In re: Storm Protection Plan Cost
Recovery Clause.

DOCKET NO. 20260010-EI

FILED: August 7, 2026

AMENDED PETITION OF TAMPA ELECTRIC COMPANY

Tampa Electric Company (“Tampa Electric” or “company”), hereby petitions the Florida Public Service Commission (“Commission”) for approval of the company’s Storm Protection Plan Cost Recovery Clause (“SPPCRC”) true-up and the cost recovery factors proposed for use during the period January 2027 through December 2027. In support thereof, the company says:

Procedural Background

1. Tampa Electric filed a Petition for approval of the SPPCRC factors for the period January 2027 through December 2027, the Direct Testimony of A. Sloan Lewis and Kevin Palladino, and supporting exhibits on May 1, 2026 in the above-captioned docket. See DN 02538-2026.

2. Tampa Electric’s 2026 load forecast was not available at the time the company prepared the May 1, 2026 filing. The 2026 load forecast and associated billing determinants are now available.

3. Tampa Electric files this Amended Petition pursuant to Rule 25-6.031(2), Florida Administrative Code to supersede the Petition filed May 1, 2026 and incorporate the updated load forecast. This Amended Petition presents the company’s proposed SPPCRC factors for the period January 2027 through December 2027 based on the updated 2027 billing determinants.

4. Tampa Electric also files revised pages 15-16 in the Direct Testimony of A. Sloan Lewis and revised Bates Numbered pages 61 and 62 in Exhibit ASL-2 contemporaneously with this Amended Petition. These revised pages reflect the updated load forecast and billing determinants.

Storm Protection Cost Recovery

5. Tampa Electric incurred actual SPPCRC operation and maintenance (“O&M”) costs of \$36,071,654 and capital costs of \$184,668,860 for the period January through December 2025. The company’s actual SPPCRC jurisdictionally separated revenue requirements incurred during that period were \$35,716,086 for O&M and \$75,789,063 for capital, resulting in a true-up amount of \$9,308,725 over-recovery including interest.

6. The Commission approved SPPCRC factors for the period commencing January 2025 in Order No. PSC-2025-0439-FOF-EI, issued November 24, 2025, in Docket No. 20250010-EI. These factors reflected an actual/estimated true-up over-recovery amount of \$9,355,937, including interest, for the period January 2025 through December 2025. The actual over-recovery, including interest for the period January 2025 through December 2025, is \$9,308,725. The \$9,308,725 actual over-recovery, less the estimated over-recovery of \$9,355,937, results in a net storm protection plan cost recovery true-up under-recovery of \$47,212, including interest. (See Exhibit No. ASL-1; Schedule A-1, page 1 of 1, filed April 1, 2026).

7. Tampa Electric estimates it will incur SPPCRC O&M costs of \$34,417,969 and capital costs of \$159,897,511 during the period January 2026 through December 2026. The company’s estimated SPPCRC jurisdictionally separated revenue requirements for January 2026 through December 2026 are O&M of \$34,077,527 and

capital of \$100,527,090, resulting in a true-up amount of \$4,092,856 over-recovery including interest. (See Exhibit No. ASL-2; Schedule E-1, page 1 of 1).

8. Tampa Electric projects it will incur \$36,263,075 in SPPCRC O&M costs and \$183,994,502 in SPPCRC capital costs in 2027. The company's SPPCRC jurisdictionally separated revenue requirements projected for January 2027 through December 2027 are O&M of \$35,906,015 and capital of \$125,704,465. Tampa Electric's total jurisdictionally separated revenue for the projection period is estimated to be \$157,698,450, after applying the revenue tax factor and including true-up estimates for the 2025 and 2026 cost recovery periods. (See Exhibit No. ASL-2; Schedule P-1, page 1 of 1).

9. Tampa Electric used the appropriate recognition of transmission jurisdictional separation, revenue tax factors and the rate design and cost allocation approved in Docket No. 20240026-EI. (See Exhibit No. ASL-2; Schedule P-5, Page 1 of 1). These factors are set out below:

<u>Rate Schedule</u>	<u>Cost Recovery Factors (cents per kWh)</u>
RS	0.952
GS and CS	0.769
GSD Optional–Secondary	0.605
GSD Optional–Primary	0.599
GSD Optional–Subtransmission	0.593
LS-1, LS-2	0.827

<u>Rate Schedule</u>	<u>Cost Recovery Factors (dollars per kW)</u>
GSD/GSDT/SBD/SBDT – Secondary	2.48
GSD/GSDT/SBD/SBDT – Primary	2.45
GSD/GSDT/SBD/SBDT – Subtransmission	2.43
GSLD/GSLDT/SBLD/SBLDT - Primary	2.10
GSLD/GSLDT/SBLD/SBLDT - Subtransmission	0.16

10. The SPPCRC factors proposed above use the company's 2027 billing determinants, which are based on the 2026 load forecast.

II. Information Required by Rule 28-106.201

11. The Petitioner's name and address are:
