Chairman. Electric bills are going up much ahead of inflation. Smart meters are ripping people off, electric costs are out of control. Stop with the rate increases, make them roll back rates to pricing from 5 years ago. This is a monopoly has been. You need to save the younger and older people. Please do something substantial.

Dear Chairwoman - I am extremely concerned with our electric bill last month. There was no unusual usage and it shot up to over 600 dollars. As a retired person, I cannot afford this. We have increased again the temperature in the house to where it is almost unbearable. We desperately need some relief. Whose grand idea was it to make storm recovery available in the summer so that Teco could maximize their income. It is outrageous.

Sincerely,
Deborah Doyle

Dear Chairwoman Gabriella Passidomo Smith,

I am writing as a TECO customer and a Florida resident to express my concern regarding the significant increase in electric bills that many customers, including myself, are experiencing.

The recent charges appear excessive and are causing financial hardship for many families. I respectfully request that the Florida Public Service Commission investigate TECO's billing practices, rate increases, and meter accuracy to ensure customers are being billed fairly and accurately.

As consumers, we rely on the Commission to provide oversight of regulated utilities and to protect the public from unreasonable charges. I ask that my concerns be documented and that this matter be thoroughly reviewed.

Please let me know if any additional information is needed regarding my account. I appreciate your time and attention to this important issue.

Thank you for your consideration.

Sincerely,

Liomna Romero Merino
Brandon, Florida
