Attn: Zachary Bloom, Attorney

Re: Docket 20250038-WS – Petition for an acquisition adjustment for a non-viable utility, by CSWR-Florida Utility Operating Company, LLC.

Dear Mr. Bloom:

CSWR-Florida Utility Operating Company, LLC (“CSWR-Florida”) submits the following response to Staff’s July 13, 2026 Ninth Data Request.

1. Complete the following table with the number of customer complaints received by the Utility from July 2022 through June 2026, by year and category.

	Billing (e.g., high bills, billing accuracy, and payment disputes)	Customer Service (e.g., delayed responses, communication difficulties, and unresolved issues)	Wastewater Odor	Service Interruptions (e.g., outages, low pressure, sewer backups, loss of service)
2022				
2023				
2024				
2025				
2026				

Response: Please see Attachment “DR 1 – North Peninsula Customer Complaints Table” for the completed table. Although the disposition categories utilized by CSWR-Florida do not directly align with the categories presented in this data request, CSWR-Florida consolidated certain disposition categories to provide what it believes is a complete and accurate response. Because CSWR-Florida does not separately track all customer contacts as formal complaints, the attached table includes all customer interactions associated with

the applicable disposition categories, regardless of whether the interaction constituted a formal complaint. As a result, the figures presented likely overstate the number of actual customer complaints.

For example, the “Service Interruption” category includes all customer contacts associated with service interruption-related dispositions, including outage notifications, boil water advisory inquiries, status requests, and other informational contacts that did not necessarily involve a complaint regarding service quality. Similarly, certain billing-related categories include customer inquiries and account discussions that may not have involved a billing dispute or complaint.

In addition, CSWR-Florida tracks sewer quality issues under broader disposition categories rather than by specific attributes such as odor. Therefore, sewer quality-related contacts have been consolidated for purposes of this response.

Thank you for the opportunity to provide additional information in support of the application. Please feel free to contact our office at your convenience with any additional questions or concerns.

Sincerely,

/s/ Thomas A. Crabb
