual results may materially differ from those expressed in these forward-looking statements. Please refer to Chesapeake Utilities Annual Report on Form 10-K for the year ended December 31, 2023 filed with the SEC and other SEC filings concerning factors that could cause those results to be different than contemplated in this presentation.

Non-GAAP Financial Information

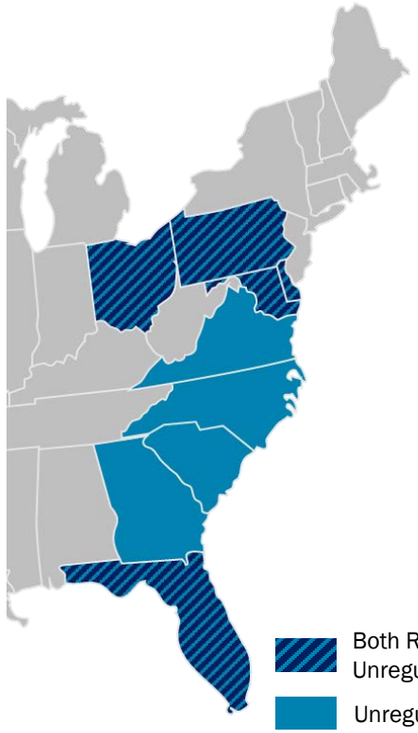
This presentation includes non-GAAP financial measures including Adjusted Gross Margin, Adjusted Net Income and Adjusted Earnings Per Share (“EPS*”). A "non-GAAP financial measure" is generally defined as a numerical measure of a company's historical or future performance that includes or excludes amounts, or that is subject to adjustments, so as to be different from the most directly comparable measure calculated or presented in accordance with GAAP. Our management believes certain non-GAAP financial measures, when considered together with GAAP financial measures, provide information that is useful to investors in understanding period-over-period operating results separate and apart from items that may, or could, have a disproportionately positive or negative impact on results in any particular period.

The Company calculates Adjusted Gross Margin by deducting the purchased cost of natural gas, propane and electricity and the cost of labor spent on direct revenue-producing activities from operating revenues. The costs included in Adjusted Gross Margin exclude depreciation and amortization and certain costs presented in operations and maintenance expenses in accordance with regulatory requirements. The Company calculates Adjusted Net Income and Adjusted EPS by deducting costs and expenses associated with significant acquisitions that may affect the comparison of period-over-period results. These non-GAAP financial measures are not in accordance with, or an alternative to, GAAP and should be considered in addition to, and not as a substitute for, the comparable GAAP measures. The Company believes that these non-GAAP measures are useful and meaningful to investors as a basis for making investment decisions and provide investors with information that demonstrates the profitability achieved by the Company under allowed rates for regulated energy operations and under the Company's competitive pricing structures for unregulated energy operations. The Company's management uses these non-GAAP financial measures in assessing a business unit and Company performance. Other companies may calculate these non-GAAP financial measures in a different manner.

See Appendix for a reconciliation of Gross Margin, Net Income and EPS, all as defined under GAAP, to our non-GAAP measures of Adjusted Gross Margin, Adjusted Net Income, and Adjusted EPS for each of the periods presented.

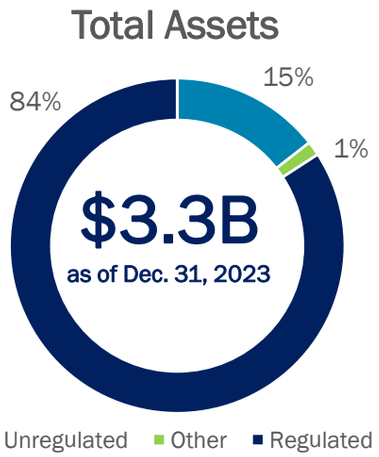
*Unless otherwise noted, EPS and Adjusted EPS information is presented on a diluted basis.

Growing, Diversified Portfolio of Energy Delivery Solutions



Both Regulated and Unregulated

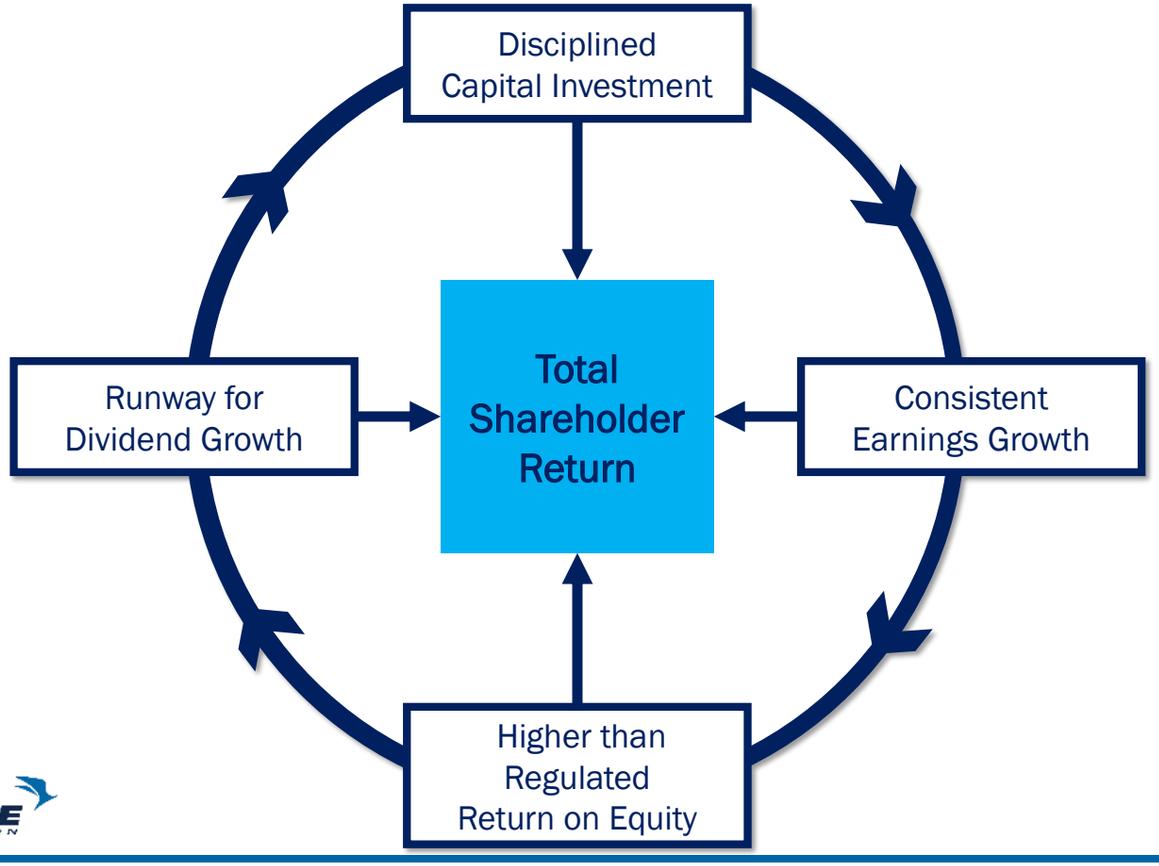
Unregulated



Chesapeake Utilities Corporation Overview
NYSE: CPK
$2.3B Market Cap company
160+ years providing energy
1,281 employees at Dec. 31, 2023
~440,000 distribution customers

Our Business Lines	States We Serve
Regulated Energy Segment	
Natural Gas Transmission	DE, FL, MD, PA, OH
Natural Gas Distribution	DE, MD, FL
Electric Distribution	FL
Unregulated Energy Segment	
Propane Distribution	PA, DE, MD, VA, NC, SC, FL
Natural Gas Pipeline System	OH
CNG Services	Multiple – Including New CNG Fueling Station in GA
CHP Generation	FL
RNG Opportunities	Multiple – Including projects and acquisitions in OH, MD, FL

Chesapeake Utilities' Model for Financial Success



2023 Takeaways and Looking Forward

2023 Key Financial Takeaways

→ 17th – Consecutive year of earnings growth*

→ 5.4% - Growth in Diluted Adjusted EPS* over 2022

→ 7 – Growth in Adjusted Net income* since 2009 (7x) and the period over which we doubled Adjusted Net income* (7 years)

→ 63rd – Consecutive year paying quarterly dividends

→ 20th - Consecutive year increasing annualized dividend per share

*Based upon adjusted earnings, excluding FCG transaction expenses

Year-End 2023 Financial Summary

Solid performance, despite significantly warmer weather and continued inflationary environment

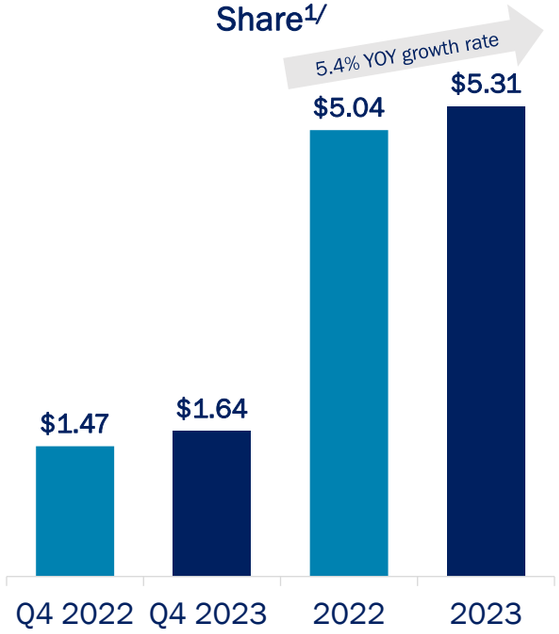
Consolidated *(in thousands except per share data)*	Fiscal Year		Change	
	2023	2022	**$**	**%**
Total Adjusted Gross Margin[1]	**$ 454,123**	$ 420,198	$ 33,925	8.1%
Operating Income	**150,803**	142,933	7,870	5.5%
Other Income (Expense), Net	**1,438**	5,051	(3,613)	-71.5%
Interest Charges	**36,951**	24,356	12,595	51.7%
Pre-tax Income	**115,290**	123,628	(8,338)	-6.7%
Income Taxes	**28,078**	33,832	(5,754)	-17.0%
Net Income	**$ 87,212**	$ 89,796	$ (2,584)	-2.9%
Diluted EPS	**$ 4.73**	$ 5.04	$ (0.31)	-6.2%
Net Income (GAAP)	**$ 87,212**	$ 89,796	$ (2,584)	-2.9%
Transaction-related expenses, net [2]	**10,625**	-	10,625	N/A
Adjusted Net Income (Non-GAAP)[1]	**$ 97,837**	$ 89,796	$ 8,041	9.0%
Adjusted Earnings Per Share - Diluted (Non-GAAP)[1]	**$ 5.31**	$ 5.04	$ 0.27	5.4%

Excluding transaction-related expenses, operating income increased $18.2 million, or 12.8%

[1]See appendix for GAAP to non-GAAP reconciliations.
[2]Transaction-related expenses represent costs incurred attributable to the announced acquisition of FCG including, but not limited to, legal, consulting, audit and financing fees.

2023 Financial Performance driven by Increased Gross Margin

Adjusted Diluted Earnings Per Share[1/]



Key Adjusted Gross Margin Drivers

$15.6M Regulated Infrastructure Programs and Recovery Mechanisms	$11.0M Pipeline Expansions and Natural Gas Organic Growth	$8.8M Higher Propane Margins per Gallon and Fees
$8.7M Contribution from Acquisition of FCG	$1.1M Increased Gathering Fees for Aspire Energy	$1.0M Adjusted Gross Margin from Off-System Natural Gas Capacity Sales

-$13.6M Lower Customer Consumption Related to Warmer Weather

[1/] Diluted Earnings Per Share Growth from Continuing Operations; 2023 excludes transaction-related costs associated with the FCG acquisition

Capital Investment Continues to Drive Our Earnings Growth

Long track record of prudent capital investments and strategic acquisitions

2014 Last 10 Years: **$2.8 Billion** 2023
