Response requested? yes
Comments:

City Gas has recently announced a proposal to increase their rates by 100%. They want to double the monthly service fee from \$10 to \$20. For what? The infrastructure has been installed for 30 years and is only being built out for new development which should not be a burden on existing customers. Personally, I have never seen any infrastructure work in my neighborhood. Also they are proposing doubling their fuel charge, even as natural gas prices are at historic lows. There is no reason to be raising customers' burdens, especially when FPL was granted huge rate increases. I'm just one customer, but I vow to convert the appliances that I have to electric when their service life is over which is coming quickly. As of now, my normal monthly gas bill has gone from an average of \$35 in the summer to \$45. It is time to look out for Florida resident and not lobbyists. Thank you.
