Subject: Our electric bills are too high, and we're watching what you do next

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Chairman Gabriella Passidomo Smith,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,

Bruce Rosenberg

LIVE WEBINAR

How VPPs Can Revolutionize Energy Efficiency

Tuesday, August 11 | 2pm ET

[Register Now](#)

Utilities are proving that scaled VPPs can provide dependable capacity, support the grid during stress, and deliver value for customers. Discover how VPP pioneers are moving from ambition to execution and why customer engagement is key to reliable flexibility in this webinar.

Utility leaders will gain actionable insights on:

- Essential steps for organizing teams and scaling VPPs successfully
- Positioning VPPs as continuously managed grid resources
- Making customer engagement a strategic imperative for reliable flexibility

For these insights and more, **[register now.](#)**

Subject: Our electric bills are too high, and we're watching what you do next

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Chairman Gabriella Passidomo Smith,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,

Mr. Tod Davis

Subject: Florida Med Mal Presuit: Get It Right From the Start [Webinar]

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Gabriella,

Florida's medical malpractice presuit process is one of the most technically demanding in the country — and getting it wrong can derail a case before it ever reaches the courtroom.

Join us for a practical, practitioner-focused CLE webinar that covers the nuts and bolts of Florida med mal presuit — from the initial investigation through notice, discovery, and beyond. Before a Florida medical malpractice case can proceed, counsel must navigate a highly technical presuit process in which problems with expert corroboration, notice, discovery, or timing can jeopardize an otherwise viable claim or defense.

- Distinguishing medical malpractice claims from ordinary negligence — and why it matters
- Navigating the 90-day presuit investigation period: rights, obligations, and strategy
- Expert affidavit requirements: selecting a qualified corroborating expert and preparing a compliant opinion
- Drafting and serving the notice of intent to initiate litigation
- Using informal presuit discovery effectively
- Statutes of limitations during presuit: tolling, relation back, and protecting your client's claim
- Evaluating early resolution options — settlement and statutory arbitration
- Addressing presuit compliance defects after suit is filed
- Applying recent Florida case law to real presuit issues

Designed for both plaintiff and defense counsel, the faculty will also discuss how presuit decisions can affect case value, available defenses, motion practice, and opportunities for early resolution.

Offered at a cost-effective rate, this program is also available as an OnDemand Streaming license, with group rates available for your team.

Florida's Medical Malpractice Presuit: Key Requirements and Strategic Decisions

Thursday, August 20
12:00 p.m. – 1:30 p.m. Eastern Time

[Register, view the agenda, faculty and rates, or pre-order OnDemand Streaming / Download Packages here.](#)

Questions? Contact us at info@pincusproed.com or (877) 858-3848.

I hope you and your colleagues will attend. Feel free to pass this along.

Sincerely,

Renee Alvo
