Subject: Our electric bills are too high, and we're watching what you do next

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gary Clark,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,

Angela Banner

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gary Clark,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors. ENOUGH!!

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it. WE ARE ALREADY IN A CLIMATE CRISIS AND FLORIDA IS FRONT LINE FOR IT. ONE WOULD THINK THAT ACTION TO REDUCE HARM WOULD BE FOREFRONT IN ANY ACTIONS UTILITY RELATED. SUPPORT RENEWABLES NOW !!

I am expecting you to:

- 1) REJECT RATE INCREASES that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC ACCOUNTABLE first TO the PUBLIC interest — NOT UTILITIES or DATA CENTERS.
- 3) STOP letting FP&L and Duke Energy RELY so heavily ON GAS PLANTS and hand us the bill when fuel prices spike
- 4) SET aggressive, binding TARGETS for SOLAR and ENERGY EFFICIENCY measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it REQUIRES is LEADERSHIP — and the POLITICAL WILL OVER GREED to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like YOU WORK FOR US...OR ARE SUPPOSED TO!!!

Sincerely,

C. H.

Subject: Electric Bills are Too High !!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Gary Clark,

Like many Floridians, I am outraged by my monthly power bills. Energy bills, that were, already, a burden have become a "crisis". Meanwhile, the clean, low-cost alternatives, that could fix this "mess" are being side-lined to protect insatiable utility profits and political favors.

The facts are simple : clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but rate-payers are being forced to fund it.

I am expecting you to :

- 1) Reject ridiculous rate increases, that prioritize FP&L and Duke Energy profits over Customer reliability and affordability.
- 2) Hold the PSC accountable first to the public interest — not greedy utilities or data centers.
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants, then handing us the bill when fuel prices spike.
- 4) Set proper, binding targets for solar and energy efficiency measures, that lower costs for Floridians.

None of this is experimental ... None of this requires waiting ... What it requires is proper leadership — and the political will to prioritize "everyday" rate-payers over "avaricious" share-holders. Floridians are watching, and we expect you to act properly for us.

Sincerely,
Mr. Leo Souto

Dear Commissioner Gary Clark,

Like many Floridians, I am outraged by my monthly power bills. Energy bills that were already a burden have become a crisis — and the clean, low-cost alternatives that could fix this are being sidelined to protect utility profits and political favors.

The facts are simple: clean energy is now the most affordable and quickest to deploy. Solar, wind, and energy efficiency improvements lower costs, reduce pollution, and make the grid more resilient. Continued investment in fossil fuel infrastructure does the opposite, but ratepayers like me are being forced to fund it.

I am expecting you to:

- 1) Reject rate increases that prioritize FP&L and Duke Energy profits over customer reliability and affordability
- 2) Hold the PSC accountable first to the public interest — not utilities or data centers
- 3) Stop letting FP&L and Duke Energy rely so heavily on gas plants and hand us the bill when fuel prices spike
- 4) Set aggressive, binding targets for solar and energy efficiency measures that lower costs for Floridian families

None of this is experimental. None of this requires waiting. What it requires is leadership — and the political will to prioritize ratepayers over shareholders. Floridians like me are watching, and we expect you to act like you work for us.

Sincerely,
Mrs. kathryn bancroft
