**Subject:** Docket 20260064-EL — Large-Load Implementation Verification Filing

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Commissioner Ortega —

I am writing only to advise that Persistence Analytics Group LLC intends to submit a public filing through the Commission Clerk in Docket No.

20260064-EL concerning large-load implementation verification, cost causation, and ratepayer protection.

I recognize that this is an active proceeding and do not seek to communicate privately regarding its merits.

The filing will address the evidence needed to distinguish:

- \* requested load from probable operating load;
- \* financial commitments from physical project readiness;
- \* customer-specific facilities from broader system consequences;
- \* initial energization from durable utilization; and
- \* private development risk from costs that could migrate to existing customers.

Given your regulatory experience across electric, water, economics, accounting, and public financial management, I wanted to ensure the filing is visible through the proper public process.

No confidential or proprietary methodology will be included. Please consider this message procedural only; the substantive comments will be filed with the Clerk for inclusion in the official record.

Respectfully,

Founder
