Subject: Our electric bills are too high, and we're watching what you do next

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,

Elizabeth Watts

Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,
Mr Raymond Collins

Subject: Electric bills need to come down

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

I am frustrated that my electric bills keep going up. Especially when we have so much sun an could be using solar panels to generate more power.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike

Subject: Electric bills are too high and production is outdated

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

Like many Floridians, my monthly power bills are high, while cleaner, lower-cost alternatives are sidelined to protect utility profits and political favors.

Clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel and nuclear infrastructure does the opposite, and ratepayers like me are being forced to fund it. While other parts of the US and other countries are moving rapidly to develop the cleaner energy sources our future demands, Florida continues stuck in the past.

I expect you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridians.

Cleaner energy is proven, available, and cheaper; All that is lacking is the political will to prioritize ratepayers over shareholders. Floridians are not willing to keep paying for bad decisions.

Sincerely,
Ms. Cheryl Gross

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,

Mr. Shane O'shea

- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,
Miss Alicia Frecker

Subject: Our electric bills are too high, and we're watching what you do next

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us. Army National Guard Veteran Andrew Nowik, Florida 32164.

Subject: Our electric bills are too high, and we're watching what you do next

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,
Mr. Nelson Towner

Dear Commissioner Mike La Rosa,

Your name is false - you are not the Public Service Commission - you are the Energy Monopolies commission. In the 4+decades that I have followed your decisions I have yet to see one that refuses the monopolies demands. All I have seen is the rubber stamping of all proposals for higher rates even against the recommendations of your own counsel. If that is not bering in the pocket of the monopolioies I don't know what is.

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

Dear Commissioner Mike La Rosa,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,

Mrs. Eliza Perkins

3573 Indigo Pond Dr Palm Harbor, FL 34685-1012 eliperk43@duck.com

Subject: Our electric bills are too high, and we're watching what you do next

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Mike La Rosa,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,
Dr. As Eriers
